DALLAS, (APRIL 24) PR NEWSWIRE - Kaneb Services Inc. today announced the filing of a preliminary consent statement with the Securities and Exchange Commission relating to a proposed reclassification of Kaneb's outstanding Adjustable Rate Class A Preferred Stock. The reclassification would require the forgiveness of all dividends from September 1986 through June 30, 1990.

The restructured terms would increase the dividend rate, eliminate future non-default redemption requirements and provide for significant default penalties. Furthermore, the holders would be given a special redemption right later in the year on a variable pricing basis depending on the number of holders electing to redeem.

The reclassification is subject to approval of two-thirds of the preferred holders and authorization of certain matters by the Kaneb common holders pursuant to definitive consent or proxy solicitation materials. Kaneb cannot predict whether such approvals will be obtained.

DALLAS, (APRIL 24) PR NEWSWIRE - Diamond Shamrock Offshore Partners (NYSE: DSP), the master limited partnership of Maxus Energy Corp. (NYSE: MXS), reported net income of $6.2 million, or 9 cents per unit, for the first quarter 1990, compared to net income of $9.6 million, or 17 cents per unit, for first quarter 1989.

Sales for the first quarter 1990 were $29.4 million, compared to $33.9 million in the like quarter a year ago. Cash flows from operations before working capital changes totaled $22.6 million, compared to $26.9 million in first quarter 1989.

Commenting on DSP's first quarter results, C.L. Blackburn, chairman of DSP's special general partner, said:

"Production of natural gas during the first quarter 1990 averaged 98.5 million cubic feet per day (mmcfpd), down from 137.8 mmcfpd in first quarter 1989. The decrease in natural gas production reflected normal decline rates and sales of assets. Natural gas prices averaged $2.24 per thousand cubic feet (mcf) in first quarter 1990, an increase from $2.06 per mcf in the same period of 1989.

"Crude oil production in the first quarter 1990 was 5,200 barrels per day (bpd), compared to 5,900 bpd in the first quarter 1989. Oil prices increased to $20.32 per barrel in first quarter 1990, from $15.76 per barrel reported in the same quarter of 1989."

Maxus Energy Corp., the special general partner of DSP, is an independent exploration and production company based in Dallas.

OAK BROOK, IL (APRIL 24) PR NEWSWIRE - Joseph J. Ross, chairman, president and chief executive officer of Federal Signal Corp. (NYSE: FSS), and Marc V. Gross, president of Wormald Americas, Inc., announced today

the signing of a definitive agreement by which Federal Signal will sell its Autocall, Inc. subsidiary to Wormald U.S., Inc. of Dallas. It is anticipated that the transaction will be finalized by April 30, 1990.

Autocall, Inc., located in Shelby, Ohio, manufactures and markets fire alarm and life safety systems primarily to non-residential construction and renovation markets. Wormald U.S., Inc. is a subsidiary of Wormald International Limited, an Australia-based worldwide manufacturer and installer of fire suppression systems, with sales of over $1.0 billion.

Ross stated, 'The Autocall divestiture is consistent with our practice of exiting businesses which no longer fit Federal Signal's long-term strategic objectives. The sale of Autocall is expected to result in an after-tax gain yet to be determined.''

According to Gross, ''Wormald is solely focused on fire protection and Autocall, Inc. is a complementary strategic addition to our existing businesses.''

Federal Signal Corp., listed on the New York Stock Exchange, is a manufacturer and worldwide supplier of public safety, signaling and communications equipment, fire trucks, emergency and street sweeping vehicles, parking control equipment, custom on-premise signage, carbide cutting tools, precision punches and related die components.

CONTRACT: Charles R. Campbell, 708-954-2020, for Federal Signal

IRVINE, CA (APRIL 24) PR NEWSWIRE - Fluor Daniel announced today that it has been awarded a contract by Augusta Newsprint Company in Augusta, Ga. The contract is valued at approximately $23 million.

Fluor Daniel's Industrial Sector is providing procurement and construction services for a 250-ton-per-day paper-recycling plant to be built as an addition to an existing newsprint mill in Augusta.

Work is under way in Greenville with project completion scheduled for September 1990. Fluor Daniel constructed the original newsprint mill in 1965 and has been involved in various other projects at the site since then.

Augusta Newsprint Company, a newsprint manufacturing company, is a joint venture between Toronto-based Abitibi-Price Inc. and Toronto-based Thomson Newspapers Corp.

Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an

international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

#90114p6686 04/24/1990 ~PR Newswire

BOISE, ID (APRIL 24) PR NEWSWIRE - In his comments at today's annual shareholders' meeting, John B. Fery, chairman of the board and chief executive officer of Boise Cascade Corp. (NYSE: BCC) outlined five challenges for the paper and forest products industry and Boise Cascade in the 1990s. "By successfully meeting these challenges, Boise Cascade will improve its performance in the 1990s and therefore continue to increase shareholder value," said Fery.

In the next decade, Fery said, companies must find ways to meet customer needs for ever-increasing improvements in the quality of products and services, deal with environmental issues more effectively, respond to changes in the work force, keep up with the pace of technological change, and satisfy the demands of shareholders for improved financial performance.

Fery described the steps Boise Cascade is taking to prepare for or respond to each of these challenges. Among the specific near-term examples that he cited were the company's implementation of Total Quality processes and continued aggressive capital investment to insure that the company has modern, low-cost facilities producing quality products and services.

Fery commented that the company's earnings will be down in 1990, compared with those of 1989, primarily because of lower prices for certain paper products and comparatively high wood costs in the Pacific Northwest. He concluded his remarks by saying that he is confident in what the company can and will accomplish in the years ahead. "I firmly believe," he said, "that we are becoming better and stronger every year, despite the cycles that are inevitably going to make earnings fluctuate."

Also addressing shareholders at today's meeting was Jon H. Miller, president and chief operating officer, who summarized the company's performance in 1989 and emphasized Boise Cascade's commitment to safety in the workplace.

Boise Cascade Corp. is an integrated forest products company headquartered in Boise, Idaho, with operations located primarily in the United States and Canada. The company manufactures and distributes paper and paper products, office products, and building products and owns and manages timberland to support these operations.

IRVINE, CA (APRIL 24) PR NEWSWIRE - Fluor Daniel Inc. announced today that it has been awarded a contract by Wilmington, N.C.-based Cape Industries. The project value is approximately $24 million.

Fluor Daniel's Process Sector will provide engineering, procurement and construction management services for a dimethyl terephthalate (DMT) and terephthalic acid (PTA) manufacturing facility located in Wilmington, N.C. The scope of work includes plant improvement projects which will reduce operating costs and increase wastewater treatment capability.

Derivatives of DMT are widely used in polyester wire enamels and insulating varnishes, unsaturated polyester resins and hot-melt adhesives. DMT and PTA are raw materials supplying the polyester industry throughout the world.

Engineering is under way in Fluor Daniel's Greenville, S.C., offices with project completion scheduled for mid-1991.

Cape Industries is a joint venture company owned by NCT Corp., a subsidiary of Hoechst Celanese Corp., and American Petrofina Inc.

Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an international engineering, construction and technical services company with more than 50 offices around the world.

NEW YORK (APRIL 24) PR NEWSWIRE - Culbro Corporation (NYSE: CUC) today reported net income for the first quarter ended March 31, 1990, of $907,000, or 21 cents per share on sales of $232,383,000. Net income in the 1989 first quarter was $1,170,000, or 27 cents per share on sales of $230,149,000.

Culbro stated that all of its businesses were profitable during the quarter, with a marked improvement in the CMS Gilbreth Packaging Systems unit which incurred losses in 1989. Profit in the consumer products segment was lower principally due to a reduction, as expected, in suppliers' purchase incentives.

Culbro Corporation is a diversified organization with interests in cigars, wholesale distribution of tobacco and sundry consumer products, industrial products including labeling systems and plastic components, real estate and landscape nursery stock.

MINNEAPOLIS (APRIL 24) PR NEWSWIRE - Jostens Inc. (NYSE: JOS) today reported record sales and earnings for the nine months ended March 31, 1990.

Net sales for the nine months ended March 31 were $491.6 million, a

13-percent increase over last year's volume of $436.5 million.

Net income was $26.2 million, a 13-percent gain over the $23.2 million reported a year ago. Earnings per share rose 12 percent to 66 cents, versus 59 cents per share for the prior year.

H. William Lurton, chairman and chief executive officer, said, "I am pleased with the direction and focus of the newly formed School Products Group, which reflects the combination of the former Scholastic, Printing & Publishing and School Pictures divisions. This new organization will provide a more cost effective and competitive structure for our school products businesses as we enter the 1990s. Recent management and program changes within this organization are designed to improve the performance of our class ring business, which is slowing this year's earnings growth."

He added, "The prospects for our businesses are positive and fiscal 1990 will be another record year for Jostens. I expect our sales increase to approximate 12 to 13 percent and our earnings per share to be in the $1.50 to $1.55 range for the year."

Jostens Inc. is a leading provider of products and services for the youth, education, sports award and recognition markets. The Fortune 500 company is listed on the New York Stock Exchange under the symbol "JOS" and last year reported sales of $696 million.

#90114p6723 04/24/1990 ~PR Newswire

ROCHESTER, NY (APRIL 24) PR NEWSWIRE - Yesterday's newspaper can find new life in tomorrow's Kodak film carton as the result of a wide-ranging packaging program announced today by Eastman Kodak Company (NYSE: EK).

Beginning this year, various film packaging will be manufactured from recycled paperboard which is produced from a mixture of newspapers, corrugated paperboard, carton stock and computer paper. Production of some film cartons from recycled stock is expected to begin this year in both the U.S. and Europe. Packaging conversion for consumer films sold in the U.S. is expected to begin during 1990.

"Our goal is to convert all consumer film packaging to recyled stock as soon as practical. We expect that when this program is fully operational we will conserve many thousands of tons of virgin paperboard used in our U.S. packaging operation each year," said Peter M. Palermo, Kodak vice president and general manager of the Consumer Imaging Division. "Conversion of our worldwide film packaging to recycled paperboard will add dramatically to that total," he noted.

Palermo said that innovations in technology to produce the high quality recycled stock necessary to print Kodak's film packaging has recently opened the way to this major step. Tests conducted by the company confirmed that the recycled paperboard now available from suppliers will accept Kodak's high quality printing graphics.

"The use of recycled paperboard to package our consumer films is another step in a series of environmental measures," Palermo said. "Last fall we announced that we would take the leading role in helping the photographic industry recycle the plastic and metal components used in packaging 35mm, 110 and 126-size photographic films. This spring we began an innovative program to recycle Kodak single use cameras including the Fling 35, Stretch 35 and the Weekend 35."

"Conservation and reuse of resources is a key part of our commitment as a responsible manufacturer. It is the right thing for us to do," Palermo concluded.

#90114p6728 04/24/1990 ~PR Newswire

HOUSTON (APRIL 24) PR NEWSWIRE - Pogo Producing Co. (NYSE: PPP) shareholders were told today that the company's net income for the quarter ending March 31, 1990 is $938,000 or 4 cents per share on revenues of $33,857,000. This compares to a loss of ($568,000) or (2 cents) per share on revenues of $32,868,000 for the first quarter of 1989.

Pogo's interest charges were reduced from the $9,850,000 incurred during the first quarter of 1989 to $8,345,000 for the quarter just ended. Shareholders also were informed that as of today the company's long term debt and production payment obligation have now been reduced to

approximately $299 million, down sizably from the peak of $515 million the company's total debt reached in 1986.

The company reported total liquids production for the first quarter of 1990 was at an average of 6,307 barrels per day. Last year's first quarter average daily liquids production was 7,666 barrels per day. Natural gas production for the company for the quarter just ended averaged 111.9 million cubic feet per day compared to 121.6 million cubic feet per day for the 1989 quarter.

In addition to the successful operations at South Timbalier 198, Pogo shareholders learned that operations in several South Texas and West Texas areas were met with favorable results.

The company and its joint venturers drilled and set casing in two successful step-out wells at the Neff Prospect in Eddy County, N.M. The wells are now being completed after testing at approximately 100 barrels of oil per day each from the Brushy Canyon formation. Pogo has 25 percent to 100 percent working interest in this area and additional drilling is being planned for the company's extensive offsetting acreage.

MILWAUKEE (APRIL 24) PR NEWSWIRE - Harley-Davidson, Inc. (NYSE: HDI) today reported record sales and earnings from continuing operations for its first quarter ended April 1, 1990.

Net sales for the quarter totaled $217.6 million, an increase of $30.0 million, or 16 percent, over the comparable year-ago quarter. Net income and earnings per share totaled $12.1 million and $1.36, respectively, on 8.9 million shares outstanding, compared to $7.2 million and $.84 on 8.6 million shares outstanding in the year-ago quarter. This represents a $4.9 million increase in net income, or 68.1 percent, over the year-ago quarter. In 1989, the company had a loss from discontinued operations of $0.2 million ($.02 per share) and an extraordinary expense of $0.6 million ($.06 per share).

The increase in first-quarter net sales is primarily attributable to a 22.4 percent increase in the company's Motorcycle and Related Products segment. January 1990 market share statistics indicate that Harley-Davidson's retail motorcycle sales account for a commanding 71.1-percent share of the U.S. superheavyweight (850cc+) motorcycle market, an increase of 8.5 points over the comparable year-ago period.

The company's Transportation Vehicles segment (Holiday Rambler

Corporation) reported a net sales increase of $0.2 million over the year-ago quarter. Holiday Rambler sales were stable despite a continuing softness in the recreational vehicle industry as a whole.

Sales in the company's Defense and Other Businesses segment were $6.7 million, compared with $3.1 million in the year-ago quarter, reflecting continued work on $13.9 million of contracts to produce practice metal bomb casings and suspension lugs for the U.S. Department of Defense. These contracts were awarded during the second and third quarters of 1989. In March, the company was awarded an additional $25.5 million contract to manufacture practice metal bomb casings.

Harley-Davidson, Inc., the only American motorcycle manufacturer, produces heavyweight motorcycles and a complete line of motorcycle parts and accessories. Its Holiday Rambler subsidiary is a leading manufacturer of premium recreational vehicles, specialized commercial vehicles and a diverse range of related products. Harley-Davidson, Inc. is also a manufacturing contractor for a variety of industries, including the U.S. Department of Defense.

BRANCHBURG, NJ (APRIL 24) PR NEWSWIRE - Air & Water Technologies Corp. (AMEX: AWT), a leading environmental treatment and services company, announced today that it has filed a Registration Statement covering $150 million Convertible Subordinated Debentures due 2015 and 2,500,000 shares of its Class A Common Stock.

The offerings will be made through a group of underwriters led by Allen & Company Incorporated, Alex. Brown & Sons Incorporated and Kidder, Peabody & Co. Incorporated.

The company intends to use the net proceeds from the sale of the Debentures solely to refund outstanding high-yield acquisition-related debt and the net proceeds from the sale of its common stock for general corporate purposes.

The company provides a comprehensive range of services and technologies directed principally at controlling air pollution, protecting the integrity of our nation's water resources and disposing of or reusing certain waste by-products through development of inert and environmentally sound products.

A registration statement relating to these securities has been filed with the Securities & Exchange Commission but has not yet become effective.

These securities may not be sold nor may offers to buy be accepted prior the the time the registration statement becomes effective. This (communication) shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

MIAMI (APRIL 24) PR NEWSWIRE - The trustee for Eastern Airlines today urged approval of its Latin American route sale as a major step towards successfully reorganizing the company.

Martin R. Shugrue, in a filing with the Department of Transportation, said "If the transaction is approved, Eastern will, in fact, be able to reorganize.

"My immediate review of Eastern's situation establishes beyond any doubt -- any doubt whatever -- that this transaction should be promptly approved " Shugrue said.

He emphasized that his only mission is "to operate Eastern, and to turn this long-suffering company around."

Shugrue said he believes the airline can be revived and regain its competitive place as a major domestic carrier.

"If I did not believe this, I would not have accepted the appointment as trustee. I am not a liquidator," he declared.

Shugrue told DOT that he has commitments from the bankruptcy court and the unsecured creditors committee that the financial resources needed to restore Eastern to viable operations will be made available.

DEERFIELD, IL (APRIL 24) PR NEWSWIRE - Gaylord Container Corporation (AMEX: GCR) reported a net loss of $12.5 million, or $.79 per share, for the second quarter of fiscal 1990 ended March 31, 1990, compared with net income of $6 million, or $.38 per share, for the second quarter of the prior fiscal year.

Net sales for the quarter declined to $162 million from $178 million in the year-ago quarter. Operating earnings dropped to $.6 million from $23.6 million in the prior-year quarter.

For the six months ended March 31, 1990, the company reported a net loss of $10.5 million, or $.66 per share, vs. net income of $18.4 million, or $1.16 per share, for the same period a year ago. Net sales for the first half of fiscal 1990 totaled $345 million, down from $361 million for the first half of the prior fiscal year. Operating earnings declined to $19.9 million from $52.2 million a year ago.

Marvin A. Pomerantz, chairman and chief executive officer, said that the loss for the second quarter and six months was due to multiple factors, some of which were non-recurring in nature.

Major Factors Affecting Second-Quarter Earnings -- California Mill Paper Machine Rebuild -- loss of approximately 50,000 tons of mill production as a result of a five-week shutdown of the mill's largest paper machine and production disruptions in the remainder of the mill caused by the rebuild -- operating earnings impact approximately $13 million.

-- Higher Fiber Costs -- higher market prices for wood chips and lower yields at the California mill; higher chip costs because of extremely wet weather at the Bogalusa, La., mill -- operating earnings impact approximately $5 million.

-- Product Prices - weakening industry prices -- operating earnings impact approximately $3 million.

-- Net Interest Expense -- higher borrowing level partially offset by higher capitalized interest -- pre-tax earnings impact $1.7 million.

-- Plant Consolidation -- provision for costs associated with the consolidation of the Marion and Baltimore, Ohio, converting operations and the disposition of the Houston converting facility -- pre-tax earnings

impact $5 million.

Gaylord Container Corporation is a major national manufacturer and distributor of corrugated containers, containerboard, unbleached kraft paper, multiwall bags and through a joint venture, grocery bags and sacks.

#90114p6746 04/24/1990 ~PR Newswire

CHICAGO (APRIL 24) PR NEWSWIRE - Donald N. Boyce, chairman and president of IDEX Corp. (NYSE: IEX), today told shareholders at the 1989 annual meeting that 1990 is expected to be another record year for IDEX.

"Incoming orders in the first quarter of 1990 were at record levels and improved by about 7 percent over the same period last year. Had it not been for a three-week work stoppage at our Viking Pump unit in February, our performance would have surpassed our earlier expectations and slightly exceeded last year's first quarter. We expect to end 1990 with higher sales and earnings than 1989's record results."

Boyce also told shareholders that the company established new records in sales, operating margins, net income and earnings per share for 1989. Sales totaled $221 million, an increase of 10 percent over 1988, and net income amounted to $18.1 million, a 19 percent increase from the prior year.

Profit before interest and taxes equaled 19.4 percent of sales in 1989 as compared with 18.5 percent in 1988. The company's consistent progress in widening margins stemmed from its leadership positions in niche markets, from productivity improvements; and from maintaining a reputation for providing high quality products.

Also at the meeting, shareholders elected Boyce, Henry R. Kravis, Richard E. Heath and Neil A. Springer as directors.

Boyce, 51, has been chairman of the board, president and chief executive officer of IDEX since the company's acquisition of its principal operating subsidiaries from Houdaille Industries on Jan. 22, 1988. Previously, he served as chairman, president and chief executive officer of Houdaille. Boyce has a total of 20 years' experience with IDEX and Houdaille.

Kravis, 45, has been a director since Jan. 22, 1988, and is currently a general partner of Kohlberg Kravis Roberts & Co. He also serves as director of Owens-Illinois Inc., RJR Nabisco Inc. and Union Texas Petroleum Holdings Inc., among others.

IDEX Corp. is a manufacturer of a wide array of proprietary, highly engineered industrial products, including industrial pumps, stainless steel banding and claming devices, metal fabricating equipment and tooling automatic lubrication systems and vibration control equipment. Its products are sold to a broad range of international markets, including the chemical processing, transportation equipment, food processing, pulp and paper, oil refining and many other industries.

WHITE PLAINS, NY (APRIL 24) PR NEWSWIRE - Texaco Inc. (NYSE: TX) and Chevron Corporation (NYSE: CHV) today announced that their affiliates have entered into a Production Sharing Contract (PSC) with Pertamina, the Indonesian national oil company, to explore for oil and gas onshore and offshore East Nusa Tenggara in the southeastern Indonesian island of Timor.

Amoseas Indonesia Inc. will act as operator in this block for Texaco Exploration Soe Inc., an indirect subsidiary of Texaco Inc., and Chevron International Soe Limited, an indirect subsidiary of Chevron Corporation. Each will have a 50-percent interest in the block, which covers 4,566,778 acres (18,481 square kilometers).

In addition to the Onshore and Offshore East Nusa Tenggara PSC, Texaco and Chevron subsidiaries are also participating in two other frontier blocks in eastern Indonesia: the Manui Block offshore eastern Sulawesi, signed in 1987, and the Misool Block offshore Irian Jaya, which was awarded in 1989. With the signing of this third PSC, Amoseas Indonesia's acreage position in high risk frontier exploration areas now totals 13,363,000 acres (54,083 square kilometers).

This exploration program demonstrates the high regard Amoseas has for the oil potential in eastern Indonesia.

#90114p6752 04/24/1990 ~PR Newswire

WINSTON-SALEM, NC (APRIL 24) PR NEWSWIRE - Health Equity Properties Incorporated (NYSE: EQP) reported that revenues for the first quarter ended March 31, 1990, were $4,467,826 compared to $4,718,187 for the same period of 1989. The change is attributable primarily to the decrease in rental income due to the sale of three properties during 1989.

Net loss for the quarter ended March 31, 1990 was $475,107, compared to a net loss of $492,233 for the quarter ended March 31, 1989. The slight reduction in net loss over 1989 is due mainly to decreased interest expense and depreciation as a result of the sale of the three properties during 1989.

Net cash flow from operations for the first quarter ended March 31, 1990

was $1,409,450 ($0.39 per share), compared to $1,545,286 ($0.43 per share) for the same period of 1989. The change is primarily due to an increase in rents receivable for the first quarter of 1990.

As of March 31, 1990, one lessee was in arrears with respect to the March 1990 rental payments on 5 of the company's 77 facilities. To date, rental payments have been made current on 2 of the 5 facilities, and the lessee is now in arrears with respect to the rental payments on only 3 facilities. Net cash flow from operations also was affected by the four month arrearage in rental payments due beginning December 31, 1989 regarding the company's Colorado facility. The arrearage resulted from a dispute with the lessee regarding the terms of the lessee's option to purchase the facility. Payment was made on a portion of the arrearage on April 6, 1990. Upon payment of the remainder of the arrearage on April 25, 1990, the lessee has been given the right to renegotiate the lease or purchase the facility.

Based in Winston-Salem, NC, Health Equity Properties owns 77 nursing homes in six states with a total of 5,152 beds. The company's advisor is ACREMS, Inc. As a real estate investment trust (REIT), the company is managed to emphasize net cash flow from operations rather than net income. Funds available for dividend payments and portfolio reinvestment are determined by the level of net cash flow from operations.

BELLEVUE, WA (APRIL 24) PR NEWSWIRE - During the coming decade, cellular and paging services will transform the way people communicate throughout the world, shareholders of U S WEST NewVector Group Inc. (NASDAQ: USWNA) were told today at the company's second stockholder annual meeting.

John E. DeFeo, NewVector chairman, said the company stands at the "perimeter of the most important decade in telecommunications" and ready to serve as a global leader through the development and operation of domestic and international cellular systems.

"The network will be a seamless fabric of communication that stretches across the face of the globe," DeFeo said. "It will be the medium by which people-to-people, rather than people-to-place, communication is made a reality." To facilitate the development of global personal communications, U S WEST Inc. (NYSE: USW) recently created U S WEST Radio Spectrum Enterprises. DeFeo serves as president and chief executive officer of the new division which manages NewVector and U S WEST International (Joint Ventures).

Joint Ventures, responsible for the development and operation of international cellular units, is currently building the first Eastern European cellular system in Budapest, Hungary. The entity is also involved in construction of a Personal Communications Network (PCN) in London.

Domestically, NewVector markets service in 28 Metropolitan Statistical Areas (MSA) and two Rural Service Areas (RSA) under the name U S WEST Cellular. MSAs are the top 306 population centers and the first markets developed under Federal Communications Commission (FCC) guidelines. RSAs the remaining areas in the United States, were approved for development this year. Reynie U. Ortiz, NewVector president and responsible for domestic operations, said the company plans to develop strategic RSAs which either expand or connect existing MSAs.

U S WEST NewVector is a majority-owned subsidiary of U S WEST Inc., a diversified corporation headquartered in Englewood, Colo. NewVector, headquartered in Bellevue, has operations in 16 western, midwestern and southwestern states.

#90114p6760 04/24/1990 ~PR Newswire

PITTSBURGH (APRIL 24) PR NEWSWIRE - USX Corporation (NYSE: X) announced net income for the first quarter 1990 of $176 million, or $.66 per common share, on sales of $4.7 billion, compared with net income of $296 million, or $1.09 per common share, on sales of $4.5 billion for the first quarter 1989. The first quarter of 1989 included favorable special items of $179 million in operating income and a $74 million pretax gain from asset disposals.

Operating income for the first quarter 1990 was $354 million, compared with operating income of $514 million in the first quarter 1989. Results in last year's first quarter included a net favorable $119 million for provisions and settlements of lawsuits and a favorable $60 million change in Marathon's inventory market valuation reserve.

Marathon Oil Company reported operating income of $242 million on sales of $3.0 billion in the first quarter 1990 compared with operating income of $241 million on sales of $2.4 billion in the first quarter 1989. Excluding a favorable $60 million inventory valuation reserve adjustment, first quarter 1989 operating income was $181 million.

Marathon's upstream operations (worldwide exploration and production) generated operating income of $152 million for the current quarter, an

increase of $34 million from the first quarter 1989. The increase was primarily due to higher prices for domestic and foreign liquid hydrocarbons partially offset by reduced international tanker liftings and domestic production.

Texas Oil & Gas Corp. reported an operating loss of $5 million on sales of $230 million in the first quarter 1990, compared with operating income of $147 million on sales of $393 million in the first quarter 1989. The first quarter of 1989 included a favorable $144 million from the settlement of lawsuits.

The Steel segment reported operating income of $60 million on sales of $1.3 billion in the first quarter 1990, compared with operating income of $99 million on sales of $1.5 billion in the first quarter of 1989. The declines in operating income and sales were primarily attributable to lower steel prices and the effects of the sale of the Lorain (Ohio) Works to a 50 percent owned joint venture in the second quarter of 1989.

The Diversified Businesses segment reported operating income of $20 million on sales of $187 million in the first quarter 1990 compared with operating income of $30 million on sales of $252 million in the first quarter 1989. The reduced operating income and sales reflect the disposition of several businesses in this segment.

SAN FRANCISCO (APRIL 24) PR NEWSWIRE - The Pacific Stock Exchange (PSE) today announced that Robert G. Kirby, chairman of Capital Guardian Trust Co. in Los Angeles, has been elected to the PSE Board of Governors. Kirby was elected at the scheduled monthly meeting of the board and comes to the PSE as a public governor -- an added board post approved by Exchange members in January 1990.

"Bob Kirby brings expertise to the PSE that covers a broad range of financial markets," said Lee Korins, president and chief executive officer of the PSE. "He is both highly regarded on the West Coast because of his work with Capital Guardian and respected nationally for his thorough knowledge of financial markets, as indicated by his service on The Brady Commission (the Presidential Task Force on Market Mechanisms)," Korins further remarked.

Commenting on his election to the board, Kirby stated, "I look forward to my new association with the PSE. My regional pride and vision of a strong Western presence in global financial markets are an appropriate fit with the Pacific Stock Exchange."

Dr. Maurice Mann, who is leaving the Exchange as chairman in May, commented on the significant role that public governors play at the PSE. "Public governors contribute a depth of expertise and insight brought from their respective industries and disciplines. This benefits the PSE by expanding its awareness of issues and concerns in financial markets and other businesses."

Kirby is a founding officer of Capital Guardian, which provides investment management and fiduciary services to large institutional accounts and is a trustee for, or manages, institutional portfolios with assets totaling more than $20 billion. Kirby has been with the organization since its inception in 1968, serving first as chief investment officer, then as president in July 1972, and finally as chairman in July 1978. He is also a director of The Capital Group Inc., parent of Capital Guardian Trust Co.

A graduate of Stanford University and the Harvard University Graduate School of Business, Kirby also serves on the faculty of the Stanford Graduate School of Business as a lecturer on investment management. He also chairs the advisory board of the Investment Management Program at Stanford Business School.

Kirby is a trustee of the College Retirement Equities Board, and is currently a member of the board of advisors of the Institutional Investor Project at the Columbia Center for Law and Economic Policy.

ROCHESTER, NY (APRIL 24) PR NEWSWIRE - Bausch & Lomb (NYSE: BOL) convened its 1990 annual meeting of shareholders in Rochester today. In a series of presentations by senior management, the company emphasized that it is well-positioned to continue the rapid growth attained during the second half of the 1980s.

Stating that the accomplishments of the past decade have established a foundation for excellent future progress, Daniel E. Gill, chairman and chief executive officer of Bausch & Lomb, highlighted a number of milestones achieved during the past ten years:

-- The company achieved a compound annual growth rate of 14 percent; however, this accelerated 18 percent for the most recent five-year period.

--- Over the past ten years, earnings grew from $56 million to $114 million -- with a compound growth rate of 18 percent for the most recent

five years.

-- The company experienced a four-fold increase in market capitalization; with the creation of $1.5 billion in new shareholder value in the 1980s.

-- Capital spending in the decade of the 80's was more than five times the amount of the preceding ten years.

In addition to the financial and statistical indicators of progress, Gill also discussed important organizational changes which have contributed to Bausch & Lomb's current success and its future potential:

-- The company has achieved a truly global stature allowing it to take advantage of foreign market opportunities. Foreign sales have increased three-fold since 1980, while earnings on those sales are now about eight times greater than foreign operating earnings, in 1980.

-- A conservative, risk-averse corporate culture has been transformed into an entrepreneurial environment.

-- A system of corporate values, introduced during the company's restructuring and now shared by employees at every level, focuses on an unswerving commitment to quality and customer service.

-- Bausch & Lomb has diversified its product portfolio to the point where no single product line accounts for more than about 25 percent of its consolidated operating earnings -- giving the company greater ability to adjust to adverse conditions in any individual market.

Gill discussed the domestic contact lens and pharmaceuticals businesses as areas where opportunities had not yet been optimized, and stated that both represented attractive long-term opportunities for the company.

NEW YORK (APRIL 24) PR NEWSWIRE - The Chariot Group, Inc. (AMEX: CGR) announced first quarter 1990 earnings from continuing operations of $7,000 compared with $521,000 or 21 cents per share in 1989.

1989 first quarter results included a loss from the discontinued operations of Republic Metal Products, Inc. of $127,000 or 5 cents per share. Republic was closed at 1989 year end.

Operating results decreased compared with the prior year period. Selling and administrative expenses for 1989 were reduced by reimbursement of

expenditures relating to certain issues with respect to the 1988 sale of Sandusky Plastics, Inc. In addition, the company provided for reduced level of equity earnings from its 20 percent interest in Synalloy Corporation, following Synalloy's recent press release relating to its current operations.

The company expects to close its previously announced acquisition of a Delaware-based aluminum and vinyl window and door company within the next week.

Chariot is also tendering its investment in Synalloy for proration under Synalloy's offer to acquire an aggregate of 525,000 shares at $9.50 per share from all of its shareholders.

CHICAGO (APRIL 24) PR NEWSWIRE - Today United Airlines is launching United Shuttle service between San Francisco and Los Angeles with Shuttle flights every half hour from 7:00 a.m. to 7:00 p.m. The Shuttle is United's latest step in its ongoing strategy to strengthen United's service in California.

"In addition to introducing the premium-level United Shuttle service which dramatically increased schedule frequency between San Francisco and Los Angeles, United's two major hubs in the California Corridor, we are committed to strengthening United's growth and employment in California," said Stephen M. Wolf, chairman and president.

United's presence is particularly prominent in Los Angeles, San Francisco and Oakland, three cities where United already carries more passengers than any other airline, and where United is a major area employer.

With today's launch, United raises to 27 the number of daily flights in each direction between LAX and SFO, offering service every half-hour

between 7:00 a.m. and 7:00 p.m. every business day. Two additional departures will be added with the June 8 schedule, at 6:30 a.m. and 8:30 p.m., raising the frequency between the two airports to 29 flights from 16.

Outstanding features of the United Shuttle are: -- Convenient, close-in departure gates: In San Francisco, Gates 74, 75, and 75A, in Los Angeles, Gates 70A and 70B are a short walk from curbside, allowing customers to bypass lobby ticket counters.

-- Full-service gaterooms that offer expanded ticket counters and dedicated personnel to provide full service, including ticketing, check-in and baggage check.

-- Mileage Plus members earn Bonus Miles on United and United Express flights between the San Francisco and Oakland and the five L.A. Basin Airports -- LAX, Ontario, Burbank, Orange County and Long Beach. Mileage Plus members earn 1,000 miles for their first paid round trip; bonuses multiply with additional flights. In addition, a Shuttle Bonus Plus promotion will allow Mileage Plus members who travel to destinations outside the California Corridor to double or triple all the Shuttle Bonus Miles earned during 1990.

-- Express Car Rental service with express car rental counter positions at Hertz and Dollar Rent A Car exclusively for United Shuttle passengers and discounted rates and car upgrades for a limited time.

United presently employs approximately 20,000 employees in the Bay Area and nearly 6,000 in the greater Los Angeles area.

#90114p6794 04/24/1990 ~PR Newswire

TROY, MI (APRIL 24) PR NEWSWIRE - Standard Federal Bank (NYSE: SFB) Chairman and President Thomas R. Ricketts today announced the election of Beverly Beltaire, president and CEO of PR Associates, and David P. Williams, president and COO of The Budd Company, to the bank's board of directors at its annual stockholders' meeting. Beltaire and Williams fill the vacancies created by retiring board members Harvey A. Kresge and Robert F. Weber.

"We believe Standard Federal Bank, its shareholders, employees and customers alike, will be extremely well served by the addition of these outstanding business leaders to our board," said Ricketts. "Beverly Beltaire and David Williams bring with them extraordinary backgrounds and talents in the combined areas of management, marketing, operations, public

relations and sales, thereby significantly enhancing our ability to meet the many challenges facing us," he added.

As one of Detroit's best known and most respected communications counselors, Beltaire has earned numerous distinctions over a long and distinguished career. Beginning as a newspaper writer, Beltaire was a broadcast journalist and magazine publisher before founding PR Associates in 1963. Among her many activities, Beltaire has served on the Detroit board of directors of the Federal Reserve Bank of Chicago and on the executive board of directors of the Economic Club of Detroit. She has served as chairman of the Greater Detroit Chamber of Commerce.

"I am honored to serve in my new capacity on the board of this outstanding financial institution, which has done so much for so long to serve the home-lending needs of its customers," said Beltaire.

David Perry Williams was elected president and chief operating officer of The Budd Company in July 1986, after serving as senior vice president and chief operating officer since 1981.

Prior to Budd, he spent 13 years with Kelsey-Hayes Company, his last position being vice president of sales and marketing. He then served at International Telephone & Telegraph in New York as corporate vice president and worldwide automotive product line manager.

"I am pleased to accept my new position as a Standard Federal Bank director and look forward to serving this fine and well-managed institution," said Williams.

Williams is also a member of the board of directors of The Budd Company, Budd Canada Inc., Greening Donald Co. Ltd., and is a chairman of the Board of the Consortium for Human Development, a non-profit corporation for the treatment of drug and alcohol-related problems, with emphasis on adolescents.

Ricketts said of outgoing directors Kresge and Weber: "We are grateful for the outstanding contributions and long, tireless service made by Mr. Kresge and Mr. Weber and wish them well as they retire from our board."

Headquartered in Troy, Standard Federal Bank reported assets of $9.7 billion for the end of its first quarter 1990, and operates 113 branch offices in Michigan and Indiana.

EAST HARTFORD, CT (APRIL 24) PR NEWSWIRE - United Technologies Research Center (UTRC) today announced the formation of a new venture unit, United Technologies Photonics, to design, build and sell a variety of fiber and integrated optic components, modules and subsystems.

The unit is comprised of personnel, technology and assets from the Electronics and Photonics Department of UTRC. It will continue to be based at the Research Center's facility in East Hartford.

"United Technologies Photonics is rich in technology and deep in talent and leadership," said Wayne G. Burwell, director of research. "This group has earned a highly respected reputation over the past ten years for its advancement of photonics. The group has brought this technology of manipulating and transforming signals and data with light, rather than conventional electronics, to a point where it now provides the corporation with substantial new business potential," Burwell added.

Sales prospects for the new venture include both aerospace and commercial customers. United Technologies Photonics also will provide custom and standard components for UTC's fly-by-light and fiber-based communication systems, radio frequency and microwave fiber-optic systems, and optical navigation systems.

Burwell explained that United Technologies Photonics will continue to look to the Research Center for technical support.

The new unit will be headed by Fred Leonberger, who will report directly to Burwell. "Our outlook is bright," said Leonberger. "We're excited to bring to the marketplace a variety of products based on our leadership position in integrated optic chips and embedded fiber gratings."

Leonberger, known internationally for his work with integrated wave- guide optics, joined UTRC in 1984 and most recently served as manager of photonics and applied physics. For his many contributions, he was named a Fellow of The Institute of Electrical and Electronics Engineers and the Optical Society of America.

The Research Center, headquartered in East Hartford, Conn., is the central research organization of United Technologies Corporation (NYSE: UTX). Employing close to 1,100 scientists, engineers, technicians and support staff, the Research Center carries out basic and applied research across a broad span of scientific disciplines.

EDMONTON, ALBERTA (APRIL 24) PR NEWSWIRE - Numac Oil & Gas Ltd. (Toronto: NMC), Gascan Resources Ltd. and Suncor Inc., announce the results of a Granite Wash oil discovery in the Otter area of the Peace River Arch, 220 miles northwest of Edmonton, Alberta.

The well drillstream tested light gravity oil to surface in 15 minutes and produced an average of 175 barrels of oil per day for five days prior to being shut-in over spring breakup. The allowable is expected to be 126 barrels of oil per day.

By drilling this well on a farmout from Suncor, Numac, as operator, and Gascan each earned a 50 percent interest until payout.

Numac and its partners subsequently purchased 2,400 acres of offsetting Crown land in which Numac has an average interest of 35.6 percent. Several drilling prospects have been identified on these lands. Numac now has an average working interest of 31.2 percent in 6,880 acres adjacent to this well and in eight oil wells in the general area which are currently producing 660 barrels a day.

In addition, early in 1989 Numac participated as to a 50 percent interest in a Granite Wash oil discovery at Kitty, approximately 10 miles south of Otter. Three wells have been drilled at Kitty and production is expected to average 460 barrels per day. Numac and its 70 percent subsidiary, Giant Reef Petroleums Limited, jointly hold a 50 percent working interest in 9,440 acres at Kitty.

Further drilling is planned in both of these new fields in 1990.

NEW YORK (APRIL 24) PR NEWSWIRE - Amtorg Trading Corporation, in conjunction with International Delaware Corp., has announced publication, scheduled for this November, of an American Business Directory for the U.S.S.R.

It will be the only comprehensive directory of American companies available to Soviet business and industry, though similar directories of European and Asian companies have already been widely distributed.

An initial press run of 200,000 copies is planned; yet, interest in the directory is so great, Amtorg reports, that the directory has been greatly oversubscribed, with 380,000 pre-paid subscriptions received as of mid-April.

Amtorg, a U.S. corporation owned by various Soviet enterprises, has represented Soviet trade interest in the United States since 1924. International Delaware, headquartered in New York, assists U.S. companies in doing business in the U.S.S.R.

"Soviet managers are eager to develop relationships with American companies," said Basil Pegushin, managing director at Amtorg of the American Business Directory for the U.S.S.R. "They have high regard for American quality, technology and productivity. For years such managers have been cut off from detailed information about American companies, products and services. This directory will provide the information they have been missing. We anticipate that most Soviet business leaders will study the directory from cover to cover. Even with the economic reforms now sweeping the Soviet Union, these 380,000 managers will continue to play a key part in the future of the Soviet economy."

For U.S. companies, the directory represents an opportunity to take advantage of perestroika, the Soviet Union's movement to decentralize decision-making authority and let the people who produce products and services make the buying and selling decisions in foreign markets. For U.S. companies, these managers represent access to the world's largest untapped market -- a market of 300 million consumers.

Planned as the first in an ongoing annual series, the directory will include hundreds of pages of advertisements from U.S. companies, arranged into numbered sections by industrial category, with pages of punch-out reply cards and an index listing U.S. company contacts.

Copy can be in Russian or English or bilingual, with the Russian copy

written by expert translators provided by the publisher.

A media kit called "Doing Business in the Soviet Union" is available. Contact Basil Pegushin, Amtorg Trading Corp., 1655 Broadway, New York, N.Y. 10019, 212-956-3010, ext. 221.

DALLAS, (APRIL 24) PR NEWSWIRE - Centex Corp. (NYSE: CTX) today announced record earnings and earnings per share from operations and all-time high revenues for the company's 1990 fiscal year ended March 31, 1990.

For the year, corporate net earnings from operations reached $62,003,000, a 55 percent increase over $40,020,000 for fiscal 1989. Earnings per share from operations totaled $4.02 for 1990, 52 percent higher than $2.64 in 1989. Corporate revenues surpassed the $2 billion mark for the first time in company history, reaching $2,072,644,000 in 1990, a 12 percent increase over $1,845,484,000 reported last year.

Centex is a Dallas-based company with operations in home building and mortgage banking, general construction, construction products and savings and loan.

For the quarter, corporate revenues were $556,690,000, a record level for any quarter and a 14 percent increase over $486,998,000 for the like quarter in fiscal 1989. Net earnings for the quarter were $15,627,000, a 19 percent improvement over $13,147,000 for the like quarter last year. Earnings per share for the quarter were $1.01, 16 percent higher than 87 cents for the like quarter a year ago.

Revenues from home building and mortgage banking were $281.8 million for the current quarter, a 27 percent increase over $222.0 million for the like quarter a year ago. Operating earnings from home building and mortgage banking rose 30 percent to $27.9 million for the current quarter from $21.5 million for the like quarter last year. Home closings for the quarter were 2,064 units, a 20 percent increase over 1,727 units for the like quarter a year ago.

For fiscal 1990, home building and mortgage banking revenues reached a record of slightly more than $1 billion, a 30 percent increase over $769.4 million for fiscal 1989. Operating earnings from home building and mortgage banking were $96 million for the year, a 49 percent improvement over $64.3 million last year.

Home closings for the year totaled 7,709 units, an 18 percent increase over 6,539 units for 1989. The backlog of homes sold but not closed at March 31, 1990, was 3,114 units, 22 percent higher than the backlog of 2,559 units reported at March 31, 1989.

General construction revenues for the current quarter were $233.8 million, 4 percent above $224.3 million for the like quarter last year. Operating earnings from general construction were $3.0 million for the quarter, 14 percent lower than $3.5 million for the like quarter last year.

For the year, general construction revenues were $869.1 million, 6 percent less than $924.8 million in 1989. Operating earnings from general construction were $13.0 million for the year, 8 percent higher than $12.1 million last year. The backlog of uncompleted construction contracts at March 31, 1990, was $915 million, 14 percent less than $1.07 billion reported at March 31, 1989 and 4 percent below the $951 million backlog reported at Dec. 31, 1989.

For the quarter, construction products revenues were $27.5 million, up 11 percent from $24.7 million last year. Construction products reported a loss of $2.5 million for the quarter versus a gain of $355,000 for the like quarter a year ago. The loss was due primarily to inventory and other adjustments at Texas readymix operations.

For the year, revenues from construction products were $137.5 million, 2 percent higher than $135.4 million last year. Operating earnings from construction products were $7.1 million in 1990, a 34 percent decline from $10.7 million last year.

For the quarter, revenues from the savings and loan established in late December 1988 were $13.6 million versus $15.9 million for the like quarter last year. Operating earnings for the quarter were $356,000 compared to $145,000 for the like quarter last year.

Revenues from the savings and loan were $62 million for fiscal 1990, compared to $15.9 million in 1989 when the operation was owned for only one quarter. Net earnings from the savings and loan were $744,000 this year versus $145,000 last year.

DALLAS (APRIL 24) PR NEWSWIRE - Kaneb Services Inc. today announced the filing of a preliminary consent statement with the Securities and Exchange Commission relating to a proposed reclassification of Kaneb's outstanding Adjustable Rate Class A Preferred Stock. The reclassification would require the forgiveness of all dividends from September 1986 through June 30, 1990.

The restructured terms would increase the dividend rate, eliminate future non-default redemption requirements and provide for significant default penalties. Furthermore, the holders would be given a special redemption right later in the year on a variable pricing basis depending on the number of holders electing to redeem.

The reclassification is subject to approval of two-thirds of the preferred holders and authorization of certain matters by the Kaneb common holders pursuant to definitive consent or proxy solicitation materials. Kaneb cannot predict whether such approvals will be obtained.

LEXINGTON, KY (APRIL 24) PR NEWSWIRE - At the Annual Meeting of Shareholders of Kentucky Utilities Company (NYSE: KU) held on April 24, 1990, the following were elected as Directors of the Company:

Elected for a one-year term expiring at the 1991 Annual Meeting of Shareholders:

Milton W. Hudson, New York, New York, Managing Director and Senior Economic Advisor of Morgan Guaranty Trust Company of New York, New York.

John T. Newton, Lexington, Chairman of the Board and President of the Company.

W. L. Rouse, Jr., Lexington, Chairman, President and Chief Executive Officer of First Security Corporation of Kentucky.

Elected for a two year term expiring at the 1992 Annual Meeting of shareholders:

W. B. Bechanan, Lexington, Retired, formerly Chairman of the Board of the Company.

James C. Codell, Jr., Winchester, Kentucky, President of Codell Construction Company.

Harry M. Hoe, Middlesboro, Kentucky, President of J.R. Hoe & Sons. Elected for a three year term expiring at the 1993 Annual Meeting of Shareholders:

Frank V. Ramsey, Jr., Madisonville, Kentucky, President of Dixon Bank. Warren W. Rosenthal, Lexington, Investments and the owner of Patchen Wilkes Farm.

Charles L. Shearer, Lexington, President of Transylvania University. Mr. Hudson replaced Mr. Andrew C. Duke, who retired from the Board this year in accordance with Board retirement policy.

At the meeting, the shareholders approved the Performance Share Plan proposal and all of the proposed Amendments to the Articles of Incorporation, including the proposal to classify the Board of Directors into three groups and provide for the election of directors for three-year terms of office.

In his message to shareholders, John T. Newton, Chairman and President, discussed the many changes taking place in the industry, including increased competition, deregulation, and the introduction of new

technologies. "Perhaps our greatest challenge for the decade ahead is to maintain our position as a low-cost producer while continuing to meet the growing needs of our customers," he said. Mr. Newton stated that the Company's focus in the coming years would be to continue operating efficiently, controlling costs, and enhancing customer responsiveness. Special attention will also be given to ongoing efforts to gain market share and to promote economic growth in the Company's service area.

According to Mr. Newton, the acid rain issue is of major concern to the entire electric utility industry. Newton said, "Compliance with proposed legislation would result in substantial increases in electricity cost for our customers as well as those of other utilities." He cited switching to lower sulfur coal and installation of flue gas desulfurization equipment as the main measures the Company would implement if proposed acid rain legislation is enacted.

Mr. Newton expressed disappointment with the delay in the Company's proposed reorganization of the Company into a holding company structure. However, he stated, " ... we continue to believe that it is the best means of positioning the Company for the challenges and opportunities of a changing marketplace."

In closing, Mr. Newton expressed confidence in the strength of the Company. "As we move into a new decade, we believe that the Company is well-positioned for the challenges and opportunities ahead. Our strong financial base and the commitment of our employees to service and efficiency will give us the edge in continuing to build on our tradition of success in the 90's," he said.

BRIDGEPORT, CT (APRIL 24) PR NEWSWIRE - Bridgeport Hydraulic Company (BHC) has signed a letter of intent specifying the terms for its acquisition of the New Canaan and Ridgefield water supply companies, it was announced today at the annual meeting of BHC's parent, The Hydraulic Company (NYSE: THC), by Jack E. McGregor, president and chief executive officer of BHC and THC.

McGregor said BHC would acquire all of the outstanding shares of common stock of New Canaan Water Company (NCWC) and Ridgefield Water Supply Company (RWSC) in exchange for THC common stock having an aggregate value of $3,250,000. The City of Norwalk's Second Taxing District Water Department is expected to provide up to $2 million of the purchase price in return for rights to NCWC's supplies, he noted.

"The proposed combination of BHC and its Stamford Water Company subsidiary with RWSC and NCWC is in the best interests of these companies' water consumers and stockholders," he said, "in that it provides the framework for economies of scale and efficient integration of management resources."

McGregor further stated that he is "looking forward to working with the New Canaan and Ridgefield organizations and their people."

THC, a Delaware holding company, is a diversified water management services corporation. BHC, its largest subsidiary and one of the 10 largest investor-owned water companies in the United States, serves a total population of approximately 460,000 in an 18-community franchise area of Fairfield, Litchfiled and New Haven counties.

Through its Southwest Regional Pipeline, BHC wholesales most of the water currently used by customers of NCWC, which serves a total population of approximately 10,000 in New Canaan. RWSC serves a population of some 7,000 in Ridgefield.

McGregor said the intended acquisition is subject to a number of complex conditions, involving approvals from, among others, the State Departments of Public Utility Control, of Health Services, and of Environmental Protection, as well as the BHC and THC boards of directors.

He added that, "BHC looks forward to working with the Town of New Canaan in this endeavor."

CONTACT: James S. McInerney Jr., BHC executive vice president and chief operating officer, 203-337-5971, or Anthony M. Macleod, BHC and THC senior vice president-law and administration, 203-336-7639.

SAN JOSE, CA (APRIL 24) PR NEWSWIRE - Chips and Technologies Inc. ("Chips") (NASDAQ: CHPS) today reported net sales of $66.4 million and net income of $5.0 million, or 32 cents per share, for the fiscal third quarter ended March 31, 1990 (Third Quarter 1990). This compares to net sales of $57.4 million and net income of $9.4 million, or 63 cents per share, for the fiscal third quarter ended March 31, 1989 (Third Quarter 1989).

For the nine months ended March 31, 1990, Chips reported net sales of $211.7 million and net income of $23.0 million, or $1.47 per share. This compares to net sales of $155.8 million and net income of $23.0 million, or $1.58 per share, for the nine months ended March 31, 1989.

Chips had announced several weeks ago that the company expected revenue and earnings for Third Quarter 1990 to be significantly below operating results for the fiscal second quarter ended Dec. 31, 1989, when the company reported revenue of $74.4 million and net income of $8.9 million or 57 cents per share.

Gordon Campbell, president and CEO of Chips attributed the lower revenue and earnings to several factors. "During Third Quarter 1990 we saw continued pricing pressure on some of our more mature products. Price declines more than offset an increase in unit shipments. This situation was compounded by a delay in the introduction of several new generation products."

Campbell continued, "Lower prices contributed to a decline in gross margin to 44 percent of net revenue for Third Quarter 1990, well below both our long-term goal of 50 percent and the 53 percent rate reported for Third Quarter 1989. We expect some of this pressure to abate, as we anticipate that shipments on new products will commence during the fiscal fourth quarter of 1990.

"Another significant factor was the recent worldwide shortage of 32-bit microprocessor products. Chips has been a leader in supplying hardware and software solutions for high-performance computers based on 32-bit architectures. During Third Quarter 1990, our shipments of high- end CHIPSets to Asia for 32-bit machines were adversely impacted by a shortage of 386DX and 386SX microprocessors in Taiwan. In addition, we were unable to respond to some unanticipated customer demand late in the quarter.

"While it is difficult to predict when 32-bit microprocessor shortages will end, we are encouraged by an increase in customer demand over the past four weeks. Further, customer lead-times are lengthening, which improves our ability to meet demand. We continue to generate cash from operations, and ended Third Quarter 1990 with cash and cash equivalents of $71.0 million. Our inventory balance is at a 12-month low of $19.1 million, reflecting an active program of inventory management.

Stockholders' equity has grown to $130.7 million, with retained earnings representing more than two-thirds of this amount," said Campbell.

Chips and Technologies Inc. is the world's leading supplier of VLSI proprietary CHISPets and software solutions for high performance microcomputer systems based on evolving industry standards. The company's common stock is traded over the counter under the symbol "CHPS" and is listed on the NASDAQ National Market System.

SAN DIEGO (APRIL 24) PR NEWSWIRE - BSD Bancorp Inc. (AMEX: BSD) today announced that its board of directors, at a regularly scheduled meeting, declared an $.08 cash dividend payable May 18, 1990, to holders of record as of May 4, 1990. The dividend represents an increase of 60 percent over the most recent dividend of $.05 per share paid in November 1989.

Commenting on the announcement, Chairman James S. Brown said, "This action is a clear indication of the Board's confidence in the future of BSD Bancorp as the Company reports its seventh consecutive comparative record quarter earnings."

BSD Bancorp announced April 11 that its first quarter earnings were $1,006,000 or $.27 per share, up 34 percent from 1989 first quarter earnings of $750,000 or $.21 per share. Both 1989 and 1988 were record years for BSD Bancorp, and the first quarter results point to another strong year in 1990.

BSD Bancorp Inc. is a diversified holding company serving banking and trust markets predominately in Southern California.

DALLAS (APRIL 24) PR NEWSWIRE - William E. (Bill) Buckley, chairman and chief executive officer of Royal Insurance in Charlotte, has joined NCNB National Bank's North Carolina board.

Hugh McColl announced Buckley's election following a Tuesday meeting of the North Carolina bank's board. McColl is chairman of the board and chief executive officer of NCNB Corporation (NYSE: NCB) and is chairman of NCNB National Bank of North Carolina.

"We are fortunate to have such a strong business leader join our North Carolina board," McColl said. "Bill Buckley brings a wealth of experience and understanding to share with us."

Buckley was named to his current position at Royal Insurance in January 1989. He joined Royal in October 1987 as president and chief operating officer.

Previously, he was chairman and chief executive officer of Crum & Forster Commercial Insurance. Prior to that, he spent 23 years with Aetna Life & Casualty, holding various underwriting, marketing and general management positions.

A 1961 cum laude graduate of Stonehill College, Buckley completed the executive program at Dartmouth College's Amos Tuck School of Business Administration.

He has served as a director of the Insurance Service Office, the American Insurance Association and the American Institute for Property & Liability Underwriters/Insurance Institute of America.

At the community level, he is a director of the Presbyterian Hospital Foundation in Charlotte, the Young Men's Christian Association of Greater Charlotte, the Foundation for the Carolinas and the Capital Funds Board. In addition, he serves on the Cities in Schools Advisory Council, Safe Drive, the Governor's Business Council on the Arts and Humanities and the University of North Carolina at Charlotte Foundation.

NCNB National Bank is a subsidiary of NCNB Corporation, a Charlotte-based holding company with more than $63 billion in assets and full-service banks in seven states.

NEW YORK (APRIL 24) PR NEWSWIRE - Willow Peripherals of Bronx, N.Y., filed suit in Federal District Court in the Southern District of New York against U.S. Video. Willow's suit, called a Declaratory Judgement, requires the court to make a determination that Willow's new product, VGA-TV GE/O(TM), is not infringing U.S. Video's patent on genlocking.

Willow takes this action after enduring what principals of the company consider far-ranging accusations made by William Erdman of U.S. Video concerning the new Willow VGA-TV GE/O product. VGA-TV GE/O is the newest product in a line of SuperVGA cards made by Willow which enable a user to output directly from a PC to a television or VCR. VGA-TV GE/O (GE/O, pronounced "Gee-Oh"), adds the ability to genlock and overlay graphic images created on the PC with live video images on the television.

"Every day we have heard new instances of accusations of patent infringement from U.S. Video," says Willow President Jonathon Vall. "It's gotten to the point where, to defend our product, we need to clear the air of this issue."

Willow considers its VGA-TV GE/O board to be a tremendous boon to the PC market. It gives users high-end VGA graphics video overlay capability for the low price of $895 (US MSRP), while providing a SuperVGA card and NTSC output as well.

"U.S. Video thinks they have the patent on genlock," says Willow VP Finance and General Counsel Valerie Gardner. "In reality, they have a patent in a very narrow area of signal synchronization, and we are definitely not using their technique. All we hope to do with this lawsuit is to get a court declaration that we are not infringing their patent so they cannot scare our customers by claiming that they are suing us for patent infringement. Now that we are shipping GE/O, we need to remove this uncertainty from the marketplace."

Genlocking is a technique that allows the synchronization of computer video output signals with those of an NTSC video source (namely a television, VCR tape player or video camera), thereby permitting the simultaneous viewing of images of both signals on the monitor. Familiar uses of genlocking technique on television include the showing of graphic scoreboards over sports action or scrolling credits at the beginning and ends of programs.

Willow Peripherals, located in the Bronx, is one of the few high technology computer hardware manufacturers operating within New York City limits. Willow also offers Publishers' VGA(TM) (VGA card with gray-scale video frame grabber), Publishers' GS(TM) and Publishers' Color(TM) (stand-alone high-resolution frame grabbers for black & white or color video image capture, respectively).

HARRISBURG, PA (APRIL 24) PR NEWSWIRE - Harsco Corp. (NYSE: HSC) today released the text of a letter which it has sent to Frank Carlucci of The Carlyle Group in response to his letter of April 11, 1990.

The text of the letter is as follows:

Dear Mr. Carlucci:

The Board of Directors, with the assistance of its advisors, has carefully considered your proposal of April 11, 1990, as it understands it. On the basis of this analysis, it has concluded that the proposal does not contain any strategies or programs that have not been considered by the Board from time to time and rejected as not in the best interest of

the Company and its shareholders.

If there are matters not included in your letter which are relevant to your proposal, please contact me and we will arrange an opportunity for you to meet with representatives of the Company to elaborate on your proposal.

For the Board of Directors
Very truly yours,
/s/
M. W. Gambill
President and Chief Executive Officer

Harsco Corp., a diversified industrial company, conducts its business through 12 divisions and has 20 varied classes of products and services, principally for defense, industrial, commercial and construction applications.

#90114p6872 04/24/1990 ~PR Newswire
DEARBORN, MI (APRIL 24) PR NEWSWIRE - CMS Energy Corporation (NYSE: CMS) and Oxford Energy Company (AMEX: OEN) announced today the formation of a new partnership designed to accelerate the development of Oxford Energy's scrap tire-to-energy power projects currently in various development stages.

Through the newly formed partnership, CMS Energy has agreed to contribute major funding and other support for Oxford's power projects, while Oxford has transferred and contributed interests in four tire-to-energy projects to the partnership, including its 30 megawatt Exeter Energy Project currently under construction in eastern Connecticut and three other projects now in development.

Under the terms of the agreement, Oxford Energy affiliates transferred approximately 40 percent of their interests in four power projects in return for cash payments from the partnership totaling around $11 million over approximately 20 months and also contributed approximately 59 percent of their remaining project interests as a capital contribution to the partnership.

CMS Energy affiliates, in return for their partnership interests, are contributing $11 million in cash, which the partnership will use to purchase Oxford's 40 percent project interests, and in addition will contribute $6 million over the same 20-month period to cover the development costs of the three new tire-to-energy projects. CMS Energy

will also provide up to $7.5 million as an equity contribution to the Exeter Energy Project when that project is completed, expected in 1991. The three projects in development are in New York, Nevada and in the Midwest.

Oxford will be the general partner of the limited partnerships established to manage the development of the individual power projects, while CMS Energy will serve as the principal general partner of the development partnership.

Robert D. Colman, Oxford's president and chief executive officer, said, "This is a tremendous stimulus for us. This new cooperative arrangement will enable us to draw upon substantial resources to move these projects forward more rapidly. Over the next few years, our company expects to make a significant impact on our nation's scrap tire problem. The development of our large-scale tire resource recovery projects involves complex technology and logistics. We look forward to drawing on the many capabilities of CMS as we focus on their rapid completion."

Eric O. Fornell, president and chief operating officer of CMS Enterprises Company, said, "The power projects we are developing with Oxford Energy address one of the most troublesome and underutilized portions of our nation's waste stream -- scrap tires -- which currently affect communities across the nation in quantities that stagger the imagination. We believe converting scrap tires is an excellent way to meet our continuing demand for electricity and to make an important environmental contribution, removing this blight from the nation's landscape."

The Oxford Energy Company is a developer, owner and operator of recycling, resource recovery and alternative energy facilities, with projects in operation or development throughout the United States.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth- largest combination utility. CMS Enterprises Company is also a subsidiary of CMS Energy.

MIAMI, (APRIL 24) PR NEWSWIRE - Florida Power & Light Company this week received Public Service Commission approval to build 1,342 megawatts of generating capability at the Lauderdale plant in Broward County and Martin plant in Martin County.

Lauderdale units 4 and 5, fueled by natural gas and oil, will undergo a process known as repowering to add 572 megawatts of capability by late 1992. Construction of two 385-megawatt units at the Martin plant will add 770 megawatts to a site already producing 1,566 megawatts. Unit 3 should be in service by December 1993, with unit 4 following a year later. The Martin units initially will be fueled by natural gas but may be converted to gasified coal in the future.

"Construction of these units is critical to meeting demand for electricity in one of the nation's fastest-growing states," FPL Senior Vice President Joe Williams said. "The units are an important part of our overall program that includes efforts to encourage energy conservation, promote production of electricity from non-utility sources and purchase power from reliable sources at prices that benefit FPL's customers."

The PSC's certification of need for the units completes a major step in a review process that includes various local, state and federal agencies.

FPL is one of the nation's largest investor-owned utilities and is the principal subsidiary of FPL Group, Inc. (NYSE: FPL).

DALLAS (APRIL 24) PR NEWSWIRE - The Board of Directors of the managing general partner of Diamond Shamrock Offshore Partners (NYSE: DSP) declared a quarterly distribution by DSP of 10 cents per unit. This cash distribution is payable June 7, 1990, to unitholders of record on May 15,

1990.

Consistent with the previously announced policy, the partnership will distribute on a quarterly basis substantially all distributable cash. For this purpose, distributable cash means net cash provided by operating activities and proceeds from the sale of assets, less expenditures for oil and gas properties and equipment, including dry hole costs, reserves for future operating and capital requirements and contingencies, and other partnership obligations.

SAN DIEGO (APRIL 24) PR NEWSWIRE - Unaudited earnings per common share for the first quarter ending March 31, 1990, were 95 cents compared to 59 cents for the same period last year, Thomas A. Page, San Diego Gas & Electric (NYSE: SDO) chairman of the board, president and chief executive officer, announced at the 1990 annual meeting of shareholders today.

"This significant jump in earnings is attributed to the fact that last year's earnings for the same period were depressed by the Public Utilities Commission's 1989 decision to disallow the utility $25 million in costs to import power over the Southwest Powerlink," said Page. "We also saw reduced utility operating and maintenance costs and improved earnings of our subsidiaries."

Earnings applicable to common shares increased to $53.4 million compared to the same quarter last year of $33.1 million.

Consolidated operating revenues for the quarter were $539.5 million compared to $499.4 million, an 8 percent increase. Consolidated operating expenses increased 6 percent to $460.5 million from $436 million in 1989.

HOUSTON (APRIL 24) PR NEWSWIRE - Constantine S. Nicandros, president and chief executive officer of Conoco Inc. and executive vice president of its parent company, E. I. du Pont de Nemours and Co. was elected a director of Cooper Industries Inc. (NYSE: CBE) today at Cooper's annual meeting of shareholders. He replaces retiring director John P. Diesel.

Nicandros is a member of the boards of directors of both du Pont and Conoco and is a member of the executive committee of the du Pont board. He joined Conoco in 1957 and held various positions in planning, marketing and transportation before being named executive vice president in 1975 and group executive vice president in 1978. He was president for Conoco's worldwide petroleum operations for four years before taking his present position in 1987.

A graduate of Ecole Des Hautes Etudes Commerciales in Paris, Nicandros has a law degree and a doctorate in economics from the University of Paris Law School. He holds a master's degree from the Harvard Graduate School of Business Administration.

Nicandros is also a director of Texas Commerce Bancshares Inc. He serves a number of industry and business organizations and is active in civic affairs.

Cooper Industries, with 1989 revenues of $5.1 billion, is a diversified, worldwide manufacturer of electrical products, electrical power equipment, tools and hardware, automotive products, and petroleum and industrial equipment.

DALLAS (APRIL 24) PR NEWSWIRE - Diamond Shamrock Offshore Partners (NYSE: DSP), the master limited partnership of Maxus Energy Corp. (NYSE: MXS), reported net income of $6.2 million, or 9 cents per unit, for the first quarter 1990, compared to net income of $9.6 million, or 17 cents per unit for first quarter 1989.

Sales for the first quarter 1990 were $29.4 million, compared to $33.9 million in the like quarter a year ago. Cash flows from operations before working capital changes totaled $22.6 million, compared to $26.9

million in first quarter 1989.

Commenting on DSP's first quarter results, C.L. Blackburn, chairman of DSP's special general partner, said:

"Production of natural gas during the first quarter 1990 averaged 98.5 million cubic feet per day (mmcfpd), down from 137.8 mmcfpd in first quarter 1989. The decrease in natural gas production reflected normal decline rates and sales of assets. Natural gas prices averaged $2.24 per thousand cubic feet (mcf) in first quarter 1990, an increase from $2.06 per mcf in the same period of 1989.

"Crude oil production in the first quarter 1990 was 5,200 barrels per day (bpd), compared to 5,900 bpd in the first quarter 1989. Oil prices increased to $20.32 per barrel in first quarter 1990, from $15.76 per barrel reported in the same quarter of 1989."

Maxus Energy Corp., the special general partner of DSP, is an independent exploration and production company based in Dallas.

WESTBOROUGH, MA (APRIL 24) PR NEWSWIRE - New England Electric System (NYSE: NES) (NEES) today announced several management changes, all to become effective July 1, 1990.

NEES Executive Vice President and Chief Operating Officer John F. Kaslow will retire after 34 years with the organization and will be resigning his position as a member of the company board of directors. Kaslow, 57, has had senior responsibility for retail electric companies operations, engineering, generating facilities and service company operations. He also serves as president of New England Power Company, NEES' wholesale generating company.

Assuming responsibilities for retail electric operations will be Edward E. Mulligan, currently president of Massachusetts Electric Company, a NEES subsidiary. Mulligan, 59, who currently reports to Kaslow, will become a NEES vice president and will report to John W. Rowe, NEES president and chief executive officer.

Also reporting to Rowe will be George P. Sasdi, NEES senior vice president and chief engineer, and Robert C. Smith, NEES vice president and president of New England Power Service Company (NEPSCO). Sasdi, who currently reports to Kaslow, will continue to have direct responsibility for engineering and generating facilities. Smith, who also currently reports

to Kaslow, will continue to have direct responsibility for service company operations.

Successors in the operating chief and New England Power Company president posts were not named.

The Massachusetts Electric Company directors have elected John H. Dickson as president, replacing Mulligan. Dickson is currently NEES treasurer. Dickson, 47, will report to Mulligan as will Robert L. McCabe, president of The Narragansett Electric Company and Lydia M. Pastusezek, president of Granite State Electric Company.

Assuming the position as NEES treasurer, replacing Dickson, will be Richard P. Sergel, currently NEPSCO vice president and director of rates. Sergel, 40, will report to Alfred D. Houston, NEES senior vice president and chief financial officer.

New England Electric System is a public utility holding company headquartered in Westborough, Mass.

#90114p6905 04/24/1990 ~PR Newswire

DALLAS (APRIL 24) PR NEWSWIRE - Wyndham Garden Hotels, a division of Wyndham Hotels & Resorts, today announced an agreement to purchase and renovate 11 recently constructed hotel properties for a total transaction cost of $130,000,000. These properties are currently owned and operated by Ramada Hotel Operating Company and were originally built as prototypes for its new development program. The hotels will become Wyndham Garden Hotels after substantial upgrading and renovation.

The purchase of the 11 hotels for $116,000,000 will be completed through a joint venture between YTB Leasing (America), Inc. and other Japanese investors and Wyndham Hotels & Resorts based here. The transaction is expected to close May 21, 1990. Wyndham would assume management responsibility for the 11 hotels and begin its renovation efforts May 22.

The 11 acquired properties are located in the following major metropolitan markets: Atlanta, Ga.; Minneapolis, Minn.; Seattle, Wash. (2); Chicago, Ill.; Nashville, Tenn.; San Diego, Calif.; San Jose, Calif.; and Phoenix, Ariz.(3).

When completed, the acquisition will bring the present number of Wyndham Garden Hotels to 17. Two additional Garden Hotels in Milwaukee, Wis. and Indianapolis, Ind. are under construction and four others are scheduled to

begin construction shortly which will bring the Wyndham Garden Hotels' national presence to 23 by early 1991. This move clearly sets in motion Wyndham's growth strategy which calls for its Garden Hotel Division to develop or acquire an additional 40 hotels in the next few years.

A division of the Trammell Crow Group, Wyndham owns, operates and manages hotel properties throughout the United States and the Caribbean. With hotels operating in three specific segments of the industry -- luxury, upscale suburban and resort -- Wyndham is one of the fastest growing hotel management companies in the United States.

#90114p6907 04/24/1990 ~PR Newswire

HOUSTON (APRIL 24) PR NEWSWIRE - At the annual meeting of Cooper Industries Inc. (NYSE: CBE) today, shareholders approved an amendment to the company's Articles of Incorporation to increase the authorized shares of $1.00 par value preferred stock from 9,495,143 shares to 36,197,499 shares.

The purpose of the amendment is to effect a five-for-one stock split of the outstanding series of $8.00 Convertible Exchangeable Preferred stock, as agreed in the merger agreement with Cameron Iron Works Inc. The record date for the five-for-one split of the convertible exchangeable preferred shares is May 4, 1990. The anticipated date for issuance of the new shares is May 25.

Shareholders also voted to amend the Articles of Incorporation to authorize a new class of 10 million shares of $2.00 par value preferred stock. Robert Cizik, chairman and president, said the creation of the new class of preferred shares will ensure that the company is able to choose the most appropriate methods of financing future business opportunities.

With approval of the amendment to increase the number of authorized shares of $1.00 par value preferred shares, the voting rights of the $1.00 par value preferred stock are reduced from 1/2 to 1/10 vote per share.

Following the split, the annual dividend rate of the convertible exchangeable preferred stock will be $1.60, and the conversion ratio will be 0.55 share of Cooper common stock for each post-split share of convertible exchangeable preferred stock. The redemption prices of the post-split convertible exchangeable preferred shares will decrease from $23.50 in 1995 to $22.70 in 2000 and thereafter.

As of the record date for the annual meeting, 6,213,515 shares of convertible exchangeable preferred stock were outstanding. The convertible exchangeable preferred stock was issued in conjunction with the merger of Cameron Iron Works Inc. with and into Cooper, which was completed on Nov. 29, 1989.

Cooper Industries, with 1989 revenues of $5.1 billion, is a diversified, worldwide manufacturer of electrical products, electrical power equipment, tools and hardware, automotive products, and petroleum and industrial equipment.

#90114p6915 04/24/1990 ~PR Newswire

BEAUMONT, TX (APRIL 24) PR NEWSWIRE - Gulf States Utilities Co. (NYSE: GSU) reported a loss of 12 cents per share of common stock for the first quarter of 1990, compared to a 24-cent loss in the first quarter of 1989.

GSU officials said that the first quarter results include about $2 million of revenue from a $28 million rate increase granted by the Louisiana Public Service Commission, effective March 1. Also included in the first quarter results is a $6.2 million charge associated with a workforce restructuring in January, which the company estimates will save $12.9 million in annual labor costs.

Net income, before the accrual of preferred and preference stock dividends was $2.5 million for the first quarter of 1990, compared with a net loss of $10.7 million for the first quarter of 1989. During the first quarter of 1989, as a result of the LPSC's February 1989 rate order, the company recorded a $14.9 million (net of tax) write-down of the previously cancelled River Bend 2 nuclear unit.

First quarter 1990 kilowatt-hour sales were 6.3 billion, two percent less than the 6.5 billion kilowatt-hours sold in the first quarter of 1989.

The sales decrease reflects mild weather in February and March.

GSU also reported a loss of 88 cents per share of common stock for the 12 months ended March 31, compared to earnings of 19 cents per share of common stock during the 12 months ended March 31, 1989. The 88-cent loss resulted primarily from three significant accounting charges recorded in the third and fourth quarters of 1989. These charges resulted from the regulatory environment in the FERC jurisdiction and steam department and the abandonment of lignite leases.

GSU also reported that kilowatt-hour sales totaled 27.3 billion for the 12 months ended March 31, about the same level recorded during the 12 months ended March 31, 1989.

GSU serves almost 565,000 electric customers in a 28,000-square-mile area spanning the Gulf Coast between Houston and New Orleans.

PRINCETON, NJ (APRIL 24) PR NEWSWIRE - UJB Financial Corp. (NYSE: UJB) Chairman T. Joseph Semrod told shareholders of the state's third largest banking organization today that in 1989 the company reported increased earnings for the 13th consecutive year.

Semrod noted that banking is a cyclical business and closely tied to the health of the regional economy in which it operates. "In a soft economic environment, it can't be totally immune," he said, observing that the sluggish pace of expansion in the region, especially evident in the soft real estate market, will have an effect on bank earnings in the short run.

"Long term is what counts," Semrod said, "not quarter-to-quarter quick profits, but being positioned for the '90s and beyond. At UJB Financial, we remain focused on maximum sustainable long-range earnings growth, and maximum long-term return for our shareholders."

John R. Haggerty, senior executive vice president and chief financial officer for UJB Financial, reported first-quarter 1990 earnings which he said reflect the continuing softness in the residential housing market in the region. Net income for the first three months of 1990 was $24.7 million, or 55 cents per share, compared to $31.9 million, or 71 cents per share, for the same period a year ago.

Shareholders approved amendments to the certificate of incorporation providing for a classified board of directors. Staggered terms for members of the board will provide stability and help assure continuity in

UJB Financial's business strategies, and further protect the long- term interests of all shareholders as well as the company's relationships with customers, employees and the communities which it serves.

Twelve directors were elected and independent public accountants approved by 95 percent of the shares voted. Clifford H. Coyman, retiring chief executive officer of United Jersey Bank, did not stand for re-election, and was recognized for his years of service to the company. A moment of silence was observed in memory of Dr. Edward J. Bloustein, former director and president of Rutgers, who passed away in December of 1989.

UJB Financial is among the nation's leading regional bank holding companies, with over $12 billion in assets and more than 250 offices in 22 counties in New Jersey and eastern Pennsylvania.

AKRON, OH (APRIL 24) PR NEWSWIRE - BFGoodrich Aerospace Division has created a new business through the combination of the Marine Products & Services (MP&S) and Dynamic Polymer Products (DPP) units. John Foulk has been named General Manager; headquarters will be established at existing MP&S facilities in Jacksonville, Fla. A name has not yet been selected for this new business.

In making this announcement, Aerospace group vice president Steve Huggins said, "These two units share so many of the same customers and technologies that, as we began to explore new business opportunities, the logic of such a combination became compelling."

The new unit will continue to develop and manufacture products for the marine and transportation industries, including sonar domes and acoustic windows for the U.S. and allied navies, water-lubricated marine shaft bearings, components for bus and truck suspension systems, and other specialty polymer and composite products. New-product development capabilities will be a strength of the new business, offering a new unique mix of engineering skills, talents and facilities -- including the largest autoclave in the Western Hemisphere, able to cure one-piece polymer and composite structures to a 29-foot diameter and 44-foot length.

Other BFGoodrich Aerospace products and services include aircraft ice protection systems, evacuation systems, instruments and avionics, maintenance, repair and overhaul services, engineered fasteners, and aircraft and off-highway braking systems. BFGoodrich Aerospace is a division of the BFGoodrich Company (NYSE: GR), with headquarters in Akron,

Ohio.

NEW YORK (APRIL 24) PR NEWSWIRE - Recognizing the advantages of combining regional expertise into a global operation, Marine Midland Banks, Inc. and Wardley Holdings Limited have agreed in principle to integrate the business of Marinvest, the bank's investment management subsidiary, with that of Wardley Investment Services, the investment management arm of the HongkongBank group. The announcement was made jointly by Marine Midland President and CEO Geoffrey A. Thompson, and Bernard H. Asher, CEO of Wardley Holdings Limited.

Thompson and Asher noted in their joint announcement that Marinvest's U.S. expertise complemented the Asian and European expertise of Wardley Investment Services. The enlarged business would have total assets under discretionary management of $10 billion. The decision reflects a trend in the investment management industry towards integration and globalization.

Thompson said the move would add a stronger, international dimension to the investment management services which Marine Midland currently offers to its retail, institutional and commercial customers in the United States. He noted that this would be of particular appeal in light of a recent U.S. survey which ranked Wardley Investment Services as the leading global money manager for 1989. Asher added that the move would also strengthen Wardley Investment Services' ability to offer Marinvest's U.S. expertise to clients in Europe and the Far East.

Marine Midland and Wardley are both members of the HongKongBank group which, with assets of $133 billion, is one of the world's 30 largest banking organizations.

#90114p6924 04/24/1990 ~PR Newswire

WASHINGTON (APRIL 24) PR NEWSWIRE - British Aerospace and the Sierra Division of LTV Missiles and Electronics Group today delivered the first of six C-29A aircraft to the U.S. Air Force.

The C-29A is a military version of the British Aerospace twin engine BAe 125-800. These jets will replace aging Lockheed C-140 and Rockwell T-39 aircraft presently in use by the Air Force. Under terms of a contract awarded in 1988, Sierra is manufacturing and integrating flight inspection

systems into a total of six modified commercial jet aircraft built by British Aerospace of Chester, North Wales.

In a ceremony at Sierra's suburban Cheektowaga facility, Buffalo, N.Y., LTV Missiles and Electronics Group President Robert N. Parker presented the first system to Gen. Hansford T. Johnson, commander in chief of U.S. Transportation Command and of the Military Airlift Command. Parker noted "Aside from the inherent complexities in a system program of this size, we did it with 3,000 miles separation between the mission equipment supplier and the aircraft manufacturer. This achievement is a tribute to the teamwork we have enjoyed with our British friends." Gen. Johnson said, "The C-29 program represents superb coordination between government and industry, and represents a leap forward in flight check technology, reliability and cost efficiency."

A second ceremony was held when the C-29A, piloted by General Johnson, landed at Scott AFB. British Aerospace's Peter A.S. Boxer, senior vice president, government programs, North America, and George Davidson, Sierra Research Division's vice president and general manager, electronics systems, met the aircraft at Scott AFB.

Boxer expressed both the pleasure and pride that British Aerospace and its employees felt at renewing their "association with the United States Air Force." He reflected on the history of aircraft built by British Aerospace predecessor companies for the Air Force of the United States, "more than 600 Spitfires flown by the then Army Air Corps fighter pilots during World War II. In the 1950s, we produced the B-57, a derivative of the British Canberra medium bomber ... (which) saw service up through the Vietnam War. We are proud and pleased to be part of turning the common heritage of our two countries into a shared future."

Logistics support for the C-29A, provided under subcontract to Sierra by Garrett General Aviation Services, the C-29A engine supplier, is scheduled into September 1997.

Flight inspection systems play a key role in aviation safety by analyzing air navigation aids and airport landing facilities to ensure that the ground equipment conforms to national and international standards.

DALLAS (APRIL 24) PR NEWSWIRE - Trinity Industries Inc. (NYSE: TRN) today announced that preliminary reviews of the difference in book and physical

counts of inventories at one of its divisions at Mar. 31, 1990, indicate a shortage of $2.9 million after tax (approximately 13 cents per share on anticipated fully diluted earnings per share).

Trinity's management is continuing to take all necessary steps to determine if this loss, in fact, has been incurred and its precise amount. If it is determined that the loss has been incurred, it will be recorded in the fourth quarter of Trinity's fiscal year ended Mar. 31, 1990.

Trinity Industries, with headquarters in Dallas, manufactures and markets a wide variety of metal products, principally in six business segments: Railcars, Containers, Structural Products, Marine Products, Metal Components and Leasing.

HOUSTON (APRIL 24) PR NEWSWIRE - Galvest Inc. (NASDAQ: GALV) has announced the recent purchase of an overriding royalty interest in the Willow Springs Field, Gregg County, Texas. The interest covers approximately 3,000 acres.

Galvest acquired a 3 percent overriding royalty interest in 766 acres on which there are five producing wells, as well as a sixth well currently drilling. The Galvest overriding royalty interest on the remaining acreage (2,243 acres) will be approximately 1.5 percent.

Galvest was created in 1988 as part of the reorganization of Galaxy Oil Co. Galvest's principal asset is its interest in a limited partnership which holds interests in producing oil and gas properties located in Texas New Mexico and Oklahoma. The most significant of such properties is located on the San Pedro Ranch in Dimmit and Maverick Counties, Texas. Galvest is managed by Global Natural Resources Inc., a Houston based energy company.

CONTACT: Eric Lynn Hill of Galvest Inc., 713-880-5464.

DALLAS (APRIL 24) PR NEWSWIRE - American Petrofina Inc. (AMEX: APIA) today announced first quarter net earnings of $26.2 million, or $1.70 per share.

Before tax profits were essentially the same as last year, but net earnings were 46 percent lower because the 1989 first quarter included a

nonrecurring profit of $23 million from the adjustment to deferred taxes associated with the Financial Accounting Standard Board's Statement 96.

Sales and other operating revenues increased 25 percent to $896.3 million, compared to revenues of $718.9 million in the first quarter of 1989, as a result of higher crude oil and refined products prices and increased natural gas sales.

Commenting on first quarter results, Ron W. Haddock, president and chief executive officer, said, "Operating results compared to a year ago were mixed. Upstream operating profits improved, reflecting higher crude oil and natural gas prices and the results of increased drilling activity.

"Downstream operating cash income declined, largely due to lower aromatics margins, only partially offset by higher throughput and improved marketing results.

"Chemicals operating income also declined. Lower industry margins were partially offset by strong demands and increased sales volumes resulting from recent expansion projects."

A comparative summary of the company's unaudited results vs. 1989 follows:

	Three Months Ended March 31	
	1990	1989
Sales and Other Operating Revenues	$896,272,000	$718,890,000
Net Earnings	$ 26,218,000	$ 48,760,000
Earnings Per Share	$ 1.70	$ 3.32
Average Shares Outstanding	15,460,438	14,675,090

American Petrofina Inc., through its main operating subsidiary, Fina Oil and Chemical Co., engages in crude oil and natural gas exploration, production, and marketing; petroleum products refining, supply and transportation, and marketing; and chemicals manufacturing and marketing. Organized in 1956, it is part of an international group of about 200 companies in 33 countries affiliated with Petrofina S.A., which is headquartered in Brussels, Belgium.

SALT LAKE CITY (APRIL 24) PR NEWSWIRE - Smith's Food and Drug Centers Inc. (NYSE: SFD) announced plans today to operate a special off-price discount food and drug store in its leased space in the Olympus Hills Shopping Center in Salt Lake City. This operation is to be a warehouse type store to be called "Buy -N- Save" and will feature case lot and

non-perishable products at considerable savings, together with a convenience store section of the most commonly purchased items.

Smith's plans to commence remodeling this location immediately and anticipates a grand opening on or before June 27. This store will occupy the space formerly used by Smith's for a conventional food and drug store which is moving to larger and newer facilities at 3171 East 3300 South, a former Skaggs Alpha Beta site. The Alpha Beta store has been completely remodeled into the latest state-of-the-art Smith's prototype, similar to the stores which Smith's opened last year in the Phoenix market.

The "Buy -N- Save" format is intended to provide a special buying opportunity for customers who, generally or occasionally, buy larger quantities for food storage and family use. Jeff Smith, Chairman of Smith's, said, "this type of store has been successfully operated by others in other geographic areas and he has high hopes it will appeal to the Salt Lake consumer." The Buy -N- Save store is designed to draw customers from a much broader area. The location on the newly opened I-215 belt route is ideally suited as a convenient location for residents of the entire valley.

Although the final merchandising plans are not complete, the Buy -N- Save store, in addition to non-perishable food and drug case goods, will feature a special convenience section to provide commonly purchased items for neighborhood residents which items will be sold individually. The store will not have perishable departments such as a bakery, produce, meat and deli.

Space will be provided in the store to accommodate special purchases of close-outs and overruns which will be purchased in large quantities and shipped directly to the store from manufacturers, thus minimizing handling costs. This operation will always be on the lookout for special buying opportunities to provide special savings for the customer.

CONTACT: Robert D. Bolinder or Matthew G. Tezak both of Smith's Food & Drug Centers Inc., 801-974-1400.

ROSEMEAD, CA (APRIL 24) PR NEWSWIRE - Southern California Edison Company today sold $100 million of 2-year, first and refunding mortgage bonds. The company will use the proceeds from the financing for the redemption, repayment or retirement of outstanding indebtedness, the financing of construction expenditures or other general corporate purposes.

The bonds, Series 90A, due 1992, were sold to a group of underwriters led by Shearson Lehman Hutton Inc. The bonds were priced at 99.812 percent of

the principal amount with a 9-1/8 percent coupon, resulting in a 9.23 percent annual cost to the company. Shearson's offer was the lowest cost of money among the three competing bids received by the company.

The bonds are expected to be offered to the public by the underwriters at 100 percent of the principal amount, to yield 9-1/8 percent.

This offering is being made only through a prospectus, which may be obtained from the underwriters.

#90114p6951 04/24/1990 ~PR Newswire

AKRON, OH (APRIL 24) PR NEWSWIRE - The Michelin Group announced today that it has been informed by the Antitrust Division of the U.S. Department of Justice that the department would not object on antitrust grounds to Michelin's acquisition of The Uniroyal Goodrich Tire Co.

In March the Canadian Bureau of Competition Policy issued a letter to the same effect and Investment Canada gave its approval to Michelin's acquisition. The acquisition has been contingent on obtaining necessary government approvals in both the United States and Canada.

As announced in September, Michelin intends to operate Uniroyal Goodrich as a separate subsidiary of the Michelin Group. Uniroyal Goodrich will retain its headquarters in Akron, and will continue to manufacture and distribute Uniroyal, BFGoodrich and the various brand tires it currently produces.

A Michelin spokesperson added that changes are not contemplated in the present management team or in the current operating and employment policies of Uniroyal Goodrich.

Michelin plans to support the capital investment planned by Uniroyal Goodrich for its manufacturing operations over the next five years. These investments will enable Uniroyal Goodrich to further improve plant facilities and increase productivity and quality.

Michelin also announced today that it intends to make offers and solicit consents with respect to the $415 million of publicly traded debt of Uniroyal Goodrich issued in June 1988. The offers will be only by the "Offers to Purchase and Consent Solicitations" materials to be furnished to security holders shortly.

Michelin has a long-established presence in the United States and Canada. It built its first manufacturing facilities in North America more than 19

years ago. Today, its North America companies have grown to nine manufacturing plants and employ more than 16,500 persons. Michelin already has more than 700 employees in North America devoted to research and development, and operates a 2,500-acre test track facility in Laurens, S.C.

Uniroyal Goodrich manufactures and markets Uniroyal and BFGoodrich brand tires through a network of independent tire dealers, distributors and mass merchandisers. Uniroyal Goodrich is also a major supplier of private brand tires.

NEW YORK (APRIL 24) PR NEWSWIRE - Hallmark Cards Inc. announced today that it has accepted for payment $161,763,000 principal amount of the Senior Subordinated Discount Notes due 1998 and $89,941,000 principal amount of the 13 3/8 percent Subordinated Debentures due 1999 of Univision Holdings Inc. pursuant to the tender offers made by a Hallmark subsidiary for those securities and it has allowed the tender offers to expire.

The tender offers were for all of the Discount Notes at a price of $553 per $1,000 principal amount and for all of the Debentures at a price of $312.25 per $1,000 principal amount, plus interest accrued to Feb. 1, for total consideration of $379 per $1,000 principal amount. The securities accepted represent approximately 98 percent of the outstanding Discount

Notes and 86 percent of the outstanding Debentures.

Hallmark also announced that Univision has entered into an agreement with the banks that are parties to its bank credit agreement amending certain covenants and restructuring the payment terms thereunder.

A Hallmark spokesperson said "We are pleased that the Univision debt has been restructured and we are happy that Univision management will now be able to devote its entire attention to operating the business."

Univision Holdings Inc. is a privately held company, based in New York, which owns and operates a Spanish-language television network in the U.S. and a group of television stations.

#90114u0314 04/24/1990 ~United Press International
(APRIL 24) UPI - NASA technicians are fueling the shuttle Discovery's giant exterior tank in preparation for Tuesday morning's launch. Thunderstorms swept the Cape Canaveral, Florida, area late Monday... but forecasters predict weather at launch time has a good change of being favorable. The launch is running two weeks behind because of hydraulic problems that delayed an April 10th lift-off. The goal of the flight is to orbit the one-point-five-BILLION dollar Hubble Space Telescope.

Federal authorities are investigating Monday's derailment of an Amtrak passenger train south of Batavia, Iowa. At least 100 people were injured when eight of the train's 16 passenger cars derailed. Three flipped on their sides. The California Zephyr, Pioneer and Desert Wind en route from the West Coast to Chicago was two hours behind schedule, but witnesses say the train did NOT seem to be speeding excessively.

The State Department is raising the possibility that the Jewish takeover during Easter Week of a building in the Christian Quarter of Jerusalem's Old City may prompt a change in U-S aid to Israel. On Sunday, the Israeli

government admitted it contributed money to buy the disputed building. On Monday, Christian leaders announced that holy sites in Jerusalem and Bethlehem will close for one day Friday in protest. Also Monday, a magistrate ordered the Jews to vacate the building within 48 hours.

A Chicago television station says authorities investigating the slayings of a north suburban couple two weeks ago are looking into a possible link between the sister of the slain woman and the Irish Republican Army. The sister... a civil rights activist seeking the release of an I-R-A leader imprisoned in New York... reportedly was warned late last year by the F-B-I that she was the target of an I-R-A death threat. The station says one possibility under investigation is a case of mistaken identity.

Organizers say the anti-drug program ''Cartoon All-Stars to the Rescue'' drew the biggest audience ever to watch a Saturday morning entertainment program. N-B-C Research estimates the half-hour program was viewed by 30-Million peopleMillion of which were between the ages of two and 11. The show was simulcast on more than 600 stations on the four major networks and hundreds of independent stations.

#90114u0340 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - A Bush administration official defended the use of animals for scientific research and told scientists that disruptive activism threatens ''the very foundation of both our scientific and political well-being.''

The issue will be tested Tuesday when animal-rights advocates demonstrate nationally as part of what is being called World Animal Liberation Day. A target of demonstrators was the National Institutes of Health in Bethesda, Md.

To prepare for the protest, Constance Horner, undersecretary of the Department of Health and Human Services, gave NIH scientists a pep talk Monday about the importance of using animals in medical research.

''A new idea ... the idea of animal rights, threatens now to undermine the very foundations of both our scientific and political well-being,'' Horner said.

''Adherents of this movement have tried to foster a siege mentality among our scientists and at our nation's laboratories,'' she said. ''They have tried to put us on the defensive, through intimidation and even violence. They will not succeed.''

Groups such as Animal Liberation Front and People for the Ethical Treatment of Animals have tried to stop scientists from using animals for

research. In some cases, activists have broken into laboratories to steal animals and data.

Kay Holcombe of the Foundation for Biomedical Research said there have been about 76 cases of vandalism at research facilities in the last eight years.

Activists not only oppose animal experimentation, but argue alternatives can be found.

''If everybody woke up tomorrow and there was no such thing as animal experimentation, I doubt scientists would sit there ringing their hands and twiddling their thumbs and would get busy to find alternatives that are yet undiscovered,'' said Mary Beth Sweetland, a researcher for People for the Ethical Treatment of Animals.

But Horner said animal studies have been an indispensable part of biomedical research, helping to develop vaccines against diseases, insulin for diabetics and radiation and chemotherapy for cancer patients.

''We must not permit the activities of a handful of extremists to deprive millions of the life-sustaining and life-enhancing fruits of biomedical research,'' she said, denouncing the animal rights movement's ''core belief ... that there is no difference in principle between people and animals.''

She added that animals must be treated humanely and properly when used in research. ''But as citizens and scientists, we will not tolerate intimidation, threats, violence or lawbreaking,'' she said.

Sweetland said her group ''firmly draws the line'' against any acts of violence against human beings.

''But we do not denounce acts of violence against instruments of torture '' she said. ''We do not consider material destruction of any consequence compared to what animals suffer in labs.''

Last November, the Senate passed legislation that would make it a felony to damage, vandalize or steal any property at a research facility. Violators could receive a maximum fine of $25,000 and a prison term of up to 20 years for each violation. The House has not acted on the measure.

#90114u0398 04/24/1990 ~United Press International

(APRIL 24) UPI - John Tudor's return to the St. Louis Cardinals is starting to make people forget about his injury-plagued stint in Los Angeles.

Tudor scattered five hits over eight innings and Pedro Guerrero hit a two-run homer Monday night, leading the St. Louis Cardinals to a 7-4 victory over the Pittsburgh Pirates.

Tudor, 3-0, added another line to his successful comeback from elbow and shoulder problems that plagued him since he arrived in Los Angeles in an August 1988 trade. He returned to the Cardinals by signing as a free agent over the winter.

''Three-and-oh (Tudor's record) looks pretty good when you're only 6-8,'' St. Louis Manager Whitey Herzog said. ''He's already stopped three losing streaks and we've only played two weeks. We might pitch him tomorrow.''

Tudor, befuddling the Pirates by mixing the speed on his pitches, broke a four-game St. Louis losing streak and a five-game home skid.

''You don't want to go on a long road trip losing five games at home,'' Tudor said. ''I was throwing right down the middle of the plate, but they hit it right at the guys. They were getting some pitches to hit.

''I'm surprised Whitey (Herzog, St. Louis manager) didn't take me out to save the married guys on the infield. The fact we scored six or seven runs helped me go eight innings. I'm sure they got some guys over in the other locker room kicking themselves.''

Tudor's outing was his longest of the season. His string of 13 scoreless innings this season and 19 dating back to last year ended in the first inning, but he allowed just three runs on five hits. Tudor's ERA is 0.42.

''We had a chance to knock him out early,'' Pittsburgh Manager Jim Leyland said. ''But we didn't and he got better as he went along. Good pitchers are that way.''

The Cardinals pounded Pittsburgh pitching for 12 hits. Bob Walk, 0-3, lasted just four innings. Walk, who had won eight of his last 11 decisions allowed eight hits and five runs, three earned.

Pittsburgh's loss snapped a four-game road winning streak. The Pirates are on a 13-game road trip.

Guerrero's two-out home run in the third inning gave St. Louis a 3-2 lead. With one out, Ozzie Smith reached on a error by first baseman Gary Redus. One out later, Guerrero slammed a 3-2 fastball over the left-field wall for his third homer of the season.

''I feel like I hit better when it's warmer,'' said Guerrero, who hit a grand slam Saturday. ''I wish I had it in my contract just to play when it's warm. I'm more relaxed at the plate.

''I want to do better. I don't like seeing my average below .300.''

In Monday night's only other National League game, San Diego crushed San Francisco 13-3.

In the American League, it was: Toronto 12, Cleveland 9; Baltimore 8, Kansas City 5; and Detroit 6, Minnesota 3.

-- AROUND THE NL --

Padres 13, Giants 3

At San Diego, Joe Carter belted a grand slam in the first inning and drove in a career-high seven runs and the Padres pounded out 17 hits in the rout.Carter, who came to the Padres in an off-season trade with the Cleveland Indians, belted a 1-0 pitch from rookie Eric Gunderson, 0-2, for his second homer of the year and the fifth grand slam of his career to make it 4-0. Andy Benes, 2-1, worked six innings for the victory.

#90114u0501 04/24/1990 ~United Press International
(APRIL 24) UPI - Around the world, around the clock... here's the latest news across the wires of United Press International.

Iran's foreign minister says that his country played a key role in the weekend release of U-S hostage Robert Polhill. But the Iranian official hinted that future hostage releases will depend upon whether the West uses its influence to press Israel and Lebanese Christians to release Iranian and Moslem prisoners.

The White House says it is NOT sure what role Iran played in the release of Polhill. Presidential spokesman Marlin Fitzwater says the United States will NOT make any deals for future hostage releases. But he says the Bush administration is willing to negotiate with Iran to try to free remaining hostages.

The National Transportation Safety Board says its investigators will arrive Thursday night at the scene of yesterday's AMTRAK train derailment in Batavia, Iowa. The accident occurred on a stretch of Burlington Northern track, which critics say have been the location of several mishaps.

The Soviet Union and China are on the verge of signing an agreement aimed at easing tensions along their nearly 42-hundred-mile border. Officials from both sides issued a statement yesterday that the pact to reduce troop numbers along the border will ''promote peace in the Asia Pacific region.'' Chinese Premier Li Peng arrived in Moscow yesterday for a four-day visit.

The public interest group Common Cause says 44 current senators received more than one-Million dollars from political action committees between 1983 and '88. Heading the list among senators was Texas Democrat Lloyd Bentsen who pulled in nearly two-point-six-Million dollars during the six-year period.

-30- 1894
#90114u0511 04/24/1990 ~United Press International
(APRIL 24) UPI - A published report quotes an unidentified Bush administration source as saying President Bush will announce some type of measures against Moscow for its stance toward Lithuanian independence. The official did NOT disclose terms of the the plan.

The shuttle Discovery's five-person crew is slated to board the craft this morning for today's scheduled liftoff. Discovery is carrying in its payload the one-and-a-half-BILLION-dollar Hubble Space Telescope, an optical lens that astronomers will help them answer basic questions about

the formation of the universe.

Animal rights activists have declared today World Animal Liberation Day. The activists plan to mark the occasion with protest rallies at various laboratories around the world. A Bush administration official said yesterday that the use of animals in biomedical research is vital and said scientists should NOT be intimidated by extremists.

Chicago police say 134 people were arrested yesterday during several rallies around the city by AIDS activists. The AIDS Coalition to Unleash Power organized the protests at city hall, the Prudential Insurance Company and the American Medical Association. The marches were staged to protest discrimination against homosexuals and people with AIDS.

The United Nations increased its size yesterday to 160 nations when it admitted newly independent Namibia. The head of the U-N General Assembly hailed the moment, saying that Namibia's entry to the world body is- ''a victory for the international community as a whole.'' The United Nations administered the African nation's elections this year.

#90114u0654 04/24/1990 ~United Press International

(APRIL 24) UPI - The shuttle Discovery and the Hubble Space Telescope await blastoff this morning at Cape Canaveral... an Amtrak derailment in Iowa injures about 100 people... the latest news from United Press International.

After weeks of delay, NASA hopes to launch the shuttle Discovery this morning on its mission to put the Hubble Space Telescope into orbit.

Discovery is fueled and waiting on its Cape Canaveral launch pad after a two-week delay due to hydraulic problems that scrubbed an April 10th launch.

The shuttle's five-member crew planned to strap in aboard the orbiter shortly before dawn to await a thundering climb to a record 380-mile-high orbit.

The two-week delay for Discovery's launch is nothing compared to the wait scientists have had for the one-point-five-BILLION-dollar telescope to go into orbit. Scientists have waited seven years to put the instrument in orbit to get at questions about the birth and fate of the universe.

Once in operation high above Earth's atmosphere, the telescope will be able to study planets, stars and galaxies in far more detail than ever before.

Scientists say an expected scientific bonanza will more than justify the high cost and the long wait for its priceless data.

Nearly 100 people were injured yesterday when an Amtrak train derailed near Batavia, Iowa.

Witnesses say the 16-car train did NOT appear to be traveling at an excessive rate of speed, but one observer said the train started rocking as it passed a switch and then cars came off the track.

The accident took place along a stretch of Burlington Northern tracks which critics claim fails to meet safety standards. The leader of one group opposed to continued use of the Burlington Northern track- the Reverend Paul Goodland of Ames, Iowa- says several accidents have occurred on the controversial track.

Goodland says he and others have advised Amtrak to switch their operations through Central Iowa to track maintained by Chicago Northwestern. Goodland says he does NOT know when Burlington last upgraded its track. But he says Northwestern is in the process of spending Millions of dollars to improve its track.

The National Transportation Safety Board says its investigators will arrive at the accident scene Thursday night.

Hospitals receiving the injured say most of the injuries were minor.

#90114u0659 04/24/1990 ~United Press International

(APRIL 24) UPI - Thunderstorms and hail hammered the southern Plains states early Tuesday as rains soaked portions of the Midwest and gusty winds whipped northern California, where a tornado struck a schoolyard and uprooted trees.

Strong thunderstorms and some hail spun through west-central and northwest Texas and central Oklahoma, the National Weather Service said. Kingfisher County, Oklahoma reported large hail and high winds, officials said.

Storms that reportedly dumped golfball- and tennis ball-size hail in parts of the Texas Panhandle Monday night had died down and produced moderate rains, with spots of heavy rain, in north-central Texas, north of Dallas.

Some of the scattered storms moved into western Arkansas and Louiaiana. Isolated thundershowers were reported in northwestern New Mexico, where cloudy skies were reported across much of the state, NWS forecasters said.

Northern California was in the 50-degree range with strong winds Tuesday,

a day after a tornado touched down in the countryside and ripped the siding from a trailer used as an elementary school office, officials said. The twister also uprooted two juniper trees but caused no injuries.

In San Francisco Monday, strong winds blew down scaffolding around a bank and stalled a trolly line with blowing debris.

The violent weather was part of a storm system that spun off a Pacific weather front, which blew ashore over the weekend and hung around Monday to produce scattered showers and downpours, isolated thunderstorms, funnel clouds and some snow in the Sierra Nevada range along with strong winds.

Skies were cloudy and drizzly over much of Southern California, where rain-slick freeways were blamed for scores of accidents. Rain delayed the San Diego Padres-San Francisco Giants baseball game twice but the teams completed the game.

In Oregon, a weakening upper-level low-pressure system over central Washington circulated showers across most of Oregon. Cloudy skies continued in Western Washington, and rain fell between Seattle and Everett.

Minnesota and western Wisconsin endured heavy thunderstorms and strong winds, with temperatures in the 60s. Illinois and Missouri were cloudy, and northwest Iowa had isolated showers.

Much of the South was cloudy and warm Tuesday, but generally free of rain. Mississippi had scattered rain. Atlanta was 68 degrees and Knoxville 69.

The mid-Atlantic region saw a mostly clear night. Pennsylvania was generally in the 40s, although Philadelphia posted about 50. Delaware, southern New Jersey and West Virginia were slightly warmer in the 50s.

New England temperatures hovered in the 40s Tuesday, following a day when the region soared into the 60s. Maine and coastal areas were a few degrees cooler.

#90114u0660 04/24/1990 ~United Press International

(APRIL 24) UPI - A pro-Iranian clergyman in Beirut says another American hostage would be set free soon... but only if Israel releases some 400 Arab prisoners.

Seyyed Hussein Musawi is the leader of the Iranian-backed Islamic Amal. He said in an interview today that another American hostage will be freed... but he could NOT give details.

The Islamic Amal is an offshoot of the Iranian-founded Hezbollah group.

In Washington, Iran's foreign minister says Tehran deserves credit for helping to arrange the weekend release of hostage Robert Polhill.

Ali Akbar Velayati linked more releases to Israel's freeing a captive Shiite leader, Sheikh Abdul Karim Obeid, a Lebanese cleric abducted last year by Israeli commandos.

Velayati also says it's time for the ''other side'' to release Palestinian and Iranian prisoners held by Israel and its allies in Lebanon.

And in West Germany, doctors are debating whether diabetic Robert Polhill should have the fudge sundae the American professor craved after 39 months as a hostage in Lebanon. NO word yet on that decision.

Secretary of State Baker says it's possible the European Community will join the United States in developing a major economic aid package for the developing democracies in Latin America.

Baker's comments came after yesterday's meeting in Washington with Western allies that form the so-called ''G-24.''

Last year, Gordinate aid for Poland and Hungary. The group also agreed to send assistance to East Germany, Bulgaria and Czechoslovakia once those nations hold democratic elections.

Yesterday's statement by Baker runs counter to a long-standing unwritten policy that the United States would be the major player in Central and South America.

Baker responded to a question along those lines by saying that U-S philosophy corresponds with that of other nations that make up G

#90114u0672 04/24/1990 ~United Press International

(APRIL 24) UPI - Fallen junk bond wizard Michael Milken will appear in federal court in New York this morning. He's expected to strike a plea bargain to settle a 98-count indictment on insider trading and other charges.

Milken pioneered the use of high-yield, high-risk bonds that fueled the feverish corporate takeovers of the 1980's. He's expected to plead guilty to six felony counts of securities law violations and pay a record 600-Million dollars in fines and penalties.

Milken... who once earned as much as 550-Million dollars a year... had faced a noon deadline Friday to strike a deal with prosecutors or else

face a new and broader indictment.

Sources say Milken reached an 11th-hour agreement Friday with federal prosecutors to settle a March 1989 indictment on 98 counts of racketeering and fraud charges.

Under terms of the agreement, the former head of the junk bond department for the defunct Drexel Burnham Lambert will plead guilty to six lesser charges rather than the insider trading and racketeering charges included in the indictment.

A Montana judge has ordered a controversial religious group to temporarily stop work on a bomb shelter complex north of Yellowstone National Park.

District Judge Byron Robb yesterday set a May 3rd hearing date on the state's motion to halt shelter development until an environmental analysis is completed on the shelter's septic system and other church construction.

The state originally sought the building halt following a 31-thousand-gallon petroleum fuel leak outside the facility earlier this month.

Robb's ruling came on the first day that the Church Universal and Triumphant predicted nearly 26-thousand years of ''bad karma'' will visit humankind over the next 12 years.

Members of the self-proclaimed New Age sect believe catastrophe awaits the world and say they must chant 24 hours a day to relieve the stress facing the globe.

The church has drawn national attention because of the doomsday predictions and the fear of nearby communities that the church members are stockpiling arms.

#90114u0816 04/24/1990 ~United Press International

MIAMI (APRIL 24) UPI - Gov. Bob Martinez urged radio listeners to donate campaign money for an upcoming election - in Czechoslovakia.

Martinez, who is up for re-election in November, spoke Monday over three Spanish-language radio stations in Miami. He urged listeners to give $1 and $5 donations to boost Czechoslovak President Vaclav Havel's campaign.

''There is no other city in Florida that better understands the damage of communism,'' Martinez explained.

Havel, a playwright who repeatedly spoke out against repression while his

country was under communist rule, was named provisional president in December. Elections are scheduled for June.

The Republican governor said he was responding to a request for funds made in March by Ivan Havel, the president's brother, while Martinez visited Eastern Europe on a trade mission.

''I said I'd go back and hold a fund-raiser and transmit whatever funds we raised back to them,'' Martinez said.

Martinez said the fund-raising pleas had absolutely no relation to his own race for re-election.

''I'm doing this because I believe in democracy. Ivan Havel said that they needed help and I am not going to shy away from helping anyone,'' Martinez said.

At the governor's side was Jorge Mas Canosa, chairman of the Cuban-American National Foundation. The foundation joined the governor in the fund-raiser, which gathered more than $10,000 in pledges for the Eastern European Cultural Endowment Ltd. Martinez described the endowment as a U.S. fund-raising arm of Civic Forum, Havel's party.

Florida gubernatorial candidate Lawton Chiles, a former U.S. senator, also invoked Havel's name. In announcing his candidacy for the Democratic nomination April 12, Chiles said Havel's inspiration was one of the main influences in his decision to run.

-30- 2018

#90114u0823 04/24/1990 ~United Press International

(APRIL 24) UPI - New York police say they've discovered the body of a security guard who was abducted yesterday during a bold daylight heist in Manhattan. The 46-year-old guard's body was discovered two-and-a-half hours after five unidentified men forced him from his courier van into their vehicle. However, it was NOT until this morning that officials realized the body they had found was the missing guard. Police say the body bore NO visible wounds.

The man who pioneered the use of high-yield, high-risk bonds that brought on the feverish pace of corporate takeovers in the 1980's is expected to plead guilty in New York City today to six counts of securities laws violations. Michael Milken also is expected to pay a record 600-Million dollars in fines and penalties. Milken reached the agreement Friday with federal prosecutors in New York.

Anti-drug chief William Bennett says the Bush administration does NOT see any need to alter its method of financing the war on drugs in U-S cities.

Bennett said yesterday that to change from the present system of giving states block grants that eventually fund urban efforts would create a ''disorganized hodge-podge.'' Many city officials complain that the war on drugs is NOT being waged in urban areas because they have NOT received money.

East Germany's state-run news agency says West German Chancellor Kohl and his East German counterpart, Lothar de Maziere will meet today. Their meeting follows East Berlin's praise of a Bonn plan to convert the weak East German mark at a 1-1 rate to the strong West German mark. It would be the first meeting between the two since de Maziere took office April 11th.

#90114u0949 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - Orders for durable goods shot up 6.7 percent in March on strong demand for aircraft and cars in the largest increase in more than a year, the Commerce Department said Tuesday.

Private analysts had expected a moderate increase of 1 percent.

Orders for durable goods, expensive items made to last three or more years totaled $128.8 billion in March vs. $120.7 billion in February, according to the monthly report by the department's Census Bureau.

The increase ''was heavily influenced by the transportation equipment industry'' and was the biggest since a 7.4 percent advance in December 1988, the department said.

''The increase in transportation equipment in March of $6.3 billion or 21 percent to $36.2 billion was mostly attributable to aircraft and parts, although motor vehicles and parts also had a significant increase,'' the Commerce Department reported.

The 21 percent gain in new orders for transportation equipment in March was the biggest monthly increase since 21.2 percent in December 1988, the department said.

The overall 6.7 increase in durable goods orders in March follows a 2.3 percent gain in February that was also attributed to a strong showing in the transportation industry.

In January, durable goods orders plunged 10.5 percent.

Excluding transportation items, orders for durable goods were still up by a healthy 2.2 percent, the department said.

Excluding defense items, orders surged 7.5 percent, the best showing in

that category since a gain of 8.3 percent in September 1980.

Defense orders were off by 4.5 percent in March.

Total shipments of durable goods, meanwhile, increased by 1.5 percent in March after a 5.5 percent gain in February, and unfilled orders edged up 0.8 percent in March following a 0.5 percent decline in February, the Commerce Department said.

In other categories, March orders for:

-Non-defense items surged 14.9 percent.

-Capital goods industries jumped 11.5 percent.

-Primary metals increased 7 percent.

-Non-electrical machinery gained 1.6 percent.

-Electrical machinery increased 1.1 percent.

-30- 2295
#90114u0976 04/24/1990 ~United Press International
BEIJING (APRIL 24) UPI - An intgernational law conference dedicated to world peace degenerated into a shouting match Tuesday when Palestinians and Israelis traded insults and an archbishop from the Vatican obliquely denounced host China during a debate on human rights.

The panel discussion at the Great Hall of the People was among 21 being held this week by the 14th World Law Conference, sponsored by the World Peace Through Law Center, an international body of prominent jurists and attorneys.

The conference delegates from 65 nations and regions included South Korea, Israel and the Vatican, with which Beijing has no formal relations.

The meeting was originally scheduled for last July but was postponed following China's violent June 3-4 crackdown on the democracy movement.

The American chairman of the human rights panel, Ved P. Nanda, a professor of law at the University of Denver, defended the decision to meet in Beijing despite widespread charges of human rights and legal abuses after the crackdown.

''We came back thinking channels of communication should be left open,'' Nanda said.

Despite a rule barring the mention of specific countries in the debate, delegates took the opportunity to air national grievances.

A Palestinian delegate challenged an Israeli panel member's speech as ''propaganda for Israel'' and defended Palestine's right to exist.

''People are fighting against the atrocity of Israel,'' said the delegate amid shouts of protest.

An Israeli delegate jumped up and yelled, ''There is no such country as Palestine.''

Indian delegate Soli Sorabjee defended his nation's decision to keep British author Salman Rushdie's book ''The Satanic Verses'' off the shelves after offended Moslems rioted over its treatment of Islam.

His comments were hotly debated by Abdul Razak, a barrister for the Supreme Court in Bangladesh, who condemned India for its role in the escalating anti-Hindu conflict in India's northern Kashmir Valley.

''The right of speech has been taken away in Kashmir. This is a black day for India,'' Razak said.

The most passionate speaker was Archbishop Ernesto Gallina, secretary of state of the Vatican, who did not mention China but condemned totalitarianism and religious persecution in a veiled criticism of the host country.

''The excessive development of the state lends itself to human rights abuses,'' Gallina said.

''We do not accept it when the state behaves as if it itself was a church '' he said, decrying the ''omnipotence of censorship when one party tries to control religion by controlling expression.''

Gallina, who said he was attending as ''a representative of the pope and Roman Catholics all over the world,'' ended his speech by calling on international organizations to step up political pressure on nations abusing human rights.

China forbids contact with the Vatican by the country's Catholics and denies charges of religious persecution despite frequent reports of arbitrary arrests and imprisonment of Catholic priests and bishops.

Gallina is the highest Vatican representative to visit China since Philippine Cardinal Jaime Sin visited Bejing three years ago.

(APRIL 24) UPI - Discouraged by bearish Wall Street stock trading and another weakening of the Japanese yen, prices fell for the third consecutive day Tuesday on the Tokyo Stock Exchange.

The blue-chip Nikkei average of 225 selected issues, which lost 156.37 points Monday, fell another 177.69 points to 29,501.38.

The broader-based Tokyo Stock Exchange Index of all major listed shares, a 12.96-point loser Monday, dropped another 8.11 points to 2,193.09.

An estimated 480 million shares changed hands, up from the 338 million shares Monday.

Declines outnumbered advances 645 to 310, with 147 issues unchanged.

Traders said the 29.28 point drop in prices on Wall Street Monday and weakness in the yen contributed to the decline.

On the Tokyo Foreign Exchange, the U.S. dollar strengthened against the Japanese yen in quiet trading, closing at 158.15 yen, up 0.60 yen from Monday's close of 157.55 yen.

Analysts said investors were also reluctant to buy in large quantities ahead of the coming holidays.

Markets in Japan will be closed for three days beginning next Monday in a

string of national holidays known as Golden Week.

On the trading floor, Isuzu paced the actives, followed by Sumitomo Heavy Industries, Mitsui Engineering, Nippon Mining and Sasebo Heavy Industries.

Elsewhere, constructions and department stores fell as prices declined in most sectors.

Elsewhere in Asia, prices closed broadly lower in light trading on the Hong Kong Stock Exchange following Wall Street's fourth straight losing session.

The key Hang Seng Index, which lost 10.44 points Monday, fell 1.3 percent - or 41.02 points - to 3,015.84. Utilities dropped 42.87 points, financials lost 18.39, industrials shed 33.30 and properties plunged 101.85 points.

Turnover was light as 1.09 billion shares changed hands, compared with 1.32 billion shares Monday.

''Most of the decline was due to the weakening in overseas markets,'' said David Lavington, an analyst with Morgan Grenfeld. ''Both the New York and Tokyo markets showed losses and that certainly affected Hong Kong.''

''There has been a lot of international interest in investing in the Hong Kong market lately and that is begining to dry up,'' he said. ''I would look for stocks to continue to soften in the next few days.''

Prices dropped soon after the opening bell and by the end of the morning session issues were down by more than 34 points.

A brief afternoon rally failed to inject any optimism into the market and issues declined throughout the session.

Prices on the Singapore Stock Exchange plunged in moderate trading in line with the sharp losses in Tokyo and on Wall Street.

The blue-chip Straits Times Industrial Index, which lost 15.95 points Monday, fell another 25.60 points to 1,479.01. The narrower All Singapore Index fell 8.07 points to 405.27.

Turnover amounted to 54.06 million shares, compared with 36.28 million shares Monday.

Analysts said market sentiment was weakened by the bearish Wall Street trading and further depressed by Tokyo's performance.

Market watchers also said foreign investors were diverting to other

regional markets like Thailand and Hong Kong.

On the trading floor, Singapore Airlines paced the declining issues, followed by Development Bank of Singapore and Keppel Corp.

Shangri-la Corp. paced the advancing issues, followed by High and Low Co. and Parkway Holdings.

In Australia, prices closed lower on the Sydney Sharemarket for the fourth consecutive day in light trading.

The key All Ordinaries Index, which lost 8.9 points Monday, fell 1.1 percent or 16.1 points to 1,467.3 - its lowest level in 12 months.

Turnover amounted to a light 58.7 million shares, compared with 57.7 million shares Monday.

Analysts said declining shares abroad and concern that U.S. interest rates might rise depressed investor sentiment.

Domestic interest rates firmed amid speculation that the local housing industry was strengthening, which analysts said could slow the Australian government moves to ease interest rates.

On the trading floor, losses were shared evenly between industrials and resource stocks.

Among the blue chips, BTR Nylex lost 8 cents to $2.72, Lend Lease eased 10 cents to $12.85 and News Corp. lost 25 cents to $10.15.

In the mining scetor, WMC Mining slipped 2 cents to $4.75, MIM Mining lost 4 cents to $2.05 and CRA Mining fell 5 cents to $10.95.

Australian markets will be closed Wednesday for the ANZAC (Memorial) Day holiday. Trading will resume Thursday.

#90114u1021 04/24/1990 ~United Press International

BOSTON (APRIL 24) UPI - The Cosa Nostra has been compared to many things over the years. But the Elks Club?

Lawyer John Cicilline drew the comparison Monday in arguing that bail should be set for his client, reputed New England mob boss Raymond ''Junior'' Patriarca of Lincoln, R.I.

Cicilline - a Providence, R.I., lawyer who represented Patriarca's father, mob boss Raymond L.S. Patriarca, before his death in 1985 - said the Cosa

Nostra is similar to organizations like the Ku Klux Klan, the Nazi Party and the Communist Party because it espouses unpopular views.

Regarding a Mafia induction ceremony the FBI recorded on Oct. 29, Cicilline said the gathering was similar to a meeting of the Elks Club.

''We have men who gather together to discuss an organization, its rules, its philosophy,'' Cicilline said.

The ceremony, over which Patriarca presided, included sworn oaths by four inductees to kill anyone who turned on a ''family'' member. Cicilline said such ideas may be ''unpopular'' but are protected by constitutional guarantees to free speech.

Also, no plans for any specific crime were discussed at the ceremony, so Patriarca cannot be convicted of racketeering, Cicilline said.

U.S. District Magistrate Lawrence P. Cohen questioned how the First Amendment could be used to protect anyone who ''tells someone to go out and kill somebody.''

But Cicilline pointed to Supreme Court decisions that threw out convictions against KKK and Nazi leaders who advocated violence against minorities and political opponents.

Cohen took the matter under advisement.

Cicilline said his client will, if released on bail, pay the cost of a 24-hour FBI guard; turn in his passport and any firearms he may own; wear an electronic monitoring bracelet; agree to a phone tap and pay for it; and avoid communication with any of his reputed fellow mobsters.

The lawyer added that some Rhode Islanders are prepared to pledge $12 million worth of real estate to secure the release of Patriarca.

#90114u1072 04/24/1990 ~United Press International

PATON, IA (APRIL 24) UPI - Many of Paton's 291 residents crowded the town's two main street cafes Tuesday to watch hometown hero Loren Shriver blast into space on the space shuttle Discovery.

The cafes handed out free coffee and doughnuts to launch observers and there were tears, cheers and hugs when the shuttle finally took off.

Shriver's parents, Darrell and Jessie Shriver, and his sister, Dorla Neiderheiser, were among the more than 100 people packed in to the cafes to watch the launch.

Judy Wilson, operator of Paton Place Cafe, said the crowd stood and cheered when the shuttle blasted off then quieted during the tense seconds before the spacecraft achieved orbit.

''You could hear a pin drop,'' Wilson said. ''His parents held each other.''

The town was decorated with red, white and blue helium balloons, ribbons and giant banners to honor Shriver, wo was valedictorian of Paton high school Class of 1962 and has maintained close ties to the community.

Wilson, a high school classmate, said the area is ''floating'' in space along with the astronauts.

She said townspeople pray the mission goes perfectly because Shriver is the mission commander.

Wilson said she's already planning a big celebration to honor Shriver after he returns to earth.

Family members and friends journeyed to Florida two weeks ago only to be frustrated when the shuttle launch was delayed. This time, all but Shriver's mother-in-law, Helen Durbin of Jefferson, stayed put to watch the launch on television.

Wilson said there were groans when the launch was delayed for a few minutes Tuesday and then wild cheering and hugging when the spacecraft took off.

''Five high school boys sang 'The Star Spangled Banner,' everbody's wiping their eyes,'' Wilson said.

A huge banner saying ''Paton is behind you,'' hung from one building.

''Corn is king and Shriver is next in line,'' Wilson said, quoting from a line from a Florida newspaper article about Shriver. ''He's still a neighbor to everyone. He's such a terrific humble person.''

#90114u1086 04/24/1990 ~United Press International

(APRIL 24) UPI - The shuttle Discovery's countdown is winding its way toward this morning's blastoff. Discovery's five-person crew is aboard the

craft making last-minute adjustments for an on-time launch. If everything goes as planned, Discovery will deposit the revolutionary Hubble Space Telescope into space tomorrow.

Lithuania has NOT responded to a new Moscow offer that would allow the Baltic republic to maintain its declaration of independence if it freezes the act for two years and abides by the Soviet constitution during talks with Moscow. The proposal comes as an embargo implemented by Moscow takes its toll on Lithuanian industry.

An American military doctor who examined freed U-S hostage Robert Polhill says Polhill does NOT appear to have been physically assaulted by his captors during his 39-month captivity. The physician says Polhill expresses great anger at having been held by Islamic fundamentalists for more than three years.

An important pro-Iranian cleric in Beirut says he expects another U-S hostage to be freed soon. The clergyman linked the release to co-operation by the United States in meeting captors' demands for freedom of Arab prisoners in Israel and Kuwait. The White House has said that it will NOT engage in any deals to win the freedom of remaining hostages.

The heads of the world's two largest communist nations met today in Moscow. The official Soviet news agency says the talks between Soviet President Gorbachev and Chinese Premier Li focused on how the two can establish more effective economic bonds. Beijing has been critical of Gorbachev's reform system.

#90114u1097 04/24/1990 ~United Press International

(APRIL 24) UPI - Attorney General Thornburgh says 30 percent is a conservative estimate of the amount of savings and loans that went under because of criminal actions within the S-and-L industry. Speaking in Dallas yesterday, Thornburgh said he does NOT hold out much hope of recovering money from insolvent thrifts.

The Nepalese government has lifted a curfew it imposed last night after street violence in the capital city of Katmandu claimed at least 18 lives. There are NO reports of bloodshed overnight. Supporters of the new pro-democracy leadership say rising tempers in Nepal stem from activities by supporters of the recently ousted monarchy.

The standoff continues between inmates and prison officials at Strangeways jail in Manchester, Britain. Yesterday, guards snared one of seven ringleaders who've holed up in one section of the aging complex since April 1st. A spokesman for a national guard's group says the time it's taking authorities to regain the complex bodes negatively for the future.

Doctors in San Francisco are unsure whether a 14-month-old girl who ate cocaine will suffer long-term brain damage. The apparently accidental ingestion caused the toddler to suffer a heart attack and she lapsed into a coma. Officials say the girl showed ''slight neurological improvements'' yesterday.

Veterinarians at the Barnet Zoo in Syracuse, New York, expect a 36-year-old elephant who underwent a Cesarean section yesterday to be back on her feet soon. Doctors put the pachyderm named Babe under the knife to assist her in her on-again, off-again birthing process. The medical team discovered that Babe's calf did NOT survive the pregnancy.

#90114u1112 04/24/1990 ~United Press International

NEW YORK (APRIL 24) UPI - Oryx Energy Co. said Tuesday its first-quarter net income declined about 60 percent, although operating income more than doubled because of higher oil prices.

The Dallas-based company, formerly the exploration arm of Sun Co. of Radnor, Pa., said its first-quarter earnings were $40 million, or 38 cents a share, compared to $102 million, or 96 cents a share, in the year-earlier period.

Oryx reported first-quarter revenues of $469 million compared to $306 million for the same period a year ago.

The company said that the 1989 first quarter included an $85 million benefit from changes in accounting methods. Excluding the changes, Oryx said its 1990 first-quarter operating income increased 135 percent to approximately $40 million from the $17 million operating income acieved in the 1989 period.

''Operating income more than doubled, largely on the strength of higher oil prices,'' said Robert Hauptfuhrer, Oryx chairman and chief executive officer. ''This is also the first quarter that includes results from our international operations.

#90114u1124 04/24/1990 ~United Press International

INDIO, CA (APRIL 24) UPI - An earthquake measuring 3.6 on the Richter scale struck early Tuesday, the latest in a swarm of minor temblors to hit the area.

The 3.6 quake hit at 4:27 a.m., said Caltech Seismology Laboratory spokesman Robert Finn. The epicenter was pinpointed 11 miles

north-northeast of Indio, about 25 miles east of Palm Springs.

''This is the latest in a swarm of small earthquakes in that area that started in early April,'' Finn said.

The quake was not related to the two quakes that shook the wilderness area in the Joshua Tree National Monument early Monday, Finn said.

The wilderness quakes hit within a minute of each other and were both centered in the desert 18 miles north-northeast of Palm Springs, Finn said.

The first struck at 2:29 a.m. and measured 2.6 on the Richter scale. The second hit at 2:30 a.m. and measured 3.0.

There were no immediate reports of damages or injuries in any of the quakes.

#90114u1199 04/24/1990 ~United Press International

LOS ANGELES (APRIL 24) UPI - The Air Force, under pressure to reduce its budget, has proposed to jettison plans for deploying MX missiles aboard railroad cars and to cut B-2 bomber production by as much as half, the Los Angeles Times reported Tuesday.

Citing budget pressures and changes in the Soviet strategic threat, senior Air Force officials have urged Defense Secretary Dick Cheney to shift the weight of the nation's nuclear deterrent to bombers and submarines, the newspaper reported, citing unidentified sources.

The Air Force proposed abandoning the rail MX, but called for proceeding with a B-2 bomber force, although it would be scaled back to as few as 65 airplanes instead of the 132 the service had wanted.

The proposals were forwarded to Cheney last Friday by Air Force Secretary Donald Rice, the Times said.

The proposals come as the armed services maneuver to fit their spending priorities into budgets that will shrink by at least 2 percent annually for the next five years.

If Cheney and the White House approve the proposals, the cutback of land-based missiles would represent a significant shift away from the Bush administration's policy of modernizing the nation's nuclear arsenal on all fronts.

It also could set the stage for further superpower negotiations aimed at banning mobile missiles carrying more than one warhead.

As part of the recommended changes, the Air Force would delete a request for more than $2 billion that Cheney proposed to spend on the purchase of rail cars for the MX missiles in the year beginning Oct. 1, 1990.

''This is the old competition (within the Air Force) between intercontinental ballistic missiles and bombers, and the service has consistently tried to play down ICBMs,'' a Pentagon official told the Times.

''At some levels, this is a done deal,'' he said.

Other defense officials told the Times that the proposal was certain to face some resistance from Cheney and his top advisers who have argued that the United States must respond to the Soviets' continuing strategic nuclear modernization with an aggressive nuclear building program.

Despite Cheney's public calls for more spending on nuclear weapons, the Times said he has told the military services in internal planning documents that budgets for long-range nuclear weapons will fall by 3 percent to 5 percent annually over the next five years.

Cheney is scheduled to tell House and Senate committees on Thursday that he will recommend continued production of the B-2 bomber following a comprehensive review of the program and three other major aircraft programs.

But sources told the Times that Cheney is likely to adopt in some form the Air Force's proposal to scale back B-2 production.

#90114u1226 04/24/1990 ~United Press International

LONDON (APRIL 24) UPI - Six inmates still occupying Strangeways Prison set two wings of the jail ablaze Tuesday amid signs that guards are slowly advancing to forcibly break the siege that began 24 days ago.

Officials said the holdouts torched a pile of debris near the Victorian-era facility's central rotunda and the fire spread to two wings, one of which appeared to have been entirely gutted.

Flames licked out of windows and smoke belched from the roof of the most affected wing, despite efforts by firefighters. Two inmates sat on the roof of the burning building, one of them strumming a guitar and seemingly oblivious to the billowing smoke.

The six apparently started the fire to defend themselves against advancing

guards, who since Monday seemed to have considerably reduced the areas occupied by the holdouts by taking a more forceful strategy.

The inmates are the last of hundreds who began the uprising on April 1 in a protest over crowded and squalid conditions which inspired disturbances in 11 other institutions and prompted calls for an overhaul of Britain's overstressed penal system.

The British Broadcasting Corp. reported the six during the night offered to surrender in exchange for a decent night's sleep. Authorities responded by turning on sirens and searchlights and spraying jets of water over occupied areas of the complex in Manchester, 200 miles northwest of London.

Ivor Serle of the Strangeways Prison Officers Association said guards were slowly dismantling barricades and predicted the siege would be over within 36 hours.

''We are embarrassed because the general public cannot understand why these six inmates are holding us at bay,'' he said. ''I emphasize again the danger of our staff going in against barricades and booby traps ... but we know that we are winning and the conclusion is not too far away.''

Serle said the authorities managed to capture Alan Lord, a convicted murdered and ringleader of the rebellion, when he walked into a trap set for him on Monday as he went to meet negotiators.

The siege has been lengthy because the rebels stockpiled food and erected elaborate defenses against guards, scores of whom have been injured.

Officials say all lower floors have been blocked by debris and the prisoners are armed with knives, spears and bombs made from floor polish. They can drop iron fixtures on anyone trying to reach the upper floors, to which they have cut off all access by smashing the spiral staircases, officials say.

Repair costs are estimated to exceed $164 million, and officials have pledged the rebels, when captured, will spend the rest of their prison lives in solitary confinement.

#90114u1247 04/24/1990 ~United Press International

WELLESLEY, Mass. (APRIL 24) UPI - EG&G Inc. Tuesday blamed ''dramatically lower capital gains'' for a 12-percent drop in first-quarter earnings.

The electronics and engineering company earned $14.7 million, or 51 cents a share, in the period ended April 1 compared with earnings of $16.7 million, or 56 cents a share, in the first quarter of 1989.

Sales rose 43 percent to $561 million from $391 million in the year-earlier period.

Income from operations rose 6 percent to $22.9 million from $21.6 million in the 1989 first quarter. Income from operations was ''stronger than anticipated,'' Chairman John M Kucharski said.

(APRIL 24) UPI - The military physician treating freed American hostage Robert Polhill says Polhill is recovering rapidly from being held captive 39 months in Lebanon by Moslem extremists. However, Dr. Kenneth Koskinen says the 55-year-old professor remains ''very angry'' about his captivity. Polhill is undergoing medical checkups and debriefing in Wiesbaden, West Germany.

There's NO word on the cause of yesterday's Amtrak derailment in southeastern Iowa that left about 110 people injured. One witness says several of the passenger cars tipped over as the Chicago-bound train passed a switch on the Burlington Northern railroad tracks. National Tranportation Safety Board officials are on the site to begin their investigation.

Romanian television is vowing to pursue through legal channels those responsible for selling the uncensored videotape of the trial and execution of dictator Nikolai Ceausescu and his wife. The film was broadcast Sunday on a French television station. The video shows Ceausescu going to his death on Christmas Day, weeping with his hands bound behind his back.

Orders for durable goods last month rose well beyond analysts' expectations. The Commerce Department says orders for durable goods shot up nearly seven percent on strong demand for aircraft and cars. It's the largest increase in more than two years... and far beyond the one-percent hike expected by private analysts.

TORONTO (APRIL 24) UPI - Northern Telecom Inc. Tuesday reported first-quarter earnings of $79.1 million, or 30 cents a share, up 50 percent from $52.6 million, or 20 cents a share, in the first quarter of 1989.

Revenues at the telecommunications company rose to $1.5 billion from $1.38 billion in the year-ago period.

''We achieved double-digit revenue growth and a significant earnings increase despite continued competitive market pressures,'' said Paul G. Stern, vice-chairman and president.

The results reflected execellent sales penetration and expense control, Stern added.

Sales of central office switching equipment, transmission products, business communications systems and terminals increased, the company said, while cable and outside plant sales were flat.

Stern said sales outside North America showed the largest percentage increase, although businesses in Canada and the United States achieved sizable revenue growth.

Barring a significant economic downturn during 1990, Northern Telecom expects an increase in both earnings and revenue for the full year, Stern said.

Northern Telecom manufactures business communications systems and terminals, and transmission and cables products at plants in Canada, the United States, Malaysia and Europe.

LONDON (APRIL 24) UPI - Legislators have voted to allow medical research on embryos during the first 14 days after the seed of life is bred in a test tube, and were considering whether to reduce the legal time period in which abortions may be performed.

The Human Fertilization and Embryology Bill is two-pronged and culminates a six-year public debate in Britain.

Party leaders have granted members in the House of Commons a rare chance to make a personal moral vote - rather than along party lines - and they were to decide later Tuesday whether to reduce the legal 28-week limit in which abortions are permitted.

Surveys have showed that most members opt for 24 weeks, given medical advances that allow premature babies to be kept alive from an earlier age.

Anti-abortion activists argue that Britain has the most liberal abortion laws in Europe and say some 3 million abortions have been conducted since legalization in 1967.

They tried to press their claims by sending life-size plastic replicas of

a 28-week-old fetus to all 650 lower house members, including Prime Minister Margaret Thatcher.

Unlike their American counterparts, most leading British politicians accept abortion and proposals in 1988 to reduce the time limit sparked protests by thousands of women who said it would rekindle the trade of back-street abortionists.

Britain's maternal death rate dropped drastically after abortions were legalized and there have been no abortion deaths recorded in some years, according to the medical journal Lancet. In practice, few abortions are performed after 24 weeks, it said.

Members of Parliament late Monday voted, 364-191, to grant scientists continued rights to do research on embryos during their first 14 days of existence in a test tube, in keeping with a government commission that last year recommended research be allowed but with more safeguards.

The debate in Parliament on the issue was emotional, with one anti-research member comparing embryo tests to experiments done by Nazi doctors on inmates of World War II concentration camps.

Current prenatal tests are done after a fetus is within a woman's uterus. Anti-research activists argued that in vitro work can be a mere prelude to killing a living being because if an abnormality is found, the embryo is often destroyed.

Health Secretary Kenneth Clarke said he did not recognize an embryo as being entitled to protection before 14 days of life. More research would help couples with inheritable defects have healthier babies and bring knowledge in the areas of infertility, congenital diseases, miscarriages, contraception techniques and genetic or chromosomal abnormalities, he said.

''We all share a moral duty to respect and protect the sanctity of human life,'' Clarke said. ''We also all share a moral duty to alleviate suffering and to fight against disease. In my view a vote in favor of properly regulated research for sound medical reasons is compatible with both these duties.''

After the voting the bill will go before the House of Lords, which can tinker with it but not veto it.

BELGRADE, YUGOSLAVIA (APRIL 24) UPI - A court acquitted Yugoslavia's most prominent political prisoner, Azem Vllasi, Tuesday of charges he had fomented riots by ethnic Albanians aimed against the Serbian population of

Kosovo province.

Vllasi, 41, former leader of the Kosovo ruling Communist Party, was immediately released from prison in Titova Mitrovica, 190 miles south of Belgrade, the Kosovo provincial court announced.

Vllasi and other 14 business executives, all ethnic Albanians, had faced sentences ranging from 10 years in prison to death penalties under charges of ''organizing and inspiring mass demonstrations'' and a general strike in Kosovo that led to riots in March 1989 leaving at least 25 people dead.

The acquittal by the five-man jury of the court was seen by Western diplomats in Belgrade as a gesture of good will by Serbia's Communist leadership acting under pressure from human rights activists.

Numerous organizations have charged the Serbian leadership with violating human rights of ethnic Albanians.

In a similar move of good will to improve its image of hard-line Communist nationalists, the Serbian leadership last week lifted emergency measures that had been imposed some 13 months ago in southeastern Kosovo province.

In Kosovo, 1.7 million ethnic Albanians outnumber 200,000 orthodox Christian Serbs, who otherwise are a majority in the Yugoslavia.

WIESBADEN, WEST GERMANY (APRIL 24) UPI - It appears that several of the Western hostages held by Moslem extremists, including at least two Americans, are being held together in southern Beirut, a U.S. official said Tuesday.

The U.S. official at Wiesbaden, where freed American hostage Robert Polhill is undergoing medical examination and debriefing at a U.S. military hospital, said the hostages were regularly moved to new sites in the predominently Shiite southern suburb of the Lebanese capital.

He said Polhill was held in the same room with fellow Beirut University College professors Alann Steen and Jesse Turner. All three were taken hostage 39 months ago.

''They were in a building with other hostages,'' he said, adding he did not know who the hostages were and whether any were Americans. There are 17 Western hostages, including at least seven Americans, believed still held in Lebanon.

The official, who asked not to be identified, said it would be possible for U.S. intelligence officials to identify at least one specific location at which hostages have been held.

''We know they are held in an area of Beirut that is strongly Shiite. They are moved around in this area,'' he said. Answering a question, he confirmed he meant southern Beirut.

''But they are regularly taken to other buildings. The people who are holding the hostages are professionals - they are very good at what they do,'' he said.

''They are not moved around in plain sight,'' he said. He would not confirm recent speculation coffins had been used to transport hostages from one location to another.

He said the hostages were apparently held by various clans of the Moslem fundamentalist Hezbollah group.

He said hostages were often bound, and did not usually see the faces of their captors.

Asked whether he thought it possible all hostages held in Lebanon could be

freed soon, he said ''I think we can be hopeful of a release. I believe an Iranian minister said this could happen by the end of the year.''

''I suppose the release of Mr. Polhill is a good sign,'' the U.S. official said. He categorically denied the United States administration had contacted the hostage-takers.

''There is no American contact with the groups,'' he said.

#90114u1340 04/24/1990 ~United Press International

TORONTO (APRIL 24) UPI - TransCanada Pipelines Ltd. Tuesday reported first-quarter earnings of $41.8 million, or 27 cents a share, up from $20.9 million, or 14 cents a share, for the year-ago period.

Revenues at the gas transportation company fell to $745.6 million from $782.3 million in the first quarter of 1989.

The company said its results reflected a combination of higher interest income, lower non-utility financial charges, reduced income tax expense and a higher approved rate base.

TransCanada said deliveries of natural gas totaled 411.1 billion cubic feet in the first-quarter, up 4 percent from a year ago. The company attributed the increase to strong export sales, which rose 34 percent from 1989 levels.

Improved exports were offset by warmer than usual weather during the quarter which resulted in a slight decrease of deliveries to Canadian customers, the company said.

TransCanada owns and operates a natural gas pipeline extending from the province of Alberta to Quebec and to export points along the Canada-United States border. The company also has interests in other pipeline, gas marketing, energy and supply operations.

#90114u1374 04/24/1990 ~United Press International
MOSCOW (APRIL 24) UPI - Thousands of Armenians gathered in Yerevan's central square Tuesday for a day of mourning to mark the 75th anniversary of the massacre of at least 1 million Armenians.

A spokesman for the nationalist Armenian Liberation Movement, reached by telephone from Moscow, said more than 200,000 people had gathered in the Square of Freedom in Yerevan by midday, but the figure could not be confirmed independently.

The spokesman said thousands more were kept from entering the square.

Soviet officials prevented foreign reporters from traveling to Yerevan this week ''at the request of the local authorities.'' No other explanation was given.

Tuesday was declared a worldwide day of mourning for the Armenian diaspora. Ceremonies were held in Armenian communities around the globe to mark the genocide attributed to the Turks before and during World War I, culminating in April 1915.

In Yerevan, the capital of the Soviet republic of Armenia, piles of flowers were laid at a monument to the dead after prayers, a procession and speeches.

#90114u1380 04/24/1990 ~United Press International
WASHINGTON (APRIL 24) UPI - The Supreme Court, in a case involving mass-murderer Ronald Simmons, ruled 7-2 Tuesday that a convict could not bring a lawsuit to stop the execution of another prisoner who chose not to appeal his death sentence.

The court, in an opinion by Chief Justice William Rehnquist, said the Arkansas inmate, Jonas Whitmore, does not have legal standing to bring the case.

Rehnquist noted that the court has received a number of requests for third party intervention to stop executions, most notably that from the mother of Gary Gilmore, and has barred them.

Quoting from a 1901 decision of the court, Rehnquist said, ''However friendly he may be to the doomed man and sympathetic for his situation; however concerned he may be lest unconstitutional laws be enforced, and howerver laudable such sentiments are, the grievance they suffer and feel is not special enough to furnish a cause of action in a case like this.''

Justice Thurgood Marshall, joined by Justice William Brennan, dissented. Marshall argued the Constitution requires that ''state provide appellate review of capital cases notwithstanding a defendant's desire to waive such review. To prevent Simmons' unconstitutional execution, the court should relax the common law restriction on next-friend standing and permit Whitmore to present the merits question on Simmons' behalf.''

The case stems from a decision by Ronald Simmons not to appeal his death sentence.

Simmons, on Dec. 28, 1987, went on a rampage through the town of Russellville, Ark., killing two people and wounding three others. After he was captured, police searched his home in Dover, Ark., and found the bodies of 14 members of his family.

In separate trials, he was convicted of all the murders and sentenced to death. He then waived his right to appeal.

However, Whitmore, another deathrow prisoner, sought to intervene and stop the execution. While courts denied Whitmore's intervention, the Supreme Court granted a stay of Simmons' execution, which had been scheduled for March 16, 1989, pending review of the case.

88-7146 Whitmore, individually and as next friend of Simmons vs. Arkansas et al.

#90114u1384 04/24/1990 ~United Press International

EAST BERLIN (APRIL 24) UPI - The World Jewish Congress will hold its first conference on German soil next month to coincide with the 45th anniversary of the Allied victory in Europe and the collapse of the Nazi regime, a spokesman said Tuesday.

Hermann Simon, the deputy chairman of the East Berlin Jewish Community, said, ''It was from Berlin that the greatest crime in human history had been concocted - the shoa, the murder of the Jewish people.

''The staging of the conference in Berlin, jointly with the European Jewish Congress and the Central Council of Jews in Germany would serve to remind German citizens of more recent history, particularly in view of developments now occuring in Germany,'' he said.

During the planned World Jewish Congress from May 6-8 in West Berlin, a series of events are planned, including a memorial service in front of the lakeside Wannsee Villa where Nazi leaders in early 1941 drew up the blueprints for the destruction of European Jewry. Germany surrendered on May 7, 1945.

Israel has stipulated that diplomatic ties with East Germany was conditional on East Berlin's recognition that it also bore a moral responsibility for the Holocaust and a readiness to pay some form of compensation.

Late Monday, East Germany announced plans to give money for the first time to support survivors of the holocaust.

The East German News Agency ADN reported late Monday that the new coalition government headed by Prime Minister Lothar de Maiziere will give $3.65 million to a foundation which helps survivors.

The de Maiziere government has pledged a new era in relations with Israel, and has strongly condemned the attitude of the former hard-line Communist leadership toward the Jewish state.

In an unprecedented move, a declaration was read out when the newly constituted East German Parliament was convened this month, asking the Jewish people for forgiveness for what had happened during the Nazi era.

West Germany has paid over $47 billion in reparations to Israel and the Holocaust survivors.

#90114u1385 04/24/1990 ~United Press International

WIESBADEN, WEST GERMANY (APRIL 24) UPI - Freed U.S. hostage Robert Polhill is recovering rapidly from being held captive 39 months by Moslem extremists but is still ''very angry,'' the military physician treating him said Tuesday.

''He can certainly rationalize the three years he spent there and is very angry about it,'' said Kenneth Koskinen, the flight surgeon who directed the medical evacuation team that flew Polhill from Damascus to a U.S. base in West Germany Monday.

''He said that once he gave up that anger (during his captivity), what would be left? He would become a vegetable,'' Koskinen said, adding Polhill's sense of humor also helped him.

Polhill, who is undergoing medical tests and debriefing at a U.S. military

facility in West Germany, was reunited Tuesday with his two sons from a previous marriage, Brian, 23, and Stephen, 26, who arrived in Wiesbaden Tuesday morning.

A U.S. official said Polhill, his current Lebanese-born wife, Ferial, and his sons had lunch at the medical center.

''They were alone in a room ... an accordionist was also there, playing for them,'' the official said.

Koskinen described Polhill as ''physically fatigued'' and ''ravenous'' but apparently continued to deny him the hot fudge sundae he craved. Instead, Polhill's dinner Monday night included broccoli, the vegetable publicly derided by President Bush.

''That's something (a sundae) we plan to give him as soon as his medical condition allows it,'' Koskinen said.

He said Polhill, a diabetic who needs a daily dose of insulin, ''was afforded visits by a physician while in captivity'' and said there is no evidence the 55-year-old professor was physically assaulted.

Asked whether Polhill received a special diet during captivity, Koskinen said, ''Yes, eat what you get.''

He said Polhill appeared to be making rapid mental and medical progress, and is ''in good spirits considering his ordeal.''

Koskinen said Polhill's captors confined him to a room and he had no idea what was going on in the world.

''He is an avid sports fan and asked a lot of questions about the Super Bowl,'' another U.S. official said.

The official said Polhill, who is being interviewed by U.S. intelligence officials ''indicated willingness to talk to the debriefers but he is concerned about endangering fellow hostages.''

''It is too early to say whether this is affecting his willingness to cooperate,'' he said.

Polhill is staying in a section of the medical center known as Freedom Hall, which has accomodated several U.S. hostages released in the Middle East.

As Polhill recuperated, Iran claimed credit for arranging his release and said ''it is now the turn of the other side'' to release Palestinian and Iranian prisoners held by Israel and its allies in Lebanon.

The White House again ruled out dealing with Tehran or the hostage takers.

In Beirut Tuesday, pro-Iranian cleric Seyyed Hussein Musawi said in an interview with the Lebanese leftist Voice of the People radio a U.S. hostage would be freed soon but he linked the release to the captors' demand to free Arab prisoners in Israel.

Musawi is the leader of the Iranian-backed Islamic Amal and is said to have some influence over some of the captors in Lebanon.

Also Tuesday, hard-line Iranian newspaper Jomhuri Islami urged the West to reciprocate for Polhill's release by pressuring Israel and Lebanese Christian forces to stop ''kidnapping'' Lebanese. Israel holds Palestinians and Lebanese Moslems taken prisoner in military operations.

Ali Akbar Velayati, Iran's foreign minister, told Cable News Network on Monday another Western hostage could be released soon but hinted further releases would be tied to gestures of good will by Washington.

The International Committee of the Red Cross said it had received information two Swiss Red Cross workers captured in Lebanon last year could be freed by Friday.

Polhill was released in Beirut Sunday and driven to the Syrian capital of Damascus, handed over to U.S. officials and flown to Rhein-Main.

#90114u1394 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - Sen. Robert Byrd, D-W.Va., said Tuesday he opposes extending new economic benefits or food aid to the Soviet Union as long as it is ''starving'' the breakaway republic of Lithuania.

Byrd spoke on the Senate floor as President Bush and congressional leaders met at the White House to review possible U.S. responses to the Soviet Prsident Mikhail Gorbachev's crackdown on Lithuania's independence moves.

After that meeting, lawmakers said Bush had not made a decision about possible retaliation.

Byrd, a former Senate Democratic leader, said ''none of us wants a crisis in Lithuania'' and acknowledged fears a harsh U.S. response could endanger Gorbachev's reform policies. But he called on his colleagues to stop ''hand-wringing'' and stand up for the ''principles that we believe in.''

Specifically, he said most-favored nation trade status should not be extended to the Soviet Union. Byrd did not specify what kind of food aid

should be cut, but a spokeswoman said support for grain sales should be considered.

''There comes a time that we dare not stand mute in articulating and acting upon principles that are the foundation stone of this nation,'' Byrd said. ''The overriding principle is the self-determination of independent peoples.''

Byrd said Lithuania, Estonia and Latvia differ from other Soviet republics with independence movements because they were sovereign nations ''forcibly incarcerated ... through a cozy arrangement between Hitler and Stalin.''

''If we are sending messages to the Soviet leadership, then here is one to think about. I would oppose extending new economic benefits and rewards to the Soviet leadership at the same time it is starving Lithuanians of food and fuel,'' he said.

''Should we be providing any kind of food assistance to the Soviet Union while food is being used as a weapon against Lithuania? I think not,'' Byrd said.

PORTLAND, OR (APRIL 24) UPI - A Lithuanian seaman said he jumped a Soviet fish processing ship two weeks ago because he feared retribution as the only Lithuanian aboard the vessel.

Valis Budreika said Monday he left the 280-foot Kushka as it was docked at the Port of Portland's Terminal 2 in early April to take on supplies.

Budreika, 27, said he feared for his safety because of Lithuania's attempts to gain independence from the Soviet Union.

''The crew did not come out against him, but they were talking about him '' said Al Tekorius, a Lake Oswego businessman acting as Budreika's translator.

City Commissioner Bob Koch, a second-generation Lithuanian-American, said he has quietly harbored Budreika since April 9. During a City Hall news conference, he said he at first tried to keep the matter secret.

''It's very personal for me,'' Koch said, explaining that his great-grandfather fled Lithuania under similar circumstances almost a century ago. ''It has nothing to do whatsoever with my elective responsibilities.''

The commissioner said Sen. Mark Hatfield, R-Ore., was trying to win

political asylum for Budreika. A spokeswoman for Hatfield's Portland office could provide no details about that effort.

Koch said the Soviet army drafted Budreika from Lithuania when he was 19 and he served for two years. He then became a seaman based in Siberia, where his Soviet wife and 1-year-old son remained.

Budreika said most of the crew of about 85 was allowed to venture off the ship to go shopping when the Kushka arrived in Portland for an unscheduled stop. But he never returned.

''He just wandered around this side of the river, sleeping on park benches '' Tekorius said. ''He didn't want to go to the authorities before the ship left; otherwise, he feared he would be returned to the ship.''

The ship left Portland on Friday, Apr. 6. Budreika said he feared he would be jailed if he bothered authorities on the weekend. He waited until the next Monday to turn himself in to Portland police.

#90114u1424 04/24/1990 ~United Press International

NEW YORK (APRIL 24) UPI - James Stewart, last surviving male movie star of Hollywood's pre-World War II golden years, has been honored by his co-stars at a glittering Film Society tribute as an actor who is ''more than the sum of his parts.''

''He's an actor who has won the love and respect of his peers as well as a vast audience, a man who has truly led a wonderful life, an actor who is more than the sum of his parts,'' said Roy L. Furman, president of the society as he conferred the 1990 Film Society Tribute Award Monday on the 81-year-old Stewart at Avery Fisher Hall.

''I think he's the happiest man in the world tonight,'' observed Dorothy Lamour, who played a hula girl to Stewart's clown in ''The Greatest Show on Earth'' in 1952.

Furman led Stewart's colleagues - Lamour, Maureen O'Hara, June Allyson, Jack Lemmon, Kim Novak, George C. Scott, Janet Leigh and Robert Stack - in praising the spartan virtues of Stewart who began his Hollywood career in 1934 and made his last film in 1981.

If he had not taken five years out of his career to fly U.S. Air Force bombers in World War II, he might have made even more than 70 films, O'Hara noted, adding that ''Jimmy was always convincing in whatever role he played.''

Scott suggested that ''nobody could ever have played Jimmy's roles but

Jimmy Stewart.''

When Stewart came on stage from a box he shared with his wife, Gloria, at the conclusion of the evening, he seemed overwhelmed with emotion. He spoke briefly, calling it a ''wonderful, wonderful night that has been more than I ever dreamed of,'' and voicing his gratitude to his colleagues and audience.

''You mean the world to me,'' he said. ''I've been such a lucky man. I thank God for all of you, and when he takes each of your lives into his editing room, I wish he will be as good to you as he has been to me.''

Clips from 23 films shown at the tribute, an annual benefit for the Film Society, proved the versatility of the awkward beanpole of an actor whose drawl marked him as a native Hoosier wherever the setting of the movie.

The audience's enthusiastic applause for each clip was especially thunderous for Stewart as an idealistic junior congressman in ''Mr. Smith Goes to Washington.'' Second in decibels was the greeting given the late Grace Kelly when she appeared on screen with Stewart in ''Rear Window.''

From the loony murderer in ''After the Thin Man'' and Eleanor Powell's crooning, dancing sweetheart in ''Born to Dance'' to the deceptively mild-mannered sheriff in ''Destry Rides Again'' and the heroic Lindbergh in ''The Spirit of St. Louis,'' Stewart created a gallery of unforgettable characters, seemingly without artifice.

''Jimmy has a love affair with the camera,'' said Stack. ''He goes right through the lens, onto the screen and into people's hearts. There is no fakery. He is what you see.''

Lemmon said Stewart's ease before the camera was such that ''I never saw him in a scene in which I felt he had ever spoken it or acted it before.''

''He has touched us, exposed us, made us think,'' Lemmon said. ''He has enlightened us.''

Allyson called him ''the most thoroughly prepared actor I ever worked with'' and Novak described him as ''a genuine innocent who communicates with a few words, deep feeling and the truth.''

''He seemed to me one of God's tall redwood trees standing in a make-believe forest,'' Novak said.

Scott, who admitted to learning a great deal about acting from Stewart, thanked him for the roles of Jefferson Smith, Tom Destry, Elwood P. Dowd (''Harvey'') amd most of all for George Bailey (''It's a Wonderful Life'') and ''for teaching us that what we do can make a difference.''

''You've lifted our hearts and enriched our spirits. Thank you,'' Scott concluded.

#90114u1432 04/24/1990 ~United Press International

BRUSSELS, BELGIUM (APRIL 24) UPI - Secretary of State James Baker will meet with NATO ministers in Brussels on May 3 before joining talks on German unification in Bonn, officials said Tuesday.

Baker and NATO representatives will discuss developments in Central and Eastern Europe, including German unification. They also will review progress of the Conventional Forces in Europe talks and discuss the Conference on Security and Cooperation in Europe, a NATO spokesman said.

The secretary of state also will meet May 3 with the European Commission, the executive agency of the 12-nation European Community, EC officials said.

Baker and the foreign ministers of France, Britain and the Soviet Union meet on May 5 in Bonn with their counterparts from East and West Germany, for the first ministerial meeting in the ''two-plus-four'' process on German unification.

NATO allies of the United States are concerned about slow progress of the conventional forces talks, being held in Geneva between the 16 NATO countries and seven nations of the Warsaw Pact. On Monday, British Foreign Secretary Douglas Hurd, in Brussels, cited a ''stiffening'' of the Soviet negotiating position.

The main sticking point in the conventional forces talks is aircraft levels, with the Soviets seeking a level far higher than deemed acceptable by NATO.

A summit of the 35-nation Conference on Security and Cooperation in Europe is expected this fall, but the United States does not want such a meeting if a conventional forces treaty is not ready to be signed.

#90114u1454 04/24/1990 ~United Press International

HOLLYWOOD (APRIL 24) UPI - ''Teenage Mutant Ninja Turtles'' led a rampaging movie box-office hit parade for the fourth consecutive week with a gross of $9.7 million in 2,377 theaters.

The violent action-comedy has compiled a blistering $89 million, insuring it will burst through the magical $100 million mark within the next two or three weeks.

The most surprising hit currently in release is the Richard Gere-Julia Roberts romantic comedy ''Pretty Woman,'' a Pygmalian story of a rich businessman smitten by a beautiful streetwalker.

''Pretty Woman'' dropped only 18 percent last week - ''Turtles'' dropped 30 percent - to hold onto the No. 2 position in the weekly tabulations with a tally of $8.3 million. Showing on 1,707 screens, it has registered $71.7 million in five weeks.

No. 3 was ''The Hunt for Red October,'' the submarine thriller starring Sean Connery as a Soviet U-boat captain, which inched up on the $100 million circle with an eight-week gross of $95 million.

As tabulated by Entertainment Data Inc., it pulled in $3.5 million last week.

Newcomer ''Miami Blues,'' starring Alec Baldwin as a sometimes comedic ex-convict on a personal crime spree stalked by a weary, out-of-shape cop played by Fred Ward, opened in 832 situations with a gross of $3 million. It was No. 4.

''Earnest Goes to Jail,'' the latest of Jim Varney's misadventures, took in $2.9 million on 1,918 screens to drop a click to No. 5 last week. In three weeks it has posted a $17.3 million gross.

The only other new release to make the top 10 in the rankings was ''Lisa '' a tense drama of a teenage girl whose playful telephone calls imperil her life. Making its debut in the No. 10 slot, ''Lisa'' earned $1.1 million in 287 theaters.

Academy Award-winner ''Driving Miss Daisy'' continued to stay in the top 10 in the No. 8 position with a gross of $2 million. In 19 weeks it has

grossed $93.5 million.

It was a smashing week at the box office as the 23,000 theaters in North America coined $95.6 million, far ahead of the equivalent week in record-setting 1989, which registered $66.5 million.

To date this year all theaters have grossed $1.2 billion as opposed to $1.1 billion for the same number of weeks in 1989.

The top 10, last week's gross, total gross, weeks in release:

1. ''Teenage Mutant Ninja Turtles,'' $9.7 million, $89 million, 4 weeks.
2. ''Pretty Woman,'' $8.3 million, $71.7 million, 5 weeks.
3. ''The Hunt for Red October,'' $3.5 million, $95 million, 8 weeks.
4. ''Miami Blues,'' $3 million, 1 week.
5. ''Ernest Goes to Jail,'' $2.9 million, $17.3 million, 3 weeks.
6. ''The First Power,'' $2.5 million, $15.6 million, 3 weeks.
7. ''Crazy People,'' $2.4 million, $7.8 million, 2 weeks.
8. ''Driving Miss Daisy,'' $2 million, $93.5 million, 19 weeks.
9. ''I Love You to Death,'' $1.9 million, $10.9 million, 3 weeks.
10. ''Lisa,'' $1.1 million, 1 week.

#90114u1474 04/24/1990 ~United Press International

KATMANDU, NEPAL (APRIL 24) UPI - Prime Minister Krishna Prashad Bhattarai said the army and police chiefs Tuesday affirmed their support for Nepal's

new multi-party government, but he accused King Birendra of failing to fully cooperate in ending violence that claimed at least 18 lives.

Street battles pitting supporters of Nepal's ousted hard-line regime against police and vigilante gangs broke out Monday in Katmandu. While the capital was calm Tuesday, with Bhattarai affirming he was in control, a curfew was imposed for a second night.

A citywide curfew ran from 8 p.m. Monday to 6 a.m. Tuesday. There were no immediate reports of violence during that period, and on Tuesday people went to work as usual or shopped and tourists viewed the ancient monuments of the city amid light patrolling by armed police.

Authorities decided, however, to impose for a second night the 10-hour curfew. Violators of the curfew risked being shot. The curfew announcement on state-run radio sparked a late-afternoon buying spree by residents anxious to get home before it went into effect.

On April 16, the partyless panchayat government was dismissed when Birendra bowed to six weeks of pro-democracy demonstrations organized by Bhattarai's Nepali Congress Party and the seven-party United Left Front coalition against a 29-year-long ban on political parties.

At least 52 people were killed in the movement leading up to the legalization of political parties.

Bhattarai was sworn in April 18 in as head of an interim government composed of his party and the leftist alliance. Its supporters charged that the unrest Monday was provoked by unnamed elements seeking to destabilize the new administration and restore the partyless system, under which the Harvard-educated Birendra enjoyed absolute power.

In an interview with United Press International, Bhattarai disclosed that he threatened to resign during a meeting he held with Birendra late Monday to discuss the turmoil that had convulsed the capital of the Himalayan nation throughout the day.

''I said to him point blank that while taking the oath of office, he had assured me of his fullest cooperation and since I find it is not forthcoming to the extent it is necessary, I want to resign from the government,'' Bhattarai said, without elaborating.

''Upon hearing this, the king said I should talk to the chief of the army and also the inspector general of police ... and find out a solution of this trouble,'' Bhattarai recounted.

He said he met with Army Chief of Staff Gen. Sachit Shamsher Rana and Police Inspector General Hem Bahadur Singh and the pair affirmed that they

would help the government preserve stability.

''They will completely cooperate with us,'' Bhattarai said.

Nepali Congress Party sources said Bhattarai met later in the day with Birendra, but they provided no details of the session.

Bhattarai said that unspecified ''strict measures'' had been taken to stabilize the situation, adding that ''I hope with these new measures, we will succeed in bringing normalcy in the country.''

One of the steps was apparently the decision to reimpose the curfew.

#90114u1482 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - Congressional watchdogs urged the Navy Tuesday to suspend its ''home-porting'' program until the costs are re-examined and New York's mayor insisted a Staten Island port project should be dropped.

A Navy official told a meeting of two House Armed Services subcommittees that while the Navy continues to support the plan to disperse the fleet, all Navy ports - including the new ones - will compete on equal footing in a study of facilities that might be closed.

Martin Ferber, head of the General Accounting Office's National Security Division, told the seapower and installations subcommittees that the Navy should hold up for the moment.

''Before further monies are spent on the home ports, the total costs ... should be estimated and a comparison made to the costs of keeping the ships and existing ports and-or improving existing port facilities to handle newer ships,'' said Ferber.

The GAO, which does investigative work for Congress, also forecast that the project will cost about $1 billion once all sources of money are considered. Congress capped appropriations for the project at $799 million but money from state and local governments and from the Pentagon's base closure account will raise the ultimate cost.

Ferber also said the Navy has not reassessed its plans in light of the likely reduction of the fleet in coming years.

When it was trying to reach a 600-ship total, the Navy decided to use the ''home porting'' strategy to spread the fleet around, a move that combined military utility with incentives to lure support from more lawmakers whose areas would be affected. But with the decline of the Cold War and harsh

budget realities, the plan has come under pressure.

Two home ports have been scrapped - Galveston, Texas, and Lake Charles, La. Work is well under way at Staten Island, N.Y.; Everett, Wash.; Ingleside, Texas; Pascagoula, Miss.; Mobile, Ala., and Pensacola, Fla. Of the $799 million total, $488 million has been obligated and almost $300 million has been spent.

While members of Congress from five of the areas argued the project should continue to completion, the New York delegation was deeply split over the Staten Island port, where $133 million of a projected $193 million already has been spent.

Sen. Alfonse D'Amato, R-N.Y., testified that junking the project would be ''harmful to the Navy, harmful to New York and harmful to national security.''

But Mayor David Dinkins of New York said opposition has grown to the point that 11 members of the congressional delegation and much of the city council oppose the Staten Island port.

He noted the battleship Iowa, a 1,500-man vessel, will be retired rather than rebuilt, knocking out the major portion of the personnel destined to be based at the port.

''The time has come to protect and preserve domestic security,'' he said, arguing the money could be better spent to fight drug abuse, crime, and infant mortality, or to ease the plight of the homeless and illiterate.

The depth of the split was also evidenced by the testimony of Rep. Susan Molinari, D-N.Y., who last month won the seat formerly held by her father.

''Despite the protests of our mayor and the misinformation being spread ... by specialized anti-nuclear and anti-military groups, the truth is that a vast majority of our residents favor the siting of a Navy home port in Staten Island,'' she said.

But Rep. James Scheuer, D-N.Y., said, ''We don't need it. We don't want it and it's irrevelant to our national security.''

The Iowa is to be replaced at Staten Island by the cuiser Normandy. Mayor Betty Turner of Corpus Christi, Texas, told the panels, ''If the Normandy is not welcome in New York, we would welcome the chance to find them a berth.''

#90114u1485 04/24/1990 ~United Press International

BONN, WEST GERMANY (APRIL 24) UPI - Chancellor Helmut Kohl and East German Prime Minister Lothar de Maiziere held the first summit of freely elected German leaders Tuesday, pledging to complete a key step toward unification in early July.

West German government spokesman Dieter Vogel told reporters the two leaders met for a three-hour private meeting at Kohl's Chancellery to discuss the broad outlines of the unification process.

The first of a series of high-level meetings designed to lead to German unification next year came a day after the West German government bowed to East German demands and agreed on a 1-to-1 exchange rate as part of the planned German currency union.

''The chancellor and prime minister agreed to reach the goal of this union as quickly as possible,'' Vogel said in a statement.

''Both expressed the determination of their governments that this economic monetary and social union can go into effect July 2 of this year,'' the statement said.

The monetary, economic and social union is a key step toward unification of the country, split since the end of World War II. If West Germany's plans work out, it will be followed by a political union next year and all-German elections in the fall of 1991.

''The governments and the negotiating commission will do everything to carry out the necessary preparatory work as fast as possible,'' Vogel's statement said.

It was the first meeting between Kohl and de Maiziere, both members of the Christian Democratic Party, since the East German won his nation's first democratic elections with Kohl's strong backing.

Vogel said the actual negotiations on the monetary, economic and social union will begin in East Berlin Wednesday.

Senior aides of the two government leaders will discuss Bonn's proposal for the general conversion rate of one strong West mark for one weak East mark for wages, pensions and a large proportion of personal savings as part of the monetary union.

Diplomats said the speed of the unity process will depend on negotiations among the German states and the four World War II victors who retain special rights and responsibility in Germany: the United States, the Soviet Union, Great Britain and France.

The foreign ministers of the six states will meet in Bonn May 5 to discuss

the security aspects of unification, such as the membership of a unified Germany in military alliances.

West German Foreign Minister Hans-Dietrich Genscher and East German Foreign Minister Markus Meckel met in Bonn Tuesday to discuss preparations for the six-power meeting and security problems posed by unification, officials said.

De Maiziere flew to the Bonn-Cologner airport for the brief visit and went by helicopter to the Chancellery. He was accompanied by East German Parliament Speaker Sabine Bergmann-Pohl, who went to a 70th birthday party for West German President Richard von Weizsaecker.

The West German delegation to the East Berlin talks Wednesday will be headed by Hans Tietmeyer, the director in charge of international relations for the Bundesbank, the West German central bank. He is Kohl's personal adviser on questions relating to the monetary union.

The West German proposal made Monday for the mark conversion rate was more favorable for East Germany than the plan of the Bundesbank, which had recommended that wages, pensions and most East German assets and liabilities except small savings accounts in general be exchanged at the rate of 1 West mark for 2 East marks.

The East German government called the plan ''an interesting negotiating offer'' and ''an important step to end the unfortunate discussion on this controversial matter.''

In his state of the nation address to parliament last week, de Maiziere demanded a general 1-to-1 rate.

His call reflected the widespread feeling in East Germany that the original Bundesbank proposal broke promises made by Kohl in speeches in East Germany in support of de Maiziere's Christian Democrats during the East German election campaign and would make East German workers second-class citizens in a unified Germany.

The Bundesbank had feared that a general 1-to-1 rate would pose the danger of inflation. It also believed a 1-to-1 conversion rate for wages would make East German industry even more non-competitive in world markets and lead to unemployment.

#90114u1509 04/24/1990 ~United Press International

MOSCOW (APRIL 24) UPI - Baskin-Robbins, known for its 31 ice cream flavors, including such exotic varities as raspberry truffle and pink bubblegum, signed a $30 million deal Tuesday to build a plant in Moscow -

where only chocolate and vanilla are now generally available.

Despite the lack of flavors, locally produced Russian ice cream is considered among the best in the world. Baskin-Robbins thinks it can find a market by offering variety and alleviating shortages.

''We have no doubt our ice cream will be very popular with Soviet consumers,'' Baskin-Robbins International President Michael Cohn said at the signing Tuesday in Moscow. ''We will help fill the excess demand.''

The Glendale, Calif., ice cream company - which says it has made as many as 600 different flavors at one time or another but generally sells 31 at a time - plans to introduce 10 flavors at first in Moscow and expand to more flavors and more cities.

Soviet citizens have a passion for ice cream. Muscovites consume about 80,000 gallons a day of vanilla, chocolate and the occasionally available strawberry. Downtown kiosks often draw lines and frequently run out during the summer months.

Yuri Abramian, the Russian director-general of the joint venture, would not say whether he thought Baskin-Robbins tasted better than local ice cream.

''They are both of very high quality,'' Abramian said diplomatically. ''(But) the Baskin-Robbins assortment is very broad.''

The Baskin-Robbins plant will be the company's largest facility and the joint venture hopes to produce 8 million gallons a year in the Soviet Union. The company estimates that given the chance, Muscovites would consume nearly double that amount.

''The Soviets love ice cream,'' Cohn said. ''We're excited that soon they'll have a bit more choice to please their tastes.''

Cohn said the plant, to be built in a Moscow suburb in a joint venture with Baskin-Robbins International and the Republic of Russia's Ministry of Trade, should be finished within 2 years.

Nearly two years ago, Baskin-Robbins opened a shop in the Rossia Hotel selling ice cream it imported from Britain, but that store only accepts hard currency and is therefore not available to most Russians.

After the new plant is built, Baskin-Robbins plans to open several of its own stores in Moscow and also sell the ice cream in food stores and kiosks - a departure from the company's general practice of selling only through franchises.

The ice cream will be sold for rubles. The company would not provide specific financial details of the deal - including how much the ice cream would cost or how it planned to convert its profits to Western currency.

Since the ruble is not now convertible to hard currency, Western companies often accept Soviet products for export in barter deals to get profits out of the country.

The company plans to introduce some flavors specifically for the Soviet market, but would not give details.

Officials did say a special ''Gorba chocolate'' would be introduced in the United States in July to honor Soviet President Mikhail Gorbachev. A Baskin-Robbins spokesman said the ice cream - a combination of white and dark chocolate - was not meant to have a political flavor.

#90114u1517 04/24/1990 ~United Press International

(APRIL 24) UPI - The Amtrak passenger train that derailed in southeast Iowa and injured 97 people yesterday left the rails along a stretch of track that some groups have asked Amtrak to abandon. The cause of the derailment has NOT been determined. Witnesses report seeing several passenger cars tip over as the train rolled past a switch on the Burlington Northern tracks. The leader of one group says there have been several accidents along the Burlington Northern line in southwest and southeast Iowa.

Jury deliberations will begin this morning in the fraud and conspiracy trial of Tennessee Representative Harold Ford. During the 10-week-old trial, the government contended that Ford took one-and-a-half-Million dollars in bribes disguised as bank loans. In return, prosecutors say the eight-term Democrat delivered votes to banker Jake Butcher's unsuccessful 1978 race for governor.

#90114u1518 04/24/1990 ~United Press International

CAPE CANAVERAL, FL (APRIL 24) UPI - Elated astronomers, seeing years of work coming to fruition, celebrated the launch of the space shuttle Discovery Tuesday on a long-awaited mission to ferry the Hubble Space Telescope into orbit.

''I'm extraordinarilly excited. It was just a fantastic experience,'' said NASA scientist Albert Boggess minutes after the shuttle thundered into space.

''I was thrilled beyond belief,'' said William Jeffreys of the University

of Texas. ''I've been working on this project so long. That was the moment of actual liftoff that we've been waiting for for 12 years.''

''There's no experience in my life that can match this,'' said NASA astronomer Edward Weiler, searching for words to describe his feelings. ''The adventure begins.''

Hundreds of scientists were among the thousands of onlookers who gathered under warm sunny skies at the Kennedy Space Center to watch the shuttle blast off, shaking the ground beneath them.

''I think it was a perfect start to a great adventure for scientific thought for mankind,'' said Colin Norman of the Space Telescope Science Institute in Baltimore, which will coordinate the telescope's work.

''I think our lives are going to change. Our concept of the universe, our understanding of our global perspective in the environment of the universe as a whole is just going to be changed by this telescope. And it's good to have such a perfect start to such an adventure,'' Norman said.

The shuttle's crew is scheduled to place the $1.5 billion telescope into orbit 380 miles above Earth's surface on Wednesday to begin the highly sensitive instrument's 15-year mission.

Operating above Earth's fuzzy atmosphere, the telescope is expected to answer fundamental questions about the birth of the universe and its ultimate fate by peering more deeply into space and with greater clarity than ever before.

Originally proposed in 1977, the telescope was repeatedly delayed by technical problems and shuttle program troubles. Launch was put off again Apr. 10 by a malfunction in the shuttle's steering system four minutes before liftoff.

''There were so many delays that the thing became a fantasy almost to us. We just never believed it was going to go up,'' Weiler said.

''It's like fantasyland right now. It just doesn't seem real. It's just absolutely incredible,'' he said.

The repeated postponements put the scientists through an emotional roller-coaster.

''There have been times when we were deeply depressed,'' said Jeffreys. ''There have been times when we were very elated. This is one of the elation times.''

Eric Chaisson, a senior scientist at the Space Telescope Science Institute

noted astronomers were somewhat sobered by facing some eight months of fine-tuning the telescope and then years of exploration.

''Our work really only begins now,'' he said, predicting the telescope would live up to its expectations.

''If I could project myself hundreds of years into the future we will see this as a tremendous turning point. Where we really began to measure well a lot of key fundamental scientific issues,'' he said.

Among the long list of advances expected from the telescope are a more accurate measurement of the age of the universe and the rate at which it is expanding, which should provide clues to its ultimate fate, Chaisson said.

''The most exciting discoveries ... that we're likely to make are those in the darkness, where we've never seen anything yet - the ones that the human mind can not even now conceive,'' he said.

Boggess noted the telescope is the first of a series of new space-based observatories.

''I think it's in fact the dawning of several new eras for astronomy,'' he said. ''This is the first of a whole series of new observatories in space. From my perspective not only is this the first but it's the most important one.''

#90114u1567 04/24/1990 ~United Press International
DOUGLASVILLE, GA (APRIL 24) UPI - Jesse James has the name but not the ability of the Old West bandit.

Police said Jesse N. James, 47, a house painter, walked into the Commercial Bank at the Cedar Mountain Village shopping center Monday and demanded money under threat of a fake bomb.

A teller gave him some cash and her car keys but he fled after trying unsuccessfully to force her outside into the car.

Jumping into the car, he couldn't start it and fled on foot. Detective Michael Zachery cornered him in a patrol car.

James was charged with bank robbery and kidnapping.

Police said James apparently was no relation to Jesse James, who achieved fame by robbing some 25 banks, trains and stagecoaches a century ago.

#90114u1601 04/24/1990 ~United Press International
NEW YORK (APRIL 25) UPI - ''Wings'' was flying high, ''Twin Peaks'' may have peaked and NBC stayed on top in the prime time ratings race last week, it was reported Tuesday.

NBC withstood the ABC challenge of new spring shows as the two networks divided the bulk of the audience pie between them, while CBS had no shows in the top 10 and only three in the top 30.

If ABC could find ways to program ''America's Funniest Home Videos'' seven days a week, who knows how high they could soar - two of the network's four entries in the top 10 were back-to-back episodes of that show.

The most watched race by ratings junkies was the one involving ABC's ''Twin Peaks.'' NBC introduced ''Wings'' following ''Cheers'' on Thursday night in the time period opposite ''Twin Peaks'' and won both half hours, with ''Cheers'' the most-watched show of the week and ''Wings'' in seventh place. ''Peaks'' was 28th.

''Wings'' replaced ''Grand,'' which bumped ''Dear John.''

'''Wings' started off two share points better than 'Grand' was doing in the time period,'' said Preston Beckman, NBC vice president, audience research. ''It's holding as much as the 'Cheers' lead-in as 'Dear John' did. One of our concerns was that although 'Grand' put in a strong performance for us, we were hoping 'Wings' would give us an even better retention of the 'Cheers' audience and that appears to be the case.''

He pointed to all the ''media hoopla'' involving ''Peaks,'' and the fact that it was followed last week by the edition of ''PrimeTime Live'' featuring Diane Sawyer's interview with Marla Maples, and said:

''You buy into the hoopla about 'Twin Peaks' and say, 'Gee, we think 'Wings' is a good show but it's untested. Nobody knows about it. But it beat 'Twin Peaks' by nine share points.''

The Maples interview boosted ''PrimeTime Live'' to 19th place.

The list of new shows tells the story. ''Wings'' (NBC) placed fifth, ''Carol & Company'' (NBC), 11th; ''Down Home'' (NBC), tied for 23rd; ''Twin Peaks'' (ABC), 28th; ''Working Girl'' (NBC) and ''Equal Justice'' (ABC), tied for 44th; ''Shannon's Deal'' (NBC), tied for 47th; ''The Marshall Chronicles'' (ABC), 52nd; ''His & Hers'' (CBS), tied for 57th; ''Capital News'' (ABC), tied for 65th; ''Sunset Beat'' (ABC), 76th: ''Normal Life'' and ''Sydney'' (both CBS), tied for 77th and ''In Living Color'' (Fox), 81st.

Two new CBS shows that looked good in the ratings were pre-empted last week - ''Bagdad Cafe'' and ''Sugar and Spice.''

NBC won the week ending April 22 with a 12.5 rating and a 22 share. ABC came in second with a 12.0 rating and a 21 share, while CBS had a 9.6 rating and a 17 share.

The official 30-week prime time season ended Sunday, April 15, but working on a 52-week season, as of the week ending April 22 NBC has a season-to-date rating of 14.5 and a 24 share. ABC is second with a 12.9 rating and a 21 share and CBS third, with a 12.1 and a 20 share.

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings continued to dominate with a 10.0 rating and a 21 share. ''CBS Evening News'' with Dan Rather stayed in second place with an 8.8 rating and a 19 share, while ''NBC Nightly News'' with Tom Brokaw was third with an 8.3 rating and an 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 regular series for the week ending Sunday, Apr. 22, according to the A.C. Nielsen Co., were:

1. Cheers (NBC)
2. America's Funniest Home Videos (ABC)
3. The Cosby Show (NBC)
4. America's Funniest Home Videos (ABC)

5. A Different World (NBC)
6. Roseanne (ABC)
7. Wings (NBC)
8. Wonder Years (ABC)
9. (tie) Empty Nest (NBC)
10. Unsolved Mysteries (NBC)

#90114u1606 04/24/1990 ~United Press International

KHARTOUM, SUDAN (APRIL 24) UPI - Sudan executed by firing squad Tuesday 28 officers convicted of attempting to overthrow the African country's military leader, a state-run radio broadcast and Egypt's official Middle East News Agency said.

MENA gave few details of the execution, but said three major generals, a brigadier general and four colonels were among those executed.

''Sudan executed by firing squad today (Tuesday) 28 officers found guilty after court martial of the attempted coup,'' the agency said. It said one colonel was aquitted of conspiracy charges and nine were still to face trial.

The radio broadcast said the officers included retired Maj. Gen. Abdul Gadir al Kadaru and Brig. Mohamed Osman Karrar who allegedly masterminded the coup attempt.

Islamic fundamentalist leader Gen. Omer el-Bashir personally approved the sentences passed by field summary tribunals set up late Monday night to court martial the officers for high treason and mutiny against the army. One officer was acquitted, the radio said.

Earlier Tuesday, government spokesman Mohamed Khogali Salihein had said the officers had been guaranteed a fair trial for their surrender.

It was the second time in four weeks the 15-man Revolutionary Command Council, the military junta that seized power last June, claimed to have defeated an attempted coup.

On March 28, the official Sudan News Agency reported a series of arrests connected to an attempted overthrow.

Loyalist troops crushed the latest rebellion by daybreak Monday, by which time the capital had returned to normal and the presence of soldiers on the streets was no heavier than usual.

Salihein said the plotters had infiltrated a number of army units in the capital under the guise of reinforcement forces.

He said Karrar had manged to reach the Khartoum airport tower while al Kadaru was leading an armored command at Alshajara in the southern part of the city before they were disarmed by loyalist troops.

El-Bashir has claimed the plotters were ''in alliance with the rebels'' of the Sudanese People's Liberation Army, a predominantly Christian group that has waged a seven-year civil war against the Moslem-led central government.

Salihein said the foiled coup was ''an extension'' of the March uprising that led to a government crackdown on trade unionists, lawyers and professionals thought to hold liberal views.

An SPLA radio broadcast monitored in Nairobi Tuesday called on ''the Sudanese popular masses to step up the struggle.''

''The National Islamic Front (government) must be toppled,'' the broadcast said. ''The Front has torn Sudan and its people apart ... Sudan has already lost a considerable number of her sons and daughters through toruture and killing only within a period of 10 months of the rule of the NIF.''

Under el-Bashir, a paratroop commander whose family name means in Arabic the bearer of good news, Sudan has been criticized by international organizations for its record on human rights.

Sudan, the largest nation in Africa, covers nearly 1 million square miles and is one-fourth the size of the United States. Sudan is crossed by the Nile, and is bordered by Egypt is to the north and Libya to the northwest; Chad and the Central African Republic to the west; Zaire, Uganda and Kenya to the south, and Ethiopia to the east. It has a population of about 21 million.

#90114u1640 04/24/1990 ~United Press International

MADRID, SPAIN (APRIL 24) UPI - An unidentified gunman shot and killed one of the members of the gang that pulled off Britain's so-called Great Train Robbery of 1963, police said Tuesday.

Police reported a full investigation was under way into the Monday evening slaying of Charles Wilson in Marbella, a Mediterranean resort 320 miles south of Madrid.

Wilson was freed from jail in 1978 after serving time in connection with the notorious robbery from the mail train of more than $4 million. He had lived in Spain since his release.

Police quoted witnesses as saying a young man dressed in a track suit and running shoes rode to Wilson's villa on a bicycle and entered to speak with the Briton.

Police said the assailant, wielding a small-caliber pistol, killed Wilson instantly with a bullet that entered his mouth and came out through the back of his head. The gunman also shot Wilson's dog before escaping, they said.

Wilson was a former bookmaker who was thought to have been the treasurer of the gang that in August 1963 robbed the Glasgow-to-London mail train of 2.63 million pounds, or $4.31 million.

The robbers escaped with about 120 mail bags crammed with bank notes, of which only 343,000 pounds, or $555,000, was ever recovered.

One of the six also bludgeoned the train driver, who later died, and when the gang members were later captured, they received various sentences for robbery and murder.

One of Wilson's accomplices, Ronald Biggs, speaking to the British Broadcasting Corp. from his home in the Brazilian city of Rio de Janeiro, said he was saddened by Wilson's death.

''If there was going to be anybody who was going to live to a ripe old age ... it was going to be Charlie Wilson or myself,'' Biggs said. ''It is

very hard to imagine that anyone would have a grudge against Charlie. Mind you, he was a tough guy ... and he wouldn't let anybody push him around.''

The BBC said Wilson was believed to have known where the remainder of the mail money was stashed. It said Spanish police have not ruled out that his murder could have been the settling of an old score linked to the robbery 27 years ago.

Other gang members apparently have not received any of the loot. One, Buster Edwards, has been employed as a flower seller outside London's Victoria Station since his release.

#90114u1674 04/24/1990 ~United Press International

NEW YORK (APRIL 24) UPI - A Manhattan lawyer testified Tuesday he arranged the purchase of prime Fifth Avenue real estate for a Swiss bank in which Imelda and Ferdinand Marcos were known to have secret accounts.

Peter Williams also testified at the fraud trial of Imelda Marcos that he was at a meeting in which the former Philippines first lady discussed renovations to the Crown Building on Fifth Avenue at 57th Street.

Mrs. Marcos, 60, is accused of plotting with her late husband, former President Ferdinand Marcos, to divert more than $200 million from the Philippine treasury into art and real estate, including the Crown Building.

She is on trial in U.S. District Court on charges of racketeering, conspiracy, fraud and obstruction of justice.

Williams, who handled the closing for the Crown Building sale, said he traveled to Hawaii in 1981 on the instructions of the Swiss bank, Banc Paribus, where he met with Ferdinand Marcos.

He testified how through a complex series of transactions, the Crown Building was purchased Sept. 30, 1981, on behalf of the bank with the bulk of the payment, $43.5 million, coming from Banc Paribus. Previous testimony has showed the Marcoses held secret accounts with the bank.

Recalling the October 1981 meeting with President Marcos, he said, ''I brought a smaller version of the closing binder'' to Marcos.

''I gave it to him,'' Williams said. ''He looked at me very politely and said, 'Thank you.' It didn't concern him and he gave it to an aide.''

He said he was then instructed by the bank to meet Mrs. Marcos at the Waldorf Towers in Manhattan ''in case any legal questions came up in connection with the purchase'' of the Crown Building.

''She was a very charming and polite lady,'' Williams recalled.

Asked what was discussed during the meeting with Mrs. Marcos and a representative of the Swiss bank, Williams replied, ''They discussed renovations of the building.''

On Monday, Gabriel Singson, 61, deputy governor of the Central Bank of the Philippines, identified documents from September 1981 in which Marcos approved the foreign exchange on behalf of a Philippines business supplying labor to Saudi Arabia.

Singson said Marcos also called and wrote follow-up letters approving the credit.

#90114u1677 04/24/1990 ~United Press International

LONDON (APRIL 24) UPI - Stock prices ended slightly higher in moderate trading Tuesday on the London International stock exchange despite some gloomy corporate news pressuring individual stocks.

The blue-chip Financial Times 100-stock index, which tumbled 27.9 points Monday, added 0.7 points to 2,159.9.

The key index, which measures the value of Britain's largest 100 companies in terms of market capitalization, had been down about 9 points before a late round of bargain hunting boosted prices.

The narrower top 30 industrial average gained 4.5 points to 1,697.2.

Volume amounted to around 372 million shares, compared with 382 million shares Monday.

Analysts said many institutional investors stepped to the sidelines ahead of Wednesday's report on Britain's trade.

On the corporate news front, Midland Bank chairman Sir Kit McMahon told the company's annual meeting that the ''deterioration in trading conditions is continuing and indeed intensifying,'' and high interest rates are aggravating the bank's bad debt position.

McMahon's bearish outlook led the banking sector broadly lower. Midland Bank tumbled 42 cents to $4.54 and Barclays Bank lost 16 cents to $8.15.

Elsewhere, B.A.T Industries tumbled 38 cents to $11.20.

Sir James Goldsmith Monday announced Hoylake Investments Ltd. will not

renew its $21 billion hostile takeover bid for the tobacco and insurance giant and its subsidiaries.

Goldsmith last year set up Hoylake Investments to lead the takeover attempt of the British-American conglomerate and joined forces with France's Axa Midi Assurances to overcome regulatory objections to the proposed acquisition of Farmers Insurance Group, B.A.T's U.S. insurance subsidiary.

Among the day's other highlights, Polly Peck eased 13 cents to $6.30, Body Shop fell 18 cents to $7.25, Carlton Communications tumbled 50 cents to $6.91, Reuters fell 50 cents to $17.29 and R.T. Zinc shed 22 cents to $8.25.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange continued their slide in thin trading amid worries about the latest proposal by the Bonn government on a monetary union with East Germany.

The closely watched German Stock Index, which fell 2.5 percent or 46.83 points Monday, eased 6.97 points to 1,830.53, its lowest level since early March.

Traders said investors are shunning the market amid worries that the planned one-to-one exchange of West German for East German marks will result in higher inflation.

#90114u1678 04/24/1990 ~United Press International

(APRIL 24) UPI - The Soviet Union beefed up its border patrols on Lithuania's frontiers today, saying it wants to stop weapons from getting into the republic. In Moscow, a Foreign Ministry spokesman reiterated that dialogue is the only way to solve the crisis, which began with Lithuania's independence declaration in March.

In Washington, congressional leaders are at the White House, discussing possible U-S economic measures again the Soviet Union. One administration official earlier said President Bush will likely make an announcement following the meeting.

The shuttle Discovery moved to the next phase of its mission today, as astronauts opened Discovery's two 60-foot payload doors, exposing the Hubble Space Telescope. NASA officials at Cape Canaveral told reporters that the shuttle crew was given a formal O-K to go on with the flight. Astronauts will put the telescope in orbit tomorrow.

A pro-Iranian cleric says another U-S hostage in Lebanon will be freed soon, if Arab prisoners are released in Israel and Kuwait. The remarks

were broadcast on Voice of the People radio in Beirut. Also today, an Iranian newspaper urged the West to reciprocate for the release of U-S hostage Robert Polhill by pressuring Israel and Lebanese Christians to stop abductions in Lebanon.

Romania's capital became the scene of unrest again today, with soldiers and police beating anti-communist demonstrators. Hours after the crowd was dispersed, about two-thousand protesters gathered in a main square in Bucharest to express dissatisfaction with the interim government.

#90114u1684 04/24/1990 ~United Press International

NEW YORK (APRIL 24) UPI - Manhattan's weak residential real estate market took a slight turn for the better in the first quarter of 1990, with co-op and condo prices rebounding after long declines, a survey reported Tuesday.

The asking price for Manhattan residential properties below 96th street rose 1.2 percent to $113,830 per room in the first three months of 1990, said Halsted's New York, a real estate brokerage that surveys price fluctuations.

The slight rise follows a year of consistent drops in the prices of Manhattan co-ops and condominiums, Halsted's said.

''We are certainly hesitant to say that the shift in the market we saw this quarter is the beginning of a broad change,'' said Clark Halsted, managing partner of the Halsted Property Co.

But, he said, ''It confirms what many of us have felt in the last few months, that there is beginning to be more movement in Manhattan properties.''

Manhattan residential real estate prices have fallen due to a variety of factors, including sizable layoffs on Wall Street and other sectors such as publishing, experts say.

''It will be a long time before we see the volume of sales that characterized the early 1980s when investors drove the real estate market instead of home buyers,'' said Halsted, adding, ''It's inevitable that prices will rise eventually.''

The survey found that co-op and condo sale prices have been approaching the asking prices for the properties.

At the end of the fourth quarter of 1989, buyers paid on average 80.13 percent of the asking price for residential property in Manhattan. During the first quarter of 1990, they paid 82.76 percent, the survey found.

The survey also found the asking price for properties in the exclusive ''Silk Stocking'' district - the Upper East Side - was $209,960 per room during the first quarter of 1990.

#90114u1692 04/24/1990 ~United Press International

EGLIN AIR FORCE BASE, FL (APRIL 24) UPI - A ''Star Wars'' research program has led to development of a computer the size of a deck of cards that is 100 times faster than current missile computers and 500 times quicker than a personal computer, program officials said Tuesday.

''These designs will one day make every home computer in the country outdated,'' said John Provine, chief of the guided intercepter technology branch of the Air Force Armament Laboratory.

The processors were designed for a Strategic Defense Initiative program, known as Star Wars, with the objective of developing a processor for small missiles with the capacity to find flying targets against Earth's background.

Work on the program began in December 1988. Rockwell Corp. of Anaheim, Calif., and Texas Instruments of Dallas came up with different designs. Both computers are as thick as a deck of cards.

The chip used in the computers is similar to those used to home computers.

''One of the designs has a lot of memory, but the other, with less memory, is more computationally powerful,'' said Provine.

Each computer weighs 75 grams, or about 2.5 ounces, is 10 centimeters by 1 centimeter and is capable of up to 500 million operations per second. Current state-of-the-art computers in some missiles weigh 500 grams, or 17.5 ounces, with a capacity of 4.5 million operations per second.

The average home computer has a capacity of one to one and a half MOPS.

''I can see the day when, if a person buys a home computer, it will either be very compact or have nothing but an empty box for looks,'' said Provine. ''We just won't need all that extra electronics package that they contain today.''

''You'd have a desktop supercomputer,'' said Paul McCarley, program manager for the Texas Instruments program.

It could be on the market for consumers in three to five years.

The prototypes are expected at the lab in May 1991. But a working ''breadboard'' model, not in its miniaturized version, of both computers will be arriving at the base next month.

#90114u1737 04/24/1990 ~United Press International

MOSCOW (APRIL 24) UPI - China and the Soviet Union signed an accord Tuesday reducing troops along their border and Chinese Premier Li Peng met Soviet President Mikhail Gorbachev for talks on economic cooperation between the two communist nations.

Li, on the second day of the highest-level visit to Moscow by a Chinese official in a quarter century, and Soviet Premier Nikolai Ryzhkov also signed a separate package on cooperation in space exploration, the official Soviet news agency Tass said.

''Soviet Foreign Minister Eduard Shevardnadze and his Chinese counterpart, Qian Qichen, signed an intergovernmental agreement on guiding principles for mutual reductions in the armed forces and confidence-building measures in the military sphere along the Soviet-Chinese border, and a protocol on consultations between the two countries' foreign ministries,'' Tass said.

A third accord ''will lay the foundation for intensive mutually beneficial relations in various industries and orient the two sides toward developing cooperation in progressive, high-technology areas,'' Tass said.

The agreements formalize the thaw in Sino-Soviet relations that began last May when Gorbachev went to Beijing in the midst of a pro-democracy uprising in China.

Details of Li's meeting with Gorbachev were not released, but Tass said earlier the discussions would focus on ways to ''raise the effectiveness of Sino-Soviet economic cooperation.''

Ryzhkov and Li said in a joint statement Monday night the efforts to ease tension on the two countries' 4,175-mile border ''will strengthen good-neighborly relations ... and will promote stronger peace in the Asia-Pacific region and throughout the world.''

Li held talks with Ryzhkov Monday and then attended a state dinner in his honor at the Kremlin. His visit is the first by a Chinese premier since a 1960s rift between the two communist countries over ideological and territorial disputes.

Ryzhkov described Li's visit as ''a landmark in the development of relations between the two countries after Gorbachev's meeting with Chinese leaders in Beijing last May,'' the official Soviet news agency Tass said.

At the state dinner hosted by Ryzhkov, Li spoke frankly about the troubled history of the two countries' ties.

''He noted that Sino-Soviet relations had developed 'in a zigzag way' and that their normalization was 'difficult,' but he emphasized, 'we value the results achieved,''' Tass said.

Gorbachev ended the 30-year rift in May when he went to Beijing amid a pro-democracy uprising, which the China brutally repressed the next month.

''Even during the difficult years in the history of Soviet-Chinese relations, Chinese people continued to keep in their hearts feelings of friendship toward the Soviet people and never forgot its support,'' Li said at the dinner.

The two countries still have serious ideological differences. China has privately criticized Gorbachev's reforms, charging the Soviet leader has ''betrayed socialism.''

Publicly, however, Beijing's stance is diplomatic and neutral, frequently alluding to the vast changes sweeping the Soviet Union and East bloc nations as a ''complicated international situation.''

Li, who studied in the Soviet Union and speaks Russian, was accompanied by his wife Zhu Lin, Foreign Minister Qian Qichen, State Council spokesman Yuan Mu, state planning commission vice minister Gan Ziyu, and Gen. Xu Xin deputy chief of staff of the People's Liberation Army, China's state-run Xinhua news agency said.

Another member of Li's entourage is Tomur Dewamat, chairman of China's westernmost Xinjiang province. The remote, Moslem-inhabited region bordering the Soviet Union's Asian republics has been recently torn by ethnic unrest that an official report said left 22 dead.

China, fearing an infusion of Islamic fundamentalism from the Soviet republics and neighboring Pakistan and Afghanistan, has since tightened travel along the Xinjiang border.

BETHLEHEM, PA (APRIL 24) UPI - Bethlehem Steel Corp. Tuesday reported first-quarter earnings of $21.3 million, or 20 cents a share, down 67 percent from the $64.7 million, or 78 cents a share, for the same period of 1989.

First-quarter revenues were $1.21 billion, down from $1.4 billion last

year.

Company officials blamed the plunge in earnings on higher operating costs and a continuing slowdown in the steel market.

Earnings for Bethlehem's basic steel operations totaled only $29 million for the first quarter of 1990, down from $137 million in 1989. Officials said steel shipments for the first quarter decreased 19 percent from last year.

Also contributing to the gloomy first-quarter results were a decline in steel prices, an increase in employees' wages and fierce competition in the Rail Products, Structural Products, and Bar, Rod and Wire divisions, the company reported.

#90114u1814 04/24/1990 ~United Press International

BEIRUT, LEBANON (APRIL 24) UPI - There were signs Tuesday more Western hostages in the Middle East, including an American, could be freed soon, but groups close to the kidnappers linked the releases to demands of freedom for Arab prisoners in Israel and Kuwait.

Moslem sources told United Press International Tuesday that two Swiss Red Cross workers could be freed whithin 72 hours, and a radical Palestinian group offered to free four Belgians if Belgium released a captive Palestinian activist.

''We confirm reports and information that another American hostage will be freed soon,'' said Seyyed Hussein Musawi, an influential pro-Iranian cleric believed to have influence over some of the captors in Lebanon.

''But I cannot say where and when exactly the release will take place,'' said Musawiin an interview with the Lebanese leftist Voice of the People radio.

Musawi, a leader of the pro-Iran Islamic Amal group, told United Press International over the weekend, ''we expect a solution to the captives' problem this year. It's the year of the hostages.''

But Musawi, other Moslem fundamentalist leaders in Lebanon and their backers in the government of Iran have all said the release Sunday of American hostage Robert Polhill after 39 months of captivity was only a ''goodwill gesture'' and called for the West to reciprocate by pressuring Israel and its allies to free the Arab prisoners.

''More captives would be freed if the United States exerts pressure on Israel and Kuwait to free the prisoners,'' a ranking fundamentalist figure

close to the captors said in Beirut late Monday.

The White House has repeatedly insisted it is not negotiating with hostage-takers.

But in London, The Independent newspaper said a group of Shiite Moslem prisoners are expected to be released from the Khiam jail in southern Lebanon over the next two days as part of a secret deal for Polhill's release.

''The freeing of the Khiam inmates ... was part of a deal for the American's release,'' The Independent said, quoting Lebanese militia sources.

An estimated 325 Shiite Moslems are being held without trial in the Khiam jail, which is guarded by members of the South Lebanon Army militia.

Polhill's kidnappers, The Islamic Jihad for the Liberation of Palestine, repeatedly demanded the release of the Shiite Moslem prisoners.

Meanwhile, Moslem sources told UPI that two Swiss hostages kidnapped in Lebanon last October, Emmanuel Christen and Elio Erriquez, will be freed in three days.

''All arrangements have been completed to free the Swiss,'' said one source who requested anonymity. ''They will be freed in 72 hours.'' The source said the two captives, who were in good shape, ''were notified about their planned release a few days ago.''

In Iran, a newspaper which normally reflects the view of hard-line Iranian clerics Tuesday urged the West to reciprocate for Polhill's release by pressuring Israel and Lebanese Christian forces to stop their abductions in Lebanon.

''It is now the West's turn to exert pressure on the Phalangists and Israel to put an end to their brutal kidnapping of Lebanese people,'' said the newspaper Jomhuri Islami, quoted by the official Iranian news agency.

The call echoed comments made Monday by Iranian Foreign Minister Ali Akbar Velayati, who specifically called for President Bush to push for the release Sheikh Abdul Karim Obeid, a key fundamentalist figure abducted last July by Israeli commandos.

''We do hope President Bush will use his influence over the Phalangists and also over Israel,'' Velayati told the Cable News Network.

But Musawi, saying ''the release of Sheikh Obeid will not be enough,'' said Tuesday the captors of the remaining seven American and 10 other

Western captives believed held in Lebanon had two other demands: freedom for 400 Arabs held in Israel and the release of 16 Shiites convicted and imprisoned since 1983 for bombing Western and Kuwaiti targets.

Israel said Obeid was responsible for planning attacks against Israeli targets and defended the abduction as necessary in the battle against terrorism. A Shiite extremist group claimed it hanged an American hostage, Lt. Col. William Higgins, in retaliation last summer for the abduction. Higgins'body has never been produced.

Former Defense Minister Yitzhak Rabin later offered to swap Obeid and other Shiite Moslem prisoners for all the Western hostages as well as three Israelis captured in Lebanon.

#90114u1834 04/24/1990 ~United Press International

WASHINGTON (UPI) - The State Department said Tuesday the door is open for the establishment of diplomatic relations with Albania, but the next move has to come from the government of the hardline Communist nation.

The leader of Albania, party leader and Assembly President Ramiz Alia, suggested last week that the time may be right for establishment of diplomatic relations with Washington.

''Our door is open for diplomatic discussions,'' responded State Department spokeswoman Margaret Tutwiler, ''and we are ready to pursue discussions toward this end.''

Under questioning from reporters Tuesday, she said the next move is up to the Albanian government.

There have been no diplomatic relations between the United States and Albania since 1939. The Soviets installed a Communist government in 1945 which, after the death of Soviet leader Joseph Stalin, turned away from Moscow and pursued an independent course that left it isolated in Eastern Europe.

In the past month, Albanian leaders have made conciliatory gestures toward improving relations with the West. Eleni Selenica, chairman of a parliamentary delegation from Albania that visited Cyprus last week, talked of the need for Albania to respond to the sweeping changes in Eastern Europe ''by further deepening the process of Balkan cooperation'' and widening economic contacts with the rest of the world.

The economic situation in Albania is reported by travelers to be bad, with constant shortages and breakdowns of basic services.

The State Department's annual report on human rights has been critical of the Albanian party and government, which exercise rigorous controls through the Sigurimi, the security police.

The most recent State Department report, published in February, said: ''Significant human rights violations, corroborated by private international organizations and refugees, continue to occur.''

Remarking on the possibility of improving relations between the United States and Albania, Tutwiler said, ''Diplomatic relations do not constitute an endorsement of the policies of a given government.

''Establishing diplomatic relations would give an opportunity for dialogue through which we would be able to communicate our concerns and encourage respect for fundamanetal human rights in Albania.''

#90114u1848 04/24/1990 ~United Press International

JERUSALEM (APRIL 24) UPI - The Islamic Supreme Council announced solidarity Tuesday with Jerusalem's Christian leaders who will close all holy sites for one day this week to protest a new Jewish settlement in the Old City.

To support the Christian community, the Islamic Supreme Council announced it would close the Dome of the Rock and the Al Aqsa Mosque to tourists and visitors Friday, but allow Moslem worship at Islam's third holiest site.

The council characterized the Jewish presence in the Old City's Christian Quarter as ''an aggression against the holy sites and the rights of all Moslem and Christian Palestinians in the Holy Land.''

Christian leaders in Jerusalem, including the Greek Orthodox, Armenian and Latin patriarchs, Monday announced the closure of holy sites scheduled for Friday might continue indefinitely. They said they would review their decision pending legal attempts to evict the 150 Jewish residents of St. John's Hospice.

The Jews who moved into the 72-room building owned by the Greek Orthodox church four days before Easter were reportedly the first Jews to live in the Christian Quarter since Israel captured the Old City from Jordan in 1967.

In response to criticism of the Jewish occupation, Foreign Minister Moshe Arens sent a message to his Greek counterpart saying Israel has and always will respect the rights to freedom of worship, Israel Radio reported.

Sunday, the Isareli government acknowledged it contributed $1.8 million

toward purchasing the disputed building, around the corner from Church of the Holy Sepulchre, the traditional site of Jesus's crucifixion.

The new Jewish settlement has sparked a series of court cases over church demands to evict the new residents and questions about the legality of the building's sublease. Three courts and 10 judges have considered the issues and Israel's High Court has scheduled a hearing for Thursday.

Jerusalem was occupied by Israel in 1967 and later annexed by the Israeli government together with a large parcel of surrounding lands. The U.S. government does not recognize the annexation.

#90114u1859 04/24/1990 ~United Press International

EAST BERLIN (APRIL 24) UPI - The East German military has cited three officers and is nervously questioning the loyalty of all soldiers after the officers publicly advocated the stationing of West German troops in East Germany.

The officers, whose ranks and identities were not disclosed, suggested the idea in a letter sent to West German Defense Minister Gerhard Stoltenberg and published Monday in the East German youth daily Junge Welt.

The officers, who also suggested dissolving the East German National Peoples Army and placing its facilities under West German control, claimed in the letter to represent many other responsible officers who share their views.

The publication of the letter prompted a terse reaction from East German Defense and Disarmament Minister Rainer Eppelmann, who held a news conference Monday to criticize the proposal and question the motives of those involved.

Eppelmann said that if such a letter had been sent to the West German defense minister, he expected his office would have been notified immediately.

Eppelmann was flanked at the news conference by the East German army chief of staff, the heads of the army, air force, and navy, and a representative of the association of career soldiers. All distanced themselves from the letter.

The letter proposed a three-point plan that would dissolve the National Peoples Army, place its installations under control of the Bundeswehr, or West German army, and begin preparations for the possible stationing of Bundeswehr troops in East Germany.

There was no immediate reaction from the West German government.

The letter came as a clear challenge to Eppelmann, who said only last week that soldiers from the Bundeswehr would never be allowed on East German territory.

The East German defense ministry said disciplinary proceedings were being initiated against the three officers who signed the letter.

The ministry also is highly concerned with learning how many officers in the army share the views of those who wrote the letter, the Berliner Zeitung daily newspaper in East Berlin said Tuesday.

The newspaper also said the frantic reaction of the defense ministry to the publication of the letter must raise doubts about the stability of the East German army.

The report said Eppelmann tried unsuccessfully early Monday morning to prevent distribution of the Junge Welt issue containing the officers' letter.

#90114u1869 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - The Holocaust Memorial Council presented its Eisenhower Liberation Medal Tuesday to Gen. Colin Powell, chairman of the Joint Chiefs of Staff, to honor the soldiers who liberated the Nazi concentration camps 45 years ago.

The medal went to Powell at a ceremony in the ornate Capitol Rotunda marked by a call to neither forgive nor forget the Holocaust in which at least 6 million people, most of them European Jews, were killed.

Benjamin Meed, chairman of the 1990 Days of Remembrance ceremony, told an audience beneath the Capitol dome that while freedom is emerging in Eastern Europe there is a resurgence of anti-Semitism.

And, he added, ''From Germany we have heard a long overdue apology but also talk of forgetfulness, of amnesia, of revisionism and diminishing the significance of the crime. Some say forgive, most ask us to forget. We cannot.''

Before the presentation to Powell, six members of Congress and six survivors of concentration camps paired off to light six large candles, each representing a million of the victims. The candles stood before the flags of the 15 U.S. armored and infantry divisions involved in liberating concentration camps.

Harvey Meyerhoff, chairman of the Holocaust Memorial Council, presented the medal to Powell, offering it ''as a symbol of respect and admiration for the American men and women who fought for liberty and who helped restore life for the surviving victims of the Holocaust.''

This year marks the centennial year of the birth of the medal's namesake, Dwight David Eisenhower, head of the liberating allied forces in Europe during World War II and later a two-term president.

Powell recalled the revulsion soldiers and leaders like Eisenhower and Gen. George Patton felt when they came upon the concentration camps and declared: ''So long as we tell ourselves we will never forget, other oppressed people around the world will feel the sun of freedom. ... We must always remember.''

The principle speaker at the event, Housing and Urban Development Secretary Jack Kemp, delivered a strongly pro-Israel address and said, ''We all recommit ourselves to the integrity of memory, the truth of history. ... This day can be both sad and hopeful.''

#90114u1913 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - A dogfight between most of the nation's major airlines opened Tuesday at a government hearing to determine rights to six new passenger and cargo routes between the United States and Japan.

About 100 witnesses were scheduled to testify in three weeks of hearings before Administrative Law Judge John J. Mathias. A decision on the routes is expected by Oct. 1.

The new routes were created by a bilateral aviation agreement signed last November, which allows U.S. carriers to operate an additional 24 flights weekly to Tokyo. Eighteen of these flights will offer a combination of passenger and cargo service.

The routes are lucrative and coveted by the airline industry. The U.S.-Japan aviation market generates more than $6 billion in revenue annually for both countries.

Japan is the largest international revenue market for U.S. airlines, according to the Department of Transportation.

For the 12 months ended September, 1989, the Japanese market was ranked third after Canada and the United Kingdom, in terms of numbers of passengers, and first when ranked by revenue passenger miles and passenger revenues.

Five U.S. airlines, American, Delta, Continental, Northwest and United, now offer 156 flights weekly to Japan. Attorneys for each of the airlines submitted witness lists and supporting evidence to Mathias.

Based on the testimony, Mathias will select three gateways, or departure points for nonstop flights, and as many as three carriers for travel between the United States and Tokyo.

Mathias also will select the same number of gateways and carriers for routes from the United States and cities in Japan other than Tokyo and Osaka.

Gateway airports offering flights to Japan now include Anchorage, Chicago, Dallas/Fort Worth, Detroit, Honolulu, New York, Los Angeles, Minneapolis/St. Paul, Portland, San Francisco and Washington, D.C.

New gateways sought by the airlines include San Jose, Calif.; Houston; Seattle; Kona/Maui, Hawaii; St. Louis and Fairbanks, Alaska.

The recommended decisions will be forwarded to the Department of Transportation, where Patrick Murphy, deputy assistant secretary for policy and international affairs will review them and draft a final decision.

United Airlines and American Airlines both are competing for a Chicago-to-Tokyo route.

American also has applied for Tokyo-bound flights from San Jose and Los Angeles and for Nagoya-bound flights from Chicago, San Jose and Los Angeles.

America West Airlines applied for a Honolulu-Tokyo route and Honolulu-Nagoya route. Continental Airlines is seeking Tokyo-bound flights from Honolulu, Los Angeles and Houston, as well as Nagoya-bound flights from Honolulu, Seattle and Los Angeles.

Delta Air Lines hopes to secure rights to Tokyo-bound flights from Los Angeles and Honolulu and Nagoya-bound flights from Portland and Honolulu. Pan American World Airways is seeking routes from Los Angeles-to-Tokyo and Los Angeles-to-Nagoya.

Northwest Airlines has applied for a route between Kona/Maui, Hawaii, and Tokyo and from Honolulu to Nagoya. Trans World Airlines is seeking a St. Louis-Tokyo route. Also for consideration is Air Micronesia's request for routes from Honolulu to Tokyo and Nagoya.

#90114u1922 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - President Bush submitted to the Senate Tuesday an amended extradition treaty with Canada that strengthens law enforcement cooperation in combatting terrorism and in parental child abduction and narcotics offenses.

In a written message, the president said the treaty, signed in Ottawa on Jan. 11, 1988, ''will help to improve implementation of the current extradition treaty.''

Bush said the new extradition treaty will include ''serious offenses

typically committed by terrorists; i.e., murder, manslaughter, kidnapping, use of an explosive device capable of endangering life'' as well as attempting or plotting to commit such offenses.

It also will include language dealing with child abduction and narcotics offenses.

He recommended the Senate give early and favorable consideration to its ratification.

#90114u1932 04/24/1990 ~United Press International

CHICAGO (APRIL 24) UPI - Widespread selling pressured grain and soybean futures Tuesday on the Chicago Board of Trade.

Closing prices were lower, despite assurances from President Bush that a grain embargo against the Soviet Union is not under consideration. Earlier in the day his agricultural adviser, Cooper Evans, made the same statement.

Traders have been concerned over what action the United States might take against the Soviets because of their troubles with Lithuania.

Commercials and professionals dominated the selling throughout the day. Some of it was attributed to profit-taking and some to liquidation.

Country movement was described as light as farmers turn their attention to field work. Although just a small percentage of the corn has been planted, the activity is expected to pick up this week.

The lack of any significant export sales weighed on prices, as did lower basis levels at the Gulf.

Soybeans turned lower after several days of advances, partly in response to the weakness in soybean products and the lack of trading on European markets.

New-crop wheat made made a number of contract lows in active trading.

At the close, corn was off 1/2 to 2, soybeans down 4 to 7 1/4, wheat off 2 1/2 to 5 and oats down 1/4 to 1 1/4.

MANAGUA, NICARAGUA (APRIL 24) UPI - Foreign delegations expected to include 11 heads of state arrived in Managua Tuesday for the inauguration Wednesday of President-elect Violeta Chamorro and the end of a decade of

leftist Sandinista rule.

The transfer of power from Sandinista President Daniel Ortega to opposition leader Chamorro, however, was complicated as both sides appeared at odds over who would be chief of staff of the largely Sandinsita military.

The official Sandinista newspaper Barricada confirmed Tuesday that Humberto Ortega, brother of the President Ortega and current chief of staff of the army, would step down from his responsibilities within the Sandinista party.

The move was seen as a way of allowing Ortega and other Sandinista military leaders to retain some control over the armed forces, while fulfilling a transition agreement that bans members of the military from holding key positions in political parties.

But the Political Council of Chamorro's 14-party National Opposition Union coalition said Tuesday morning it was ''unacceptable'' for Humberto Ortega to remain as head of the army. UNO sources told United Press International that Col. Oswaldo Lacayo, a cousin of Antonio Lacayo, Chamorro's son-in-law and a probable cabinet member, was being considered for the army post.

Chamorro said earlier this month that Humberto Ortega and other top Sandinista army leaders would be replaced, but the behind-the-scenes negotiations between her and President Ortega were expected to result in a compromise of some sort.

Also, Tuesday, the UNO-dominated National Assembly was scheduled to vote on its new president. The 51 UNO members of the 92-member Assmebly decided among themselves Saturday to elect Miriam Arguello, but the decision was a close one and splits within the UNO threatened to disrupt Tuesday's vote.

Meanwhile, most of the 11 heads of the state and others who were to attend Chamorro's inauguration began arriving Tuesday at Managua's Augusto Cesar Sandino airport. U.S. Vice President Dan Quayle was to arrive Wednesday morning to lead the American delegation.

Among the world leaders scheduled to attend were five Central American presidents, President Carlos Andres Perez of Venezula, Colombian President Virgilio Barco and Italian Prime Minister Giulio Andreotti.

Chamorro won a surprise landslide victory in national elections Feb. 25, defeating Ortega by a margin of about 56 to 43 percent and thus ending 10 years of leftist Sandinista rule.

#90114u1958 04/24/1990 ~United Press International

(APRIL 24) UPI - President Bush is taking a wait-and-see attitude on Lithuania. Bush consulted with congressional leaders today on possible measures against Moscow in defense of the Baltic republic's drive for independence. Rhode Island Senator Claiborne Pell, chairman of the Senate Foreign Relations Committee, says there was general feeling at the meeting that if the situation escalates, it could damage super-power relations. Pell says Bush has decided to keep his options in reserve because he doesn't want to add to the tension.

In Moscow, a four-member Lithuanian delegation is in the Soviet capital. But the group that arrived on Thursday has been left to wait, failing to make contact with any high-level Soviet officials.

The space shuttle Discovery and its five-member crew climbed to a record-high orbit after blasting off from Cape Canaveral this morning. The spaceplane is flying as high as 381 miles above Earth, roughly twice as high as shuttles usually fly. The shuttle's payload bay doors are open, exposing the Hubble Telescope that will be deployed tomorrow.

U-S officials delayed for several hours today the start of talks between the Soviet Union and the United States on bilateral trade. A U-S Embassy spokeswoman in Paris says the delay apparently was NOT related to the situation in Lithuania.

Recently freed U-S hostage Robert Polhill was reunited with his two sons today in Wiesbaden, West Germany, where Polhill is undergoing medical evaluation. Polhill was reunited with his wife in Syria before they flew to Germany yesterday. Polhill's sons... 23-year-old Brian and 26-year-old Stephen... arrived this morning. A U-S official says Polhill had lunch with his family as an accordionist played music in the background.

#90114u1963 04/24/1990 ~United Press International

SANTA MONICA, CA (APRIL 24) UPI - Elizabeth Taylor, battling a bout of pneumonia that has kept her hospitalized for more than two weeks, was ''breathing easier'' Tuesday but will remain in intensive care until her condition improves, a spokeswoman for the actress said.

The Academy Award-winning actress was listed in serious but stable condition in the intensive care unit at St. John's Hospital.

''Her doctors are somewhat encouraged and, although she's still on a ventilator to assist her breathing, she is showing some sign of breathing easier,'' Lisa del Favero, a New York City publicist for Taylor said.

''She'll remain in the ICU until she gets better. How long that will take, I can't say,'' del Favero said.

The results of a biopsy performed Sunday in an effort to determine what type of pneumonia Taylor has and how she contracted it are expected to be available sometime later this week, probably Thursday, del Favero said.

While her condition has been described as ''serious,'' Taylor, 58, is not ''on her deathbed. We're not talking about anything terminal,'' del Favero said.

Taylor's four children - Maria Burton-Carson, Liza Todd-Tivey and Christopher and Michael Wilding - were with her at the hospital.

Pulmonary disease specialists said Taylor's doctors took a prudent course by placing her on a ventilator. Additionally, a biopsy is typically taken to dictate therapy, especially when a patient fails to respond to antibiotics, as may have been the case with Taylor.

Taylor was moved to the intensive care unit Friday, three days after being transferred to St. John's from another hospital where she had checked in April 9 with what was described as a sinus condition and fever.

At the time Taylor was transferred to St. John's, one of her physicians, Dr. Patricia Murray, an infectious disease specialist, said the actress was diagnosed as having pneumonia and was suffering a high fever.

Taylor issued a statement at the same time in which she denied rumors that she was suffering from AIDS. Taylor has been active in AIDS public education efforts and has raised millions of dollars for AIDS research.

Del Favero said there was no indication that Taylor's pneumonia was precipated by any use of drugs.

Taylor, who has admitted a long dependence on such drugs as Demerol and Valium, as well as alcohol, has experienced other serious health problems. She has suffered from back problems that began with a fall from a horse during filming of the 1945 film ''National Velvet,'' and nearly died of pneumonia while filming in London in the early 1960s.

Moreover, Taylor's weight ballooned in the 1980s and she underwent several crash diets. She admitted herself into a drug rehabilitation program at the Betty Ford Center near Palm Springs in 1983 and in November 1988.

Local prosecutors last week declined to file charges against three of Taylor's doctors despite finding evidence that they had prescribed near-fatal doses of painkillers to the actress. The prosecutors said they found no criminal intent on the part of the doctors, and noted they had

tried to detoxify Taylor.

The violet-eyed actress, married seven times, including twice to the late actor Richard Burton, won best actress Oscars for her performances in ''Butterfield 8'' and ''Who's Afraid of Virginia Woolf?''

The last of Hollywood's golden era movie queens, Taylor surpassed such fellow child stars as Shirley Temple and Natalie Wood, becoming an international celebrity who met with crowned heads and presidents, yet had screaming fights with her husbands in public.

She has made headlines much of her life with scandals, illnesses, marriages, divorces and a luxurious lifestyle. A retinue of servants, nannies, pets and acquaintances followed Taylor from picture to picture in her heyday.

WASHINGTON (APRIL 24) UPI - White House press secretary Marlin Fitzwater said Tuesday there are ''some encouraging rumblings'' that another hostage held by Islamic extremists in Lebanon might be released but he had no details.

Fitzwater noted an article in the Tehran Times that said a second hostage will be released, and added, ''We've had some indications in private channels that that might be occurring, but nothing of the strength and directness that we had just prior to Mr. (Robert) Polhill's release.''

Polhill was freed Sunday, more than three years after he and two other Americans were seized by a militant group aligned with Iran.

Asked if the United States has any direct knowledge of an imminent release of another American captive, the spokesman said, ''I think the most honest answer has to be 'no.''' But he said, ''There are some encouraging rumblings.''

Other reports from the region spoke of the possible release within 72 hours of at least one of the captives, who include seven Americans and 10 other Westerners.

Fitzwater said President Bush reported briefly to congressional leaders Tuesday on the release of Polhill, a professor at the American University of Beirut who had been held for more than three years.

He said that Bush told the leaders about his telephone call Monday afternoon to Syrian President Hafez Assad and that he believes the Syrians ''had more than a passing role'' in the release.

While Bush repeated hin inaugural message to Iran that ''goodwill begets goodwill,'' the spokesman said he also declared, ''We cannot chip away at this problem on an incremental basis. We want the release of all hostages.''

Bush also said Iran understands that improved relations between Washington adn Tehran ''cannot occur until all hostages are released,'' Fitzwater said.

Polhill is receiving medical attention and being questioned by U.S. officials in West Germany. Fitzwater said he has no idea when Polhill might return to the United States.

#90114u1990 04/24/1990 ~United Press International

PARIS (APRIL 24) UPI - Negotiations between the United States and the Soviet Union on a bilateral trade agreement began Tuesday amid heightened

tensions between the superpowers over Lithuania.

There had been much speculation that the Paris talks would be postponed or delayed as part of U.S. retaliatory measures against the Soviet Union for its decision to cut off oil and gas supplies to Lithuania, but President Bush witheld any decision on sanctions against Moscow after consulting with congressional leaders Tuesday.

The White House cited what it called new ''flexibility'' on the part of Moscow in the Lithuanian crisis in explaining Bush's position.

As a result, the fourth - and perhaps decisive - round of talks began on schedule.

The talks are expected to last until Thursday, diplomatic sources said.

A trade treaty between the two countries is essential before Congress can consider Bush's request that the Soviet Union be granted most favored nation trade status.

The sources said the talks will center on conditions for U.S. investment in the Soviet Union, ranging from hiring policies to repatriation of profits.

A formal treaty would lead to expanded trade between the two countries and provide a legal framework for broader commercial relations.

In addition to the negotiations on a trade agreement, the two countries are working on a separate set of investment and tax agreements.

Both Washington and Moscow would like the negotiations to be completed so a treaty can be signed by Bush and Soviet President Mikhail Gorbachev at a summit set to run from May 30 to June 3.

There is no existing comprehensive commercial agreement between the superpowers, although accords on specific areas, such as wheat, are in effect, the diplomatic sources said.

Acquiring most favored nation status is of crucial importance to Moscow, the sources added, because it would permit the Soviet Union to import high-technology products and know-how necessary to modernize the troubled Soviet economy.

#90114u1991 04/24/1990 ~United Press International

JERUSALEM (APRIL 24) UPI - Labor Party leader Shimon Peres cast doubt Tuesday on the rival Likud Party's ability to form a government if he

fails, but the outlook for his success appeared to dim two days before his deadline expired.

Peres received a mandate to form a new coalition from President Chaim Herzog after Prime Minister Yitzhak Shamir lost the vote of confidence March 15.

But even with movement between Shamir's rightist Likud Party and the center-left Labor Party during the nearly six weeks of negotiations, the support is split in the 120-member Israeli Parliament, the Knesset.

''The situation today is as it was yesterday and the day before: 60-60. Nevertheless, our 60 are very strong,'' Peres told Army Radio. ''I do not think the 60 others are definite. I do not know on what basis the Likud says that it has a narrow government. ... It is a dream, a very strange thing, not serious talk.''

Peres had planned to present his coalition to the Knesset earlier this month, but decided against it when a member of the ultra-Orthodox Agudat Israel Party pulled his support from Labor at the last minute.

Peres then received a 15-day extension from Herzog that expires Thursday.

The 15-month-old Labor-Likud ''national unity'' government collapsed March 13 over the direction of the peace process and how to respond to a U.S. proposal on Israeli-Palestinian talks.

Among the issues confronting the government is the 28-month-old Palestinian uprising against Israeli occupation.

In the occupied Gaza Strip Tuesday, a resident of the Jabalia refugee camp was attacked by masked men who broke into his house and killed him with knives and axes, Palestinian sources said. The sources said the man had been accused of collaboration with Israeli authorities.

Israeli forces also carried out searches for two men who escaped from a Gaza City prison while awaiting trial on charges of leading outlawed popular committees. It was the fourth escape at the prison since the start of the popular revolt.

In the occupied West Bank, ultra right-wing Rabbi Moshe Levinger was lightly injured when he was hit in the head by a rock while walking alone in Hebron, Israel Radio reported.

Levinger, founder of the Jewish settlements in Hebron and nearby Kiryat Arba, is awaiting trial in connection with the 1988 slaying of a Hebron shopkeeper killed after the rabbi's car was stoned in the West Bank town.

Ironically, the whirlwind of political bargaining apparently has brought back the orthodox religious Shas Party to Shamir's camp, but an agreement has not been signed. Shas helped Labor bring down Shamir's government.

Likud and Labor officials held meetings Tuesday to shore up the support within their camps, while each continued their attempts to woo backers away from their rivals.

Foreign Minister Moshe Arens of Likud maintained Peres would fail and the Likud would be able to establish Israel's next government.

Arens ruled out the possibility of another national unity coalition.

''I think that one must learn lessons from this situation (the past Likud-Labor coalition),'' Arens said. ''Therefore, I do not foresee that the government, which will be led by the Likud, will be a unity government.''

(APRIL 24) UPI - Orders for durable goods rose six-point-seven percent in March, with demand for planes and cars leading the biggest increase in more than one year. The Commerce Department report caught anyalysts by surprise, since many expected a moderate increase of one percent. One economist says the figures are further evidence that- in his words- ''the economy has bounced back.''

British officials say they are slowly breaking down barricades erected in the siege that began 24 days ago and involved hundreds of inmates at Strangeways Prison. Six holdouts remain. Today, the inmates set a fire that burned two wings of the Victorian-era facility 200 miles northwest of London. Authorities predict the siege will be over within 36 hours.

A published report says the Air Force wants to mothball plans for deploying M-X missiles on rail cars. The report says the proposal also would reduce B-2 bomber production by as much as one-half. The report quotes unidentified sources as saying Air Force officials are urging Defense Secretary Cheney to make the changes to reduce the budget and because of changes in the Soviet threat.

#90114u2043 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - Despite a week of warnings, President Bush declined to back up tough words with firm action Tuesday and deferred any economic countermeasures against Moscow for the Soviet intimidation of Lithuania.

''I've not decided what will be done,'' Bush announced with the apparent backing of Congress and U.S. allies. ''This is a highly complex situation that we're facing, and there's a lot at stake in this situation.''

Quoting Yogi Berra, he said only half in jest that he did not ''want to make the wrong mistake'' by doing anything ''that compels the Soviet Union to take action that would set back the whole pace of freedom around the world.''

The adherence to caution after expressions last week of mounting concern had the support of Congress and allies reluctant to see Lithuania intrude on steady progress by the superpowers toward unprecedented postwar cooperation.

With the geopolitical stakes so high, Bush told a group of reporters he did not want to jeopardize the ''great deal of potential'' for peaceful dialogue that could enable Soviet-annexed Lithuania to achieve its independence.

''I am not going to give up on trying to get the Soviet Union and the Lithuanians into a dialogue,'' he said. ''I think that's a constructive approach. I think that's the approach that the American people and others around the world want.''

Though described as reversible, the decision to not provoke Soviet President Mikhail Gorbachev marked a change in direction from last week, when Soviet moves to curtail shipments of vital goods to Lithuania prompted threats of U.S. retaliation.

''We have had the chance to analyze the situation and at this point we don't believe that other actions are necessary,'' White House press secretary Marlin Fitzwater explained. ''But that could change at any time.''

After consultations with ''at least 20'' other governments found no backing for sanctions, Fitzwater said the administration, Congress and the allies were ''in pretty close alignment'' on the need for no immediate action.

As the Soviets stepped up pressure Tuesday by strengthening their control over Lithuania's borders, U.S. policy continued to be guided by a paramount desire to not imperil the warming trend in U.S.-Soviet relations.

The administration already had ruled out any retaliation affecting areas of

clear mutual benefit, such as arms control and next month's Bush-Gorbachev summit. Feeling no overwhelming pressure to act, Bush was playing it safe.

In remarks to a group of contractors, he recalled how the U.S.-supported 1956 revolt in Hungary was brutally crushed by Moscow. ''It is an extraordinarily complicated situation,'' he said. ''There are no easy calls.''

''I think the president is proceeding carefully and that's the appropriate course,'' said House Speaker Thomas Foley. ''There is not any action that, I believe, could be taken at this point that would be constructive.''

Senate Foreign Relations Committee Chairman Claiborne Pell, D-R.I., said Bush had ''general support'' for his view that punitive action against Moscow ''could precipitate an escalation'' of tensions that ''could be of mutual damage.''

Senate Finance Committee Chairman Lloyd Bentsen, D-Texas, said Bush should be given ''a great deal of discretion'' in the matter.

Despite intensified warnings that further coercion of Lithuania would result in ''appropriate responses,'' the resumption of talks in Paris on a landmark U.S.-Soviet trade agreement signaled business as usual.

A slowdown or suspension of those negotiations, which symbolize an ongoing expansion of bilateral economic relations, was among the options Bush considered for making the Soviets pay a price for the crackdown on Lithuania.

In the face of developments Monday that prompted the White House to welcome signs of Soviet ''flexibility,'' he put off action that could antagonize Gorbachev and cast a sudden chill on U.S.-Soviet relations.

''I will let the American people know and the Congress know when I decide to take certain action,'' he said. ''And that decision has not been made.''

In addition to the trade talks, the United States and Soviet Union soon will be engaged in other discussions on expanded cooperation in civil aviation and maritime transportation and tax and investment matters.

Secretary of State James Baker said last week that a rollback in commercial relations would be the most likely response to escalation of the Lithuania crisis because Gorbachev, struggling to restructure the Soviet economy, needs those enhanced ties more than the United States.

#90114u2058 04/24/1990 ~United Press International

NEW YORK (APRIL 24) UPI - A black man who admitted bringing bats to the scene of the Bensonhurst racial slaying testified Tuesday he learned of the killing when a neighborhood youth said, ''Joey Fama just shot a black kid on the corner.''

Russell Gibbons, 21, told the jury in State Supreme Court in Brooklyn that he was standing by a stoop with several others moments after Fama allegedly shot 16-year-old Yusuf Hawkins.

Fama, 19, is charged with second-degree murder in the slaying of Hawkins, a black teen who came to the predominantly white neighborhood to look at a used car and was surrounded by a bat-wielding mob.

Gibbons testified that shortly after hearing gunshots a neighborhood youth ran up to him.

''Frankie Tye came up,'' Gibbons said. ''He was excited, in a nervous state. He said Joey Fama just shot a black kid on the corner. I told him he better be careful for what he said.''

Gibbons said he helped his longtime friend, Charles Stressler, 22, bring a box of softball bats to a store in Bensonhurst after Keith Mondello told him that a gang of ''black and Hispanic'' youths were coming into the neighborhood for a fight.

''He asked me if I'd be there to defend himself,'' Gibbons testified.

''He asked me if I would take a walk with him to his house to get some bats,'' Gibbons said. ''We went to the house and brought the bats in a box. I helped carry them to the candy store.''

Gibbons said he watched white youths from the neighborhood arm themselves with bats and even took one himself in preparation for the fight.

''Did you in fact hear racial epithets?'' prosecutor Paul Burns asked.

''Yes, one or two,'' Gibbons said.

A crowd formed in an adjacent schoolyard and Gibbons said he heard someone yell, ''They're here, they're here'' before the crowd swarmed out of the yard and down the avenue.

Gibbons said he waited until everyone had left and then cautiously followed but turned back after hearing four shots.

Defense lawyers have said that Gibbons' testimony will help dispel the prosecution's contention that the killing of Hawkins was recially motivated.

Outside the courthouse, the Hawkins family said they were frustrated by the witness.

''Mr. Gibbons didn't do anything for anybody,'' said Moses Stewart, Yusuf's father, ''I closed my eyes and saw an Italian.''

Fama and Keith Mondello, 19, are both charged with second-degree murder in the Aug. 23, 1989, killing of Hawkins. The slaying inflamed racial tensions citywide and sparked a series of protests, some of them violent.

He was the only suspect in the case who was not released on bail. His lawyer has said Fama, who suffered a childhood head injury, has such limited intelligence that he legally should not be held responsible for murder.

The black teenager was slain during an attack by a gang of about 30 whites some wielding baseball bats, who had waited outside the home of Gina Feliciano. The young woman had told Mondello, a former boyfriend, that she was inviting blacks and Hispanics to her 18th birthday party.

NEW CARLISLE, IN (APRIL 24) UPI - Inland Steel Industries and Nippon Steel dedicated the world's most advanced cold-rolled steel plant Tuesday - a $525 million facility that reduces processing time from 12 days to less than an hour.

I/N Tek, a joint venture by Inland and Nippon, is a technological marvel spanning half a mile and towering up to 10 stories over the Indiana countryside near New Carlisle, 15 miles west of South Bend.

I/N Tek incorporates and expands on a continuous cold-rolling process developed by Nippon Steel, the world's leading steel producer, at a prototype rolling mill in Hirohata, Japan.

The plant, which currently employes about 200 people and will have a work force of about 245 when in full operations, also incorporates Japanese-style team-management techniques.

I/N Tek began producing cold-rolled steel Mar. 19 but is still in the shakedown process, refining the operation and finetuning plant automation systems.

But I/N Tek President John Selky said the plant's early runs have gone better than expected and they have been able to run non-stop for several hours at a stretch.

I/N Tek's continuous process produces higher-grade steel than conventional methods, Luerssen said. There also is less waste, because the new process ensures uniformity in gauge and other factors.

Luerssen predicted the new cold-rolling process will reduce the plastics industry's penetration of the steel market by providing higher quality, more formable steel.

As for future joint ventures between Nippon and Inland, Nippon Steel President Hiroshi Saito observed, ''We have an old saying that what has happened twice may happen a third time.''

But he said there are no plans for any new venture at present.

#90114u2137 04/24/1990 ~United Press International

MEMPHIS, TN (APRIL 24) UPI - The federal jury in the trial of Rep. Harold Ford deliberated Tuesday without reaching a verdict on fraud and influence-peddling charges against Tennessee's first black congressman.

The jury of eight blacks and four whites met for three hours on the third anniversary of Ford's indictment on 19 charges of bank fraud, mail fraud and conspiracy to defraud the government. Deliberations will resume Wednesday.

Ford, who faced 95 years in prison if convicted all charges, accused prosecutors of racial and political motivation and presented no witnesses in his defense during the 10-week trial.

Ford predicted a quick acquittal Tuesday. Three of the jurors have ties to the congressman - two worked in his political campaigns and another's relatives were buried by the Ford family funeral home.

''I feel super,'' Ford told reporters. ''I'm ready for the jury to come back.''

The government contended that Ford, 44, took $1.5 million in fraudulent loans from banks controlled by brothers Jake and C.H. Butcher Jr. in 18 payments between 1976 and 1983.

In return, Ford, an eight-term Democrat who runs a powerful political machine in Memphis, delivered the votes of Tennessee's biggest city to Jake Butcher in the banker's unsuccessful race for governor in 1978, prosecutors charged.

Three bank executives - Karl Schledwitz, David Crabtree and Douglas Beaty - stood trial with Ford on charges of funneling loans to him through bogus channels.

Monday, Assistant U.S. Attorney Dan Clancy likened Ford to a bank robber and his lawyers to aluminum-siding salesmen in ridiculing the congressman's defense.

''Congressman Ford makes $80,000 a year. Contrary to what politicians tell us, you can live on that,'' Clancy said in closing arguments. ''But they got many, many hundreds of thousands of dollars, more than any bank robber ever got going in carrying a gun and holding up a bank. You might say they had a .38-caliber pencil.''

Clancy made light of the contention of Ford's defense that the loans were for his legitimate business interests.

''If they were selling aluminum siding or insurance, I might have bought it,'' Clancy said. ''Make everybody play by the same rules. Being a

congressman doesn't mean you don't have to play by the rules.''

The Butchers controlled a billion-dollar network of 20 banks in Tennessee and Kentucky until it collapsed under the weight of bad loans in 1983. The Butchers are serving 20-year federal prison sentences for funneling millions of dollars in fraudulent loans to themselves. C.H. Butcher also pleaded guilty to two counts in the Ford indictment.

Prosecutors said the loans to Ford actually were bribes and the congressman did not repay them until 1983 under pressure from federal regulators who were closing the Butcher banks.

Prosecutors said Ford used the loans to live extravagantly, buying a Mercedes-Benz, two homes and a $10,000 Oriental rug while telling the government he was nearly bankrupt.

In his closing arguments, Ford's lawyer, William McDaniels, defended the congressman's lavish lifestyle, saying ''that is not a crime,'' and denounced the prosecution as ''falling woefully short'' of proving the charges.

The government called neither Butcher to testify but relied on the testimony of federal bank regulators and Jesse Barr, a Butcher associate who is serving an 18-year sentence for bank fraud.

Barr testified that the Butchers paid the congressman for a place on the ''Ford Ballot,'' a list of favored candidates distributed around Memphis before each election. Ford says the payment was for the cost of poll workers.

#90114u2149 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - President Bush, whose rhetorical hallmark is the dangling dependent clause, fell back on Yogi Berra Tuesday to explain his policy toward the Soviet-Lithuanian confrontation: ''I don't want to make the wrong mistake.''

Bush, whose circuitous syntax sometimes leaves listeners at a loss, was so taken with the phrase he borrowed from the legendary catcher that he used it twice. Or, as Berra might say, ''It was deja vu all over again.''

An acknowledged master of malapropism, Berra's career as a baseball player and manager was marked by an ability to mix metaphor and nonsense - and still make his point perfectly clear.

Bush has eschewed direct action against Moscow in response to its pressure on Lithuania. In describing the highly complex situation, Bush told a

group of agriculture journalists:

''I don't want to make, you know - remember Yogi Berra, what happened ... why did he lose the ball game? He said, 'We made the wrong mistake.'

''You've got to think about that one. And I don't want to make the wrong mistake.''

Bush later repeated the explanation to the Associated General Contractors meeting.

#90114u2160 04/24/1990 ~United Press International

NEW YORK (APRIL 24) UPI - Customs agents searching for a fugitive discovered the largest crack vial factory ever found in the United States and seized 5 million crack vials and three machines used to make the containers, officials said Tuesday.

Agents came upon the factory in the Greenpoint section of Brooklyn Monday night while hunting for a fugitive and made three arrests in the raid, said Special Agent Richard Mercier, head of the New York office of the U.S. Customs Service.

''This was the largest one from a production standpoint that we have known '' said Mercier.

The three Chinese-made machines were capable of making 2 million plastic crack vials a day and were worth $600,000 each, Mercier said. Three people were arrested for possession of drug paraphernalia.

''We were here to try to locate a customs fugitive and we ran into three people physically cranking these things out at machines,'' he said.

The seizure came two months after agents uncovered 107 million crack vials in a series raids in the College Point section of Queens, but all those vials had been made in Taiwan, said Mercier.

He said the last raid and the continuing investigation into drug paraphernalia was dubbed ''Operation Pipe'' and has yielded $60 million in seizures and 50 arrests in the New York area in the last three years.

The success of the operation, which has targeted smugglers who bring the vials in from factories in Taiwan where production is legal, has led organizations to start making the vials in the United States, Mercier said.

''I think it's an indicator that we've had an impact on the smuggling of this type of material,'' he said, adding this was the second or third

crack vial factory found in the United States.

''We have seized other locations, some production facilities, but not this large, these machines are massive, as large as cars,'' Mercier said.

The factory had been in operation for as long as four months and the colored caps that topped the vials were believed to be codes for various distribution points throughout the city.

The February raid that netted 107 million vials and other paraphernalia worth $27 million was linked to Kingdom USA, a Taiwanese company that also makes vials and crack pipes in Taiwan.

The industry is dominated by Asians, Mercier said, making it difficult to infiltrate with undercover agents.

Information from this raid has been passed on to customs officials in Asia who already have found Kingdom's legal crack pipe factory in Taiwan.

Mercier said it was unknown what the effect of the raid would be on the drug trade in New York.

#90114u2209 04/24/1990 ~United Press International
TRENTON, NJ (APRIL 24) UPI - Former Camden County Prosecutor Samuel Asbell pleaded guilty Tuesday to filing a false police report that claimed he was the target of a New Year's Day assassination attempt.

''This information was not accurate and led to my filing of a false police report,'' Asbell said as he pleaded guilty to a single count in Superior Court. ''I deeply regret it.''

A plea agreement made it unlikely that Asbell will go to jail. No sentencing date was set.

Asbell, a flamboyant, gun-toting office holder who often accompanied police on drug raids, was facing the loss of his office with the change of governors when he claimed in January that he was shot at by two unknown individuals.

Asbell peppered his official car with gunshots and claimed two men tried to kill him in a drive-by shooting.

Asbell likened the incident to attacks against judges in Colombia by drug lords and suggested it was drug-related. His story came at the same time as the letter-bomb death of a federal judge in Alabama and civil rights lawyer in Georgia and concern over safety of prosecutors and judges, and received nation-wide publicity. A Maryland judge was also wounded by a letter-bomb at about that time.

The former prosecutor told Judge Samuel Lennox he underwent counseling following the episode and now understands the reasons behind his actions. He did not elaborate.

He was appointed to the post by Gov. Thomas Kean, a Republican, but could have been turned out of office by Gov. Jim Florio, a Democrat.

Asbell apologized for the anguish his actions caused family and friends.

''No such conduct will ever occur again,'' he said.

Lennox pointed out that because Asbell pleaded guilty to charges connected with his official capacity, he would be barred from holding public office in the state in the future.

''That seems to be a very significant aspect of this case,'' Lennox said.

''Do you understand that?''

Asbell responded, ''Yes, sir.''

Asbell's story began falling apart almost as soon as he began telling it. After a long interview with state police and investigators from the attorney general's office Jan. 4, he resigned and entered the Carrier Clinic, a mental health facility near Princeton.

No charges were filed then but Lennox revealed that the episode was being investigated by a grand jury when the plea agreement was reached.

Asbell has applied for a pre-trial intervention program that could keep him from serving a jail term and Lennox ordered Camden County probation officials to prepare a pre-sentence report. Asbell was not in custody prior to the hearing and was released on his own recognizance.

Making a false report is a fourth-degree crime that carries a penalty of 18 months in prison and fines of up to $7,500, but the plea agreement called for prosecutors not to object to Asbell's entry into the pretrial program, Asbell's attorney, Philip Seaton, said.

Asbell also agreed to pay $12,000 in restitution to pay for the investigation of the incident and promised not to own any working guns for three years.

Seaton, who refused to say whether Asbell was still a patient at Carrier, said Asbell plans to return to practicing law. Carrier officials refused to comment.

#90114u2217 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - Linking the rise of drug abuse to the failure of the war on poverty, the nation's mayors Tuesday called for a wide-ranging anti-drug effort that includes job training, education and treatment on demand.

''We are fighting the war on drugs in America today in large part because our nation has not prevailed in the war on poverty,'' Houston mayor Kathyrn Whitmire, president of the U.S. Conference of Mayors told a news conference concluding a two-day meeting of mayors and police chiefs on crime and drugs.

''That there is a direct correlation between poor economic conditions and the drug-related crime and violence in our cities should be clear to all '' Whitmire said. ''We cannot effectively discourage drug trafficking and abuse unless we find ways to ease the pain of poverty and unemployment.''

But the mayors' and police chiefs' message fell on deaf ears in the administration. On Monday, National Drug Policy Control Director William Bennett told the session he planned few changes in his anti-drug strategy which is aimed principally at law enforcement and disrupting the supply of illegal drugs.

Whitmire, joined by New York Mayor David Dinkins, Boston Mayor Ray Flynn and Philadelphia Mayor Wilson Goode, however, stressed that such an approach was inadequate.

And, for the mayors, drug ''treatment on demand'' was called an imperative and ''the essential weapon in the war on drugs.

But, Whitmire said, Bennett's anti-drug strategy ''does not even include it as a goal.''

''Congress and the administration must now understand that on the basis of our experince in the drug war to date,'' Whitmire said, ''we can no longer conceive of winning the war unless we are able to offer the most basic economic opportunities to all members of our communities.''

Flynn, also linking poverty and drugs, labelled the streetcorner drug sellers ''Mr. Reagan's children,'' saying that for many of them the alternatives were ''either poverty or selling drugs.''

''We have to put a new alternative on the table,'' he said, ''and it has to be economic opportunity.''

''We should not accept the fact that because Mr. Reagan said these programs didn't work, that they didn't. In fact, it (the War on Poverty) worked very effectively.''

In outlining elements of what they believe to be an effective strategy, the mayors and police chiefs called for:

-Greater job opportunities, including expanded federal employment and training programs.

-Full funding for the Head Start pre-school program which now receives enough money to finance just over half those elgibile.

-Direct federal funding to the cities of anti-drug program money.

-Increased aid for drug treatment, rehabilitation and job training for prison inmates.

-Federally required drug education programs in all the schools in all

grades.

-A more aggressive attack on drugs by the entertainment industry.

-Establishing a national policy of providing treatment on demand, with a specific timetable for achieving the goal.

-Increased minimum security prisons and drug treatment facilities.

(APRIL 24) UPI - President Bush is keeping his options open on Lithuania, a situation he describes as ''highly complex.'' Bush told reporters after meeting with congressional leaders at the White House that he is holding off from any action because he does NOT want to make a mistake. Bush says he still believes the answer lies in a dialogue between the Kremlin and the rebellious republic.

Scientists moved one step closer today to revolutionizing astronomy. The shuttle Discovery rocketed into a record-high orbit from Cape Canaveral. The ship carries the one-point-five-BILLION-dollar Hubble Space Telescope that is scheduled to be deployed tomorrow afternoon. Researchers involved

in the project say the telescope will likely change man's concept of the universe.

At least four people were injured, one critically, today when a gunman opened fire on a crowd of shoppers at a mall north of Atlanta, Georgia. Police spokesman Tom Brown says the suspect was incoherent when he was taken into custody. Brown said the man carried some documents that indicated he may have spent some time in Georgia Regional mental hospital.

The military doctor treating Robert Polhill at an Air Force base in West Germany says the freed U-S hostage is ''very angry'' at being held captive for more than three years. But officials say Polhill is in good physical and mental shape, considering his ordeal. Polhill is being interviewed by U-S intelligence officers, though he has expressed concern about endangering other hostages.

WASHINGTON (APRIL 24) UPI - The House overwhelmingly adopted a resolution Tuesday that recognizes Jerusalem as Israel's capital, a move critics warned will disrupt the Middle East peace process but that supporters argued is morally right.

The House vote came as controversy continued of the Senate's approval of a similar resolution March 22. Senate GOP leader Robert Dole of Kansas, who co-sponsored the Senate measure, returned last week from a Middle East trip saying he had made a mistake.

Dole's description of the resolution as ''dangerous nonsense'' and his questioning of U.S. aid to Israel prompted an intramural Republican brawl, with House assistant GOP leader Newt Gingrich of Georgia trading barbs with Dole.

Israel occupied East Jerusalem in the 1967 Six Day War and considers the unified city to be its capital. The United States recognizes Tel Aviv as Israel's capital and believes that, although Jerusalem should stay unified its status should be determined by Arab-Israeli negotiation.

Supporters of the non-binding House resolution, adopted 378-34, said it was necessary to calm Israeli fears that Washington would support a divided city, fears sparked by President Bush's comments March 3 that he would oppose Jewish settlements in East Jerusalem.

''It is the sovereign right of any country to determine where its capital is and we might as well recognize that fact,'' said Rep. Dante Fascell, D-Fla., chairman of the House Foreign Affairs Committee. ''I wish the issue had never come up ... but unfortunately it did come up.''

Rep. Eliot Engel, D-N.Y., the resolution's sponsor, said the president's remarks ''sent the wrong signal.'' He added, ''We need to encourage the Israelis to take risks for peace. We do not do that by stabbing them in the back.''

But Rep. David Obey, D-Wis., said, ''We ought to ask this question: What will passage of this resolution at this time contribute to the overriding imperative in the Middle East - forward movement on the peace process? The answer to that question, unfortunately, is nothing.''

Echoing Dole's complaint that Congress passes too many resolutions, Obey said, ''No one's interest is served by unnecessarily inflaming the dialogue at this moment - not Israel's, not America's and not anyone else's.''

Rep. David Bonior, D-Mich., said the resolution was especially untimely because it comes at a time when the Israeli government has admitted supporting a Jewish settlement in a Greek Orthodox building in a traditionally Christian area of East Jerusalem.

''Given the recent developments in Jerusalem, this resolution will be seen I think, as an affront to the Arab community, the Christian community and the Greek Orthodox community,'' he said.

However, supporters of the measure said it was a matter of principle. ''The Jewish people who longed for 2,000 years to return to Zion never forgot Jerusalem,'' Rep. Dan Burton, R-Ind., said. ''Israel's legitimate moral claim to Jerusalem is not the obstacle to peace.''

Concerns about the resolution's impact on the fate of U.S. hostages in the Middle East were raised by Rep. James Trafficant, D-Ohio, who said, ''We need the community of the Middle East to help us in that process.''

''We're here today being held to a strange litmus test ... by the Israel lobby and no one will say it,'' he said. ''We represent America. We're not members of the Israeli Knesset.''

House Republican leader Robert Michel of Illinois said he would support the resolution because it says ''we like Israel,'' even though he compared its value to a resolution to ''declare National Frozen Kumquat Week.''

MIAMI (APRIL 24) UPI - A Ladeco Airlines plane bound for New York ran off the runway just before takeoff at Miami International Airport Tuesday, prompting cancellation of the flight and an investigation by federal

officials.

None of the passengers or nine crew members on the Boeing 707 was injured during the 7:45 a.m. mishap, officials said.

''The tail of the airplane came down at a given point during the takeoff attempt, and scratched the runway,'' said Eduardo Gallardo, general manager of the Chilean airline that operates nine planes and has six flights a week from Miami. ''It seems like that's the reason it went off the runway.''

''There wasn't any problem before takeoff,'' said Chuck Smith, a passenger on the flight. ''It wasn't until he hit full throttle. Then the nose of the airplane pointed up, so we went immediately straight up and bounced.''

The Federal Aviation Administration was investigating the incident, said Arlene Salac, a FAA spokewoman in Atlanta.

''It blew a tire, and that's what caused it to roll off the runway,'' Salac said.

But Gallardo said his initial investigation did not indicate a blown tire on the plane. ''We're trying to investigate the reason for it, but it did not blow a tire. There was nothing wrong with any of the tires,'' he said.

Ladeco, which provides passenger service to Central America, was forced to cancel Flight 330, but hopes to have the plane back in the air by Wednesday, Gallardo said.

The FAA was awaiting a report by the airlines to complete its investigation, Salac said.

KALAPANA, HI (APRIL 24) UPI - Lava from long-erupting Kilauea Volcano destroyed two more homes in its slow-moving rampage through a rural housing area, authorities said Tuesday.

The lava had stalled and reinflated Monday after demolishing 10 homes the previous four days, including five homes over the weekend.

But Monday night one part of a flow on another unpaved street in the housing area - moving faster than expected - incinerated a home belonging to Robert Saulson.

At 2:35 a.m. Tuesday, the 2,100-degree river of molten rock demolished a one-story structure, belonging to Thomas and Sharon Spivey of Tempe, Ariz. on the same street.

Civil defense officials said there was another home about 300 feet away from the lava flow.

Another resident had his home picked up and moved out of harm's way Sunday after his insurance expired and was not renewed.

Authorities nervously watched another lava flow heading down the slopes of the volcano, following the same course as a flow that invaded Kalapana Gardens in December 1986 and destroyed 15 homes in little more than a day.

The latest flow was three-quarters of a mile from highway 130, near the upslope boundary of the housing area on the southwest coast of the island of Hawaii.

The volcano was spewing out about 650,000 cubic yards of lava daily from its vent miles upslope.

Authorities earlier this year estimated the damage done by the volcano to homes, property, and roadways since Jan. 3, 1983, at more than $20 million not counting the most recent destruction.

The eruption wiped out the community of Kapa'ahu and virtually destroyed the Royal Gardens housing area before targeting Kalapana Gardens, invading the housing area first in 1986 and again repeatedly this year.

#90114u2315 04/24/1990 ~United Press International

CAMBRIDGE, MA (APRIL 24) UPI - The first black professor to receive tenure at Harvard Law School announced Tuesday that he intends to request an unpaid leave of absence until the school appoints a tenured black woman professor.

Derrick Bell told a group of 200 students at a campus rally that he sent a letter to law school Dean Robert Clark two weeks ago saying he intended to request a leave.

''I cannot in good conscience continue in a role that limits rather than expands faculty diversity,'' Bell said.

''I agree with our students who are telling us that without women of color in permanent positions, the faculty is as seriously unrepresentative now as it was before I became its first black member in 1969,'' Bell said to cheers, many of them from student activists in the Harvard Law School Coalition for Civil Rights, which has led the fight for more minorities and women on the faculty.

''I hope students will be moved by my example to continue their efforts to gain sooner rather than later the diversity in our faculty that is now so positive a force in our student body,'' he said.

Bell's decision comes after students at the prestigious law school twice this month occupied the dean's office overnight to protest the lack of

minority representation on the faculty.

Harvard Law has 61 tenured professors, of which five are women and three are black men. It has no black women on the full-time faculty, no Hispanics and has never had a tenured black female professor.

''For the first 150 years of its history, the faculty at Harvard Law ... was all white and all male. That is a horrible history not remediable by plaintive pleas of 'mea culpa' combined with the token appointment of members of the victim class who are least likely to remind the school of its past racist hiring record,'' Bell said to enthusiastic applause and cheers.

Bell said in the letter, circulated recently among faculty members, that the leave would begin at the end of the academic year.

Bell told United Press International that ''about a half-dozen faculty have indicated their support'' for his decision.

Professor Charles Ogletree, who is black and in tenure track, said Bell's leave would be ''a tragic event.'' Ogletree said faculty had been meeting privately to discuss the matter and would likely issue a public position in the near future.

Bell said he has not ''formally given notice and so I have not formally heard a response from Dean Clark.''

''I very much want to teach next year,'' he said, adding his wife was seriously ill and he could not afford a year or more without his law school salary.

Clark sent a letter to the coalition regreting he was ''home ill.'' In it, he called Bell ''a creative scholar and stimulating teacher.''

''It would be unfortunate if he were not around next year,'' Clark wrote, but added, ''I do not think his taking leave is an appropriate or effective way to further the goal of increasing the number of minorities and women on the faculty.''

''The school is commmitted to that goal, as well as to continuing the practice, on which its greatness rests, of appointing faculty who will be outstanding scholars and teachers,'' Clark wrote.

Law Professor Louis Kaplow, associate dean and a member of the faculty's appointments committee, said in a news conference that Bell's departure would be ''a real loss, precisely because he is a contribution to the school.''

But Kaplow defended the school's hiring record, noting that nearly 45 percent of the faculty members hired in the past 10 years have been women or minorities.

Students, however, said that figure translates to only three black men and three white women professors.

Bell, 59, was appointed to the faculty in 1969 amid strong student pressure to hire a black law professor. He received tenure two years later and became a leading critic of the school's minority hiring.

He told the rally many students have came to Harvard Law with high ideals about making changes in the world, but are often frustrated by a lack of support from much of the faculty.

''I think in our push for diversity, we are seeking to have greater concern about character and not just concern about quality of education,'' he said.

Students have been battling in support of Regina Austin, a black visiting professor from the University of Pennsylvania Law School, where she is tenured.

Traditionally, but not always, Harvard will not decide whether to offer tenure to visiting professors until the year after they complete their stint. Students demand a decision on Austin before she leaves.

Ursula Dudley, a student in the coalition, announced at the rally the formation of an alternative investment fund to solicit donations and pledges from law school alumni who support greater faculty diversity. The donations will be held in escrow until the administration grants tenure to a black woman and implements a comprehensive plan to diversify the faculty the coalition said.

The move comes as the law school launches what Clark has said is the largest law school fund-raising drive in history.

#90114u2343 04/24/1990 ~United Press International

BUCHAREST, Romania (APRIL 24) UPI - Security forces carrying automatic rifles and batons beat and arrested anti-communist demonstrators in a Bucharest square Tuesday, but protesters quickly regrouped in scenes reminiscent of December's revolution, witnesses said.

Within hours of the early morning crackdown, an estimated 2,000 protesters calling for the ouster of Romania's interim government flooded back into the main University Square, paralyzing local traffic.

Some demonstrators broke through a police line just before 1 p.m., the official Yugoslav news agency Tanjug said, but did not say what happened then.

A ranking Interior Ministry official said authorities did not interfere or

use force against the demonstrators, but added that protesters used violence against police, resulting in three injured police cadets.

The turmoil was reminiscent of the revolution, when soldiers and protesters clashed repeatedly on Dec. 21-22 during the overthrow of communist dictator Nicolae Ceausescu, who was shot by a firing squad on Christmas Day.

Tuesday, the ruling National Unity Council rejected a proposal to give security forces extended power to quash the protest. It said it would send a delegation of political leaders to talk to demonstrators about their grievances and report back, the state-run Rompres agency said.

A special delegation was told by protesters in University Square they want interim President Ion Iliescu to resign, the news agency said.

It said their demands also included the resignation of the interior minister, autonomy of the television station and the dismantling of Communist Party structures and the hated secret police network.

The Interior Ministry was requested by Parliament to show more firmness in ensuring public order in Bucharest because ''in no country with democratic traditions such meetings or unauthorized demonstrations which hinder a smooth run of activities would be tolerated,'' Rompres said.

Anti-communist protesters began staging demonstrations in the square Sunday, waving Romanian flags and shouting slogans against the Iliescu, the government and the Front.

The demonstrators charge the Front is run by former members of Ceausescu's government. They have called for daily mass protests until May 20 national elections to force the Front to surrender power to non-communist forces.

At dawn Tuesday, rows of police with shields and batons and three truckloads of soldiers charged about 100 men, women and children, beating them and scattering the crowd.

''They attacked us with batons and kicked us with boots,'' Peter Stoica, 25, said. ''About 50 have been arrested. None of us represent a party. We're here as individuals who want Iliescu and the Communists to go.''

Mihai Gabrian, 27, said a policeman dislocated his shoulder with a baton.

''I can't go to hospital because they will arrest me,'' he said. ''All the hospitals are supervised by police and securitate.''

Hours later the demonstrators had regrouped, shouting ''Down with Iliescu'' and ''You fired at us on December 22,'' said Tanjug, which

estimated the crowd at 3,000.

At Tuesday's session of the ruling National Unity Council, the news agency said Iliescu condemned the demonstrations.

''The atmosphere is intolerable and the disorder is preventing the government from ensuring normal conditions for the election campaign,'' he said.

Iliescu accused the Peasants Party, one of two leading opposition parties, of instigating the protest which began on Sunday afternoon. But Ion Lup, Peasant and Christian Democrat representative on the council, said, ''We are resolved against violence which is not typical of the Romanian people.''

Iliescu called on all parties to ''develop a polite election campaign'' and urged ''abstention from primitive methods that upset the moral and civic atmosphere in the country.''

He reportedly said it was ''the duty of each and everyone to trust the people, the electorate, the citizens and let the polls decide.''

Officials have said Iliescu was one of three men who secured 100,000 signatures needed to participate in the presidential balloting May 20. The other two are Radu Campeanu, president of the National Liberal Party, and Ion Raciu, president of the World Association of Romanian Emigrant Organizations.

Iliescu is considered responsible for many of the changes the country has undergone since the revolution, but he also is criticized by many as being the person mainly responsible for failing to achieve some of the promises of the revolution.

An anti-communist demonstration is planned for Bucharest and Timisoara on Saturday to commemorate a Jan. 28 protest in Bucharest by tens of thousands of anti-Iliescu demonstrators - the biggest such protest since the revolution.

Rompres reported the Bucharest police branded the rallies of the past few days ''unauthorized,'' adding ''boisterous elements caused disorder and material damage.''

#90114u2353 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - Environmental groups filed petitions Tuesday to force President Bush to impose economic sanctions against Mexico and Japan for illegally slaughtering thousands of endangered sea turtles.

The four national organizations petitioned Commerce Secretary Robert Mosbacher and Interior Secretary Manuel Lujan to certify that Mexico and Japan are violating international treaties protecting endangered or threatened wildlife.

Under U.S. law, if such a certification is made the president would have 60 days to either impose sanctions against the violators or explain to Congress why he has chosen not to do so.

''Imposing sanctions would send a clear signal that slaughtering

endangered species not only has environmental costs but economic costs as well,'' said Bruce Mannheim of the Environmental Defense Fund.

The group was joined by the National Wildlife Federation, the National Audubon Society and the Center for Marine Conservation in the petition action.

The petition cites Mexico, which has the largest population of sea turtle species in the Western Hemisphere, for failure to enforce laws aimed at protecting endangered species.

Wildlife Federation lawyer Robert Irvin said Japanese demand is largely responsible ''for fueling international trade'' in illegal turtle products.

Irvin said Japan is a signer of the Convention on International Trade and Endangered Species treaty, which prohibits or restricts members from importing products of the endangered olive ridley and hawksbill species of sea turtle.

Yet in 1989, Japan imported over 25,000 kilos of the hawksbill shell product known as bekko for use in making decorative objects such as combs and jewelry, Irvin said. In 1988, he said, Japan illegally imported from Mexico the skins of some 8,000 olive ridley turtles.

WASHINGTON (APRIL 24) UPI - President Bush, still waiting for congressional action on a multimillion-dollar aid for Nicaragua and Panama will dip into an emergency fund to provide an initial $2.6 million for Nicaragua, officials said Tuesday.

Bush, speaking to a group of contractors, also urged Congress again to move swiftly on his proposed $800 million package for the two countries.

''I hope that the Congress will move on my request for support for Panama and Nicaragua and do it soon,'' Bush said. ''We have a commitment now to help those democracies. And it fits into our budget.''

House Speaker Thomas Foley, D-Wash, said the House Foreign Affairs Committee was notified late Monday of Bush's intention to provide the emergency money from the discretionary fund. The president has the authority to provide up to $10 million a year for any emergency purpose with notification to Congress.

White House officials, on the eve of President-elect Violeta Chamorro's inauguration, said Bush had authorized $2.6 million in emergency aid for Nicaragua.

Vice President Dan Quayle will be leading the U.S. delegation to the inauguration in Managua on Wednesday.

''We are a symbol up here for these countries in our own neighborhood, our own front yard,'' Bush added, ''and I'd like to have that legislation intact so that our able vice president can report that to Mrs. Chamorro

when he goes down there tomorrow.''

Foley said he had no objection to the emergency request.

The House has passed a $720 million aid bill for Panama and Nicaragua, which provides $420 million for the fledgling democracy in Panama, put into power after U.S. troops invaded in December, and $300 million for Nicarauga, where Chamorro won a surprise landslide victory in national elections Feb. 25, defeating President Daniel Ortega and ending a decade of leftist Sandinista rule.

But action has been stalled in the Senate, where the appropriations committee was expected to act soon.

Senate Democratic leader George Mitchell of Maine also said Tuesday he would be willing to bring the bill to the full Senate on Wednesday but only if Republicans cooperated on other legislation.

The emergency funds would be in addition to the more than $3 million the administration has pledged, from existing appropriations, for repatriation of the U.S.-backed Contra rebels in Nicaragua.

As Chamorro's inauguration neared, it still remained unclear whether the rebels, estimated by some to number 9,000 in Nicaragua and another 1,000 in Honduras, would begin the disarmament process they agreed to last week after the new president takes office.

The agreement called for the Contras to concentrate in ''security zones'' Wednesday in various parts of Nicaragua, and for them to disarm and disband completely by June 10.

KINSHASA, Zaire (APRIL 24) UPI - President Mobutu Sese Seko relinquished single-party rule Tuesday, ended anti-Western cultural restrictions and promised a transition government to lead Zaire to its first multi-party elections ever.

Mobutu, the self-described ''guide'' of the ruling Popular Revolutionary Movement Party and one of Africa's most-criticized rulers on human rights issues, said in an address to the nation he was taking a leave from his party duties and creating a ''Third Republic.'' The speech was reported by the official Zairean African Press Agency.

Although Mobutu will remain president, a prime minister is to be appointed this month and given the task of organizing elections for April 24, 1991 in the West African nation. Three political parties - including Mobutu's - are to participate.

''President Mobutu rejects the proliferation of parties as the same time as bipolarization of parties in the Anglo-Saxon manner,'' the agency said.

Mobutu's decision follows widespread criticism from workers, churchmen and underground political activists and after a series of anti-government demonstrations around the former Belgian colony, political observers said.

Mobutu said the head of state would cease to be head of the government so as to be ''the arbiter, or better still, the last recourse.''

Mobutu, a longtime U.S. ally, has been criticized by Washington for his poor human rights record.

The political observers said the improvement in superpower relations and progress towards peace in southern Africa had undermined Zaire's role as a bastion against Communism and as a conduit for U.S. arms supplies to anti-Communist forces in Angola.

In his address, Mobutu appealed for calm but warned that dissident elements inside and outside the government would be ''routed.'' Diplomats in the region reported Kinshasa was calm but noted that most of the opposition to Mobutu is outside the capital.

The reforms promised by Mobutu included allowing labor unions to form and the establishment of a commission to draw up a new constitution which would then be ratified by a popular referendum.

Political control and appointments in the army, police, security services and civil service are abolished, according to Mobutu.

Mobutu also said he was revising certain aspects of his ''authenticity movement'' under which cultural trappings reminiscent of the former Belgian colonial were banned.

Zaireans henceforth can wear Western-style suits and neckties again instead of being obliged to don the abacost, the oriental-style high collar jacket without tie. They also can use titles such as excellence, mademoiselle, madame, monsieur that had been scrapped.

But the use of Christian names instead of African Patronymics remains banned, Mobutu said. ''The president holds that the fact of renewing authentically Zairean names is an inestimable cultural acquisition that can not be put into question,'' Mobutu said.

Nevertheless the change in tone was remarkable for Mobutu, a former journalist who survived mercenary-led uprisings and invasions.

Zaire, Mobutu, said ''without kowtowing to anyone, no longer can be

content with congealed positions, nor can it comply with immobilism.''

Mobutu seized power in a 1965 coup and began his third seven-year term Dec. 5, 1984.

WASHINGTON (APRIL 25) UPI - US Sprint and Cable and Wireless PLC Tuesday introduced the Global Fon brand of advanced worldwide telecommunications products and services for multinational companies.

The two companies also announced the first Global Fon product, Global Virtual Private Network, which will be demonstrated for the first time at the International Communications Association annual meeting in New Orleans May 22-24, and will be commercially available in September.

The Global Fon flagship product provides private networking capabilities normally associated with dedicated leased lines.

Other Global Fon products will be introduced later in 1990, the companies said.

In 1989, US Sprint and Cable & Wireless agreed to offer jointly a group of integrated telecommunications products and services marketed as one brand and supported by global service.

The products will be offered by US Sprint in the United States, and by Cable & Wireless subsidiaries, Mercury Communications Ltd. in Britain and Hong Kong Telecom International in Hong Kong.

US Sprint is a unit of United Telecommunications Inc., with headquarters in Kansas City, Mo.

Cable & Wireless is a worldwide telecommunications company based in London.

ROCHESTER, MI (APRIL 24) UPI - The Rev. Billy Graham has been released from St. Marys Hospital, where he had part of a painful rib removed, a Mayo Clinic spokewoman said Tuesday.

Graham, 71, left the hospital Monday and is continuing his recovery as an outpatient at Mayo Clinic for the next week or so, the spokeswoman said. St. Marys is run by the Mayo Foundation.

Graham's doctors have recommended he not resume his normal schedule for an undetermined length of time. They said they believe his greatest need at the moment is complete rest.

The operation forced Graham to cancel a crusade in New York this month.

The evangelist entered St. Marys Hospital April 10 after Mayo Clinic doctors observed a lesion on X-rays taken several weeks after an accidental fall and persistent pain. A portion of one rib was removed April 11.

Doctors said a pathologic examination of the tissue specimen showed no evidence of cancer.

BOSTON (APRIL 24) UPI - Plastic devices implanted under the skin that release drugs on a long-term, controlled basis are increasingly being used to treat a variety of disorders ranging from cancer to diabetes and heart disease, scientists said Tuesday.

The drug delivery systems pioneered by chemical engineer Robert Langer of the Massachusetts Institute of Technology show promise as a means of releasing chemotherapy drugs directly to tumor sites and treating specific disease sites in the heart, Langer and others told a meeting of the American Chemical Society.

''It's become a huge field,'' said Dr. Elazer Edelman of the Harvard University Medical School, who is experimenting with a plastic implant that shows promise as a means of treating hardening of the arteries.

Edelman and Dr. Morris Karnovsky are conducting tests with laboratory animals that involve placing a rubbery implant containing the blood-thinning drug heparin near arteries.

The implant acts something like a sponge, Edelman said, allowing the drug to diffuse through tiny, pore-like holes over a period of weeks or months. As the drug is released it infiltrates into the arteries, where it appears to inhibit the multiplication of muscle cells that are involved with coronary artery disease.

Researchers think the rapid proliferation of smooth muscle cells is a major contributor to atherosclerosis, hardening of the arteries. When the cells combine with cholesterol within the wall of blood vessels, the result is the formation of fatty deposits that obstruct blood flow and can led to heart attacks and strokes, studies show.

Edelman said one of the major problems facing researchers in the field of heart disease is how to prevent arteries from clogging up again once they have been cleared through a surgical procedure known as angioplasty.

He said heparin has long been used for that purpose, but because it is a blood thinner, it has the potential to cause bleeding when it is administered intravenously.

To get past that problem, he said tests are being conducted using a modified version of the drug that has had some of its anticoagulant properties removed, while retaining its ability to interfere with muscle cell proliferation.

In order to increase the efficiency of the drug and cut back on potential complications, Edelman said, the Harvard researchers came up with the idea of using an implant device to administer the heparin directly to diseased blood vessels.

But he cautioned that even if the heparin drug delivery system proves successful in animals, turning the technology into something humans can benefit from could be a long and difficult process.

#90114u2427 04/24/1990 ~United Press International

ISLAMABAD, Pakistan (APRIL 24) UPI - The pro-Soviet Afghan government suffered heavy casualties in an offensive aimed at capturing a strategic valley near Kabul from U.S.-backed guerrillas, Western diplomatic sources said Tuesday.

They said the guerrillas have repulsed a series of assaults by government forces since April 9 in the Paghman valley, 6 to 9 miles west of Kabul, and said fighting in the area is continuing.

There was no word from the communist regime in Kabul on the reports, which could not be independently confirmed.

The guerrillas, based mostly in Pakistan and backed by the United States and some Middle East nations, have had little military success despite the withdrawal in February last year of Soviet troops supporting the government of President Najibullah.

But rebels based in the Paghman area have staged near daily rocket attacks against the Afghan capital since last summer that the government says have killed hundreds of civilians.

The sources said government forces launched intense rocket and artillery

barrages against guerrillas entrenched at one end of a ridge overlooking the Paghman valley. They said the government has made repeated attempts to oust rebels from the ridge since the resistance first captured positions in the area last fall.

They said jetfighters have also attacked guerrilla positions in the area in the past two weeks. Guerrillas shot down a Soviet-made MiG-21 jet and another unidentified government aircraft, the sources said.

They quoted one resistance source as saying more than 300 members of a militia battalion taking part in the offensive were killed and more than 100 captured. They said the losses forced the battalion to withdraw from the area.

They said the guerrillas also destroyed 15 tanks and captured large quantities of arms and seized four government posts about 6 miles north of Paghman.

The sources said fighting in other parts of Afghanistan has been at a low level during the past few weeks due to Ramadan, the Moslem holy month of fasting.

The Moslem guerrillas have been fighting the Afghan government since 1978, when a coup brought the first of series of communist rulers in Kabul. The Soviet Union invaded Afghanistan in 1979 to support the government against the guerrillas, but withdrew its more than 100,000 troops last year.

NEW YORK (APRIL 24) UPI - The stock market, dragged down by a retreat in the bond market and late bouts of computerized program selling, stretched its losing streak to five sessions Tuesday in very light trading.

The Dow Jones industrial average, which fell 29.28 Monday, lost 12.17 to close at 2654.50.

Among broader market gauges, the New York Stock Exchange composite index fell 0.42 to 181.51 and Standard & Poor's 500-stock index lost 0.69 to 330.36. The price of an average share eased 8 cents.

Declines led advances 818-652 among the 1,977 issues crossing the NYSE tape. Big Board volume was 137,360,000 shares, compared with 136,150,000 shares traded Monday.

For a while, it looked as though the stock market might break its four-session losing streak. But once Treasury bonds lost the early ground they had gained despite some disappointing economic news, stocks eased.

Some late computerized program selling then put the finishing touches on what would be a down day.

Stocks opened higher, with Treasuries up despite news that durable goods orders jumped 6.7 percent in March, much more than had been expected. The news would normally drive bonds lower, making traders fearful that the Federal Reserve would need to tighten the reins on a vigorous economy.

But technical buying after the plunge in bonds last week spurred the gains analysts said.

Stocks were higher through about midday, feeding off the bond market's gains. But when the Treasury market failed to hold its ground and bonds headed south, so did stocks.

In late trading, the bellwether 30-year bond, up about 10/32 in earlier trading, was down 2/32 at 95 3/32 to yield 8.97 percent.

The Dow industrials have now posted five straight declines, losing more than 100 points in the process. The market's drop has been broad-based as well, with more than 1,000 stocks finishing lower in three out of five of those sessions.

On the trading floor, Ames Department Stores was the most active issue, sinking 5/8 to 1 3/8 amid speculation the retailer may seek bankruptcy protection. The Hartford Courant reported Tuesday that Ames has hired a bankruptcy lawyer to begin preparing paperwork for a Chapter 11 filing.

Harcourt Brace Jovanovich followed, up 1/4 to 4. Niagara Mohawk was third, off 1/4 to 12 1/2.

Among the other blue chips, AT&T was off 1/2 to 39 3/4, IBM lost 3/8 to 108 7/8, Sears tumbled 1 1/8 to 35 3/8 after reporting a drop of more than 50 percent in first-quarter earnings and Merck slumped 1 1/8 to 72 1/4. But Woolworth added 3/8 to 60 3/4.

Elsewhere, Vons jumped 1 7/8 to 22 5/8 after reporting a profit for the first quarter late Monday, compared with a loss in the year-earlier quarter.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 169,114,540 shares, compared with 164,623,030 shares traded in the previous session.

Prices closed lower in moderate trading on the American Stock Exchange.

The Amex Market Value index fell 1.06 to close at 343.89. Declines led advances 304-228 among the 800 issues traded. The price of an average share lost 4 cents. Composite volume totaled 14,471,230 shares, compared with 15,527,800 shares traded Monday.

B.A.T Industries led the Amex issues, unchanged at 11 9/16. Sir James Goldsmith said Monday he would not renew his B.A.T takeover bid, which was allowed to lapse during regulatory proceedings in the United States.

The National Association of Securities Dealers composite index was off 0.89 to 419.19.

NEW YORK (APRIL 24) UPI - The dollar was mixed and in a narrow price range in New York trading Tuesday as the previous day's rally fizzled, but some analysts said the unit looked firm on prospects of higher U.S. interest rates.

Currency traders said the dollar didn't get much mileage out of a Washington report that orders for durable goods rose a stronger-than-expected 6.7 percent in March, suggesting the economy may be rebounding.

''I don't think there was any great reaction to that number today,'' said currency manager Joseph Cambria of Banque Paribas. But the dollar firmed in late trading and ''closed quite positively,'' he said.

Senior trader Bill English of the Banca Nazionale dell'Agricoltura said gains came from market perceptions that a stronger economy gives the Federal Reserve more leeway to battle inflation with higher interest rates.

A Fed hike in short-term interest rates could pull international capital into dollar-priced investments, strengthening the U.S. currency.

The U.S. interest rate policy outlook could clarify after first-quarter gross national product data come out Friday, analysts said. Strong first-quarter economic growth could underpin the dollar, they said.

In late New York trading, the dollar changed hands at 1.6980 West German marks, down from 1.70 marks Monday but up from intraday lows. Against Japan's currency, the dollar fetched 158.95 yen, up from 157.70.

International economist Jim Merrill of McCarthy, Crisanti & Maffei investment bank gave a different reason for the dollar's rise.

He said the dollar firmed up on a report the Bundesbank won't raise West German interest rates unless it has real evidence of inflation being propelled by the monetary union of East and West Germany. Higher German rates could hurt the dollar by diverting funds from U.S. markets.

The dollar rose sharply Monday on Bonn's proposal to convert relatively weak East German marks to strong West German marks at a generous 1-to-1

rate, a move many analysts say will generate inflation.

Other dollar rates: 1.4870 Swiss francs, off from 1.4940; 5.7000 French francs, down from 5.7035; and 1,244.75 Italian lire, down from 1,247.25.

The British pound declined to $1.6335 from $1.6352.

In European trading, the dollar closed mostly lower despite the durable goods data from Washington. The market's response to the U.S. economic news was ''very subdued,'' said one London investment bank analyst.

The dollar moved down against a recovering German mark in Frankfurt, closing at 1.6960 deutsche marks against 1.6965 at Monday's close.

The U.S. unit rose in Paris to 5.6965 French francs against 5.6945 but was unchanged in Zurich at 1.4915 Swiss francs. In London, the pound slipped to $1.6345 compared to Monday's $1.6360.

The dollar closed lower in Milan at 1244.65 Italian lire against 1245.30 but held steady in Brussels at 35.0850 Belgian francs.

In Tokyo, the dollar gained on the yen in quiet trading to finish at 158.15 yen, compared with Monday's close of 157.55 yen.

Mark-yen trading dominated as dealers shifted mark holdings into yen and then bought dollars with the yen, lifting the U.S. unit.

Republic National Bank in New York closed cash gold at $376 an ounce, down from $378.75 Monday. The New York Commodity Exchange settled gold at $375.90 an ounce, off from $378.90. In Zurich, gold rose to $376.50 an ounce from $375.50 Monday. London gold rose to $378 an ounce from $376.

Republic closed cash silver at $5.005 an ounce, down from $5.105. Comex spot silver declined to $4.994 an ounce, off from $5.093. Zurich silver was unchanged at $5.10 an ounce. London silver rose to $5.10 an ounce from $5.09.

PORTLAND, OR (APRIL 24) UPI - The Los Angeles Lakers were fined $25,000 Tuesday by Commissioner David Stern for keeping two healthy starters out of their season-ending game at Portland, Trail Blazer officials said.

Blazer spokesman John Lashway said Stern took the action because Lakers Coach Pat Riley kept Magic Johnson and James Worthy on the bench Sunday night, rather than risk injuring them heading into the playoffs.

Mychal Thompson also sat out for the Lakers, who suffered their most lopsided defeat ever in a 130-88 victory by the Blazers, their franchise-record 59th victory.

Rod Thorn, the NBA's vice president-operations, said Monday the Lakers were fined in 1985 for leaving Kareem Abdul-Jabbar and Magic Johnson home rather than bringing them to a season-ending game at Kansas City.

The actions by Riley, who called Sunday's game in Portland ''insignificant '' drew the anger of Blazer fans and team officials who had promoted a pay-per-view cable telecast and closed-circuit showings of the contest.

Many callers to Portland newspapers and radio stations said they were upset at Riley's decision not to make the information on his starting lineup public before the game. The Lakers had played Saturday night in Los Angeles against the Clippers, with their starters.

''I apologize to the fans,'' Riley said after the game. ''But it's bigger than that. It was an insignificant game for us. We found out last year

that injuries are a big thing this time of season. I just didn't want to push it, and that is my privilege.''

Blazer President Harry Glickman said his true feelings about the Laker move ''wouldn't be quotable in a family newspaper. Every time you play in this league, even though it's meaningless, you always try to win.''

#90114u2566 04/24/1990 ~United Press International

(APRIL 24) UPI - Oil prices traded mixed Tuesday with traders expecting a weekly industry survey to report no inventory changes that would provide the market with any firm direction.

The market remained shrouded in the uncertainty that has prevailed since OPEC last week said it would hold a May 2 meeting in Geneva to stop a decline in prices that saw crude lose 14 percent of its value earlier this month.

The 13-nation Organization of Petroleum Exporting Countries pumps more than a third of the globe's crude oil. Production of some members beyond their quotas had played a major role in the price drop.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate for June delivery slipped 7 cents to $19 a barrel, after failing for the second day in a row to break through a technical resistance level at $19.50 a barrel.

Trading volume was a moderate 86,080 contracts.

On the U.S. Gulf Coast cash market, prompt-delivery WTI was quoted at $18.70 a barrel, a gain of 30 cents.

Unleaded gasoline for May delivery rose 0.85 cent to 64.39 cents a gallon on the Merc, on top of Monday's 1.61 cent rise. On the New York Harbor spot market, unleaded gasoline for prompt delivery rose 1.1 cents to 64.50 cents a gallon.

Spurred by early higher European crude prices, WTI opened at $19.34 and

traded as high as $19.47 a barrel earlier in the day before the doubts concerning the American Petroleum Institute report began to take their toll.

Traders were expecting the API survey to show that crude and gasoline supplies declined only 2 to 3 million barrels each last week.

Released after the Merc closed, the API report showed gasoline stocks declined a meager 900,000 barrels and crude supplies rose a slight 1.2 million barrels last week.

Gail Sagel of Paine Webber Inc. in New York said a decline in crude stocks of 5 million barrels or more would probably have triggered a rally Wednesday.

On the European cash market, Britain's widely traded North Sea Brent crude skidded 15 cents to $17.05 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - edged up 15 cents to $14.50 a barrel.

On the Merc, heating oil finished the day at 52.65 cents a gallon, down 0.47 cent, while prompt delivery heating oil in the New York spot market fell 0.15 cent to 56.50 cents a gallon.

#90114u2586 04/24/1990 ~United Press International

NEW YORK (APRIL 25) UPI - The nation's refineries raised gasoline production last week as they apparently began to emerge from their annual maintenance ''turnarounds,'' the American Petroleum Institute reported Tuesday.

As a result, crude oil and gasoline stocks changed little although gasoline demand was expected to increase with the arrival of warm, driving weather.

For the week ended April 20, the API weekly survey found gasoline production was 7.1 million barrels daily, up from 6.8 million barrels in both the previous week and the same week a year earlier.

U.S. refineries operated at 86.2 percent of capacity last week, up from 85.4 percent a week earlier and 82.3 percent a year ago.

Because of the unusually warm winter, refinery turnarounds from heating oil to gasoline production began early this year. The API production statistics appear to indicate the turnaround period is ending.

Crude oil inventories inched up to 372.9 million barrels from 371.7 million barrels in the prior week and remained well above year-ago levels of 330.7 million barrels.

Gasoline supplies eased to 221.6 million barrels from 222.5 million barrels in the prior week and were slightly less than the year-ago 223.0 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also slipped, to 168.5 million barrels from 168.8 million barrels a week earlier, and remained significantly higher than year-ago levels of 153.6 million barrels.

Gasoline imports increased substantially to 205,000 barrels daily from 158,000 barrels daily in the previous week but were below year-ago imports of 301,000 barrels daily.

Crude oil imports declined to 5.6 million barrels a day from 5.9 million barrels a day in the previous week and were less than year-ago imports of 5.7 million barrels a day.

Imports of all refined products edged up to 2.0 million barrels daily from 1.6 million barrels daily in the preceding week and were slightly higher than year-ago imports of 1.9 million barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - fell to 98.0 million barrels from 98.7 million barrels a week earlier but remained above year-ago levels of 96.0 million barrels.

Distillate production rose to 3.0 million barrels daily from 2.7 million barrels daily in the preceding week and was higher than year-ago output of 2.7 million barrels daily.

Distillate imports jumped to 332,000 barrels a day from 106,000 barrels a day in the previous week but were less than year-ago imports of 355,000 barrels a day.

#90114u2619 04/24/1990 ~United Press International

SPOKANE, WA (APRIL 24) UPI - Veteran stage and screen actor Albert Salmi shot and killed his estranged wife then shot and killed himself, police said Tuesday.

Police found the bodies of Albert Salmi, 62, and Roberta Salmi, 55, at their South Hill home Monday night. It appeared the deaths occurred between late Saturday and early Sunday, said Lt. Robert Van Leuven.

Salmi, a native of Coney Island in New York, played Bo Decker in the original production of ''Bus Stop.''

That led to scores of stage, film and television series parts in shows such as ''The Brothers Karamazov,'' ''The Rainmaker,'' ''Gunsmoke,'' ''Bonanza'' and ''Barnaby Jones.''

The husky actor co-starred in the television series ''Daniel Boone'' and ''Petrocelli,'' and recently appeared in Burt Reynolds' ''Breakin' In.''

A family friend looking for Roberta Salmi on Monday saw a woman's legs through the kitchen window and called police, who found her on the kitchen floor, shot to death with a small-caliber handgun.

It appeared Albert Salmi shot her, then went upstairs to his den, where he shot himself in the chest with a .45-caliber gun, police said.

''Based on what we've learned, Mr. and Mrs. Salmi were separated and possibly in the process of getting a divorce,'' Van Leuven said.

Neighbor Jean Greeley said she knew the couple for about six years and first learned they were having marital problems about a month and a half ago.

#90114u2657 04/24/1990 ~United Press International

TRENTON, N.J. (APRIL 24) UPI - The Exxon Corp. pipeline that burst Jan. 1 and spilled 567,000 gallons of oil into the Arthur Kill was previously damaged and an inspection could have prevented the spill, state environmental officials said Tuesday.

The Department of Environmental Protection released the report of a study of the damaged section of pipeline conducted by the Battelle Co., a Columbus, Ohio, consultant hired by the state.

The study found that the cause of the failure was a dent and gouge near the bottom of the pipe that occurred a ''substantial peirod of time'' before the leak, the report said.

The report contradicted Exxon's speculation that something had struck and damaged the pipe just before the spill, such as a ship or anchor.

The dent and gouge weakened the pipe, and fatigue from changes in the volume of oil flowing through the line at various times eventually caused it to rupture, the report said.

''Periodic internal examinations may well have revealed the over 10-foot indentation and damage to the pipe,'' DEP Commissioner Judith Yaskin said.

Such inspections are not currently required in New Jersey, but Yaskin said the DEP will adopt regulations requiring them because of the spill.

Exxon, which will be billed by the state for the $35,000 cost of the study had no immediate comment.

John Racz, manager of Exxon's Bayway refinery in Linden, told a legislative committee in March, however, that the pipeline ''was mechanically sound until it was damaged.'' Racz said there had been no corrosion of the pipe or thinning of its walls despite being underwater 23 years.

The home heating oil that spilled from the pipeline killed hundreds of waterfowl and polluted the waters and shores of the waterway.

The company has already been ordered by the state to pay for a joint $1 million cleanup study being conducted by New Jersey, New York and the federal Environmental Protection Agency.

Gov. Jim Florio has promised to make the company pay for the full cost of the spill, including the immediate cleanup and any long-term environmental damage.

The spill began about 10 p.m. New Year's Day and continued for about six hours until officials at the refinery determined that the pipeline was leaking oil, prompting criticism of Exxon by the Coast Guard and state officials. The Coast Guard said the damage could have been far less severe if the spill had been discovered earlier.

The company said an alarm sounded at least twice the night of Jan. 1 to warn pipeline operators of a leak, but did not continue to sound when reset. That led operators to believe the alarms were a malfunction, the company said.

Company investigators later learned that a sticking switch kept the alarm from continuing to sound when reset, Racz said.

#90114u2683 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - Researchers have developed an altered bacterium that does a more efficient job of breaking down lactose, a sugar in milk that some people cannot digest, the government announced Tuesday.

The Agriculture Department said it was patenting the technique.

An enzyme produced by the body normally breaks down lactose in dairy products but some people - including blacks, Asians and native Americans - tend to have a low level of the enzyme. Lactose intolerance also tends to increase in adults.

The Agricultural Research Service said the new technique could allow those people to enjoy dairy products, which would provide a new market for U.S. dairy producers.

''We are offering a new source for this enzyme,'' said George Somkuti of the ARS. ''This source is better than those now being used as additives because of its food-grade nature.''

The new source is an altered form of the bacterium Streptococcus thermophilus, which produces an enzyme that breaks down lactose. The Food and Drug Administration already has approved it as a natural agent for making products such as cheese and yogurt.

According to researchers, the altered bacterium will not grow when it is added to milk but it will split lactose into two simple sugars, glucose and galactose. Somkuti said the altered bacterium would be less expensive to use than other methods of producing lactose-reduced products.

#90114u2768 04/24/1990 ~United Press International

WASHINGTON (APRIL 24) UPI - After 10 months of controversy, Victor Stello asked President Bush Tuesday to withdraw his nomination to oversee the government's troubled nuclear weapons plants, the Energy Department announced.

In a letter to Bush, Stello said that despite three hearings on his nomination since last July, he still faced long delays in winning Senate confirmation to the post of assistant energy secretary for defense programs. In the job he would directly supervise day-to-day operations of 17 major weapons plants in 12 states.

''My experience over this past year has led me to the conclusion that final action by the Senate on my nomination will not take place in the foreseeable future,'' Stello told Bush.

''In my view, our country, the secretary of energy and you, Mr. president, require a confirmed individual in the position of assistant secretary of defense programs at the earliest opportunity,'' he added.

''It has become clear to me that I cannot be that person. In my view, it is in the best interest of our country for you to identify another nominee for this critical position.''

Stello also cited health problems, specifically a broken leg suffered in a skiing accident last winter.

Stello's withdrawal comes three months after the Senate Armed Services Committee put his nomination on hold because of controversy over Stello's actions as executive director of the Nuclear Regulatory Commission, which oversees commercial nuclear power plants.

Committee Chairman Sam Nunn, D-Ga., said the committee wanted to wait for the results of an internal NRC investigation into whether Stello lied to Congress about his decision to approve the hiring of a secret informant who purportedly had information about wrongdoing by another NRC official,

Roger Fortuna.

The investigation into Fortuna did not reveal any wrongdoing and Stello was sharply criticized by several congressional committees for hiring the informant because he personally disliked Fortuna.

The NRC investigation into Stello was opened after Rep. Peter Kostmayer, D-Pa., charged that Stello lied to his House interior subcommittee last year when he testified about his involvement in the Fortuna affair.

Even before the Fortuna flap, Stello was highly controversial. Environmentalists charged that as executive director of the NRC Stello frequently sided with the nuclear industry in opposing additional safety requirements - even some proposed by NRC experts.

Former Justice Department officials also criticized Stello's tenure at the NRC, saying he sought to undermine their probes into alleged criminal wrongdoing by nuclear plant operators.

In particular, Stello was the subject of a federal grand jury investigation into whether he covered up information about the Three Mile Island nuclear accident in Pennsylvania in 1979.

Stello withdrew despite strong support from Energy Secretary James Watkins who personally appeared before the Senate Armed Services Committee last fall to say Stello's confirmation was one of his top priorities.

Watkins said Stello had unmatched technical skills needed to safely restart the department's aging weapons reactors at the Savannah River Plant in South Carolina. The three reactors have been shut down since 1988 due to safety problems.

The shutdown has raised national security concerns because the reactors are the sole source of radioactive tritium gas needed for the nation's nuclear weapons arsenal.

Critics, however, said Stello's record at the NRC showed he was the wrong man to restore public confidence in the weapons plants, which have been the focus of public outrage after revelations that the government secretly dumped millions of gallons of toxic and radioactive waste during operations over the past five decades.

-30- 4065

#90114u2871 04/24/1990 ~United Press International

CAPE CANAVERAL, FL (APRIL 24) UPI - The shuttle Discovery's crew rocketed into orbit Tuesday, unlimbered the ship's robot arm and readied the $1.5 billion Hubble Space Telescope for launch Wednesday on a quest to map out

the history and fate of the universe.

Running seven years behind schedule and some $1 billion over budget, the space telescope appeared none the worse for its ground-shaking ride into orbit and 4 1/2 hours after liftoff, engineers on the ground began routing computer commands to the costly instrument, slowly bringing it to life.

''As far as we've been able to see on board, everything looks perfect,'' co-pilot Charles Bolden radioed mission control as the astronauts inspected the huge, 24,330-pound satellite, locked down in Discovery's cargo bay.

Later in the day, the telescope's five primary instruments were activated and if all goes well, astronaut Steven Hawley will use Discovery's 50-foot robot arm to deploy the most expensive satellite ever built around 1:57 p.m. EDT Wednesday.

''The arm flies real well,'' Hawley said after a closed-circuit TV inspection of the telescope. ''As near as we can tell everything looks perfect.''

The Hubble Space Telescope is arguably the most important scientific payload ever built. Once in operation high above Earth's obscuring atmosphere, the automated observatory is expected to revolutionize knowledge about the birth, structure, evolution and fate of the universe.

''The adventure begins!'' said an elated Edward Weiler, a NASA astronomer who has worked with the space telescope project for years. ''It's going to revolutionize astronomy.''

Taking no chances, Discovery's cabin air pressure was lowered to 10.2 pounds per square inch and astronauts Kathryn Sullivan and Bruce McCandless spent the afternoon checking out the spacesuits they will wear in the event of problems with the telescope that might require an emergency spacewalk Wednesday.

''It's been a long haul (but) finally, we've got it into its element,'' NASA Administrator Richard Truly said in an interview. ''I think it's a historic day in America's space program.''

Hawley, 38, Bolden, 43, Sullivan, 38, McCandless, 52, and shuttle skipper Loren Shriver, 45, turned in shortly after 7:30 p.m., putting a busy first day in space behind them and resting for the telescope deployment Wednesday.

The long-awaited mission began with a splash of flame and a roar of power as Discovery lifted off from the Kennedy Space Center at 8:34 a.m., three minutes late because of a minor computer glitch at the T-minus 31-second

mark.

Liftoff came two weeks to the day after Discovery was grounded at the T-minus four-minute mark because of a faulty hydraulic power unit.

But other than a minor last-second computer glitch, it was clear sailing Tuesday and Discovery rocketed into a record orbit with a low point of 358 miles and a high point of 381. Later, the orbit was circularized at an altitude of 381 miles, giving the crew a unique view of the blue Earth below.

At that altitude, the telescope will be less vulnerable to the effects of friction with the tenuous outer reaches of Earth's atmosphere, which otherwise could cause it to slowly fall back to Earth.

''It looks like it's still a nice day down at the cape,'' said Hawley as Discovery sailed over Florida completing its first orbit. ''It seems like we were just there.''

The launch was equally thrilling to scientists with the space telescope project.

''It was a perfect start to a great adventure for scientific thought,'' said Colin Norman of the Space Telescope Science Institute in Baltimore. ''I think our lives are going to change. Our concept of the universe ... is going to be changed by this telescope.''

Mike Harrington, director of the telescope's orbital checkout at the Goddard Space Flight Center in Greenbelt, Md., said the early stages of the flight were close to perfect.

''After so many years for so many people working so hard on this project, this was a very satisfactory day, almost a perfect day,'' he said at a news briefing. ''We were all just elated.''

The space telescope is the most ambitious orbital observatory ever built and despite its high price tag, scientists say an expected scientific bonanza will more than justify its cost.

Able to detect the glow of a single firefly 10,000 miles away, the Hubble Space Telecope's near-perfect 94.5-inch mirror and its five primary instruments will detect light emitted from stars and galaxies shortly after the ''big bang'' explosion thought to have created the cosmos.

One of the major goals of the 15-year space telescope mission is to refine the age of the universe to within 10 percent and to gather evidence that may help astronomers prove whether the universe will continue to expand forever or one day collapse in a cataclysmic ''big crunch.''

Assuming a 15-billion-year-old universe, the space telescope should be able to detect light emitted from stars and galaxies 14 billion years ago, that is, from objects so far away it took light, traveling 186,000 miles per second, 14 billion years to reach the space telescope.

Along with answering such fundamental cosmological questions, the Hubble Space Telescope may prove once and for all whether planets circle other stars and whether enigmatic black holes serve as the power source for high-energy quasars at the edge of the universe.

#90114u2891 04/24/1990 ~United Press International

ATLANTA (APRIL 24) UPI - A man wearing a grey business suit emptied a six-shot revolver into a lunchtime crowd at a shopping mall food court Tuesday, killing one man and wounding four others, then surrendered to police.

Police said documents found on the gunman when he surrendered outside Perimeter Mall indicated he had been released from a Georgia mental hospital on Monday. The hospital, citing patient confidentiality, refused to comment.

Authorities said the gunman, who was carrying a briefcase, entered the food court in Perimeter Mall in the city's affluent northern suburbs shortly after noon, drew a .38-caliber revolver and began firing at random at the crowd of 200, creating pandimonium as victims fell and shoppers scrambled for cover.

DeKalb County Police identified the gunman as 30-year-old Reginald Moreman of Anniston, Ala., but he also carried papers identifying him as James Calvin Brady, 31, of Atlanta.

DeKalb County Police spokesman Tom Brown said the suspect was charged with one count of murder and three counts of aggravated assault.

One of the victims of the attack, 24-year-old Michael Gregory Musick of Norcross, died at Northside Hospital of a chest wound.

Three other people wounded in the lunchtime attack were hospitalized in serious to critical condition, but were all expected to survive. A fourth victim, a Federal Express employee, was treated and released for a leg wound.

Police said the suspect emptied his pistol and began reloading when an elderly man apparently talked him out shooting anyone else. Witnesses said the suspect then walked to the front of the mall and surrendered to police

without incident.

''He met some officers coming out the door and essentially said, 'I'm the one you're looking for,''' Brown said.

''He was basically incoherent when he was taken across the street to the police precinct,'' Brown said. ''He was muttering something like 'You don't know what people have been doing to me.'''

Brown said the suspect had documents indicating he had been a patient at Georgia Regional Hospital, a mental institution. Police Col. M.F. Ferguson confirmed the documents said he had been released from the hospital Monday and they also indicated he had been diagnosed as homicidal and suicidal.

When police moved the suspect from the precinct to the city jail, he was restrained with arm and leg shackles and a straitjacket.

Kristin Kabbenjian, who along with her husband owns the Hovan deli near where Brady dropped his gun, said that as he began to reload his pistol, the elderly man said, ''Please don't shoot me.''

She said the gunman looked at the elderly man and said, ''I don't won't to kill anybody. They just did a lot of sh- to me.'' He then dropped the gun near a trash can.

Brown said officers had not located the elderly man. Witnesses said he was with an elderly woman, and the two were pushing a carriage.

''He possibly is the hero of this situation,'' Ferguson said. ''But he's apparently camera shy.''

Nyree Smith, who works at Salads restaurant, said she leaned over the counter to see what was happening when she heard a ''popping'' sound.

''He was just kind of shuffling his feet along, just shooting and shooting '' Smith said.

Brian Benefield, who was sitting about 12 feet away when the gunman opened fire, said, ''I seen the guy standing with his arm extended just firing away. I just ran to get away.''

Sharon Wise, an employee of the Great American Cookie Company, said, ''All I know is I thought it was balloons popping. He came through the mall and just started shooting.''

Jimmy Adams, another witness, said he heard the man say, ''You all did something to me. I'm just getting you back.''

Paul Seals, who witnessed the arrest, said the gunman stood at the curb outside the mall after the shooting and waited for police.

''He acted like he was waiting on a bus,'' Seals said.

In the central fast-food area where the gunman shot his victims, taco and hamburger wrappers, plastic trays and paper cups were scattered about. In the trendier end of the food court, where the gunman dropped his pistol, quiche and lasagna lay at the feet of diners who continued their lunch after police took control of the situation.

#90114u2902 04/24/1990 ~United Press International

CULVER CITY, Calif. (APRIL 25) UPI - Time Warner Inc., which has agreed to provide a $650 million loan for Pathe Communications Corp. to buy MGM-UA Comunications Co., will get to use a large part of the revenues of the merged studios to repay the loan, Securities and Exchange Commission filings showed Tuesday.

A filing by Pathe, controlled by Italian financier Giancarlo Parretti, showed that it has given Time Warner the right to apply 65 percent of ''available cash flow'' to repay interest and principal on the $650 million note.

Cash flow is defined as gross receipts from MGM-UA and Pathe products, minus Time Warner's servicing fees and revenue specifically pledged to secure project financing for individual projects.

Parretti first announced his $1.22 billion deal for MGM-UA in early March and has since made $100 million in down payments to the studio. He has also pledged $75 million in the form of rights to three upcoming movies.

But analysts were skeptical that Parretti could raise the funds to make a $20-a-share tender offer until he announced the Time Warner financing two weeks ago.

Under terms of the financing arrangement, Warner Bros. will distribute films for MGM-UA and Pathe and gain distribution rights to the 1,070-film United Artists film library as part of a 20-year services agreement, in exchange for guaranteeing the $650 million loan.

Alex Ben Block, editor of Show Biz News, said: ''It sounds as if Time Warner has gotten a very good deal for providing the loan.

''It also seems that Parretti may have to mortgage a lot to come up with the financing for the deal.''

#90114u2905 04/24/1990 ~United Press International
(APRIL 24) UPI - More talk of hostage releases... Bush holds off on action against the Soviet Union... a gunman fires into a crowd at a mall in Georgia... and the space shuttle is off and running. Those stories and more, next from U-P-I.

There are signs that more Western hostages in the Middle East... including an American... could be freed soon.

Moslem sources told U-P-I today that two Swiss Red Cross workers may be released within 72 hours. And a radical Palestinian group is offering to free four Belgians if Belgium releases a captive Palestinian activist.

One influential pro-Iranian cleric said today ''another American hostage will be freed soon.'' But he added that he can't say when or where the release will take place.

But the cleric, as well as other Moslem fundamentalist leaders in Lebanon, have all said that Sunday's release of American Robert Polhill was a goodwill gesture. They are continuing calls for the West to reciprocate by pressuring Israel and its allies to free Arab prisoners.

The White House has repeatedly said it will NOT make any deals with hostage-takers.

But a London newspaper says a group of Moslem prisoners is expected to be freed from a Lebanese jail during the next two days. The release reportedly is part of a secret deal that included Polhill's release.

In Wiesbaden, West Germany, doctors say Polhill is recovering from his more than three-year ordeal... undergoing medical tests and being debriefed.

#90114u2935 04/24/1990 ~United Press International
(APRIL 24) UPI - President Bush held off today from threatened retaliation against the Soviet Union for its crackdown on Lithuania.

After meeting with congressional leaders this morning in Washington, Bush said he still has NOT decided what he will do. He emphasized that this is a highly complex situation with a lot at stake.

Bush quoted baseball Hall of Famer Yogi Berra, saying he did NOT ''want to make the wrong mistake'' by making the situation worse.

Congressional leaders voiced general bipartisan support for prudence.

Bush also conceded that U-S allies have expressed little, if any support for sanctions, at a time when the superpowers are moving toward UNprecedented co-operation.

The decision by Bush to hold back comes a day after the Soviet Union announced that it would negotiate with Lithuania... if the republic puts a two-year freeze on its March declaration of independence.

#90114u2962 04/24/1990 ~United Press International

(APRIL 24) UPI - The shuttle Discovery is orbiting more than 350 miles above the Earth, with the crew getting ready for a big day tomorrow.

The crew is testing the ship's 50-foot robot arm, which will be used to deploy the one-point-five-BILLION-dollar Hubble Space Telescope.

Hours after today's launch from Cape Canaveral, the astronauts beamed down T-V views of the 24-thousand 330-pound telescope in the ship's open cargo bay.

Engineers on the ground sent computer commands to the costly instrument, slowly bringing it to life.

If all goes as planned, the most expensive satellite ever built will be deployed tomorrow afternoon.

The telescope project is seven years behind schedule and more than one-BILLION dollars over budget. Scientists say it is perhaps the most important scientific payload ever built.

Among other things, astronomers hope to refine the age of the universe with the telescope, which can detect the glow of a firefly 10-thousand miles away.

Police say a man wearing a business suit and carrying a briefcase and a gun opened fire in a shopping mall north of Atlanta today.

One man was killed, and at least three other people were injured, two critically.

Authorities say the gunman used a .38-caliber pistol to fire on a lunch-time crowd of 200 at a food court in the suburban Perimeter Mall.

People on the scene said the suspect fired six shots. One witness reported the gunman said- ''You all did something to me. I'm just getting you

back.''

DeKalb County Police spokesman Tom Brown identified the gunman as 31-year-old James Calvin Brady of Atlanta. Brown said Brady was ''basically incoherent'' when he surrendered to police outside the mall.

Police say Brady carried documents indicating that he may have spent time in Georgia Regional Mental Hospital.

Brady has been charged with one count of murder and three counts of aggravated assault.

-30- 2095

#90114u3040 04/24/1990 ~United Press International

(APRIL 24) UPI - One of Wall Street's best known and most controversial figures pleaded guilty in a New York courtroom today to six felonies.

Michael Milken's plea came in a deal that will cost him 600-Million dollars in fines but will allow him to avoid insider trading and racketeering charges.

The BILLIONAIRE who helped fuel the corporate takeovers of the 1980's also faces a possible 28-year prison sentence.

The plea by Milken resolves the government's case against him. But he still faces civil suits by investors and shareholders who claim they were defrauded.

Two scientists say the solar system may be 350-Million years older than was generally thought.

Paul Kuroda and Retired Air Force Colonel William Myers today said they think the solar system is closer to four-point-nine-BILLION years old than the more generally accepted figure of four-point-five BILLION years.

Kuroda is a chemist at the University of Nevada-Las Vegas. He and Myers came up with the figure by calculating how much of a rare gas called xenon is present in meteorites and moon rocks brought back by astronauts.

Xenon is a breakdown product of plutonium-244. As plutonium decays radioactively over Millions of years, it produces xenon, which is most commonly used to make fluorescent lamps.

Scientists generally have dated moon rocks by measuring the decay of uranium244 is more accurate.

Kuroda announced the finding in Boston at a meeting of the American

Chemical Society.

#90114u3114 04/24/1990 ~United Press International
(APRIL 25) UPI - SPORTS TRANSACTIONS

BASEBALL

Atlanta - Called up pitcher Rusty Richards from Richmond of the International League (AAA); optioned pitcher Tommy Greene to Richmond.

Los Angeles - Purchased contract of infielder Jose Vizcaino from Albuquerque of the Pacific Coast League (AAA); designated pitcher Isidrio Marquez for assignment.

New York (AL) - Activated pitcher Lance McCullers from the 15-day disabled list; outrighted pitcher John Habyan to Columbus of the International League (AAA).

BASKETBALL

NBA - Fined LA Lakers $25,000 for keeping two healthy starters out of April 22 game with Portland.

San Antonio - Signed forward Mike Mitchell; released forward Zarko Paspalj.

COLLEGE

Clarion - Named David Hrovat diving coach.

FOOTBALL

Dallas - Signed kicker Ken Willis, tight end Tom Huebner and quarterback Fred McNair.

HOCKEY

Montreal - Called up left wing Mark Pederson from Sherbrooke of the American Hockey League.

-30- 1128
#90114u3306 04/24/1990 ~United Press International
(APRIL 24) UPI - President Bush followed up on a week of warnings by delaying any action against Moscow for the Soviet intimidation of Lithuania. Bush met with congressional leaders today and said he has NOT decided ''what will be done.''

After seven years of delay, the Hubble Space Telescope rocketed into space today aboard the shuttle Discovery. NASA says tests in orbit show a mechanical arm is ready to deploy the telescope tomorrow.

A fourth and perhaps decisive round of trade talks between the United States and Soviet Union began today in Paris. President Bush allowed the talks to go on despite earlier threats that trade might be jeopardized by Soviet actions against Lithuania.

The White House said today there are ''some encouraging rumblings'' that another hostage held by Islam militants in Lebanon might be released. But a White House spokesman added that the indications are nowhere near as strong as before Robert Polhill's release on Sunday.

Michael Milken said he is ''truly sorry'' for his crimes and today pleaded guilty to six felony violations of federal securities and tax laws. The junk bond fiancier's plea in New York allows him to avoid trial on insider trading and racketeering charges.

Officials in New York say customs agents searching for a fugitive found the largest crack vial factory ever found in the United States. Three people were arrested and five-Million vials seized during last night's raid in Brooklyn.

-30- 1631

#90114u3317 04/24/1990 ~United Press International

(APRIL 24) UPI - China and the Soviet Union today signed an accord to reduce the number of troops along their border. The pact was inked during a visit to Moscow by China's premier, who is in the Soviet capital for talks on economic co-operation between the two nations.

A divided Senate Budget Committee is back at work this afternoon on its version of a fiscal year 1991 spending plan. Most senators want to make serious cuts in the federal deficit, but there is NO agreement on specifics.

Foreign delegations arrived today in Managua, Nicaragua, for tomorrow's inauguration of President-elect Violeta Chamorro . But a transition problem arose today when Chamorro's coalition said Army Chief of Staff Humberto Ortega canNOT remain as head of the army.

A spokeswoman for actress Elizabeth Taylor says the film star is ''breathing easier'' today, despite pneumonia that has kept her hospitalized for more than two weeks in Santa Monica, California. The publicist says Taylor is in serious condition, but is NOT ''on her deathbed.''

-30- 1206

#90114u3497 04/24/1990 ~United Press International

(APRIL 24) UPI - The White House says President Bush consulted with ''at least 20'' other governments and found NO backing for sanctions against the Soviet Union. Spokesman Marlin Fitzwater also says the administration, Congress and allies are ''in pretty close alignment'' on dealing with Lithuania. Bush has threatened retaliation for Soviet moves against its rebellious republic but has delayed any action.

The shuttle Discovery has attained a circular orbit 381 miles above the Earth. The shuttle blasted off from Cape Canaveral today, ready to deliver the Hubble Space Telescope into orbit tomorrow. Discovery is at a shuttle-record distance from Earth to minimize the effects of the planet's atmosphere and gravity on the telescope.

A doctor who treated hostage Robert Polhill after his release says Polhill is still ''very angry'' about his three years of captivity. Kenneth Koskinen directed the medical team that flew Polhill from Damascus to a U-S base in Wiesbaden, West Germany, yesterday. Polhill was re-united today with his two sons from a previous marriage.

Colombian officials today reported two dozen more violent deaths in recent days, including the discovery of the body of a badly mutilated Catholic priest. The priest's nude body was found 155 miles southwest of Bogota yesterday, five days after he was kidnapped. Two more police officers were killed during the weekend, bringing to 125 the number of officers killed in 1990.

A federal jury in Memphis, Tennessee, has recessed for the day without reaching a verdict on fraud and influence-peddling charges against Tennessee's first black black congressman. Deliberations resume tomorrow on the charges against Democrat Harold Ford. Ford accused prosecutors of racial and political motives and presented NO witnesses in his defense during the 10-week trial.

-30- 2014

#90114u3776 04/24/1990 ~United Press International

(APRIL 24) UPI - The pro-Israel South Lebanon Army says it freed four prisoners from a jail in southern Lebanon today... but denied the move is linked to Sunday's release of U-S hostage Robert Polhill. A pro-Iranian cleric believed to have influence over Islamic fundamentalist groups in Lebanon agreed with reports that another American hostage will be freed soon. The White House in turn acknowledged there are ''some encouraging rumblings'' of another release.

In Washington, senators opened debate on the budget today by agreeing to reduce the deficit, but there was little agreement on how to do it. The Senate Budget Committee held hearings on a fiscal year 1991 spending plan. Democratic Committee Chairman James Sasser of Tennessee predicted the committee eventually would pass a plan in the neighborhood of 40-BILLION dollars in deficit reduction.

A gunman opened fire on a lunchtime crowd at a food court in suburban Atlanta shopping mall today. Police say at least four people were shot, one fatally. Documents found on the gunmanyear-old James Calvin Brady of Atlanta- indicate he was released from a Georgia mental hospital only yesterday. A police spokesman says Brady surrendered outside the mall... muttering incoherently.

The Soviet Union today said it has cut its defense budget by 14 percent. The Soviet deputy foreign minister urged developing countries at the United Nations to reduce the size of their armies. The Soviet diplomat said Third World demands for weapons account for one quarter of foreign debt of developing countries. He said ''peace dividends'' will lower budget deficits, curb inflation and interest rates, and help economic growth world-wide.

-30- 1870

#90114u3853 04/24/1990 ~United Press International

(APRIL 24) UPI - Federal documents released today show Alaska's objections kept Exxon from striking a deal with the Justice Department to settle criminal charges in the Valdez oil spill. But the Justice Department said today Exxon vetoed the deal. The documents were released by Democratic Representative George Miller of California. The documents note Justice officials complained the public woN'T be satisfied until Exxon's funds are depleted and its board in jail.

The fourth round of trade talks between the United States and the Soviet Union began on schedule in Paris today. There was speculation negotiations might be postponed as part of U-S retaliatory measures against Moscow for its decision to cut off supplies to independence-minded Lithuania. But after meeting with congressional leaders, President Bush deferred any action against the Soviet Union. The current round of talks aimed at reaching a bilateral trade agreement is expected to last until Thursday.

A tearful Michael Milken pleaded guilty in a New York City federal court today to securities and tax law violations. Milken, who pioneered the use of high-risk, high-yield junk bonds to finance corporate takeovers in the 1980's, avoided the most serious charges of trading on inside information as a result of a plea bargain. He agreed to pay fines and penalties totaling a record 600-Million dollars and faces up to 28 years in prison. Milken formerly headed the junk bond department of the defunct Drexel

Burnham Lambert.

A government study released today shows nearly half of the smokers interviewed in a survey light up cigarettes without asking permission. Researchers conclude the tobacco's industry's long-standing view ''common courtesy'' can take care of any problems between smokers and NON-smokers ''clearly is NOT working.'' The study also surprisingly points out the proportion of NON-smokers asking someone to extinguish a cigarette remains at only about five percent, despite growing evidence second-hand smoke is harmful.

-30- 2192
#90114u4094 04/24/1990 ~United Press International
(APRIL 24) UPI - The House overwhelmingly adopted a resolution recognizing Jerusalem as Israel's capital today... about one month after the Senate approved a similar measure. Supporters of the House measure laud it as morally right, while opponents argue it will disrupt the Middle East peace process. Israel occupied East Jerusalem in the 1967 Six Day War and considers the unified city its capital. Washington recognizes Tel Aviv and believes the status of Jerusalem should be determined by Arab-Israeli negotiation.

Massive throngs of people marched slowly through Yerevan , the capital of Soviet Armenia, today. They were mourning relatives killed 75 years ago during the 1915 massacre of more than one-Million Armenians by Turks. Clergymen of the Armenian Church led a procession to lay flowers at an eternal flame to the victims of the attempted genocide by the Ottoman Empire.

Britain's House of Commons today endorsed a law giving researchers the right to do medical research on test-tube embryos during their first 14 days of existence. House members are scheduled to vote tomorrow on whether to reduce the legal limit on abortions from 28 weeks after conception to 24 weeks. The bill will then go to the House of Lords, which can amend but NOT veto legislation.

A study of 793 drug users in Baltimore found a small percentage tested positive for the AIDS virus and donated blood or plasma between 1978 and 1988. Researchers claim intravenous users continue to sell their blood plasma, despite efforts to exclude them as donors. A spokesman for the plasma industry criticized the report... saying screening methods are ''continually improving'' and processes used to treat plasma kills the virus even if it is present.

-30- 1911
#90114u4252 04/24/1990 ~United Press International

(APRIL 24) UPI - President Bush defers U-S action against Moscow over Lithuania... Discovery crew prepares for space telescope deployment... Wall street insider Michael Milken pleads guilty... and optimism on hostages. U-P-I has it all, next:

President Bush today decided against following up on last week's threats of U-S economic retaliation against the Soviet Union, which is curtailing shipments of vital goods to Lithuania.

The adherence to caution reportedly has the support of Congress and U-S allies, who are reluctant to see Lithuania intrude on steady progress by the super-powers toward unprecedented post-war cooperation. Feeling NO overwhelming pressure to act, Bush played it safe today and decided NOT to provoke Soviet President Gorbachev.

Lithuania's goal is to achieve its independence from the Soviet Union. But the Soviets stepped up pressure today by strengthening their control over Lithuania's borders.

The administration has already ruled out any retaliation affecting areas of clear mutual benefit, such as arms control and next month's Bush-Gorbachev summit.

U-S and Soviet negotiators met in Paris today for another series of talks on a bilateral trade agreement.

The fourth and perhaps decisive round began on schedule after Washington softened its threat of retaliation against Moscow over the Lithuanian crisis.

There was speculation the talks would be postponed as part of U-S measures against the Soviet Union. But after meeting with congressional leaders, President Bush deferred any action against Moscow for its decision to cut off oil and gas supplies to Lithuania.

An agreement between Washington and Moscow is essential before Congress can consider the president's request that the Soviet Union be granted most-favored nation trade status.

In a related matter, Soviet Deputy Foreign Minister Ernest Obminsky told the United Nations today Moscow has cut its defense budget by 14 percent. Obminsky also urged developing countries to reduce their armies significantly.

Obminsky says the so-called ''peace dividends'' will lower budget deficits curb inflation and interest rates and thus help economic growth worldwide.

#90114u4277 04/24/1990 ~United Press International
(APRIL 24) UPI - Astronaut Kathryn Sullivan says ''it is the life of an astronaut to train diligently for a variety of things you hope NEVER come to pass.''

Sullivan and fellow Discovery crewmember Bruce McCandless have the mission of stepping out of the shuttle into space tomorrow if there are any foulups deploying the Hubble Space Telescope.

Discovery blasted off this morning from Cape Canaveral into its orbit 380 miles above the Earth.

Sullivan and McCandless began breathing pure oxygen to ready their bodies for work in low-pressure spacesuits should a spacewalk be required. The crew also lowered the cabin's pressure from almost 15 pounds per square inch to 10 pounds per square inch. Both actions are required to help the spacewalkers avoid the bends.

If necessary, Sullivan and McCandless should be able to manually free the telescope from its latches, disconnect its power cable, and unfold its antennas and solar panels.

The State Department today said Syria's role in the release of U-S hostage Robert Polhill will NOT change U-S economic sanctions against Damascus.

State Department spokeswoman Margaret Tutwiler says the problem remains the presence of terrorist groups in Syria and Syrian-controlled areas of Lebanon.

She mentioned specifically the presence of the Abu Nidal organization and a group in Damascus suspected in the bombing of Pan Am flight 103 over Scotland.

In southern Lebanon, a pro-Israeli militia said it released four prisoners from the Khiam jail. But the South Lebanon Army denied a report from London that the move was part of a deal for the release of U-S hostage Robert Polhill, who was freed Sunday.

Moslem sources say two Swiss Red Cross workers could be freed by Friday. And a radical Palestinian group has offered to free four Belgians if Belgium releases a captive Palestinian activist.

White House spokesman Marlin Fitzwater hailed what he called ''some encouraging rumblings.'' But he said they were NOwhere near as strong as indications before Polhill's release.

-30- 2223
#90114u4296 04/24/1990 ~United Press International
(APRIL 24) UPI - Wall Street junk bond legend Michael Milken pleaded guilty in a New York federal court today to six felony securities and tax law violations.

Milken faces up to 28 years in prison, but as part of a plea agreement, prosecutors says they will NOT seek the maximum penalty.

The 43-year-old BILLIONAIRE elaborated on violations he committed with stock speculator Ivan Boesky and junk bond trader David Solomon. An October 1st sentencing date was set for Milkin, an innovator in the use of high-risk, high-yield junk bonds to finance corporate takeovers in the 1980's.

Milken earned as much as 550-Million dollars with now-defunct Drexel Burnham Lambert. As part of the settlement, Milken agreed to pay the government a fine of 200-Million dollars and to put 400-Million into a fund established by the Securities and Exchange Commission to reimburse damaged clients of Drexel. The Wall Street investment firm went out of business earlier this year on the heels of a collapse in the junk bond market.

In a breaking, quivering voice, Milken today said- quote- ''I am truly sorry.''

A former mental patient opened fire today at a shopping mall in an affluent Atlanta suburb. Witnesses say the gunman fired six rounds from a .38-caliber pistol, killing one man and wounding at least four other people. The attack was aimed at lunchtime crowd of about 200 people in the mall's food court.

A police spokesman identified the gunman as 31-year-old James Calvin Brady of Atlanta, but admit the name may be an alias. Brady was charged with one count of murder and aggravated assault.

Witesses say Brady emptied his pistol and began reloading when an elderly man apparently talked him out shooting anyone else.

Authorities say documents found on Brady when he surrendered outside the mall indicate he was released from a Georgia mental hospital yesterday. Police confirm the documents also say Brady was diagnosed as homicidal and suicidal. Hospital officials refuse to comment on the matter.

-30- 2205
#90114u4314 04/24/1990 ~United Press International
(APRIL 24) UPI - Nicargua's scheduled transfer of power tomorrow to

President-elect Violeta Chamorro was complicated today by differences over who will head military.

The official Sandinista newspaper, Barricada, confirmed that Humberto Ortega... the brother of out-going President Daniel Ortega... would resign his Sandinista party post but remain chief of staff of the army.

A transition agreement bans members of the military from holding key positions in political parties.

But the Political Council of Chamorro's 14-party UNO coalition said it is ''UNacceptable'' for Ortega to head the army.

The Political Council said if the executive branch allows Ortega to stay, the council ''will NOT support it and will NOT be responsible for the consequences.''

President Ortega held his last meetings as president today with foreign heads of state, who are pouring into the capital for tomorrow's inauguration.

German reunification took another step toward reality today with the first summit of freely elected German leaders.

West German Chancellor Helmut Kohl and East German Prime Minister Lothar de Maiziere met for three hours in Bonn to discuss the outline of the unification process.

The first of a series of meetings came a day after the West German government bowed to East German demands for a one-to-one exchange rate as part of the planned German currency union.

The two leaders pledged to complete the monetary unification, as well as an economic and social unification, by July 2nd.

If West Germany's plans work out, it will be followed by a political union next year and all-German elections in the fall of 1991.

(APRIL 24) UPI - There are signs that more Western hostages could be released in Lebanon. A pro-Iranian cleric told a leftist Lebanese radio station today that- quote- ''another American hostage will be freed soon.'' The White House says it heard the report but had NO details.

The South Lebanon Army says it freed four Shiite prisoners from a jail in southern Lebanon today. But a spokesman for the pro-Israeli militia denies

the move was linked to a reported deal involving the release of U-S hostage Robert Polhill.

The State Department says the United States is NOT ready to lift economic sanctions against Syria... despite its part in Polhill's release. Spokeswoman Margaret Tutwiler says the problem is Syria's continued association with groups involved in international terrorism.

President Bush is putting off any economic measures against Moscow for its crackdown on Lithuania. Bush told reporters he's ''NOT going to give up on trying to get the Soviet Union and the Lithuanians into a dialogue.''

The Senate got into a sneaker-waving foreign trade policy debate over whether to allow a duty break for making Teenage Mutant Ninja Turtle sneakers in the Caribbean rather than in China. The proposal was killed.

The Senate then passed a measure that reduces or suspends tariffs on numerous imported products until the end of 1992, and makes the duty-free status of certain goods from the Caribbean Basin permanent. It also lifts trade sanctions now in effect against Nicaragua.

The Senate Appropriations Committee today approved a two-point-three-BILLION-dollar emergency spending bill that includes 720-Million dollars in aid to Panama and Nicaragua.

#90114u4445 04/24/1990 ~United Press International

(APRIL 24) UPI - Britain's House of Commons voted tonight to trim one month from the period during which women legally may have abortions. But it overwhelmingly rejected a proposal to ban abortions outright. Yesterday British lawmakers approved a measure giving researchers the right to perform tests on an embryo during its first 14 days of life in a test tube.

In a bid to combat an outbreak of Mediterranean fruit flies, Florida officials say spraying of the chemical malathion will begin Thursday and last four weeks in an area mostly north of Miami International Airport.

Authorities on the island of Hawaii say lava from Kilauea Volcano has destroyed two more homes in its slow-moving rampage through a rural housing area. The volcano began erupting on January 3rd, 1983.

The first black professor to receive tenure at Harvard Law School says he plans to request an unpaid leave of absence until the school appoints a tenured black woman professor. Derrick Bell's announcement comes as law students continue to protest the lack of minorities and women on the faculty.

Officials at Mayo Clinic in Rochester, Minnesota, say the Reverend Billy Graham was released yesterday from the hospital after having part of a painful rib removed two weeks ago. The operation forced Graham to cancel a crusade in New York this month.

A spokeswoman for Elizabeth Taylor says the actress is ''breathing earlier '' but will remain in intensive care until her condition improves. Taylor, suffering from pneumonia, has been hospitalized in Santa Monica, California, for more than two weeks.

#90114u4596 04/24/1990 ~United Press International

(APRIL 24) UPI - The Senate today passed a miscellaneous tariff bill on a 92-0 vote. The measure reduces or suspends tariffs on numerous imported products until December 31st, 1992. But the Senate killed the controversial footwear amendment designed to lower tariffs for Carribean importers. The vote is a boon for China, which exports about two-thirds of the sneakers sold in the United States. China enjoys the lowest U-S tariff among nations manufacturing canvas shoes.

The nation's mayors today called for winning the war on drugs by waging a war against poverty. The U-S Conference of Mayors meeting in Houston called for job training, drug treatment on demand and full funding for the Head Start pre-school program. But yesterday, national drug policy director William Bennett told the session he will continue to emphasize law enforcement.

Despite the furor over U-S-financed broadcasts of T-V Marti into Cuba, Cuban officials say they've been showing U-S programs for some time. The president of the Cuban Institute of Radio and Television said in an interview that Cuba regularly snatches U-S programming from satellites without permission. Those shows include the movie ''Star Wars,'' segments of ''Saturday Night Live,''''Simon and Simon,'' and ''Fraggle Rock.''

DENVER (APRIL 25) BUSINESS WIRE - Micromedex Inc. has added the KNOW ABUSE database to its line of computerized information systems.

The new product can help health care professionals assist employers with drug screening programs to assess and interpret urine test results. It can also help in understanding therapeutic uses, kinetics and toxicity of possibly abused drugs.

The first database of its kind, the KNOW ABUSE system covers commonly abused drugs such as marijuana, cocaine and amphetamines. It is available

on floppy diskette for MS-DOS based personal computers.

Located in Denver, Micromedex Inc. has been publishing information on poisons, drugs and emergency and occupational medicine since 1974. It offers databases in a variety of forms -- from microfiche to compact disc (CD-ROM) - to some 2,000 institutions in 35 countries worldwide.

#90115b0005 04/25/1990 ~Business Wire

AKRON, OH (APRIL 25) BUSINESS WIRE - Goodyear's net income in the first quarter of 1990 was $20.9 million or 36 cents per share compared to $94.5 million or $1.64 per share a year earlier.

Operating income, worldwide and in the industry and geographic segments, was reduced by severe price competition in North America and Europe; higher selling, administrative and general expenses resulting mostly from increased advertising and compensation; and sizable cutbacks in North American vehicle production, especially in heavy trucks.

First quarter net income reflected depreciation of the All American Pipeline System as well as inclusion of its operating and interest expenses which were capitalized last year. Recognition of these items in the 1989 three months would have reduced that period's net income by $27.1 million or 47 cents per share.

The tax benefits of foreign loss carry-overs, which were accounted for as extraordinary items, increased earnings by $4.4 million or 7 cents per share in the 1990 quarter and $4.4 million or 8 cents per share in the 1989 period.

In the tires and related segment, sales of $2.2 billion were up 2.2 percent from a year earlier. However, operating income fell 32.9 percent to $129.9 million.

Worldwide tire unit sales were up 1.1 percent compared to 1989 on the strength of a 3.3 percent rise in the United States, reflecting a substantial increase in the replacement market which offset the decline in the original equipment business. Foreign tire units were down 1.2 percent.

In the general products segment, first quarter operating income was down 11.2 percent to $57.7 million because of competitive conditions in most product lines. Sales declined slightly to $516.5 million.

In the U.S. geographic segment, sales remained flat from a year earlier at $1.6 billion. Operating income fell 40.3 percent to $82.8 million.

In the foreign geographic segment, operating income was down 25.4 percent to $90.8 million as sales rose 4.8 percent to $1.1 billion.

In Europe, although sales increased slightly, operating income declined because of pricing pressures and marketing costs.

First quarter net sales in Latin America were significantly higher, but operating income was lower due to market conditions in the region and major economic reforms in Brazil starting in March.

Sales and operating income in the Asia-Africa region were down in the 1990 three months due primarily to the absence of the South Africa subsidiary, which was sold last year.

In Canada, sales declined and a loss was recorded due to start-up costs at the Napanee, Ontario, plant.

#90115b0013 04/25/1990 ~Business Wire

MUSKEGON, MI (APRIL 25) BUSINESS WIRE - SPX Corp. today reported sales and earnings for the first quarter of 1990.

Sales for the January-March first quarter were $166.2 million, an increase of 1.3 percent from sales of $164 million in the comparable period of the prior year.

Net income in the quarter was $4.1 million, or 30 cents per share, and compared with $7.7 million from continuing operations, or 57 cents per share in the comparable quarter in 1989.

Commenting on first quarter 1990 performance at the company's annual meeting of shareholders held today, Dale A. Johnson, president and chief executive officer of SPX said:

''First quarter sales by the company's vehicular service sector businesses were 88 percent of total volume. Approximately two-thirds of revenues, or $100.2 million, came from sales of specialty repair tools and equipment, with the remaining $45.5 million coming from sales of aftermarket components. Sales of products with industrial applications were 12 percent of revenues and accounted for $20.5 million in revenues.

''Impacting first quarter results were delays in key environmental programs and a softness in the dealer equipment special service tool, aftermarket component, engine performance test and wheel service markets. Seasonal factors associated with the construction industry also impacted quarterly results.

''On the positive side, sales of environmentally driven products involving refrigerant recovery and recycling, and gas emission testing equipment, will make significant contributions to the remaining portion of this year. We have recently received certification for the California emissions testing market and these programs are proceeding as expected, although on a timeline that has been delayed from our earlier expectations.

''Looking forward, our specialty tool and equipment business continues to grow, our aftermarket component business shows sign of strengthening, and our building products business is responding to its normal seasonal upturn. For these and other reasons, we remain confident 1990 will be a successful year for SPX.''

SPX Corp., a Fortune 500 company, is a world leader in the production and distribution of specialty repair tools and equipment, diagnostic instruments and repair components to the motor vehicle service industry.

CLEVELAND (APRIL 25) BUSINESS WIRE - Centerior Energy Corp. today announced a restructuring of the company's senior management, effective April 30, 1990.

The restructuring, approved by the board of directors yesterday, is linked to a cost reduction study started a year ago as part of the 1989 rate increase agreement for Centerior's operating utilities, Cleveland Electric Illuminating and Toledo Edison.

Although specific recommendations of the year-long study won't be announced until tomorrow, the report does call for consolidation of departments and functions throughout the company.

The new Centerior senior management is as follows:

-- Richard A. Miller, was re-elected chairman and chief executive officer. Robert J. Farling was re-elected president and chief operating officer, and will report to Miller.

-- Paul M. Smart was re-elected vice chairman of Centerior Energy and Toledo Edison, also reporting to Miller.

-- Elected as executive vice presidents to head three functional sectors were: Murray R. Edelman, power generation; Edgar H. Maugans, finance and administration and chief financial officer; and Lyman C. Phillips, customer operations and CEO of both operating utilities. They will report to Farling.

Reporting to Edelman: Donald C. Shelton, vice president-Davis Besse Nuclear Power Station; Michael D. Lyster, vice president- Perry Nuclear Power Plant; Richard P. Crouse, vice president-Fossil Operations; Alvin Kaplan, vice president-System Engineering and Control.

Reporting to Phillips: Donald H. Saunders, vice president and also president of Toledo Edison; Gary J. Greben, vice president- Transmission and Distribution Engineering and Services; Jacquita K. Hauserman, vice president-Customer Service and Community Affairs; David L. Monseau, vice president-Transmission and Distribution Operations; and Thomas M. Quinn, vice president-marketing.

In addition, John S. Levicki, vice president-Human Resources and Strategic Planning will report to Farling and Fred J. Lange Jr., vice president-Legal and Corporate Affairs, will report to Miller.

Lyster and Lange are newly-elected vice presidents.

SPARTANBURG, SC (APRIL 25) BUSINESS WIRE - Synalloy Corp. (ASE:SYO) producer of specialty chemicals, dyestuffs, stainless steel pipe, vessels and process equipment, announced that the company's self-tender for 525,000 shares (14 percent of its outstanding common stock) at $9.50 per share expired at midnight, eastern time, on Monday, April 23, 1990.

Preliminary results indicate that 2,531,542 shares were tendered by the holders of Synalloy common stock. Approximately 710 shares were tendered pursuant to the odd-lot procedure for tenders by holders of 10 or fewer shares and will be purchased prior to proration. Preliminary results of proration indicate a proration factor of approximately 20.74 percent.

The company expects that it will be able to announce the final proration factor and commence payment for the shares purchased pursuant to the offer on or before May 7, 1990.

EVENDALE, OH (APRIL 25) BUSINESS WIRE - General Electric Chairman John F. Welch Jr. announced Wednesday at the GE annual meeting in Erie, Penn., that Thai Airways International, the flag-carrier of the Kingdom of Thailand, has selected GE Aircraft Engines' highest thrust engines, the CF6-80C2 and -80E1, to power five firm Boeing 747-400s and four firm Airbus Industrie A330s in an engine order valued at $300 million.

Thai will take initial delivery of the 747-400s in late 1991, while the A330s are scheduled for delivery in 1993. The airline currently operates an extensive fleet of nearly 40 GE-powered widebody aircraft, including Airbus A330s and A310s, Boeing 747s, and McDonnell Douglas DC-10s.

The CF6-80C2, rated at 57,900 pounds takeoff thrust for the 747-400, is the highest thrust engine currently available, with a range extending from 52,500 to 61,500 pounds thrust. The engine has been selected to power the vast majority of 747-300s and -400s, with more than 130 747s in service or on order with 15 customers worldwide. Fifty-seven customers are operating or have ordered CF6-80C2 engines for their 747s, 767s, A300s, A310s, and MD-11s. Total sales have reached $20 billion.

Since entering service in October 1985, the CF6-80C2 has logged nearly 2.5 million flight hours and continues to be the hallmark for performance and reliability in today's high bypass turbofan engines, achieving ratings comparable to mature engines that have been in service for ten years or more.

The CF6-80E1, the newest, most advanced member of GE's highly successful CF6 engine family, is scheduled for certification at 67,500 pounds takeoff thrust in late 1992 and will then enter service on the A330 in 1993 at 65,500 pounds thrust. In order to satisfy future A330 growth requirements current plans call for certification at 72,000 pounds thrust in December 1994.

The -80E1 builds on the proven success of the -80C2 and will have many features common with its predecessor, including the core, low pressure turbine, and core-mounted gearbox. The most significant change to the CF6-80E1 will be a new, larger diameter, high-efficiency fan. For more airflow and higher thrust, the -80E1 fan diameter has been increased to 96 inches vs. the 93-inch fan for the -80C2.

In addition to Thai Airways International, the -80E1 has been selected by Air Inter of France, Continental Airlines, and International Lease Finance Corp. to power a total of 33 firm, 25 option A330s.

WASHINGTON (APRIL 25) BUSINESS WIRE - US Sprint Wednesday announced it has won a five-year $10 million award from the Department of Defense to provide real-time weather information and graphics to U.S. Air Force bases throughout the continental United States.

US Sprint will serve as systems integrator for the Department of Defense's Automated Weather Distribution System (AWDS) program, providing high-speed data links, data communications equipment, field maintenance and network operations services.

The AWDS network will help assure the rapid transmission of critical weather information necessary to sustain U.S. Air Force operational and combat readiness. The network will link 167 Air Force bases and locations.

The AWDS backbone network will consist of a digital circuit network providing nationwide access to weather data centers at Offutt Air Force Base in Omaha, Neb., and Carswell Air Force Base in Carswell, Tex. These

circuits will provide Air Force personnel with alpha-numeric reports of real-time weather conditions worldwide, as well as up-to-date satellite weather graphics.

Service for the AWDS network will be initiated in July 1990, and the network will be completed in mid-1991. Future plans include the capability to access the network from international destinations.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

IRVINE, CA (APRIL 25) BUSINESS WIRE - Signal Landmark, a leading developer specializing in the planning, construction, marketing and management of residential, commercial and industrial developments, has promoted Lucetta Dunn to senior vice president and general counsel, according to an announcement made by President Peter Denniston.

Dunn, who joined the company in 1987, most recently served as Signal Landmark's vice president and assistant general counsel. In her new position, she will serve as senior legal counsel to the company, also covering risk/benefit analysis and management of corporate litigation. She will also oversee the company's legal budget and expenses, as well as the legal department staff.

Prior to joining Signal Landmark, Dunn had her own general law practice in Santa Ana, Calif., where she practiced in real estate and business law, including litigation and transactional work. Prior to that, Dunn was in a general law partnership in Santa Ana.

Dunn graduated with a juris doctorate degree from Western State University College of Law in Fullerton, Calif. She holds a bachelor of arts degree in political science from California State University, Fullerton, and is a graduate of the Duke University FUQUA School of Business, Executive Education Program.

She is a member of the California State Bar and has been admitted to practice law before the U.S. Supreme Court and U.S. District Court.

A resident of Orange, Calif., Dunn is active in the Orange County Bar Association, Orange County Women Lawyers, American Corporate Counsel Association, and the Nu Beta Epsilon legal fraternity. She is the past

president of Parent and Child Enrichment Inc., as well as a past member of the board of directors of the Orange County Chamber Orchestra and the Orange County Epilepsy Society.

Signal Landmark, with headquarters in Irvine, has developed more than 18,000 residential units and 3 million square feet of commercial space over the past 20 years.

Signal Landmark currently owns the Long Beach Marriott Hotel, 1,100 acres of Bolsa Chica's coastal property in Orange County, over 300,000 acres of property in Michigan and Wisconsin, as well as a number of other properties throughout Southern California and Hawaii.

WAUKESHA, WI (APRIL 25) BUSINESS WIRE - Electronic Tele-Communications Inc. announced first quarter net sales of $3,179,484 compared to 1989 first quarter net sales of $618,761.

Net earnings for the quarter were $84,603, or $.05 per Class A share, compared to a loss of $86,811, or $.03 loss per Class A share, for the first quarter of 1989.

Dean Danner, President of ETC, said; ''The Company is pleased to report continued increased sales and earnings compared to results the year before. Earnings from operations are dramatically improved with a profit of $218,898 for the first quarter of 1990 compared to a loss of $216,703

for the 1989 quarter, reflecting a more efficient operation as a result of the May 1989 acquisition of The Audichron Co.

''This marks the fourth consecutive quarter in which ETC has had positive earnings which demonstrates the combined strength of the corporation created through the acquisition.

''Our Audichron subsidiary this year will celebrate the 50th anniversary of it's USA Time service. This service, which provides the time and temperature to callers throughout the world, provides annual revenues in excess of the average annual revenue of ETC prior to the acquisition. The USA Time equipment also announces weather forecasts prepared and updated twice daily by our own staff of meteorologists. Our Voices Mean Business is our way of saying what ETC means to the telephone industry.''

Electronic Tele-Communications is a leader in the manufacture of digital voice information systems selling products under the brand names of Audichron, Digicept, Aris, and AIRO. Its equipment, which is compatible with virtually every type of telephone system, provides a wide range of announcement and information services telephonically. Time, temperature, road conditions, and other types of public information are examples of some of the services provided.

The systems can also announce new and old telephone numbers, flexible pay telephone charges, class of service announcements, and customer dialing information. Manufacturing, engineering, and marketing operations are located in Waukesha and Atlanta. A regional sales office is located in Fairfax, Calif.

FRESNO, CA (APRIL 25) BUSINESS WIRE - James Prouty, 45, has been named senior vice president and chief financial officer for Fresno-based WestAir Holding Inc.

In his new position, Prouty is responsible for all financial activities for WestAir Holding, a publicly traded regional airline company listed on the American Stock Exchange (ASE:WAH).

The CFO responsibility at WestAir Holding was previously handled by company president Maury Gallagher. ''The appointment of Jim to the CFO post places the management of the company's financial matters in the

hands of a dedicated professional who has proven his abilities during several years of quality service with our company,'' said Gallagher. ''The move also allows me to devote more attention to other matters in our growing company.''

Prouty joined the company in 1984 and most recently served as vice president of administration. He had also served as controller and director of accounting for the company.

A graduate of California State University, Sacramento, Prouty earned a bachelor of science in accounting and is a certified public accountant. He resides in Fresno and is based at the WestAir Holding corporate headquarters in Fresno.

WestAir Holding Inc., which operates through two wholly owned subsidiaries and one operating division -- WestAir/United Express, NPA/United Express, and Atlantic Coast Airlines/United Express -- is the largest regional airline company in the United States. The company has marketing agreements with United Airlines allowing its airlines to operate as United Express.

WestAir Holding's airlines operate over 850 flights every business day and serve 54 cities in 12 states and Washington D.C. utilizing a fleet of more than 90 jet and turbo-prop aircraft.

SAN FRANCISCO (APRIL 25) BUSINESS WIRE - Wells Fargo Bank will operate full-service branches seven days a week inside selected Northern California Safeway Stores, the two companies announced Wednesday.

Wells Fargo expects to open the first six in-store banking offices during the fourth quarter of this year. The six branches, which will offer all the services of a traditional free-standing office, will be located in Safeway stores in Contra Costa, Marin, Solano and Sonoma counties.

''Bank branches in our stores offer our customers the convenience of one-stop shopping and service that is an integral part of Safeway's 'marketplace' concept,'' said George Unti, senior vice president and division manager.

''With the support of Safeway management and staff, plus Safeway's large presence in these markets, we're sure the convenient locations and extended hours of our new branches will attract many new customers,'' said

Terri Dial, executive vice president in charge of Wells Fargo's Northern California division.

Besides offering longer weekday hours than traditional offices, the in-store branches will be open on Sunday. ''Safeway's research shows that Sunday is its second- or third-busiest day of the week. That's why we'll be open on Sundays,'' Dial said. However, she added, ''we will not be extending Sunday hours to our traditional branches.''

Each facility will occupy about 350 square feet near the store's main entrance and provide the 24-hour convenience of automated teller machines (ATMs).

Additional information about the in-store branches, including their design hours and specific store locations, will be announced closer to opening date.

Safeway, the nation's third largest grocery chain, operates 877 stores in the United States and 220 stores in Northern California.

With $50 billion in assets and 486 branches in California, Wells Fargo is the state's third largest bank.

#90115b0105 04/25/1990 ~Business Wire

SOUTH BEND, IN (APRIL 25) BUSINESS WIRE - American Electric Power's concern for the environment parallels its achievements in engineering, AEP's chairman and chief executive officer told shareowners here Wednesday attending the company's 83rd annual meeting.

''I believe the evidence is clear that AEP does have a long-standing commitment to live in harmony with our environment,'' said W. S. White Jr. ''That commitment did not begin with Earth Day in 1970 or in 1990. It has always been, and will continue to be, an example of the character of our company.''

White cited the company's efforts in the fields of electric generation and high-voltage transmission. ''In terms of energy efficiency, I don't believe that there is another utility anywhere that can match our record over the years of improving the efficiency with which raw energy is converted to electricity,'' White said. ''That record continues with our

work on Pressurized Fluidized Bed Combustion (PFBC), considered the flagship project in the U.S. Department of Energy's Clean Coal Technology program.

''In addition, no one will dispute our efforts in transmission developments, which have allowed us to serve a growing population and growing economy while minimizing the amount of land used for transmission rights of way.''

White went on to mention that AEP installed the first natural draft cooling tower at one of its power plants in Kentucky to minimize the effect of releasing heated water into navigable waters. Often, reclamation work following surface coal mining restores the land to a better condition than before mining, he said. ''We have given thousands of acres of land for uses such as the International Center for the Preservation of Wild Animals or sold lands at less than market to Nature Conservancy districts '' White said.

Turning to Congress where amendments to the Clean Air Act aimed at acid rain are pending, White said, ''We continue to believe that there is no urgency necessitating immediate legislation.'' White quoted the recently published remarks of Dr. James Mahoney, director of the federal government's National Acid Precipitation Assessment Program (NAPAP), '' 'Acid rain cannot be seen as ranking at, or even near, the top of a present-day priority list of environemental issues...'

''Our efforts in this area have been directed at getting responsible legislation based on scientific evidence and balanced between environmental benefits and economic impact,'' White said. ''Our position remains that the perceived benefits of stringent sulfur dioxide emission reductions do not justify the enormous costs and that spending billions of dollars without greater assurance of corresponding benefits makes little sense.''

White concluded, ''A preliminary report by the Electric Power Research Institute states that a vigorous clean coal technologies program can achieve essentially the same environmental benefits (as a massive scrubber retrofit approach) at an overall cost to society of $200-400 billion less. It is difficult to discern a rational basis for legislation which would ignore such economic consequences.''

Regarding the company's prospects, White said, ''As we look to the 1990s, we see more opportunities and growth for AEP in several areas. Our forecasted five-year internal sales growth is expected to be 1.5 percent, which will allow us to shift our sales gradually from the wholesale market to the more profitable retail sector.''

AEP is a utility holding company with electric company subsidiaries

serving seven million people in parts of Michigan, Indiana, Ohio, Kentucky West Virginia, Virginia and Tennesee.

PICKERINGTON, OH (APRIL 25) BUSINESS WIRE - R.G. Barry Corp. (AMEX:RGB) today reported a loss of $2,651,000, or 71 cents per share on sales of $10,084,000 for the first quarter ended March 24, 1990.

In the comparable period last year, Barry reported earnings of $33,000, or 1 cent per share, on sales of $19,838,000.

''While not unexpected, the results are still quite disappointing,'' said Gordon Zacks, chairman and chief executive officer.

''In our 1989 annual report we cited a softening in the stretch slipper market which resulted in an excessive inventory of stretch product for many retailers at year end. Although R.G. Barry is a secondary supplier in the stretch category, we projected that our first quarter and first half sales and operating results would be significantly below last year because of those retailers' unwillingness to buy new product until excess stretch inventory was liquidated.

''This stretch slipper glut hurt the spring 1990 sales of both our stretch and non-stretch slippers. In addition, we continued to experience negative impact from the loss of low margin, high volume mass merchandise business that was temporarily sacrificed in 1988 and 1989 when the company was faced with production limitations. Those capacity limitations have been addressed with expansions at several of our plants and we expect to recapture the bulk of the sacrificed business during the second half of this year and the first half of 1991.

''Also, during the first quarter we booked less spring business with stores affiliated with the Campeau organization.

''We expect all of these factors to continue negatively affecting our business during the second quarter.

''In the first quarter, the company provided a reserve of $700,000 to cover future costs related to the April 3 closing of our Ciudad Juarez, Mexico manufacturing plant. Excessive turnover and low productivity in Juarez, and Barry's ability to more efficiently manufacture products at its other locations were the reasons for the closing.

''We expect our already successful boxed giftable slipper business to increase in the second half as stores convert space from the declining stretch slipper category to the growing boxed giftable slipper category.

''As the leader in boxed giftable slippers, our business has been and will continue to be heavily influenced by Christmas gift buying. Approximately 75 percent of our annual sales take place in the second half and 1990 will be no exception. Despite the very disappointing first half, we expect a strong second half.''

R.G. Barry Corp. is the world's largest manufacturer and marketer of soft washable slippers and footwear for at and around the home. Its brand lines include Dearfoams, Madye's, Snug Treds and slipper products under the licensed Capezio and Cannon names.

SEATTLE (APRIL 24) BUSINESS WIRE - Pizza Hut and TCBY (The Country's Best Yogurt) at Sea-Tac International Airport.

Things are sure changing in airport food service. Sparks are flying and hammers pounding as construction on new facilities proceeds through May 11.

Now travelers using Sea-Tac International Airport will be able to enjoy more nationally known food products, thanks to a marketing innovation by Host International. Seattle is one of the first of some 50 airport locations to be chosen to introduce the popular products like pizza and

yogurt.

Acetylene torches are cutting away parts of the old snack bars in two locations to make way for two new Pizza Hut outlets in the Main Terminal and on ''C'' Concourse. They will join the two existing Pizza Hut outlets that Host opened earlier this year. Host General Manager Carl Borg is available to supply information about how this marketing change will benefit Seattle travelers.

This is the first time nationally branded products have been offered by Host, a division of Marriot and the largest airport concessionaire in the country. Host also operates a T.C.B.Y. Yogurt Shop on the C/D Concourse Corner and a yogurt cart in the North Satellite restaurant.

The move by Host from generic food products to the nationally recognized branded items was done for a couple of reasons: (1) a segmentation study conducted at 16 airports, including Seattle, showed airport customers preferred brand name products in the categories of hamburgers, pizza, ice cream and cookies; (2) another Marriott restaurant division was converted from generic to branded products and survey results showed that between 70-75 percent of the respondents said they would return to one of the nationally branded outlets.

The research and some common knowledge told Host three things: (1) the public has a huge preference for brand names; (2) there is high public trust in national brands and a perception of good value for price relationship; and (3) there is a perception of high product-quality. Host currently operates 34 national franchises in airports around the country, with more to be added in 1990.

SEATTLE (APRIL 25) BUSINESS WIRE - Genetic Systems Corp. Wednesday announced it has received both FDA and Canadian approval to market a test to detect antibodies to Human Immunodeficiency Virus Type 2 (HIV-2), the second virus known to cause AIDS.

The announcement marks the first such approval in either nation. The Genetic Systems test will be immediately available in both countries.

HIV-2 was first isolated in 1985 from a West African AIDS patient. Subsequently, more than 600 infected individuals have been indentified in Africa, Europe, North America and South America. At least 26 North

American cases have been indentified -- 17 in the United States and nine in Canada.

HIV-2 is transmitted in the same manner as HIV-1, the first AIDS virus discovered. Infection occurs through sexual intercourse, reuse of infected hypodermic needles, from infected mothers to their fetuses, or through transfusion of contaminated blood.

Genetic Systems Corp., a subsidiary of Sanofi Inc., develops and markets diagnostic and screening tests for AIDS and AIDS-related conditions, hepatitis, and other infectious diseases.

IRVINE, CA (APRIL 25) BUSINESS WIRE - Westcorp Inc. (ASE:WES), an Irvine diversified financial services company, whose principal subsidiary is Western Financial Savings Bank, Wednesday announced net income for the quarter ending March 31, 1990, of $2.9 million, or 18 cents per share.

While operating income again reached new highs, the cost of further adjusting the book value of its high-yield corporate bond portfolio reduced the company's net income slightly below the $3.2 million, or 19 cents per share, reported for the same period of 1989.

The company established an additional provision for securities losses related to its high-yield corporate bond portfolio in the first quarter. This reduced net income by $2.3 million, or 14 cents per share, in response to accounting rules mandated by last year's Financial Institutions Reform Recovery and Enforcement Act (FIRREA).

''I'm very pleased with our operating results,'' remarked Stephen W. Prough, president. ''Absent the requirement to adjust the value of these bonds, net income for the quarter would have been up over 65 percent as compared to 1989.''

Westcorp has maintained its assets at approximately $2.9 billion, while increasing deposits by $90 million and reducing its portfolio of high-yield corporate bonds to $44 million, or 1.5 percent of assets. Real estate loan production for the quarter totaled $119 million, while consumer finance lending generated $189 million.

''I am also very pleased to announce that Western Financial Savings Bank maintained its capital position, exceeding all three new regulatory

measures of financial strength by substantial margins,'' stated Prough.

At March 31, 1990, tangible capital and core capital increased to $121 million, or 4.16 percent of adjusted assets; and total regulatory capital increased to $201.9 million, or 8.92 percent of ''risk weighted assets.'' Current regulations stipulate minimum ratios of 1.5 percent for tangible capital, 3.0 percent for core capital and 6.4 percent for risk-based capital.

Western Financial Savings Bank opened additional retail banking branches in Irvine, San Rafael and Thousand Oaks during the period, increasing the number of locations to 24. The bank also operates 23 consumer finance outlets, 10 real estate lending offices and five automobile finance centers throughout California.

#90115b0204 04/25/1990 ~Business Wire

HOUSTON (APRIL 25) BUSINESS WIRE - Union Texas Petroleum Holdings Inc.'s net income for the first quarter of 1990 was $31 million, or 23 cents per share, compared to $50 million, or 45 cents per share, for the same period in 1989.

The decrease in 1990's first quarter was attributed primarily to the absence of business interruption insurance accruals as a result of a 1989

second quarter settlement related to the Piper explosion in the U.K. North Sea.

As previously reported, Union Texas reached a final settlement with insurers and accrued all future periods' business interruption insurance in 1989's second quarter. In 1989's first quarter, the company recognized $38 million of revenues under the business interruption insurance policy.

The company's operations in the first quarter of 1990 benefited from higher crude oil volumes in the North Sea and increased U.S. natural gas volumes, which offset lower ethylene production volumes and sales prices.

Revenues for the first three months of 1990 totaled $311 million, up from $307 million a year ago. Higher North Sea crude oil sales and increased liquefied natural gas (LNG) prices in Indonesia more than offset the absence of accruals for business interruption insurance.

At the company's annual meeting held here Wednesday, Chairman and Chief Executive Officer Clark Johnson said that approximately 95 percent of Union Texas' $361 million capital budget is dedicated to exploration and development projects at its worldwide operations.

A major highlight in the company's U.K. North Sea activities during 1990 will be the development of the Saltire edge oil field (formerly known as East Piper), in which a Union Texas subsidiary has a 20 percent interest, Johnson noted. Union Texas and its partners will seek approval from the U.K. government to construct a fixed separate platform at Saltire, which will be linked to the new Piper platform now under construction.

Production from Saltire and Piper, in which a Union Texas subsidiary also holds a 20 percent interest, is expected to begin in 1992. Johnson said that Union Texas and its partners are continuing their aggressive edge oil exploration around the Piper and Claymore blocks.

The group recently announced discoveries on the West Claymore and Westray prospects, where additional evaluations of the wells and surrounding areas are under study.

Another bright spot in Union Texas' international oil and gas operations is the expanding market for LNG in the Pacific Rim, Johnson said. Union Texas and its partners in an Indonesian oil and gas joint venture have signed an agreement with Pertamina, the Indonesian national oil company, for a 20-year extension to the year 2018 of the group's production sharing contract.

In the United States, the Gulf of Mexico will continue to be a major focus for Union Texas' oil and gas operations. The company recently participated in apparent high bids on 18 central Gulf of Mexico blocks at

a federal offshore lease sale. Among the company's key development plans for its Gulf of Mexico holdings is a new platform at Vermilion blocks 404/412.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings Inc. (NYSE:UTH) explores for and produces oil and gas in the United States and overseas and has petrochemicals and natural gas processing interests. -0- T Comparative financial highlights follow (amounts in millions, except per share and shares outstanding data):

#90115b0223 04/25/1990 ~Business Wire

SAN FRANCISCO (APRIL 23) BUSINESS WIRE - EurekaBank Wednesday reported earnings of $5.3 million on assets of $1.77 billion for the quarter ending March 31.

The company's net worth reached $144.5 million with the earnings figure generating an annualized return on average assets of 1.21 percent.

As ranked by capital strength, the Northern California-based federal savings bank maintained its position among the nation's leading financial institutions by posting capital ratios substantially above new requirements for the thrift industry. EurekaBank's risk-based capital ratio stands at 13.68 percent, with its tangible capital ratio reaching 6.45 percent.

Earnings for the first quarter of 1990 were down slightly from the $5.6 million figure posted for the same period in 1989. This decrease is associated with three major non-recurring expense items incurred in the first quarter of 1990.

These non-recurring expenses involved: 1) a major corporate identity program associated with the change of the organization's name, 2) the launch of a major new savings product, and 3) costs associated with the relocation of EurekaBank's administrative headquarters to the Metro Center in Foster City.

''We are extremely pleased with our operating results as well as with the sustained strength of our capital position,'' said Byron A. Scordelis, president and chief executive officer. ''We invested for the future in our branches as well as in our new products and new identity in the first quarter.

''We feel that we have succeeded in developing the foundation and the capital strength necessary to maintain a leadership position in serving the financial needs of our customers in the Greater Bay Area,'' concluded Scordelis.

Headquartered in Foster City, Calif., EurekaBank serves more than 100,000 households through tits Greater Bay Area network of 35 branches.

#90115b0267 04/25/1990 ~Business Wire

SOUTH SAN FRANCISCO, CA (APRIL 25) BUSINESS WIRE - Genentech Inc. (NYSE:GNE) Wednesday announced that first-quarter profits were $13.3 million, or 15 cents per share, up from $7.4 million, or 9 cents per share for the like quarter in 1989.

Revenues for the quarter rose 32 percent, to $120.2 million, up from $91.1 million.

A pre-tax gain of approximately $11.9 million, or about 12 cents per share in contract revenues is related to the sale in March of Genentech's one-quarter interest in Genencor.

Genencor is the industrial enzyme joint venture which Genentech helped found in 1982. Genentech's divestiture of Genencor reflects its commitment to focus research activities and resources on the development of human therapeutics.

During the quarter, merger-related expenses of $11.7 million, or approximately 12 cents per share, were incurred. These expenses are related to the proposed merger of Genentech with Roche Holdings Inc.

Merger-related expenses are expected to total approximately $150 million when the transaction is completed. After consideration of the merger-related expenses, Genentech expects to incur a loss for the year.

Genentech invested $37.4 million in research and development during the first quarter. Relaxin, another potential new product, entered clinical trials during the first quarter to study its ability to facilitate safe

and natural childbirth.

Sales of the company's heart attack drug, Activase, were $54.9 million for the first quarter, compared with $48.1 million for the like quarter of 1989 and compared with $56.7 million for the fourth quarter of 1989.

Activase, tissue plasminogen activator (t-PA), maintained approximately two-thirds market share during the first quarter of 1990.

Protopin, human growth hormone, sales increased to $35.0 million from $24.9 million for the like quarter a year ago.

This is the first quarter that the results of Genentech's Canadian operation, which became a wholly owned subsidiary at the end of 1989, are consolidated with the company's overall results. Genetech Canada, which primarily is engaged in sales and marketing, had first-quarter sales of $1.9 million.

Genentech Inc. is a leading biotechnology company focusing on the development, manufacture and marketing of pharmaceuticals produced by recombinant DNA technology.

SAN JOSE, CA (APRIL 24) BUSINESS WIRE - Business Bancorp (the ''company''), holding company of California Business Bank N.A., announced net income of $149,000 (14 cents per share), for the first quarter of 1990 which ended on Mar. 31.

These results compare to net income of $170,000 (17 cents per share) for the first quarter of 1989. Average shares outstanding for the quarters ended Mar. 31, 1990 and 1989 were 1,089,842 and 1,000,000, respectively.

Results for the first quarter of 1990 include a provision for payment of income taxes of $92,000. For the first quarter of 1989, as the result of net operating losses from prior years, the company made a provision for the payment of income taxes of only $1,200.

Income before the provision for the payment of income taxes was $241,000 for the quarter ended Mar. 31, as compared to $171,000 for the like period in 1989.

Total assets at Mar. 31 were $57,432,000, as compared to $51,046,000 at Mar. 31, 1989. Total deposits were $51,384,000, as compared to

$46,284,000 and net loans outstanding were $40,216,000, as compared to $26,266,000.

Business Bancorp is a bank holding company founded in 1982. California Business Bank N.A. is a federally chartered commercial bank with one office in the downtown area of San Jose. The bank serves the needs of businesses and professionals in Santa Clara County.

Business Bancorp had approximately 650 shareholders at Mar. 31. The common stock of Business Bancorp is traded over-the-counter.

PHOENIX (APRIL 25) BUSINESS WIRE - St. Luke's Health System announced that it will not make the payment due Apr. 25, 1990, with respect to its Series 1985A bonds.

The action taken today is part of the effort initiated by St. Luke's on Oct. 25, 1989, to restructure its long term debt.

In October, St. Luke's announced that its System Board decided not to make a similar payment due Oct. 25, 1989, with respect to its Series 1985A bonds, and opened discussions with bondholders to restructure the debt. This action triggered a continuing dialogue with certain major holders of Series 1985A bonds and a group of banks which have issued letters of credit that support St. Luke's Series 1985B and 1985C bonds about restructuring St. Luke's long term debt.

On Nov. 1, 1989, and Feb. 1, 1990, First Interstate Bank of Arizona, trustee for the Series 1985A, 1985B and 1985C bonds, drew upon reserve accounts to fund bond payments due those dates. Since November, St. Luke's has replenished the reserve funds on a monthly basis in an amount equal to 1/12 of the semi-annual payment not made on Oct. 25, 1989.

Similar 1/12 monthly payments have been made with respect to the semi-annual payment due Jan. 31, 1990, which was not made. St. Luke's understands that there are sufficient funds on deposit in the reserve account to permit First Interstate Bank of Arizona to fund the Series 1985A bond payment due May 1, 1990.

St. Luke's Health System, a 544-bed system, includes the St. Luke's Medical Center and St. Luke's Behavioral Health Center in downtown Phoenix; and the Tempe St. Luke's Hospital in Tempe.

NEW YORK (APRIL 26) BUSINESS WIRE - Cowen & Co., a leading securities and investment banking firm, Wednesday announced that Michele S. Preston has joined Cowen as a partner in the firm's research department.

Preston left Salomon Brothers Inc., where she was a director and senior technology analyst, to accept the position with Cowen. She will be based in the Cowen's New York City office.

Cowen's director of research, Raymond K. Moran, said Preston, 37, will follow the personal computing industry, her area of coverage at Salomon Brothers. Moran said she will provide both industry and company-specific analysis for Cowen's institutional clientele, covering such companies as Apple, Compaq, Microsoft and Businessland.

Prior to joining Cowen, Preston served as a director and senior technology analyst at Salomon for four years. In each year since 1986, she has been among the top analysts recognized by the Greenwich Research Survey.

Additionally, Preston has been named to the Institutional Investor All-America Research Team for the information technology/microcomputers and peripherals category for each year since the category was established. In the 1989 poll, 10 Cowen research analysts held 11 All-America team positions.

Before Salomon Brothers, Preston served as a special limited partner and senior technology analyst with L.F. Rothschild, Unterberg, Towbin. Preston earned her master of library science degree from the State University of New York in Albany.

Based in New York City, with offices in Boston, San Francisco and 11 other cities worldwide, Cowen is a securities firm providing investment banking and brokerage services to institutional and corporate clientele.

Founded in 1918, Cowen is one of the oldest firms focusing exclusively on high technology and health care services. It provides research coverage and market-making support for leading technology companies and recently has co-managed public equity offerings for Genzyme, MIPS Computer Systems and Sequent Computer Systems.

LOS ANGELES (APRIL 26) BUSINESS WIRE - Teledyne Inc. Chief Executive Officer George A. Roberts has been elected vice-chairman of the board and has been succeeded as president by William P. Rutledge who was also elected to the board of directors.

The board also re-elected Hudson B. Drake, senior vice president and elected Gordon J. Bean and Gary L. Riley vice presidents and Douglas J. Grant treasurer and chief financial officer.

Dr. Roberts, 71, had been president of Teledyne since 1966 and was elected chief executive officer in 1986.

Rutledge, 48, had been executive vice president. He joined Teledyne as a group executive in 1986 from FMC Corp. where he was Defense Systems International division vice president, general manager.

In 1987 he was elected a vice president of Teledyne, in 1988 a senior vice president and in 1989 executive vice president.

He holds a bachelor of sciences degree in metallurgical engineering from Lafayette College and a masters of science degree in financial management from George Washington University and is a graduate of the Stanford Executive Program.

Drake, 55, elected senior vice president in 1988, holds a bachelor of arts degree in economics from U.C.L.A. and a masters in business administration degree from Pepperdine University. He is responsible for the aerospace and electronics segment of companies and international marketing.

Bean, 53, had been treasurer of Teledyne and as vice president will be responsible for the metals segment. He joined Teledyne in 1967 and is a graduate of the University of British Columbia.

Riley, 53, joined Teledyne in 1986 from General Housewares Corp. where he was vice president and director. At Teledyne he had been a group executive. As vice president he will be responsible for the manufacturing segment.

Grant, 39, had been controller and chief accounting officer. He joined Teledyne in 1977, is a certified public accountant and holds a bachelor of sciences degree in accounting from California State University at Northridge.

FORT WORTH, TX (APRIL 25) BUSINESS WIRE - Paul I. Stevens, chairman and chief executive officer of Stevens Graphics Corp. (ASE:SVGA/SVGB), Wednesday announced that the company reported increased sales and earnings for the first quarter ended March 31.

Net income for the quarter ended March 31 increased 45 percent to $1,564,000 from $1,079,000 in the first quarter of 1989. Sales were $33,690,000, an increase of 23 percent from $27,426,000 in the like quarter of 1989. Earnings per share increased to 18 cents, up 29 percent from 14 cents in the first quarter of 1989, despite an additional 1 million shares issued in early January 1990.

''This is the 13th consecutive quarter since the company was founded in December 1986 where both sales and earnings have increased when compared to the same quarter of the previous year,'' said Stevens.

''We are very pleased with these first-quarter results,'' Stevens continued. ''Historically, our first quarter has been our smallest in terms of both sales and income, but, as a direct result of management's execution of our plans and strategy, we have been able to steadily increase both sales and earnings.

''Although our incoming orders are somewhat slower than expected, we are hopeful that, after a major industry trade show in Europe concludes in early May, orders will resume their normal flow.''

Stevens Graphics Corp., with headquarters in Fort Worth, designs, manufactures, markets and services web-fed printing presses, collators, packaging and related graphic arts equipment on a worldwide basis. The company serves the packaging, commercial, business forms and currency/securities segments of the printing and packaging industries.

STAMFORD, CT (APRIL 25) BUSINESS WIRE - Pitney Bowes Inc. (NYSE:PBI) Wednesday reported first-quarter 1990 revenue of $755.7 million, up 15 percent from $658.2 million in the first quarter of 1989.

First-quarter 1990 income from continuing operations of $59.7 million, or 75 cents per share, increased 12 percent from $53.4 million, or 68 cents per share, in the first quarter of 1989.

Chairman and President George B. Harvey said: ''We are particularly pleased with sales in our mailing and shipping businesses. Last year's reorganizations in the United States, Canada and the United Kingdom have succeeded in sharpening the focus on our markets -- and we are now seeing the resulting increases in order rates, revenue growth and income growth.

The company's first-quarter 1990 revenue increased 15 percent to $755.7 million from $658.2 million in the first quarter of 1989.

First-quarter 1990 revenue included $365.1 million from sales, up 18 percent from $308.8 million in the first quarter of 1989; $276.5 million from rentals and financing, up 13 percent from $244.7 million and $114.1 million from support services, up 9 percent from $104.8 million.

First-quarter 1990 income from continuing operations increased 12 percent to $59.7 million, or 75 cents per share, from $53.4 million, or 68 cents per share, in the first quarter of 1989. Net income in the first quarter of 1990 was $59.7 million, or 75 cents per share.

Net income in the first quarter of 1989 was $119.5 million, or

$1.51per share, and reflected the effect of the adoption of Statement of Financial Accounting Standards No. 96, ''Accounting for Income Taxes,'' which increased first-quarter 1989 income by approximately $66 million, or 83 cents per share.

The company is in the process of selling the Wheeler Group which has been classified as a discontinued operation.

Pitney Bowes is a $2.9 billion multinational manufacturing and marketing company which provides mailing, shipping, copying, dictating and facsimile systems; item identification and tracking systems and supplies; mailroom, reprographics and related management services; and product financing.

MONROVIA, CA (APRIL 25) BUSINESS WIRE - STAAR Surgical Co.'s management announced Wednesday that the Opthalmic Panel of the FDA had granted an approvable status to the company's AA4203 series Elastic Lens, at the April 19 panel meeting in Washington, D.C.

''Our approvable status is conditioned on our distributing this product only through those physicians skillfull enough to perform the 'capsularexus' surgical technique for lens explantation,'' stated Steven Ziemba, vice president, regulatory affairs of STAAR. ''However, we are delighted at this result.''

A company spokesman stated that, achieving approvable status is the final precursor required for ultimate approval of the company's product.

STAAR, a publicly traded company founded in 1982, develops, manufactures and markets products for small incision surgery, primarily for use in cataract procedures.

#90115b0629 04/25/1990 ~Business Wire

LOS ANGELES (APRIL 25) BUSINESS WIRE - Pacific Enterprises (NYSE:PET) Wednesday reported net income for the first quarter of 1990 of $68 million up slightly from $67 million reported for the first quarter of 1989.

Earnings per share of common stock declined 10 percent to 92 cents for the three months ended March 31, 1990, compared with $1.02 per share for the same period a year ago.

Pacific Enterprises Chairman James R. Ukropina said the decline in earnings per common share was due to a greater number of shares outstanding and to an increase in dividends on preferred stock.

Operating revenues for the first three months of 1990 were $1.91 billion, compared with $1.86 billion for the same period of 1989.

Cash flow from operations totaled $182 million, or $2.56 per share, for the first quarter of 1990, compared with $188 million, or $2.90 per share, for the first quarter of 1989.

Interest expense after taxes was $28 million for the quarter ended March 31, 1990, down from $29 million for the same period a year ago.

Pacific Enterprises weighted average number of common shares outstanding in the first quarter of 1990 were 8 percent higher at 69.5 million. The increase was due primarily to shares issued in December 1989 for an employee stock ownership plan at PE's Thrifty Corp. unit, Ukropina explained.

Pacific Enterprises, with headquarters in Los Angeles, owns Southern California Gas Co., the nation's largest natural gas distribution utility. It also owns Thrifty Corp., a drug store and sporting goods chain retailer with more than 1,000 stores, and Pacific Enterprises Oil Co., a leading independent oil and gas company with operations concentrated onshore in the United States.

#90115b0641 04/25/1990 ~Business Wire

GREENSBORO, NC (APRIL 25) BUSINESS WIRE - In response to growing business volumes in the Greensboro area, CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., has opened a new 20-door terminal with increased capacity for serving the freight transportation needs of Greensboro and surrounding communities.

The new four-acre facility, located on Base Leg Road, is the second CF Motor Freight facility to open in the city. Together, the two Greensboro terminals serve businesses in Burlington, Greensboro, Haw River, High Point, Mebane, Stokesdale and Thomasville.

The terminals are the area's link to CF Motor Freight's nationwide freight-flow system, a 667-terminal network covering 99 percent of the communities in the United States and Canada.

''These facilities enable us to provide top-quality service to businesses and industries in the Greensboro area,'' said Mike Hilton, terminal manager for both facilities. ''Our local growth is in direct response to

the expansion of our customers' businesses in this region. As our customers have grown, so have we -- this year alone we expect to process 115 million pounds of freight at our Greensboro terminals.''

Like all CF Motor Freight terminals, Greensboro is tied into the company's freight-flow system through a sophisticated nationwide computer freight tracking and data management network. The company's system enables Greensboro customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing, volume and other freight profile and logistics information that helps customers manage their businesses.

The company also provides related computer programs and services utilizing a customer's own computer resources.

CF Motor Freight provides intermediate and long-haul transportation of less-than-truckload freight, which are commercial and industrial shipments generally weighing less than 10,000 pounds.

It is the largest subsidiary of Consolidated Freightways Inc., which in addition to long-haul trucking, has businesses in regional next-day trucking, domestic and international air-freight, intermodal truckload, customs brokerage and ocean freight services.

#90115b0644 04/25/1990 ~Business Wire

SUNNYVALE, CA (APRIL 25) BUSINESS WIRE - IKOS Systems Inc. and Logic Modeling Systems Inc. Wednesday announced the signing of a comprehensive OEM agreement for IKOS to sell, distribute and support the LM-1000 hardware modeling system.

Under the terms of the agreement, the two companies will also enter into a joint development program to fully integrate the LM-1000 into the IKOS simulation environment.

IKOS' hardware-based simulation systems provide a highly interactive logic, fault and behavioral-level simulation environment for the design of complex application-specific integrated circuits (ASICs) and systems.

IKOS systems combine patented hardware technology with powerful system software running on industry standard UNIX workstations to provide exceptionally fast simulation performance. IKOS also offers an extensive array of libraries from the world's foremost ASIC foundries.

Hardware modeling solves the simulation model availability problem for system and ASIC designers by allowing the physical VLSI device to be used to model its own behavior during design verification. Hardware models are full-function, full-fidelity and evaluate at hardware speed.

The LM-1000 provides designers with easy access to over 600 hardware models of important VLSI devices on the market today, and ASIC models can be developed in less than one day. The LM-1000 hardware modeling system is platform and simulator-independent.

IKOS Systems Inc. designs, manufactures, markets and supports advanced hardware-based simulation systems for the application-specific integrated circuit and systems design markets.

The company is privately held and employs more than 90 people worldwide. In addition to its corporate office in Sunnyvale, IKOS supports direct operations in Germany and the United Kingdom, as well as distributor relationships with Instrumatic (Europe), SIMAC Electronics (Benelux) and C. Itoh (Japan).

Logic Modeling sells through OEM relationships with EDA vendors including Cadence, GenRad, Harris/Scientific Calculations, Valid, Vantage Analysis Systems, Viewlogic Systems, Zycad Corp. and to companies with propriety simulators.

MOUNTAIN VIEW, CA (APRIL 25) BUSINESS WIRE - Acuson Corp. (NYSE:ACN), which designs, manufactures and markets premium-quality diagnostic ultrasound equipment, Wednesday announced the results of operations for the first quarter ended March 31, 1990.

Sales for the first quarter of fiscal-year 1990 increased 25 percent to $63,914,000, compared with $51,213,000 reported in the year-earlier period. Net income for the quarter was $10,693,000 compared with net income of $8,569,000 and earnings per share rose 25 percent to 45 cents per share from 36 cents per share reported in the comparable period a year earlier.

''In late 1989, we introduced important technological improvements to our

radiology and cardiology products,'' said Samuel H. Maslak, president. ''We have been demonstrating and delivering these capabilities in the first quarter and are very pleased with the positive customer response.''

#90115b0655 04/25/1990 ~Business Wire

SOUTHPORT, CT (APRIL 25) BUSINESS WIRE - Crystal Brands Inc. (NYSE) Wednesday announced that net income for the first fiscal quarter of 1990 rose 9 percent to $6,634,000, or 73 cents per share, from $6,068,000, or 67 cents per share, in the comparable quarter one year ago. The improved results were attributable to higher gross margins, lower selling, general and administrative expenses and reduced interest costs. Net sales of $218,800,000 for the first quarter of 1990 declined 2 percent from net sales of $223,317,000 in the prior year's first quarter.

The positive first quarter performance contributed to the continued strengthening of Crystal Brands' financial condition. At March 31, 1990, Crystal Brands' current ratio was 2.5 to 1. In addition, the company's equity increased to 43 percent from 39 percent of capital and long-term debt declined to 57 percent from 61 percent of capital at the end of the first quarter of the prior year. At March 31, 1990 book value rose 3 percent to $244,319,000, or $26.87 per share, from $237,749,000, or $26.19 per share, on December 30, 1989.

Crystal Brands produces tailored clothing, dress furnishings and sportswear for men, women and boys under the brand names Eagle Shirtmakers, Evan-Picone, Gant, Haspel, Izod, Izod Lacoste, Palm Beach, John Weitz, Polo by Ralph Lauren for Boys, Pierre Cardin for Boys, Hunter Haig, Turnbury, Brannoch, Fulcrum, Firenza, Milano and Austin Hill. The company also produces costume jewelry and accessories under the brand names Monet, Trifari and Marvella.

#90115b0659 04/25/1990 ~Business Wire

MILFORD, CT (APRIL 25) BUSINESS WIRE - BIC Corporation for the first quarter ended April 1, 1990 reported income of $6,010,000, or $.50 per

share, compared with $6,510,000, or $.54 per share, in the same period last year.

Sales for the quarter were $79,304,000 compared with $80,410,000. ''In our U.S. operations, profits and sales of writing instruments and shavers were higher and both maintained market share,'' Bruno Bich, president, said. ''However, these profit gains were more than offset by a decline in profits from lighters, whose sales were lower as the number of smokers continues to decline. The overall sales decline is attributable to the absence of any meaningful perfume sales in the 1990 first quarter.''

#90115b0661 04/25/1990 ~Business Wire

SAN JOSE, CA (APRIL 25) BUSINESS WIRE - Koala Technologies Corp. (ASE:KOA), Wednesday reported earnings for its fiscal 1990 third quarter ended March 31, 1990.

The company achieved net income of $179,200, or 1 cent per share, up 317 percent from a net loss of ($137,800), or (1 cent) per share for the like quarter a year ago. Revenue was $2,560,400, a 3 percent increase over revenue of $2,493,300 for the like quarter last year.

According to Douglas W. Kenny, president and chief executive officer, Koala's Southern California-based subsidiary, Rotational Molding Inc., which manufactures large plastic containers and custom plastic products, showed strong sales and profits during the quarter.

Also in the quarter, Koala's computer product line, which includes four peripheral hardware products with associated software packages for Apple and IBM personal computers, was expanded with the announcement of a new hardware and software version of MacVision. MacVision is Koala's popular video digitizer for the Macintosh.

Koala will begin shipping this new version of MacVision in May 1990, said Kenny.

#90115b0668 04/25/1990 ~Business Wire

LONDON (APRIL 25) BUSINESS WIRE - British Gas (NYSE:BRG) Wednesday issued a new price schedule offering an extended range of contracts to its customers. The terms of the new Schedule are effective from April 1, 1990.

The new Schedule gives customers the option of choosing index-linked contracts for a period of between two and 10 years. British Gas has already published Schedules to cover contracts of one or two, and 10 to 15 year periods. This new Schedule bridges the time gap between the two earlier Schedules and gives the customer a comprehensive range of contracts time options.

The schedule is available to all contract gas customers and offers - -- firm and interruptible supplies of gas -- no limit on the load size, providing this exceeds the relevant contract consumption threshold -- the facility to aggregate loads and where applicable, to incorporate the contract within an Umbrella Agreement -- the price of gas being indexed throughout the life of the contract to one of the indices on offer -- a contract period of three to 10 years, with a review at the fifth anniversary of the contract start date -- the facility to review the annual nominated consumption prior to the start of each contract year -- a take or pay provision linked to 70 percent of the annual nominated consumption.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer services to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is

equivalent to ten Ordinary Shares.

WAYNE, PA (APRIL 25) BUSINESS WIRE - American Film Technologies Inc., (NASDAQ: AFTI) (PHLX: AFT) Chairman George R. Jensen Jr., today announced that Disney is the first major studio to become a customer for AFT's proprietary, all-digital animation system, and results of operations for the third quarter and first nine months ended March 31, 1990.

AFT has signed a contract with Walt Disney Television to produce an animated/live action promo for a prime time series for Disney to sell to the television networks.

A sale by Disney to the networks will result in AFT being engaged on this project for a term of up to five years. Jensen said this contract with Disney is significant because it affirms the quality of AFT's animation system. He is optimistic that this beginning will evolve into a long-term association with them.

The company also announced results for the third quarter and first nine months ended March 31, 1990. Revenues for the third quarter rose 66 percent to $4,537,102 from $2,730,248 for the same quarter last year. Third quarter net earnings rose 103 percent to $506,742, or five cents per share, from $249,586, or two cents per share, for the third quarter last year.

Revenues for the first nine months increased 70 percent to $12,798,815 from $7,511,845 for the same period last year. Net income for the nine months amounted to $2,026,651, or 20 cents per share, vs. a net loss of ($133,921), or (4 cents) per share, for the same period last year.

Jensen said the company produced the equivalent of 18 COLORIMAGED Films during this year's third quarter compared to the equivalent of 12 films during the same quarter last year. March saw record colorimaging production of 751 minutes, the equivalent of about seven and one half films.

Jensen expects a strong fourth quarter due to record production levels in March and continued heavy output in the fourth quarter. He remains confident that the company will reach fiscal 1990 goals of $18 million in

revenues and $3 million in net income.

American Film Technologies Inc. color-converts black-and-white motion pictures and television productions for others on a fee basis and for its own film library. The company's animation division produces "paperless" animation on a fee basis.

NEW YORK (APRIL 25) BUSINESS WIRE - The Board of Directors of ASARCO Incorporated (NYSE:AR) Wednesday declared a regular quarterly dividend on the common stock of 40 cents per share payable June 1, 1990, to stockholders of record at the close of business on May 10, 1990.

The board also today appropriated an additional $25 million for the repurchase of Asarco common stock in the open market from time to time over the next two years, bringing to $120 million, the total value of authorized stock repurchase programs implemented in the last two years. As of March 31, 1990, the company had purchased 1,386,400 common shares and 2,880,991 common stock purchase warrants at a cost of $79.7 million. The board initially authorized a $20 million repurchase program in January 1988 and subsequent repurchases of $25 million in April 1989 and $50 million in June 1989.

Asarco increased its quarterly dividend to 40 cents per share on April 1, 1989, after paying 30 cents in the first quarter of 1989 and 20 cents in each of the previous three quarters. The dividend on common stock was restored in November, 1987, at 10 cents per share after not having been paid since the third quarter of 1984. It was increased to 20 cents per share in the second quarter of 1988.

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

STAMFORD, CT (APRIL 25) BUSINESS WIRE - General Housewares Corp. (NYSE:GHW) Wednesday reported results for the first quarter of 1989.

Net sales from continuing operations for the quarter ended March 31, 1990 were $15,807,000 compared to restated net sales for the comparable period in 1989 of $17,779,000 or a decline of 11 percent. Income from continuing operations of $512,000 or 17 cents per share was 42 percent higher than restated income for the year-earlier period of $358,000 or 12 cents per share.

Giving effect to losses associated with the operation of discontinued businesses and various costs relating directly or indirectly to their disposition, which resulted in after-tax charges aggregating $1.4 million or 47 cents per share, the company incurred a net loss for the first quarter of 1990 of $888,000 or 30 cents per share as compared to net income of $140,000 or 5 cents per share for the first quarter of 1989 (after a loss from discontinued operations of $218,000 or 7 cents per share).

TOLEDO, OH (APRIL 25) BUSINESS WIRE - Owens-Corning Fiberglas Corp. (NYSE:OCF) Wednesday announced that it is participating in the formation of a new manufacturing joint venture in the Republic of South Korea for the production of glass fiber reinforcements and yarn products.

The new venture, to be called Lucky Fiber Glass Corporation, will be owned 60% by Lucky Limited, a subsidiary of the Lucky-Goldstar Group of Korea, 30% by Owens-Corning, and 10% by Asahi Glass Company of Japan.

The venture will manufacture products for reinforced plastics sold into the Korean automotive, appliance, electronics and construction markets.

''The South Korean market for reinforced plastics is one of the fastest growing in Asia and has substantial prospects for continued long-term development,'' said Dennis Menton, Owens- Corning Vice President, International Marketing. ''The new joint venture will be well-positioned to take advantage of and further stimulate that growth.''

#90115b0694 04/25/1990 ~Business Wire

DAYTON, OH (APRIL 25) BUSINESS WIRE - NCR Corp. Wednesday became the first major personal computer vendor to introduce an Integrated Digital Network (ISDN)-compatible workstation that can simultaneously handle voice and data.

As part of this announcement, NCR released an ISDN voice/data manager application software package that provides voice mail features with simultaneous data transfer of files and screens.

NCR also introduced an adapter card that allows users to upgrade existing NCR or other AT-compatible personal computers to ISDN workstations. Each NCR product announced today can be purchased separately.

The NCR ISDN Workstation -- based on the 16 MHz Intel 386SX microprocessor -- features Microsoft's OS/2 1.1 operating environment and Presentation Manager graphical interface.

Both the power of the 386 processor and the multitasking/multi-threading capabilities of OS/2 are required to support the sophisticated features of ISDN. The graphical user interface of OS/2 provides an easy to use way of interacting with ISDN.

In essence, ISDN workstation technology provides enhanced communications and productivity. For example, two users can now simultaneously work on a document while concurrently talking on the same phone line.

NCR's new ISDN Workstation includes an NCR ISDN Personal Computer Terminal Adapter (PCTA) card, which works with the ISDN Basic Rate Interface. The Basic Rate Interface supports two 64-kilobit/second B signalling channels for voice/data transmission and one 16-kilobit/second D signaling channel.

The NCR ISDN Workstation is currently compatible with ISDN services supported by AT&T's 5ESS central office telephone switch. By fourth quarter 1990, it will be compatible with services supported by Northern Telecom's DMS-100 central office switch, and others.

The NCR ISDN Workstation features Microsoft's OS/2-based Presentation Manager interface. OS/2's multitasking capabilities take full advantage of ISDN's multiple communications channels, allowing the user to run different applications over one ISDN telephone line.

With headquarters in Dayton, NCR Corp. develops manufactures, markets and supports business information systems for worldwide markets.

LOS ANGELES (APRIL 25) BUSINESS WIRE - Harlyn Products Inc. (AMEX:HRN) Tuesday announced that net income rose 52 percent on a sales gain of 18 percent for the nine months ended March 31, 1990 (table follows). In making the announcement, Harlyn also reported that the third quarter ended March 31, 1990 was the first profitable third quarter in the company's history.

Commenting on these results, Harold Weisbrod, chairman, stated, ''We are gratified to have achieved a profitable third quarter, which is traditionally a loss quarter for the company. We are also most pleased by the sharp increases in both sales and earnings for the full nine months. These results were achieved by further penetration of our existing markets improved manufacturing efficiencies, as well as the expansion which resulted from the acquisition of George Hoffman Jewelry Manufacturing Inc.''

#90115b0712 04/25/1990 ~Business Wire

SOUTH NORWALK, CT (APRIL 25) BUSINESS WIRE - The Union Corp. (NYSE:UCO) announced Wednesday its revenues and earnings for the third quarter and nine months ended March 31.

Operating revenues for the third quarter were $18,591,000 compared to $15,180,000 reported for the third quarter of fiscal 1989, an increase of 22 percent.

Income from continuing operations after income taxes and before extraordinary item was $2,221,000, or 29 cents per share, vs. $975,000, or 13 cents per share last year. Net income (after extraordinary item and discontined operations) was $2,221,000, or 29 cents per share compared with $2,148,000 or 29 cents per share in the prior year.

Net income for the third quarter ended March 31, 1989 included income from discontinued operations of $384,000 (net of tax), or 5 cents per share, related to the results of operations of the Gichner Systems Group.

Net income for the third quarter ended March 31, 1989 also included an extraordinary tax credit of $789,000, or 11 cents per share, which resulted from the application of tax loss carryforwards. The company had no tax loss carryforwards remaining at June 30, 1989.

For the nine months ended March 31, operating revenues were $51,179,000 compared to $42,408,000 for the same period in fiscal 1989.

Income from continuing operations after income taxes and before extraordinary item was $5,883,000, or 78 cents per share, compared to $1,933,000, or 26 cents per share last year. Net income (after extraordinary item and discontinued operations) for the nine months was $5,883,000, or 78 cents per share, compared to $5,425,000, or 75 cents per share in fiscal 1989.

Net income for the nine months ended March 31, 1989 included income from discontinued operations of $1,417,000 (net of tax), or 20 cents per share, related to the results of operations of the Gichner Systems Group. Net income for the nine months ended March 31, 1989 also included an extraordinary tax credit of $2,075,000, or 29 cents per share, which resulted from the application of tax loss carryforwards.

Interest income increased $135,000 and $978,000 for the third quarter and nine months ended March 31, respectively, compared to the prior year periods. These increases were due to higher average short-term investment balances which primarily resulted from the cash received from the sale of the Gichner Systems Group in fiscal 1989.

Interest expense decreased $710,000 and $1,734,000 during the third quarter and nine months ended March 31, respectively, compared to the prior year periods primarily as a result of Union's redemption of the remaining $28,960,000 of its 14-1/2 percent subordinated debentures, with available cash, on Aug. 25, 1989.

The company provides accounts receivable management and debt collection services on a fixed rate and contingency fee basis to a wide range of institutional, commercial and government customers through its Transworld Systems Inc., and Capital Credit Corp. subsidiairies.

PHILADELPHIA (APRIL 25) BUSINESS WIRE - EDS (NYSE:GME) and Westmoreland Coal Co. (NASDAQ:WMOR) Wednesday announced the signing of a 10-year contract under which EDS will provide information technology (IT) services to Westmoreland, the low-sulfur coal producer and marketer headquartered in Philadelphia.

Beginning May 1, EDS will assume responsibility for all of Westmoreland's data processing and communications operations. Westmoreland's 37 information technology professionals will become EDS employees.

Larry Zalkin, senior vice president and chief financial officer of Westmoreland, said, ''We consider this decision supportive of our strategic objectives by reducing our costs, enhancing our informational and technological capabilities, enabling us to provide superior customer service and gaining operational efficiencies.''

The contract demonstrates EDS' growing presence in energy-related industries, where it is the largest provider of IT services.

''One of EDS' key strengths is its ability to act as a strategic business partner in delivering IT services that truly enhance its customers'

long-term competitive position,'' said Ken Scott, president of EDS' Energy Division, which is responsible for the contract. ''Also important is the addition of industry-specific expertise that comes with the Westmoreland professionals joining our EDS team.''

Westmoreland's coal sales in 1989 were $549.8 million from 19.6 million tons sold, ranking it 15th among the nation's coal producers based on tonnage sold, and 6th among United States coal exporters. Westmoreland markets 66 percent of its coal to electric utilities and 34 percent to steel manufacturers.

The company's own mining facilities are located in West Virginia, Virginia Kentucky and Montana from which it produced 10.8 million tons. The remaining 8.8 million tons sold are sourced from other coal producers.

EDS has operations in 27 countries and is the leader in providing information technology services to customers around the world. The company employs about 2,200 people in the Philadelphia area. EDS reported revenues of $5.5 billion in 1989.

#90115b0726 04/25/1990 ~Business Wire

BOSTON (APRIL 25) BUSINESS WIRE - Tech/Ops Sevcon Inc. (AMEX:TOC) reported that net income per share for its second fiscal quarter ended March 31, 1990, was 24 cents compared to 19 cents per share for the same quarter of the previous year, a gain of 26 percent.

Revenues were $4,172,000 compared to $3,758,000 in the prior year's period a gain of 11 percent. Operating income was $623,000 in 1990, a gain of 27 percent over the 1989 quarter, principally due to increased sales.

In the 1989 quarter, there was a currency translation gain of $103,000 compared to $2,000 this year; therefore pretax income was $641,000 in 1990 compared to $628,000 in last year's quarter. Net income was $403,000 compared to $392,000, an increase of 3 percent. Average shares outstanding were 17 percent lower than last year due to the company's share repurchases in the first quarter of the present fiscal year, and therefore earnings per share were 26 percent higher, year-to-year.

For the six months year-to-date, the company reported earnings per share of 44 cents, a 24 percent gain over the 35 cents earned in the first half of last year. Sales of $7,816,000 were 2 percent ahead of 1989, but operating income was 12 percent ahead of the prior year.

Net income of $780,000 was 9 percent ahead of the $716,000 for 1989. Average shares outstanding for the first six months were 12 percent lower than the previous year due to stock repurchases in this year's first quarter, and therefore earnings per share were 24 percent higher.

Tech/Ops Sevcon Inc. designs, manufactures and distributes solid-state controls for battery-driven electric vehicles such as fork lift trucks and underground mining vehicles. The company has facilities in Burlington, Mass., the United Kingdom and France.

HAMPTON, NH (APRIL 25) BUSINESS WIRE - The Timberland Co. (AMEX:TBL) Wednesday reported net income for the first quarter ended March 31, 1990, of $761,000, or 7 cents per share, as compared with net income of $323,000 or 3 cents per share, for the same period in 1989.

Net sales for the first quarter of 1990 rose 26 percent to $37,849,000 compared with $30,144,000 for the 1989 first quarter.

Sidney W. Swartz, chairman, chief executive officer, and president, indicated that he was pleased with the overall level of revenues for the quarter, which was strengthened by the company's introduction of a new product category of lightweight hiking boots and an expanded line of spring/summer apparel.

As the company's management forecasted last year, production levels and manufacturing efficiencies continue to improve, contributing to a higher gross margin percentage than the prior quarter and the first quarter a

year ago, Swartz explained.

The Timberland Co. designs and manufactures premium-quality footwear, accessories and apparel for men and women, sold nationally and in 16 countries worldwide through specialty stores, better-grade department stores and shoe stores. The company has been a leader in technical innovation, developing the first guaranteed waterproof leather boots, mastering the traditional art of hand-sewn shoes, and introducing GORE-TEX laminate technology to the footwear industry. The company's world headquarters are in Hampton, N.H.

#90115b0771 04/25/1990 ~Business Wire

ATLANTA (APRIL 25) BUSINESS WIRE - Equifax Inc. (NYSE:EFX) today is a new company with an expanded mission, C. B. Rogers Jr., president and chief executive officer, told shareholders at the company's annual meeting Wednesday.

''There is a new Equifax every morning,'' Rogers said. ''Each day our business opportunities, our customer needs and world events shape our future.''

Discussing the company's 1989 performance, he said the year ''can be characterized as a year of balanced performance (in which) we set the stage for the decade ahead.''

In 1989, he said, Equifax:

- Acquired seven compatible companies and sold two that no longer fit the company's long-range plans; - Completed an alliance with Computer Sciences Corp. that made Equifax the number one North American supplier of consumer credit information; - Reached an agreement with Dun & Bradstreet to supply credit information on individuals as part of Dun & Bradstreet's reports on partnerships and sole proprietorships; - Realigned Equifax Canada into a fully integrated information company; - Began discussions with Next PLC, a British retailer, which led to Equifax's first joint venture in Great Britain. - Formed a Technology Sector and completed a 210,000 square foot, state-of-the-art technology center.

The technology center, Rogers said, symbolizes the future of Equifax. ''We feel Equifax is investing more in technology than any company its size in the United States, because...we believe technology puts us on the path to leadership in the information industry.''

Reviewing operating results for 1989, Rogers told shareholders that it was a good year for the company financially. He pointed out that revenue increased 13 percent and that operating income, before extraordinary items increased 31 percent.

He also reminded shareholders that Equifax increased its cash dividend for the tenth time in 10 years and declared a two-for-one stock split, its fourth split in eight years.

Equifax Inc. is a leading supplier of consumer information services and systems for business, industry and government throughout the United States and Canada.

#90115b0772 04/25/1990 ~Business Wire

CHICAGO (APRIL 25) BUSINESS WIRE - The board of directors of Wells-Gardner Electronics Corp. announced that Frank J. Myers has been elected as its chairman and chief executive officer at its regular meeting following the Annual Meeting.

Myers will fill the vacancy created by yesterday's official, and expected, retirement of Albert S. Wells Jr. Wells retired after 49 years with the company.

Myers, 60, also serves as the company's president and chief operating officer. He joined the company in June of 1989. Previously, Myers served as president of Arvin Electronics, a division of Arvin Industries Inc.

In other action, the board expanded its membership to nine from eight directors. Anthony Spier, 46, was elected by shareholders to fill that newly created post. Spier is president of Bruning Corp. and a vice president of its parent, A.M. International.

Other directors being re-elected to one year terms by shareholders included: Albert S. Wells Jr., Frank J. Myers, Allen Gardner, Frank S. Righeimer Jr., Theordore S. Corwin, James J. Roberts Jr., Richard L. Conquest and John Blouin.

Before shareholders at the annual meeting earlier in the day, Myers said that management anticipates that sales and earnings for the second quarter to end June 30, should exceed the sales for the 1989 second quarter which were $9,009,000. Earnings from continuing operations were $108,000, or 3 cents a share. The loss from discontinued operations equalled $107,000, or 3 cents a share. On a net basis, earnings in last year's second

quarter were $1,000, or nil cents a share.

Myers also reported that ''the order backlog as of today stands at about $25 million. At this time last year, backlog was around $12-13 million. We believe this significant increase in orders stems from our corporate focus on the opportunities and profitability available in video monitors.''

Wells-Gardner Electronics Corp. designs and manufactures electronic products which are marketed both domestically and internationally. Its major products are color video monitors and data display monitors. In addition, the company assembles televisions under contract for Majestic Industries.

BASKING RIDGE, NJ (APRIL 25) BUSINESS WIRE - Hooper Holmes Inc. (AMEX:HH), the healthcare and health information services company headquartered in Basking Ridge, announced record operating results for the first quarter of 1990.

Company revenue of $23 million was up 22 percent while net income of $591,000 reflected an increase of some 25 percent.

Jim McNamee, president and chief executive officer, reflecting on the company's performance, credited revenue growth in its two major segments as the basis for one improvement stating, ''Our Portamedic Healthcare revenues, aided by a stronger presence in the home healthcare market, grew by some 28 percent while our Portamedic Health Information services to the life and health insurance industry posted revenue growth of nearly 20 percent.''

McNamee continued by saying, ''We are strategically positioned in two rapidly expanding markets and with the addition of Ivene Labs, as announced earlier this month, we would expect to become a known entity in the infusion therapy market in the years to come. McNamee credits the acquisition of Ivene with correctly positioning the company to take full advantage of its nationwide network of healthcare offices in adding the infusion therapy component, with its much higher operating margins, to its Portamedic in-home skilled nursing capabilities.

''We feel it is a very natural and effective fit,'' McNamee added, ''Plus we are currently studying additional ways to further enhance shareholder value.''

McNamee concluded his remarks saying, ''We're well into the second quarter of 1990 and I'm optimistic that such positive operating results will continue throughout both the second quarter, and 1990 overall.''

#90115b0788 04/25/1990 ~Business Wire

CLEVELAND (APRIL 25) BUSINESS WIRE - Eaton Corp. Chairman James R. Stover told shareholders Wednesday that he expects company sales to grow substantially over the next few years.

Speaking before 209 attendees at the company's annual meeting, held in Cleveland, Stover said the growth would be propelled by new Eaton products and stronger-than-average market demand.

''We're confident that as a whole, the decade of the 1990s will be very positive for our markets. It will be the decade of industrial rebuilding and the decade of the capital goods producer. And that's what Eaton is,'' he said.

He said that new products now entering the marketplace will generate as much as $750 million in sales by 1994, with profitability at ''historic Eaton rates.''

Stover cited two predominant Eaton characteristics as causes for his optimism: The company's strong positions in the markets it serves, and the work ethic of its employees at all levels.

''Three-quarters of Eaton's sales come from products that are number one or number two in the markets they serve, and market leadership has translated itself into superior returns,'' he said.

The company has used its earnings in part to invest in a five-year, $1 billion capital spending program, the largest in the company's history. In addition, Eaton spends between $4 million and $5 million a week for the research and development of new products.

These investments, Stover said, will support new and existing product lines. ''Some of it will go to expand capacity. All of it will improve our ability to be the low-cost producer. This investment will also propel us further up the mountain in the continuous pursuit of quality,'' he said.

Regarding what he called the inherent strengths of the people of Eaton, Stover cited four areas: ''We concentrate on fundamentals. We know and understand that the roots of an industrial company reach deep into the manufacturing shop floor. We value loyalty, consistency and integrity. We are inherently competitivewe always want to winbut never at the expense of our traditional values and obligations.''

Stover concluded his remarks by saying that, of necessity, Eaton takes the longer view of its markets. ''A short-term orientation has done more to damage American competitiveness in the last 20 years than any other single factor, and I hope we're out of that phase. Achieving growth and profitability requires a long-term orientation to the marketplace. That is the key to enduring shareholder value and reward for decades to come,'' Stover said.

With 43,000 employees in 20 countries, Eaton Corp. is a manufacturer of highly engineered products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles engine components, electrical equipment and controls.

The company's sales in 1989 were $3.7 billion, with net income of $225 million, or $6.00 per share of common stock. For the three months ending March 31, 1990, Eaton had sales of $942 million, and net income of $53.7 million, or $1.48 per share.

WASHINGTON (APRIL 25) BUSINESS WIRE - Washington (D.C.) Gas Light Co. Wednesday announced earnings per average share of common stock of $2.47 for the 12 months ended March 31, 1990, representing an increase of 12 cents per share from the prior year.

This 5 percent increase in earnings per share resulted in spite of an 8

percent increase in the number of common shares outstanding. Net income applicable to common stock was $47.7 million for the 12 months ended March 31, 1990, a 14 percent increase over the level for the similar period of the prior year.

For the three months ended March 31, 1990, earnings per average common share were $1.59, representing a decline of 49 cents from the prior year. Record warm temperatures that had an adverse effect on sales levels during the quarter were largely responsible for the decline.

#90115b0805 04/25/1990 ~Business Wire
NEW YORK (APRIL 25) BUSINESS WIRE) - Allegheny Power System Inc., Wednesday reported consolidated net income for the 1990 first quarter and the 12 months ended March 1990 of $63.6 million, $1.20 per share, and $196 million, $3.73 per share, respectively, compared with $62.5 million, $1.20 per share, and $200.7 million, $3.87 per share, for the corresponding 1989 periods.

Net income for both the three and 12 months ended March 31, 1990, reflects the continued growth in kilowatthour sales and the elimination in early January of the previously reported temporary $20 million reduction in annual revenues in Pennsylvania.

The resulting higher revenues were partly offset in the first quarter, and more than offset in the 12 months, by increases in maintenance and other expenses.

West Penn Power on March 15, 1990, filed for rate increases designed to produce $56.9 million in additional annual revenues. The Pennsylvania Public Utility Commission is expected to hold hearings and issue an order on the rate increases by Dec. 15, 1990.

LOS ANGELES (APRIL 24) BUSINESS WIRE - Windsor Hotel Group has assumed operation of the Lake Arrowhead Hilton Resort.

The announcement was made by William J. McMorrow of HSM Group, the managing partner of the Arrowhead Joint Venture, owner of the Lake Arrowhead Hilton Resort and adjacent Lake Arrowhead Shopping Village.

Windsor Hotel Group is an independent hotel management firm whose principals include Carlos C. Lopes and Eric Prevette.

The Lake Arrowhead Hilton Resort was recently acquired by the Arrowhead Joint Venture, comprised of the HSM Group, a fully integrated real estate firm based in Santa Monica. The total acquisition included the hotel and adjacent Lake Arrowhead Village which houses a 223,000 square foot Alpine-style shopping mall and executive suite center and ranks among

Southern California's premier retreat destinations.

The Lake Arrowhead Hilton Resort boasts 261 lakefront rooms, suites and villas, as well as eighteen conference rooms with a combined square footage of 18,000. The resort also harbors a full-service health club and spa and four restaurants.

Windsor Hotel Group, operator of the four-star, four-diamond Biltmore Hotel in downtown Los Angeles, also operates the U.S. Grant Hotel in San Diego, and is engaged as the pre-opening consultants for the historic Mission Inn, located in Riverside.

BETHESDA, MD (APRIL 25) BUSINESS WIRE - IBM Wednesday announced a new organization to provide a single focus for IBM's service to customers in the United States government.

The organization, called the Federal Sector Division (FSD), combines the former Systems Integration Division's Federal Systems unit and the National Federal Marketing (NFM) organization.

Federal Systems provides custom information-handling systems for defense and aerospace, as well as integrated systems applications for all federal customers. National Federal Marketing provides IBM's commercial product offerings to the federal government.

"This realignment will allow a single focus on the federal customer's needs while preserving the strengths of the two organizations," said Gerald W. Ebker, IBM vice president and president, Federal Sector Division. "Synergies gained through realignment will allow IBM to work more effectively on behalf of our federal customers."

The realignment is a continuation of IBM's worldwide efforts to become a more market-driven company responsive to customer requirements. Each FSD organization brings a unique perspective to the federal customer's systems integration requirements. The two groups will work together to meet customer requirements as well as maintain partnerships with other companies to ensure the best solution for the federal customer.

National Federal Marketing brings to the new organization a strong knowledge of its federal customer needs, commercial marketing skills and an understanding of IBM product offerings.

Federal Systems contributes marketing, requirements definition skills, research and development expertise, technical capabilities, specialized manufacturing skills and large project management experience.

The organization will continue to apply its specialized skills to Department of Defense, aerospace and National Aeronautics and Space Administration programs.

National Federal Marketing and Federal Systems will maintain their headquarters in Bethesda. The FSD directs the activities of 14,000 IBM employees serving the federal government.

In addition to NFM and FS groups in Bethesda, FSD has major development or manufacturing locations at Boulder, Colo., Gaithersburg, Md., Houston, Texas, Owego, N.Y. and Manassas, Va.

HOUSTON (APRIL 25) BUSINESS WIRE - Panhandle Eastern Corp. announced Wednesday that Philip J. Burguieres, 46, has been elected chairman by the company's board of directors. Burguieres is replacing Robert D. Hunsucker who has retired from the board and the position of chairman, effective Wednesday.

Burguieres became president and chief executive officer Jan. 1, and has been a member of the Panhandle Eastern board since 1984. Before joining the company, Burguieres was chief executive officer of Cameron Iron Works Inc. a Houston-based holding company engaged through its subsidiaries in the design, manufacture, and marketing of a broad range of oil tools, ball valves, and forged products. In 1989, Cameron was sold to Cooper Industries.

The stockholders of Panhandle Eastern elected three directors at the 61st annual meeting conducted here today. Elected to new three-year terms on the board of directors were incumbent members: Harold S. Hook, chairman and chief executive Officer of American General Corp., Houston; Leo E. Linbeck Jr., chairman and chief executive officer of Linbeck Construction Corp., Houston; and R.L. O'Shields, former chairman and chief executive officer of Panhandle Eastern.

Stockholders also approved a proposal to amend the certificate of incorporation to increase the authorized common stock from 200 million shares to 300 million shares and the authorized preferred stock from two million shares to three million shares.

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

CANTON, MA (APRIL 25) BUSINESS WIRE - The directors of Bay State Gas Co. (NYSE:BGC), at a regularly scheduled meeting Wednesday, voted to increase the quarterly common stock dividend by approximately 7 percent.

The new quarterly dividend of 32 cents per share is payable June 1, 1990 to shareholders of record on May 18, 1990 and increases the annualized dividend rate from $1.20 to $1.28 per share.

Including the current increase, Bay State's common dividend has grown at an average annual rate of 8.5 percent over the last five years.

''Bay State's consolidated operations continue to turn in strong earnings performance, which provides a secure base for this dividend increase,'' said Roger A. Young, president. ''The board of directors continues to believe that a conservative, earnings-based dividend policy is in the shareholders' long-term best interest,'' he added.

Bay State Gas Co. provides natural gas service to more than 270,000 customers in Massachusetts and, through its Northern Utilities Inc. subsidiary, in New Hampshire and Maine. The company is also active in natural gas transmission as well as retail sales of propane and home improvement products.

HOUSTON (APRIL 25) BUSINESS WIRE - Southdown Inc. (NYSE:SDW) announced net earnings of $6.3 million, or 28 cents per share on a fully diluted basis for the three month period ended March 31, 1990.

This compares with net earnings of $7.0 million, or 33 cents per share, in the first quarter of 1989. Net earnings in the first quarter of 1989 included $3.3 million, or 16 cents per share, from the company's oil and gas operations which were sold in late 1989 and have been classified as a discontinued operation.

Operating earnings from the cement segment increased 4.2 percent to $17.3 million in the first quarter of 1990 from $16.6 million a year ago primarily because of lower manufacturing costs. Operating earnings from

the company's concrete products segment declined in the first quarter of 1990 to $4.6 million from $6.7 million a year ago.

The decline was primarily a result of lower sales volumes in both Florida and Southern California. Corporate and other expenses were $5.3 million in the first three months of 1990 compared with $3.7 million in the first three months of 1989.

Interest expense declined significantly in the first quarter of 1990 compared with a year ago. In the first quarter of 1990, interest expense totalled $7.5 million, compared with $14.1 million in the 1989 first quarter. The decline reflected substantially less debt outstanding than a year ago as a result of the sale of the company's oil and gas operations.

Southdown Inc. is one of the leading U.S. cement and ready-mixed concrete companies. The company manufactures cement in eight plant locations around the country and markets ready-mixed concrete in Florida and Southern California.

#90115b0844 04/25/1990 ~Business Wire

HOPKINTON, MA (APRIL 25) BUSINESS WIRE - EMC Corp.'s board of directors voted Wednesday to maintain their present election process by which every member of the EMC board must stand for reelection every year rather than reelect one third of the board each year as allowed under the Commonwealth's new ''Staggered Board'' legislation.

This new law, designed to block a hostile takeover of Worcester based Norton Co., mandates publicly held corporations to limit to only one third the number of directors which have to stand for election each year.

According to EMC Chairman and Chief Executive Officer, Richard J. Egan, ''In my opinion it appears that the state legislature is simply offering the same prerogatives to private industry that are presently enjoyed by the Commonwealth's incumbent politicians.'' Egan views a board of directors with the staggered terms of office as counterproductive to efficient management practices and unresponsive to shareholders in general.

''If the directors of a publicly held corporation don't oversee its operation in an efficient manner they should all be answerable to the stockholders of that corporation on an annual basis. Egan also does not feel that it is the responsibility of a state legislature to offer management in the private sector a shield to hide behind when it fails to live up to shareholders' expectations.

Egan went on to point out that he has great sympathy for the predicament that Norton Co. (the subject of a hostile takeover attempt by British conglomerate, BTR) is in, however, he feels that the newly enacted legislation is a totally inadequate means of addressing the problem.

According to Egan, ''Any legislation that is designed to save Norton Co. or any other company from the threat of hostile takeover must be designed to address the issue of hostile takeovers. H5556 was thought up one day and passed the next with absolutely no consideration to the long term consequences that the specifics of the bill will create and is contrary to the interests of shareholders.

This legislation provides leaders of private industry with the option of not having to be accountable for their actions. All of the things that we presently find fault with in the bureaucratic structure will now be able to find their way into business and industry as well.''

EMC Corp. is a publicly held corporation listed on the New York Stock Exchange, (EMC) that manufactures high performance storage products for IBM, DEC, Hewlett-Packard and Wang computer systems.

#90115b0873 04/25/1990 ~Business Wire

NEW YORK (APRIL 25) BUSINESS WIRE - ASARCO Incorporated (NYSE:AR) Wednesday announced that stockholders at its 1990 annual meeting approved the election of six directors, the selection of Coopers & Lybrand as independent auditors and a proposal adopting a new Stock Incentive Plan to replace a prior plan.

Directors elected to three-year terms were Richard de J. Osborne, chairman president and chief executive officer of Asarco; Willard C. Butcher, chairman of the board and chief executive officer of Chase Manhattan Bank, N.A.; Harry Holiday, Jr., former chairman of the board and chief executive officer of Armco Inc.; and Peter R. Rowland, consultant, Feez Ruthning.

Elected to a one-year term were E. Gordon Gee, president of the University of Colorado; and James Wood, chairman of the board, president and chief executive officer of The Great Atlantic & Pacific Tea Company, Inc. Also at the meeting, Richard de J. Osborne, reviewed the company's recent financial performance and reiterated that demand for the metals the company produces, including among others copper, lead and zinc remains good.

In 1989, Asarco had net earnings of $231 million, or $5.50 per common share, compared with $207 million, or $4.92 per share, in 1988. In the 1990 first quarter, Asarco had net earnings of $35.8 million, or $.86 per common share, compared with $68.6 million, or $1.63 per share in the prior-year quarter. The lower quarterly results primarily reflect lower prices for copper, zinc and silver.

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

#90115c0045 04/25/1990 ~Comtex

WASHINGTON (APRIL 25) COMTEX - Securities and Exchange Commission Chairman Richard C. Breeden said today that former Drexel Burnham Lambert junk bond guru Michael Milken is required to cooperate fully and openly with SEC and Justice Department officials as part of his plea bargain agreement.

Yesterday, Milken pleaded guilty to six felony counts and agreed to pay a record $600 million in penalties, $200 million directly to the government and $400 million into a fund to compensate investors who suffered losses as a result of Milken's illegal manipulation of the financial markets in the mid-1980s.

As part of his plea agreement, 92 other charges against Milken were dropped but he faces a maximum prison term of 28 years.

Testifying at a congressional hearing on the penny stock market, Breeden clarified any misconceptions regarding Milken's plea bargain as pertains to aiding ongoing investigations of other Wall Street wrongdoings.

"The documents that govern the settlement are unequivocal," Breeden said. "Milken is required and has agreed in writing to cooperate with government investigations. He must make himself available for questions. Any violation to cooperate in ongoing civil and criminal government investigations will put him in contempt."

Noting that Milken made $550 million in 1987 alone, Rep. Edward J. Markey (D-Mass.) questioned whether the $600 million penalty was steep enough.

"I don't want to hazard a guess on Milken's assets but I don't think he

will be left in the poor house following the settlement," Breeden said.

"We think its a good agreement," Breeden added, citing the six felonies, the requirement to cooperate, and $600 million in fines. "We got 100 percent of everything we sought on the civil side. Milken is barred permanently from the securities business."

#90115c0098 04/25/1990 ~Comtex

WASHINGTON (APRIL 25) COMTEX - Securities and Exchange Commission Chairman Richard C. Breeden said today he supports the objectives of legislation designed to curtail fraud in the penny stock market but disagrees with its specifics.

The Penny Stock Reform Act of 1990 was introduced earlier this month by leaders of the House subcommittee on telecommunications and finance, the congressional panel which oversees the SEC.

Rep. Edward J. Markey (D-Mass.), the panel chairman, noted that the North American Securities Administrators Association (NASAA), which has endorsed the bill, found that investors lose $2 billion or more each year due to fraud and abuse in the penny stock market.

"The legislation we are considering today strikes directly at the most egregious problems in the penny stock market," Markey said. "It would expand the SEC's authority to bar crooked promotors and consultants from the securities business; mandate that all penny stocks trade through an automated quotation system; greatly expand disclosure to penny stock customers; impose a range of new regulatory responsibilities on the self-regulatory organizations overseeing this market; and ban blank checks and penny stock blind pool offerings, a frequent and easy vehicle for fraud."

Penny stocks, which can sell from a few cents to $5 per share, are bought by investors who hope to take advantage of the low prices to make windfall profits. But promotors have often sold millions of penny shares in new companies that have no assets, no employees and no business plan.

"We strongly support the goals of the bill but there are two problems," Breeden said. "First expansion of persons associated with broker-dealers is overbroad and if blank checks are outlawed, the issuer could identify an industry and turn it into a blind pool."

Breeden was referring to the part of the legislation which would ban "associated persons of broker-dealers" who violate securities laws. For example, an issuer's ordinary officers and employees may be classified as associated persons if they engage in routine contact with a broker-dealer

in the course of issuing securities.

A blank check offering expresses no specific business plan or purpose. A blind pool is where an issuer seeks mergers or acquisitions in an identified business line but the specific assets sought to be acquired are not identified. The bill would ban all blank check offerings and blind pool offerings of penny stocks.

However, Breeden cautioned that blind pool financings have been used for years by issuers in venture capital, oil and gas exploration programs, and real estate as an important source of producing capital.

"Rather than prohibit blank check offerings, the commission believes that the appropriate approach to the problem is a strong antifraud enforcement program which targets blank check issuers to ensure that the public is not being defrauded," he said.

The bill also requires that all penny stocks be quoted on an automated quotation system. The National Association of Securities Dealers currently has a proposal underway for establishing an electronic bulletin board for non-NASDAQ companies in which market makers can publish quotations on a voluntary basis. The NASD also recently implemented a rule requiring broker-dealers to report price and volume on a daily basis if their aggregate purchases or sales exceed either 50,000 shares or $10,000.

"The commission believes that it would be beneficial to review the effect of these initiatives before mandating that all penny stocks be quoted on an automated system," Breeden said.

Breeden said the SEC's recent adoption of the "cold calling" rule, which protects investors from high pressure telephone tactics of unscrupulous broker-dealers, has been useful in the fight against penny stock fraud but concedes the "battle is by no means won."

Breeden believes the best weapon to combat the penny stock scourge is the passage of a revised Securities Law Enforcement Remedies Act. The revised bill would authorize the SEC to impose fines on individuals and firms for securities laws violations and give the commission authority to issue both temporary and permanent cease and desist orders for violations of the federal securities laws.

"Virtually all other federal agencies are authorized to issue cease and desist orders," Breeden complained. "Cease and desist authority would assist the commission in combatting penny stock fraud because it permits swift remedial action in response to illegal conduct."

A cease and desist order is an administrative remedy that directs a person to refrain from engaging in further violative conduct.

Breeden argued civil fining authority is necessary to increase the deterrent effect of the SEC's enforcement actions. He noted that absent a criminal prosecution or a private suit for damages, if a fraudulent penny stock promotor is caught, he is merely required to give back his gains.

"A civil money penalty would provide both the courts and the commission with greater flexibility to tailor a remedy to fit the seriousness of the violation," Breeden said.

TOKYO (APRIL 25) - Eurotunnel PLC will request Japanese banks to extend an additional 500 million pounds (817.5 million dollars) in loans to construct a tunnel under the Channel between Britain and France, Jiji Press reported on Wednesday.

Eurotunnel Deputy Chairman Alistair Morton, speaking to Japanese newsmen in London Tuesday, was quoted by Jiji as saying that Eurotunnel will soon contact Japanese banks, including the Bank of Tokyo and Sanwa Bank, which have managed a Japanese syndicated loan for the project.

Mr. Morton said he would visit Tokyo from June 10 to make a formal request for the additional Japanese financing.

Eurotunnel announced on Monday additional funds of over two billion pounds (3.27 billion dollars) will be required for the project. It said it wants Japanese banks to put up 20 to 25 percent of the additional funds.

A group of 39 Japanese banks has already extended a total of 1.164 billion pounds (1.903 billion dollars) for the project.

SEOUL (APRIL 25) - South Korea's strike wave gained force Wednesday as workers at Kia Motors Co., one of three major auto makers here, took a holiday en masse on the eve of a threatened strike, company officials and workers said.

Some 1,700 of the 4,000 day-shift workers at Kia's Soari plant in southern suburbs of Seoul did not report to work and the remaining 2,300 stayed away from assembly lines, strolling and chatting at the plant, they said.

"Production completely stopped at the Soari plant," a Kia spokesman said, adding that many of the plant's workers had taken the day off.

The Soari plant, one of Kia's two plants, produces 1,200 vehicles daily, including compact cars, vans and trucks.

A labor union spokesman said union representatives had decided to launch a strike from Thursday unless demands were not met by Wednesday evening.

The workers want management to rescind a decision not to pay for a day lost last week when the union held a general meeting to vote on labor-management negotiations.

"We've already decided to go on a strike tomorrow," the union spokesman said.

Workers at Hyundai Heavy Industries at the southeastern city of Ulsan also went on strike Wednesday to demand that six union leaders be let out of jail,

joining union members at the Korean Broadcasting System, who have been on strike for the past 13 days.

#90115d1840 04/25/1990 ~French/German News Agency

TAIPEI (APRIL 25) - The Bureau of Investigation (BOI) has cracked down on 10 illegal futures companies and five more underground investment houses in a crackdown on illicit economic activities, BOI officials said Wednesday.

Executives of the 10 futures firms were referred to the Prosecutors' Office Tuesday in BOI's first clampdown on the illegal operations, the officials said.

"Responsible persons" for the five investment houses were also turned over for prosecution, they said.

A total of 216 companies were engaging in overseas futures transactions and only a few had been granted special permission from the authorities to handle the trading, which has not been legalized, the officials said.

The BOI started raiding the unlicensed investment firms after Parliament passed a revised banking law in July which imposed prison terms of up to seven years and maximum fines of one million Taiwan dollars (37,879 U.S. dollars) for illegal deposit-taking.

The investment companies had offered interest rates of up to 40 percent a month to attract billions of dollars from small investors.

The officials said many of the now-defunct 200 investment houses had turned to futures transactions and many had also absorbed funds from investors

allegedly to build golf courses or amusement centers, join mutual funds and establish new banks.

#90115d2300 04/25/1990 ~French/German News Agency
TOKYO (APRIL 25) - Japan asked its business leaders Wednesday to buy more from abroad by taking advantage of a new package of measures designed to slash the nation's huge trade surplus, officials said.

But, at a regular import-promoting session, International Trade and Industry Minister Kabun Muto was told that the government could itself do more by helping to halt the yen's downslide and asking foreign firms to increase sales efforts in Japan.

Mr. Muto asked top leaders of 163 major Japanese firms who attended the meeting to boost their imports and help the growth rate of Japan's overall imports above the fiscal 1989 level of 10.3 percent, the officials said.

Japan's trade surplus was reduced by 25 billion dollars in fiscal 1989, Mr. Muto was quotes as saying. "But it still remained at a high level of about 70 billion dollars."

The minister said the growth rate had slowed from 29.2 percent in fiscal 1987 and 19.2 percent in fiscal 1989.

"From a medium- and long-range view, we wish you to achieve a greater growth than the last fiscal year," Mr, Muto said.

He urged the companies to take advantage of the surplus-cutting measures which were enforced on April 1, the first day of fiscal 1990, the officials said.

The package features tax incentives for imports, elimination of tariffs on 1,008 items and the budgeting of 100 million dollars for an import-promoting program to set up an information network, bring together importers and exporters, and to send experts on buying missions abroad.

The package might help reduce Japan's trade surplus by 3-4 billion dollars in fiscal 1990 at an initial estimate, according to Yasuo Imai, director of import expansion policy at the Ministry of International Trade and Industry (MITI).

#90115d3050 04/25/1990 ~French/German News Agency
KUALA LUMPUR (APRIL 25) - Malaysia's Pacific Bank Bhd., a medium-sized commercial bank, said Wednesday that Japan's Yasuda Trust and Banking Co. Ltd. would buy American Express Bank Ltd.'s entire 20 percent stake in the local bank.

Pacific Bank chairman Choi Siew Hong said he had been informed that American Express Bank had signed an agreement with Yasuda on the sale of the block of 5.22 million shares.

Yasuda said in Tokyo that it would pay 1.5 billion yen (9.5 million dollars) for the stake, which priced each Pacific Bank share at 1.82 dollars.

Mr. Choi said the deal had been approved by the relevant authorities and would make Yasuda one of the major shareholders of Pacific Bank, which is widely seen to be a conservative but well-run bank with 17 branches.

#90115d3100 04/25/1990 ~French/German News Agency

TOKYO (APRIL 25) - Japan's Honda Motor Co. said Wednesday it planned to export cars made in its U.S. plants to West Germany from next year, becoming the first Japanese automaker to penetrate the European market via the United States.

A spokesman confirmed reports that the company's California subsidiary, Honda Motor U.S.A. Co., would export to West Germany between 3,000 and 4,000 units of its Accord model produced at the company's Ohio plant.

The move raises a new question for the European Economic Community (EEC) -- whether or not Japanese cars made in the United States should be included in import quotas. The community is already divided on the question of whether or not Japanese cars made in member countries should be included in quotas.

Frans Andriessen, the vice president of the European Commission, said last month that it was unlikely that Japanese cars made in Eastern Europe or the

United States would be included in European import quotas on Japanese cars.

"It is not my intention to put these cars (made in Eastern Europe) in the monitoring system," he told a news conference in Tokyo, adding that there was "no reason to include Japanese cars made in the U.S." either.

Mr. Andriessen said that exports to the EEC of Japanese cars made in the United States were likely to be small. But local production of Japanese carmakers in EEC countries is much bigger and "therefore has to be taken into account," he said.

Honda began selling Accords made in the United States to Taiwan in 1987 followed by sales to Japan in 1988 and to South Korea last year. It reportedly plans to begin exports to Israel this year.

Honda's exports from the United States are expected to rise from 12,600 units this year to at least 35,000 next year, reports said. Production at the Ohio plant is expected to rise from 425,000 units to 510,000 in the same period.

BRUSSELS (APRIL 25) - Agriculture ministers of the 12-nation European Community (E.C.) entered negotiations here Wednesday to map out farm prices for fiscal 1990-91, while around the Community, some 20,000 farmers protested against proposed food price cuts.

The talks take up where a futile marathon session at the end of March left off. The main dispute concerns how much compensation should be paid farmers to help them cope with lower guaranteed grain prices which the E.C. intends to impose.

Meanwhile, farmer demonstrations were reported in West Germany, France, Belgium, and the Netherlands against the planned price cuts. The Confederation of European Farmers Associations (Copa) had urged farmers to stage the demonstrations.

Among other protest activities, French farmers in Lyon used their tractors to set up a blockade on a road to the airport, while in southern West Germany, farmers obstructed traffic by driving herds of cattle, sheep and pigs onto the roads.

DHAKA (APRIL 25) - Tornados and hail storms have left 14 people dead, more than 1,900 injured and houses and crops destroyed throughout

Bangladesh in the past two days, press reports said Wednesday.

In northeastern Sylhet district, hail storms pounded 13 villages around midnight Monday, while nine people were missing after a boat capsized in the Surma river, reports said.

At least five people, including two children, were killed and 1,700 injured after a tornado hit the western district of Sirajganj late Monday for the second time in a week, the Bengali daily Ittefaq said.

Hardly any homes were left standing in most of the 20 battered villages in Ullapara and Belkuchi sub-districts.

The two sub-districts were hit at the weekend by a tornado which reportedly killed 24 people and injured 2,000.

Hailstorms lashed eastern Brahmanbaria district late Monday, leaving seven people dead, 12 hospitalised and more than 1,000 dwellings destroyed, reports said.

In northern Rangpur, two people were killed and 200 injured, 50 of them seriously, when a severe storm hit several villages.

At least 94 people have already been reported dead recently in storms across this calamity-prone south Asian nation, where storms hit with increasing frequency this time of the year.

A year ago, a tornado destroyed several villages in Saturia sub-district near Aricha in Manikganj, leaving 573 people dead and more than 15,000 injured.

JAMMU, India (APRIL 25) - Moslem separatists have shot dead five men in Indian Kashmir, the Press Trust of India (PTI) reported, as shops and banks opened in the valley Wednesday for the first time in almost three weeks.

Gunmen killed an employee of a microwave television station at a bazaar in the south Kashmir town of Achchabal, PTI said. Security forces clamped a curfew on the town and launched a house-to-house search for the killers.

Moslem militants also shot dead four others during the past 24 hours in separate incidents elsewhere in the valley, apparently suspecting the victims were police informants, PTI said.

But they failed in a second bid to kill a man they shot and wounded Monday. Four gunmen entered the hospital where the victim was admitted, overpowered

two guards posted outside his room, fired and missed, PTI said.

The killings were reported as the Kashmir administration ordered an eight-hour relaxation, the longest in almost three weeks, of a marathon curfew in the city of Srinagar and some parts of the valley ahead of the Moslem Eid holiday.

Banks and shops opened, although poorly stocked. Residents could be seen shopping for new clothes and other items for Eid, which marks the end of the holy fasting month of Ramadan.

Meanwhile, security forces reported they had arrested 45 more suspected Moslem separatists since Tuesday. They also seized 1,500 audio cassettes containing anti-Indian propoganda.

More than 500 suspects have been arrested in a major security crackdown launched on April 6 after Moslem militants kidnapped -- and later killed -- three men they held hostage.

Moslem militants are fighting for Kashmir's secession from the Indian union in a campaign which has left more than 400 people dead so far in the year.

ANGELES, Philippines (APRIL 25) - Hundreds of U.S. airmen and their families living outside Clark Air Base here are to be housed inside the facility to protect them from burglars, military officials said Wednesday.

The paramilitary constabulary chief of this city north of Manila, Colonel Julius Yarcia, told reporters he was working with the U.S. Air Force on the details of the mass transfer.

U.S. Air Force Captain Chen Almazen said the Americans are to be moved from 10 rental housing projects outside Clark due to a rash of burglaries involving loss of property worth 68,500 dollars in the last three months.

He did not say exactly how many were to be transferred, but said about 5,200 houses and apartment units, let to Americans at an average monthly rent of 300 dollars, will be affected by the plan.

More than 12,000 U.S. troops are deployed at Clark, Subic Naval Base and six smaller U.S. military facilities in the Philippines.

The U.S. soldiers have also been targetted by communist New People's Army (NPA) guerrillas, who killed two servicemen outside Clark in October 1987 and a U.S. army colonel in suburban Manila in April 1989.

BUDAPEST (APRIL 25) - Hungary needs 2.5 billion dollars this year to pay its foreign debt, Frigyes Harshegyi, an official of the National Bank of Hungary, said Wednesday.

Mr. Harshegyi told the business magazine Vilaggazdasag that Hungary had to pay out 1.7 billion dollars to service its foreign debt, which stood at 20.6 billion dollars at the end of last year.

Its budget deficit, which he forecast would be about 550 to 600 million dollars, would increase its need for funds, while it would also need another 200 million dollars to reconstitute currency reserves.

About 20 percent of that amount is to be financed by loans tied to World Bank projects, and the International Monetary Fund has granted Hungary a stand-by credit of about 400 to 500 million dollars.

To finance the rest of its debts, Hungary intends to raise about one billion dollars on international capital markets. The European Economic Community has guaranteed Hungary a credit of about one billion dollars, including 400 million to be paid in April.

AMMAN (APRIL 25) - Jordan has reached an agreement with Iraq and Saudi Arabia to import Iraqi oil by linking an Iraqi pipeline running through Saudi territory with another line which now pumps Saudi oil to Jordan, a Jordanian official confirmed Wednesday.

Commenting on a report published in the English-lanuguage Jordan Times newspaper, the official said the project will save Jordan 40 million to 50 million dollars a year in transportation costs it now pays for trucking oil from Iraq.

Jordan gets about 80 per cent of its oil needs from Iraq and the rest from Saudi Arabia.

The Jordan Times said Saudi Arabia approved the project during a visit to Riyadh by Jordanian Prime Minister Mudar Badran, who discussed the idea with Saudi Oil Minister Hisham Nazer.

The paper quoted Iraqi Oil Minister Issam Chalabi as confirming that the project was under study to link the Saudi Tapline and the Iraqi pipeline, which runs from Iraq to the Saudi port of Yanbu, 440 kilometres from Jeddah.

Chalabi, who was in Amman on Tuesday to attend a meeting of the oil and energy ministers of the Arab Cooperation Council, rejected assertions that Baghdad had reservations about the project.

''Iraq supports the idea, but we have to wait and see when the project study is finalised,'' the minister told the paper.

Jordan imports 18 million barrels of oil a year from Iraq and Saudi Arabia. The Kingdom pays an average of 400 million dollars in oil import bills annually.

The pipeline connection will give a boost to Jordan's economy which is grappling with an 8 billion dollar foreign debt and an economic restructuring program.

TAIPEI (APRIL 25) - Indirect trade between Taiwan and China rebounded in February following three consecutive monthly falls, registering 243.2 million U.S. dollars, a 7.29 percent rise over a year ago, the Board of Foreign Trade (BOFT) said Wednesday.

But indirect trade in the first two months slowed down by 3.4 percent to 486 million U.S. dollars as compared with the same period in 1989, the BOFT said.

The January-February trade accounted for 2.46 percent of the island's overall trade in the two months, with Taiwan enjoying a surplus of 302 milion dollars, the BOFT said, citing Hong Kong customs statistics.

Taiwan sold 394 million dollars' worth of merchandise to the mainland via Hong Kong in the first two months while importing 92 million dollars of Chinese products.

In February, exports to the mainland grew 2.6 percent to 200 million dollars while imports rose 35.61 percent to 43.2 million dollars, leaving an imbalance of 156.8 million dollars in favor of Taiwan.

The BOFT attributed the trade decline in the previous months to import and export restrictions imposed by China and the aftermath of the June 4 massacre in Beijing.

The Taipei government in March further relaxed restrictions on travel to China, allowing traders to make business trips and attend international fairs on the mainland.

It has also widened imports from China in response to calls by Taiwan businessmen.

TOKYO (APRIL 25) - Asia-Pacific members of the General Agreement on Tariffs and Trade (GATT) will meet in Malaysia next month to discuss the final phase of multilateral talks on trade liberalisation, officials said Wednesday.

The two-day informal meeting, beginning on May 28, is to group senior trade officials from Japan, Australia, New Zealand, South Korea, Hong Kong and five members of the Association of Southeast Asian Nations (ASEAN), they said.

An official at Japan's International Trade and Industry Ministry said that "anything" could be discussed at the meeting, the seventh in a series of so-called regional consultative talks on GATT issues.

The official added that he "would not be surprised" if the issue of tropical products was raised given Malaysia's chairmanship of the meeting. Other ASEAN members attending are Singapore, Indonesia, Thailand and the Philippines.

Tropical products, textiles and intellectual property rights are among the main issues dividing developing countries from industrialised nations in the four-year Uruguay Round of talks on trade liberalisation due to expire in December.

Noboru Hatakeyama, director of the Japanese ministry's international trade policy bureau, told reporters Tuesday that it was "very important for developing countries to participate" in the Uruguay Round.

He noted that Japan had recently proposed to abolish the multi-fibre arrangement which restricts exports of textiles by developing countries.

The United States has been a vocal critic of developing Asia countries for violations of intellectual property rights such as patents and copyrights. Washington has also been embroiled in various trade disputes with exporters of both textiles and tropical products.

One of the most contentious issues in the Uruguay Round, however, is a proposal to liberalise agricultural trade.

#90115d3350 04/25/1990 ~French/German News Agency

BERLIN (APRIL 25) - East Germany wants to establish diplomatic relations with South Korea and Israel this coming summer, East German Foreign Minister Markus Meckel was quoted Wednesday as saying.

Mr. Meckel made the disclosure Tuesday on the way home from Bonn where he accompanied Prime Minister Lothar de Maiziere to his first summit with Chancellor Helmut Kohl, ADN news agency reported.

East Germany has been negotiating for some months to establish ties with Israel which the old communist regime never recognised. The new East German leadership even offered Monday to pay financial compensation to Jews affected by Nazi persecution.

The former East German government never recognised South Korea and only had relations with North Korea. However in recent months contacts have established with Seoul and diplomats from both countries have met on a number of occasions in third countries.

#90115d3480 04/25/1990 ~French/German News Agency
PARIS (APRIL 25) - Thai Airways International has ordered 13 airliners from the European consortium Airbus Industrie, Airbus said Wednesday.

Thai has ordered eight A330 twin-engined wide-bodied aircraft, which Airbus plans to introduce in 1993, and five A300-600R planes, Airbus's current twin-engined wide-bodied airliner.

Airbus said that with Thai's order it now held more than 200 orders for the new generation of Airbus A330 and A340 wide-bodied aircraft.

Thai is Airbus's biggest customer in the Far East, with a fleet of 12 A300 B2B4 and eight A300-600 airliners, plus three planes already ordered.

The 400-seater A330 planes will be delivered between autumn 1993 and autumn 1994. Thai is expected to use them on its busy south-east Asian lines.

Airbus said Thai had ordered the 13 planes to cope with its growing traffic.

Airbus now holds 202 orders for its A330 airliners and A340 four-engined long-haul planed, placed by 22 customers.

STUTTGART, West Germany (APRIL 25) - West Germany's biggest industrial group, the vehicle makers Daimler-Benz, on Wednesday posted net consolidated profit of 6.8 billion Deutsche marks (about four billion dollars) for 1989.

Daimler-Benz said last year's profit was not comparable with the profit figures for 1988 as the group has been restructured and now used new accounting methods.

But it said that for the same structure and balance sheet presentation, 1989 profit would be roughly the same as the group's 1988 profit of 1.7 billion marks (about one billion dollars).

The parent company Daimler-Benz AG posted net profit of 1.12 billion marks (662 million dollars), half of which was paid into reserves.

LONDON (APRIL 25) - British interest rates will not be raised in the wake of the huge March trade deficit announced Wednesday, Chancellor of the Exchequer John Major said.

Mr. Major said in a television interview that the 2.18 billion pound March trade deficit announced Wednesday, nearly a billion pounds more than the February deficit of 1.39 billion pounds, resulted from "erratic" factors.

He said Britain's foreign trade balance was showing a long-term improvement,
the tendency being for exports to grow four times faster than imports.

"The reason for a change in interest rates, if and when that might prove necessary, will depend on a whole range of factors," he said, adding that the government's policy of keeping interest rates high to reduce demand and therefore inflation was working.

"Our policy is working, interest rates are working. Inflation will fall and thereafter interest rates," he said.

British bank interest rates have risen from 7.5 to 15 percent since mid-1988.

#90115d3840 04/25/1990 ~French/German News Agency

PARIS (APRIL 25) - Some 4.5 million workers in France's public sector are due to stage a one-day general strike Thursday in protest at government pay curbs which the unions say have led to a steady erosion of purchasing power while allowing industrial and investment profits to soar.

The strike, which has the unusual concerted backing of all the country's major trades unions, will affect public transport, schools, postal services, government offices, railways and hospitals, although emergency cases will be maintained.

Air France has cancelled half its medium-haul flights out of Paris, although all long-haul flights will go ahead. Air Inter, the state-owned domestic airline, has cancelled three flights out of four.

The strike comes at an unfortunate time for Prime Minister Michel Rocard and President Francois Mitterrand, both of whom have suffered a sharp fall in popularity in recent opinion polls.

The Socialist Party-led government and Mr. Mitterrand do not appear to have reaped the benefit of praise such as that lavished on France's monetary and economic policies by the OECD (Organisation for Economic Cooperation and

Development).

In a recent report that body lauded the "remarkable results" of the French government's anti-inflation policies and efforts to boost economic growth.

The government says its wage restraint and the disindexation of wages from inflation have strengthened the franc and resulted in greater prosperity. But while this may be so, the bigger profits have not been shared out equally and have not filtered down the social scale.

The French Institute of Statistics notes that since 1979, the purchasing power of that 25 percent of households with high revenues has increased by a fifth, whereas that of households at the other end of the scale has stagnated or declined.

For the Socialists, who derive most of their support from medium and low-income voters, these figures hold the seeds of electoral disaster.

It is particularly galling for Mr. Mitterrand and Mr. Rocard that the statistics should so clearly demonstrate their failure to make good on pledges to "rectify inequalities" and establish social justice.

#90115d3870 04/25/1990 ~French/German News Agency

TOKYO (APRIL 25) - Japanese brewer Suntory Ltd. said Wednesday it would launch a new draft beer produced under contract with Canadia's Labatt Brewing Co. Ltd. in the United States next month.

The company said it expected sales of about half a million cases in the first year, amounting to between 10.5 million dollars and 12.5 million dollars. The beer will be distributed through a unit of Britain's Allied Lyons plc.

Suntory, which launched its draft beer in Japan last year, said it signed a contract with Labatt in December 1988, marking its second brewing venture abroad since forming a Chinese brewing venture in 1984. The Japanese and Canadian brewers both produce Carlsberg under licence from the Danish brewer.

#90115d3950 04/25/1990 ~French/German News Agency

BAALBECK, Lebanon (APRIL 25) - A senior Shiite leader here on Wednesday urged Lebanese kidnappers not to release another hostage after the U.S. House of Representatives approved a resolution naming Jerusalem the capital of Israel.

Hussein Musawi in a press statement accused the United States of having responded to the release of a U.S. hostage on Sunday with "bad faith."

His appeal, one day after the non-binding House resolution was approved, came amid indications that another Western hostage could be freed soon.

"I would hope that the groups holding hostages, if they are true revolutionaries, would not release any more of them," said Mr. Musawi, head of the fundamentalist movement Islamic-Amal.

"The United States responded to a gesture of goodwill, the release of Robert Polhill, by showing proof of its bad faith at the highest level: the House of Representatives yesterday adopted a resolution naming Jerusalem as the capital of Israel."

Mr. Polhill, a professor at Beirut University College, was freed in west Beirut Sunday by Islamic Jihad for the Liberation of Palestine after 39 months in captivity.

Iran and Libya have since appealed for additional hostage releases.

"Moslems offer concessions and get stones thrown at them in return," Mr. Musawi said.

Several Arab governments have already criticized the House resolution, which was identical to a measure approved by the Senate in March.

Arab leaders do not accept Israeli sovereignty over Jerusalem, the Arab eastern sector of which was seized by Israeli troops during the 1967 Middle East war.

Israel declared a united Jerusalem to be its eternal capital in 1980.

Official U.S. policy, despite the House and Senate resolutions, holds that the status of Jerusalem should be determined through negotiations and does not recognize the city as the Israeli capital.

#90115d4100 04/25/1990 ~French/German News Agency

BONN (APRIL 25) - West German Economics Minister Helmut Haussmann told federal prosecutors here Wednesday to go ahead with further investigations of allegations that submarine blueprints may have been illegally sold to South Africa.

Haussmann said he made the decision ''after making a careful study'' of new documents in the case which the prosecutor's office had provided him.

The minister said that it was also in the interest of the German shipbuilding firms implicated in the affair that the matter be completely cleared up.

Allegations that blueprints of submarines sold to India were delivered to South Africa in 1984 and 1985 have been denied by the engineering firm Ikl in Luebeck and the shipbuilding company Hdw in Kiel.

On Wednesday the two firms sought a temporary restraining order to stop further investigations. But their petition was rejected by a Cologne civil court.

India in the past has protested to Bonn about the possibility that the submarine documents were delivered to South Africa.

The state prosecutor believes that possibly the West German-Indian secrecy accord linked with the submarine sale would have been violated if the technical documents were given to the South Africans. more dpa ds 251638 apr 90

Investigations of the submarine affair had been stopped while a three-man Bonn parliamentary team went to South Africa for a fact-finding trip.

The three, all from the governing Christian Democratic UnionChristian Social Union (CduCsu) camp, on their return maintained there was no substance to the allegations.

But a West German television team went along with the three and filmed evidence that South Africa was possibly building a submarine.

A parliamentary committee investigating the affair was due to resume its hearings on Thursday, and in early May it will question Defence Minister Gerhard Stoltenberg about what he may have known about the affair.

Stoltenberg, from the northern state of Schleswig-Holstein where the Ikl and Hdw companies are located, was Finance Minister at the time of the submarine sale.

Norbert Gansel, the top opposition Social Democratic Party deputy in the parliamentary committee, praised Haussmann's decision as a ''defeat for the

government, which has tried since 1985 to prevent the investigations''.

The pacifist-environmentalist Greens party, pointing to the suspicions that South Africa was building a submarine based on German blueprints, demanded that Chancellor Helmut Kohl cancel a scheduled May 21 visit to Bonn by South African President Frederik de Klerk.

#90115d4190 04/25/1990 ~French/German News Agency

ABIDJAN (APRIL 25) - Ivory Coast National Assembly speaker Henri Konan Bedie indicated Wednesday that multiparty politics could be introduced in the West African country, in the first such statement by a senior official.

"If multiparty politics are conceived as a political system for the well-being of all ... it should be possible to work patiently and intelligently to bring it democratically on to the Ivorian political scene " the speaker said at the opening of the year's first parliamentary session.

It was the first time a top political official has suggested the possibility of a multiparty system, which has until now been considered by President Felix Houphouet-Boigny as a "threat to national unity" which would revive tribalism.

Mr. Konan Bedie, 55, is considered the number two in government. He is constitutionally to succeed the octogenarian head of state should the president die or become incapacitated and would have to organize a presidential election within 45 to 60 days.

Mr. Houphouet-Boigny last week told the French newspaper Le Figaro that: "If I have to go, I will go. (But) let me leave with my head held high".

There have been hints that he was beginning to bow to the winds of change blowing across Africa's single-party states.

The Ivory Coast government has been forced, after mass protests, to shelve the implementation of pay cuts for civil servants and a tax on private sector income that had been meant to help reduce a 1.7-billion-dollar foreign debt and ease negotiations with creditor countries and institutions.

Article Seven of the constitution explicitly allows for several political parties, but the only one recognized is the Democratic Party (PDCI), in power since independence in 1960.

Three opposition parties have filed for registration: the Ivorian People's Front headed by historian Laurent Gbagbo and the Worker's Party both describe themselves as socialist, while Robert Gbai Tagro's Republican Party claims to be reformist.

Other parties are likely to come forward soon, informed sources said.

#90115d4370 04/25/1990 ~French/German News Agency

LONDON (APRIL 25) - Shares in beleaguered British advertising group Saatchi and Saatchi slumped to a new low on the stock market here Wednesday, depressed by reports of boardroom strife.

Saatchi was quoted at 93 pence in mid-afternoon on the London Stock Exchange, down 9 pence on the day, after sinking as low as 87 pence in earlier trading.

The company's management consultancy arm is up for sale, and Saatchi's new French chief executive Robert Louis-Dreyfus is expected to want to get rid of three Saatchi employees as a result. They are top executives Terry Bannister and Roy Warman, and deputy chairman Jeremy Sinclair.

The three are long serving members of the team, and market speculation has it that a wrangle over their future is developing between Louis-Dreyfus and Charles and Maurice Saatchi, the brothers who founded the company.

The continued absence of a bid for the ailing company which many analysts were expecting has also recently depressed the company's stock, while the squeeze on corporate advertising budgets in the current adverse economic climate has been a further depressing factor.

Saatchi, made famous in 1979 by its successful election advertising campaign for Margaret Thatcher's Conservative party, saw its shares changing hands at more than nine pounds each only two years ago.

But the high profile agency was seen by experts to have overstretched itself with its abortive takeover attempt on Midland Bank in 1987, and began to run into difficulties with its management consultancy division in 1989.

Saatchi's pre-tax profits in 1989 were 84 percent down on the previous year at 21.8 million pounds (35.5 million dollars), the first fall in the company's history. After tax and extraordinary items the group made a loss of 58 million pounds (95 million dollars).

Earlier this year the company lost its place as the world's biggest advertising group to WPP, another British agency run by former Saatchi finance director Martin Sorrell, and last month the Saatchi brothers cut their own salaries by 30 percent, and those of their other directors by 10 percent.

#90115d4540 04/25/1990 ~French/German News Agency

KABUL (APRIL 25) - The Afghan government announced a package of measures Wednesday designed to save the local currency, which has been falling sharply against the dollar since the Soviet troop pullout 14 months ago.

President Najibullah's cabinet on late Tuesday ordered the Da Afghanistan Bank to intervene and stabilise the Afghani, a government spokesman said.

The Da Afghanistan Bank, also known as the Afghan State Bank, is the largest of the country's three banks and acts as the central bank. It has the exclusive right to issue the Afghani notes.

In a bid to reduce hard-currency demand, the Soviet-backed regime has ordered all state institutions and corporations to purchase U.S. dollars and other hard currencies from the central bank, the official said.

This should reduce the number of institutional buyers at Kabul's important money bazaar, run by private traders who usually finance imports, he said.

Most imported merchandise, especially untaxed items, is smuggled into Pakistan, which has stiff import restrictions.

This re-exportation is a source of currency, but the dollar has lately spiraled because the war in eastern Afghanistan has cut off trade routes that fetch back the dollar, traders say.

The money market, although not officially recognised by the regime, is the mainstay of Afghanistan's fragile fiscal balance and the dollar often soars here because of uncontrolled buying by individuals or government firms.

One dollar bought 220 Afghanis when the Soviet forces withdrew in February 1989. The current dollar rate in the bazaar is 650 Afghanis, compared to 500 Afghanis in February.

The government spokesman said the Afghan currency was "undervalued" and hoped it would appreciate against hard currencies after the new measures.

But the spokesman, asked if the local unit was expected to add value substantially, had some words of caution.

"Don't cash all the dollars you have. Keep some because it can go up again. After all this is the land of the Inshallah (the will of God)," he said.

Government efforts to boost exports, wiped out by the war, have so far been futile, and the country's main foreign exchange earner, natural gas exports to the Soviet Union, remains cut for security reasons.

In December, Afghan Prime Minister Sultan Ali Kestmand announced similar

plans to rake in dollars and control inflation, but the moves failed.

BEIRUT (APRIL 25) - Rival Lebanese Christian forces Wednesday fought pitched battles for the second consecutive day, leaving at least five dead and 15 wounded, police said here.

Troops loyal to General Michel Aoun and militiamen of Samir Geagea's Lebanese Forces (Lf) clashed with heavy machineguns and artillery in the mountainous northeastern district of Kesrwan.

The rival forces battled fiercely around the village of Qlaiat, 20 kilometers northeast of Beirut.

Hundreds of shells and rockets from 155 mm and 130 mm batteries on each side smashed into buildings and started fires, police said. Artillery shells hit two sectors of the Lebanese capital.

PARIS (APRIL 25) - Louis Vuitton group, a subsidiary of luxury goods and cognac manufacturer LVMH Moet-Hennessy Louis Vuitton, boosted its net consolidated profit 37.6 percent to 1.298 billion francs (about 230 million dollars) last year, compared to 1988, the group announced Wednesday.

Louis Vuitton posted consolidated sales of 6.751 billion francs (1.205 billion dollars) for 1989, up 27 percent from the previous year. The sales excluded the results of the Givenchy haute couture house.

The hugely successful group has multiplied consolidated sales by 100 and net profit by 130 since 1977.

But the battle for control of LVMH, which makes champagne, cognac and leather goods, rages on between Bernard Arnault, managing director of LVMH and the Louis Vuitton chief Henri Racamier.

On Thursday the Paris appeals court will hear the latest in a series of cases between the two rivals.

The court will have to rule on the future of 12 percent of LVMH stock issued in March 1987. In November the court said the share issue was "irregular" but did not cancel it.

If it does declare the issue null and void, Mr. Arnault will suffer a serious but not decisive blow.

But if the issue is upheld, Mr. Arnault's way to take control of the group will be clear.

The luggage manufacturing subsidiary of Louis Vuitton, Louis Vuitton Malletier, which accounts for 70 percent of the Louis Vuitton group's business, last year boosted sales by 33 percent to 4.4 billion francs (7.8 billion dollars).

Sales growth was highest in Japan, where the group achieved a 63 percent increase.

The group increased its work force by 15 percent last year to 4,834 people.

LONDON (APRIL 25) - South African gold mines fell sharply on the London and Brussels stock exchanges Wednesday on rumours that several mines were to shut down soon, brokers said.

Driefontein lost 25 cents to 11.50 dollars and Vaal Reefs shed three dollars to 83.50. Western Areas was marked down 13 percent Wednesday to 140 dollars, following a 10 percent fall Tuesday.

John Taylor, an analyst with James Capel brokers, said the market was influenced by a statement from the South African mining group Gencor saying that its least profitable mines would soon be shut down.

The statement sparked rumours that the Stilfontein mine would close.

Mr. Taylor, however, said the rumours were unjustified as the mine had made a profit in the last quarter of 1989 and the first quarter of this year.

He said the mine would continue working for several years. "Some analysts give it 10 years, others one to two years. I would think a middle estimate of five to six years would be likely."

In Brussels, South African gold mines registered falls of four to seven per- cent Wednesday on the rumours that Stilfontein was about to close.

PARIS (APRIL 25) - French tire maker Michelin on Tuesday posted consolidated profit of 2.65 billion francs (473 million dollars) for last year, slightly up from the 1988 result.

Consolidated sales of the group, which also publishes guide books, rose to 55.26 billion francs (9.86 billion dollars) last year from 51.82 billion francs in 1988.

Michelin attributed the 6.6 percent sales growth to currency exchange rate fluctuations, changes in its accounting practices and the development of its prices.

It said consolidated profit included about 250 million francs in proceeds from the sale to Citroen of shares in Citroen Hispania, the French car maker's Spanish subsidiary.

#90115d4800 04/25/1990 ~French/German News Agency

DURBAN, SOUTH AFRICA (APRIL 25) - A 53-year-old white man Wednesday became the latest victim in political violence besetting Natal Province, police believe.

A police spokesman said the body of 53-year-old Adrian Jeffery was early Wednesday found next to his burnt-out vehicle near KwaMakutha black township, 40 kilometres (25 miles) south of this east coast port.

KwaMakutha is one of the flashpoints in ongoing violence in the province where already this year over 700 people have died, the overwhelming majority of them black.

"It appears robbery was not the motive and we are investigating the possibility that Mr. Jeffery may be a victim of the political violence in the area," the spokesman told Agence France-Presse.

Most of the violence in the province is the result of a power struggle between African National Congress supporters in the United Democratic Front and vigilantes of Zulu leader Mangosuthu Buthelezi's Inkatha movement.

Up to 3,000 people have died since the conflict first flared in 1986.

LONDON (APRIL 25) - Muscovites will eventually be able to savour "Gorba" chocolate ice cream, named after President Mikhail Gorbachev and produced at a factory which British food group Allied Lyons plans to build in Moscow.

Allied Lyons said Wednesday it had signed a joint venture agreement with the Soviet Trade Ministry to build a 20 million pound (32 million dollar)

ice cream factory in the Soviet capital, which will be financed equally by the two partners.

The factory, which will be able to produce 36.4 million litres of ice cream a year, will start with only two flavours, vanilla and chocolate.

But Allied Lyons plans to expand the range, adding another eight flavours including "Gorba" chocolate.

#90115d4880 04/25/1990 ~French/German News Agency

Geneva (APRIL 25) - The Iranian resistance movement People's Mujahedin of Iran Wednesday accused Teheran President Ali Akbar Hashemi Rafsanjani of being directly responsible for the slaying of their representative in Switzerland, Kazem Rajavi.

Rajavi, 56, was shot and killed Tuesday on a street in Coppet, near Geneva. He was driving to his home near Tannay on Lake Geneva when he was stopped by another car and shot at.

The brother of the victim, Saleh Rajavi, and a member of the Mudjahedin National Council, Hossein Mahdavi, told reporters here that Rafsanjani had ordered Iranian Ambassador to the United Nations in Geneva Sirus Nasseri to prepare and supervise the attack.

Saleh Rajavi and Mahdavi charged that the two assailants fled to the Iranian consulate in Geneva after the attack. The Iranian mission here declined to comment on the accusations.

A spokesman for the Teheran embassy in Berne said in response to a query his country had nothing to do with the murder. He suggested that the mujahedin probably wanted to rid themselves of Kazem.

Kazem Rajavi had commented critically on Iran's human rights policy and was said to have received repeated death threats.

Kazem's brother Massoud Rajavi, who is the leader of the People's Mujahedin and lives in Baghdad, in a telegram to Swiss President Arnold Koller stressed that over the past years his brother had repeatedly asked for police protection. He accused the Swiss authorities of lack of political sensitivity.

#90115d5240 04/25/1990 ~French/German News Agency

LONDON (APRIL 25) - Britain's trade deficit in March climbed sharply to 2.18 billion pounds from 1.39 billion in February, a development which

economists here described as "very disturbing".

The pound, shares and gilts were all sent sharply lower after the release of the figure, the worst trade gap since August last year. Operators had been expecting something in the region of 1.3 billion.

The Treasury said half the 800-million-pound increase was due to erratic items which do not represent an underlying trend.

But economists pointed out that the remaining 400 million pounds still amount to "stunning growth in material imports".

"The evidence of these figures put together with recent bank lending statistics and robust company profit news suggests that economic activity is rebounding and manufacturing industry is restocking for growth," said Avanash Persaud of UBS Phillips and Drew here.

"This is a very disturbing development, suggesting that the government's high interest rate policy has yet to take full effect on sectors other than those connected with property," he said.

"The possibility of an interest rate cut before the end of this year is diminishing rapidly," Mr. Persaud added.

Simon Briscoe of Midland Montagu went further. "The economy is still buoyant, and the figures call into question the success of government policy," he said.

Chancellor of the Exchequer John Major pledged that the figures in themselves would not prompt a further rise in interest rates. Base rates are already at 15 percent, up from 7.5 percent less than two years ago.

Economists agreed that a further rise was not really on the cards politically, and would in any case be self defeating in the short term, as this would only add to inflation through its effect on home-loan repayments.

Neil MacKinnon of Yamaichi International said he was concerned that the exports boom over the past year could soon falter as higher interest rates in Europe cause "shrinkage" in British export markets.

Rising inflation -- expected to reach 10 percent in Britain by the middle of this year -- also reduces exporters' competitive edge, he said.

#90115d5430 04/25/1990 ~French/German News Agency

BASEL, SWITZERLAND (APRIL 25) - Top Swiss chemicals group Ciba-Geigy said

Wednesday that its first quarter sales hit 5.48 billion Swiss francs (3.04 billion dollars), a rise of six percent in francs over the figure for 1989.

"This rate reflects a slightly reduced economic growth overall, but at the same time, a healthy consolidation and the continuation of business at a high level", the company said.

Pharmaceutical products, the lion's share of the group's business, rose by 10 percent in volume -- a rise of 14 percent when the weakness of the Swiss franc is taken into account -- to 1.55 billion francs (1.04 billion dollars).

Agricultural products came second with 1.49 billion francs (one billion dollars), followed by colourings and chemical products, two sectors in which sales remained stable compared to the first quarter of 1989.

#90115d5480 04/25/1990 ~French/German News Agency

PARIS (APRIL 25) - French President Francois Mitterrand expressed ''full support'' for the German unification process in a two-hour conversation here Wednesday with West German Chancellor Helmut Kohl.

Bonn government spokesman Dieter Vogel said the meeting took place in a ''cordial and friendly atmosphere''.

Kohl had arrived earlier on Wednesday for the 55th round of regular Franco-German consultations scheduled to last until Thursday.

The spokesman said a recent initiative put forward by Mitterrand and Kohl to create a European political union represented an ''essential step'' toward strengthening Franco-German friendship.

Mitterrand and Kohl underlined that German unity and European unity must go ''hand in hand'', Vogel said.

The subjects of German unity and European integration will be high on the agenda of a European Community (E.C.) summit in Dublin, Ireland, on Saturday.

A french presidential spokesman, Hubert Vedrine, had stated before the start of the Mitterrand-Kohl meeting that ''the French and the Germans work together''.

This was still true in the event of disagreements over certain issues, Vedrine said in what was seen as a reference to recent irritations between Bonn and Paris over the rapid pace of German unification.

#90115d5950 04/25/1990 ~French/German News Agency

MONROVIA (APRIL 25) - Liberian President Samuel Doe on Wednesday told rebels fighting troops in northeastern Nimba County to lay down their arms within two weeks or be "wiped out" completely by government forces.

In a news conference broadcast live on state radio, Mr. Doe said places will be designated for rebels to lay down their arms peacefully. The rebellion began on December 24 last year.

"As I understand, some of those involved were forced (to join the rebels) " he said. He told parents to have their children in the bush lay down their arms "or you will never seem them again after two weeks."

Mr. Doe also repeated allegations that Libya, Burkina Faso and Ivory Coast were supporting the rebels led by Charles Taylor, a former top civil servant who is wanted in Monrovia on embezzlement charges.

He said Libya supported the rebels "because Moamer Kadhafi knows that Charles (Taylor) would kill Americans" if he took power in Liberia.

Mr. Doe said Ivory Coast authorities wanted rebel activities to continue in Liberia because they were against Monrovia's multiparty system and preferred a dictatorship.

He also charged that opposition leaders in self-imposed exile in the United States supported the rebels because they wanted chaos because they they could not take part in the 1991 general elections.

Liberia's elections laws stipulate that a candidate for the presidency must have lived in the country 10 years prior to general elections.

Mr. Doe, who shot his way to power in a bloody coup in April 1980, said elections would go ahead as scheduled "even if rebels came to Monrovia on polling day."

General elections are scheduled here in October 1991 during which Mr. Doe will be seeking a second six-year term after ruling the country for 11 years,
five of which were under military regime.

Mr. Doe also told reporters he would never negotiate with Mr. Taylor.

"He is a criminal and a wanted man," Mr. Doe charged.

Mr. Doe said government troops were exhibiting caution in repelling the aggression without causing havoc.

There have been persistent reports that soldiers have killed and robbed civilians and burned entire villages in what the government calls "mopping up operations."

Commander-in-Chief Doe said the army was capable of "blasting the entire" Nimba County, and appealed to civilians living there to leave the area because government forces were now ready to bring the situation under complete control "once and for all."

"If there is one person in this country who is concerned about the present rebel activities in Liberia, it is me," Mr. Doe said, adding he was prepared to "deal with the situation drastically and militarily."

He denied press reports that rebel activities had spread beyond Nimba County. "Even in Nimba County rebels have never been able to take a town or village for more than two days without government forces failing to recapture it."

Informed sources reported last week that hundreds of residents in central Bong and eastern Grand Bassa counties had fled to other parts of the country for fear of rebel attacks.

He said people were fleeing central Liberia because "bandits and misguided people" spread rumors that rebels had ventured out of Nimba County.

Mr. Doe also accused the press of promoting rebel activities through "false reporting," warning that any journalist who published or broadcast that rebels have captured a town would be compelled to prove it or be treated as a rebel.

He said journalists reporting dissident advances would be escorted by the military to such towns to prove they are under rebel control.

#90115d6460 04/25/1990 ~French/German News Agency

WASHINGTON (APRIL 25) - Secretary of State James Baker expressed hope Wednesday that a congressional resolution calling Jerusalem the capital of Israel would not impede efforts to free American hostages in Lebanon.

Asked if the non-binding resolution passed Tuesday by the U.S. House of Representatives would have a negative impact on efforts to free the hostages,
Mr. Baker said, "I hope not. It shouldn't."

The House of Representatives resolution, which is almost identical to one passed by the Senate, calls united Jerusalem the capital of Israel -- a position that is at odds with U.S. Government policy.

In Lebanon, senior Shiite leader Hussein Musawi Wednesday urged Lebanese kidnappers not to release another hostage following the House resolution.

He accused the United States of "bad faith" for passing such a measure after the release of U.S. hostage Robert Polhill, a professor at Beirut University College after 39 months in captivity.

His appeal, one day after the non-binding House resolution was approved, came amid indications that another Western hostage could be freed soon.

"I would hope that the groups holding hostages, if they are true revolutionaries, would not release any more of them," said Mr. Musawi, head of the fundamentalist movement Islamic-Amal.

Seven American hostages are believed to be held in Lebanon, acording to U.S. officials who say they are being held by the Hezbollah.

#90115d6480 04/25/1990 ~French/German News Agency

WASHINGTON (APRIL 25) - The U.S. Senate has unanimously passed legislation to ban imports from Burma in protest at human rights violations,
narcotics trafficking and environmental devastation in that country.

The legislation, a version of which is under consideration in the House of Representatives, would affect about 17 million dollars in imports of teak,
fish, gems and textiles from Burma.

The provision was included in a trade bill adopted late Tuesday by the Senate in a 92-0 vote.

"In light of the Burmese Government's blatant disregard for human life ... it is time that we show (them) we mean business," said Senator Terry Sanford in introducing the amendment.

Sentaor Daniel Moynihan, author of the amendment, accused the military regime of General Saw Maung of deforesting his country and selling Burma's natural resources to finance "continuing military repression."

Calling the Rangoon government "one of the world's most perfidious regimes " Mr. Moynihan recalled the military's role in crushing pro-democracy demonstrations, helping opium traffickers and violating human rights on a massive scale.

He particularly noted an ongoing government forced resettlement program under which an estimated 500,000 persons have been moved from cities to remote or undeveloped rural areas as a way of breaking the back of the urban-based opposition prior to elections scheduled for May 27.

President George Bush on March 1 cited Burma as one of four nations that failed to act against drug traffickers.

#90115d8200 04/25/1990 ~French/German News Agency

TOKYO (APRIL 26) - Japan's coal imports will likely increase to 50 million tons in 1995 from the present annual average of 29 million tons, with Australia remaining the top supplier to Japan, a Tokyo research institute said Thursday.

The Institute of Energy Economics made the prediction in its report on the present and future state of the Australian coal industry.

It said Japanese domestic coal output would continue to dwindle while demand from the Japanese electric power industry will expand by more than 20 million tons over the next five years.

Japanese statistics showed that coal imports in 1989 totaled 29.3 million tons, with Australia accounting for 69 percent, followed by the Soviet Union with eight percent.

Quoting these figures, the report said Japan should diversify supply sources by lessening its dependence on Australia and developing coal fields in the United States.

But Australia will remain the top coal supplier to Japan in the future because demands from the paper and pulp and chemical industries as well as the electric power industry is expected to grow, it said.

The institute also forecast that prices of imported coal will rise in next five years at an annual rate of about seven percent in view of growing demand worldwide.

-30- 1486

#90115k0090 04/25/1990 ~Japanese News Agency

TOKYO (APRIL 25) KYODO - FUELED BY GROWING DEMAND FROM THE ELECTRIC POWER INDUSTRY, JAPAN'S STEAMING COAL IMPORTS WILL INCREASE TO 50 MILLION TONS IN 1995 FROM THE PRESENT ANNUAL AVERAGE OF 29 MILLION TONS, A PRIVATE ENERGY RESEARCH INSTITUTE REPORTED WEDNESDAY.

THE INSTITUTE OF ENERGY ECONOMICS MADE THE PREDICTION IN AN ANALYTICAL REPORT ON THE PRESENT AND FUTURE SITUATION OF THE AUSTRALIAN COAL INDUSTRY.

THE INSTITUTE SAID DOMESTIC PRODUCTION OF COAL WILL CONTINUE TO DWINDLE WHILE DEMAND FROM THE ELECTRIC POWER INDUSTRY WILL EXPAND BY MORE THAN 20 MILLION TONS OVER THE NEXT FIVE YEARS.

IT SAID JAPAN SHOULD DIVERSIFY SUPPLY SOURCES BY LESSENING DEPENDENCE ON AUSTRALIA, CURRENTLY THE TOP COAL SUPPLIER TO JAPAN.

THE INSTITUTE SAID JAPANESE COAL IMPORTS IN 1989 TOTALED 29.3 MILLION TONS WITH AUSTRALIA ACCOUNTING FOR 69 PERCENT, FOLLOWED BY THE SOVIET UNION WITH 8 PERCENT.

AUSTRALIA WILL REMAIN THE TOP COAL SUPPLIER TO JAPAN IN THE FUTURE BECAUSE DEMAND FROM THE PAPER AND PULP AND CHEMICAL INDUSTRIES IS EXPECTED TO GROW THE INSTITUTE SAID.

THE INSTITUTE PREDICTED PRICES OF IMPORTED COAL WILL GROW IN NEXT FIVE YEARS AT AN ANNUAL RATE OF ABOUT 7 PERCENT IN VIEW OF GROWING DEMAND WORLDWIDE.

#90115p6994 04/25/1990 ~PR Newswire

RADNOR, PA (APRIL 25) PR NEWSWIRE - Sun Co. (NYSE: SUN) today reported 1990 first quarter net income of $71 million, or $.66 per share of common stock, compared with net income of $81 million, or $.76 per share, for the first quarter of last year.

SUN CO.
Financial Summary

First Quarter	1990	1989
Revenues	$3,110,000,000	$2,650,000,000
Net Income	$71,000,000	$81,000,000
Net Income per Share of Common Stock	$.66	$.76
Weighted Average Number of Common Shares Outstanding	107,017,427	106,722,340

Included in first quarter results for 1990 is a $30 million after- tax benefit resulting from the cumulative effect for prior years of a change in accounting principle related to refinery maintenance shutdowns. Before this accounting change, net income was $41 million in the first quarter of 1990, a decrease of 49 percent compared with the year ago period. Revenues were $3.11 billion in 1990's first quarter compared with $2.65 billion a year ago.

Robert McClements Jr., Sun's chairman and chief executive officer, indicated that the decrease in net income before the accounting change was due to lower results in domestic refining and marketing operations. Partially offsetting this decrease were improved earnings from Suncor, Sun's 75-percent-owned Canadian petroleum subsidiary.

McClements noted that real estate and leasing earnings were unchanged during the period. Higher earnings from leasing operations during the 1990 first quarter, resulting from a $5 million after-tax gain on the sale of an ocean-going vessel, were offset by lower real estate results.

McClements also announced Sun will discontinue new investments in the leasing and financing businesses conducted through its subsidiary, Sunoco Leasing Inc.

He further stated that recent tax law and accounting practice changes have made the continued investment of capital in Sunoco Leasing incompatible with the strong commitment Sun has to the basic energy business, including its renewed commitment to international oil and gas exploration and

production. These tax regulations require that a portion of the interest expenses incurred by Sunoco Leasing be allocated to Sun's foreign operations for purposes of calculating Sun's foreign tax credits.

VIRGINIA BEACH, VA (APRIL 25) PR NEWSWIRE - Essex Financial Partners L.P. (EFP), a multi-state S&L holding company, through its wholly owned subsidiary Northeast Financial Corp., has just signed a letter of intent with First South Savings Bank of Columbia, S.C., to form and capitalize a South Carolina holding company. The action will result in First South's meeting the new federal regulations under the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA).

The proposed South Carolina thrift holding company is subject to approval by all state and federal regulators, as well as the board of directors of Essex Financial Group Inc., and EFP's Investment Committee. First South's board has approved the transaction contingent upon shareholders' approval.

Essex Financial Partners L.P. is acquiring undercapitalized savings and loan institutions throughout the Southeast and plans to expand and develop EFP into a multi-state regional institution serving five of the 11 fastest growing states. EFP has already acquired S&Ls in North Carolina and Virginia and plans to develop into a holding company operating from Virginia to Florida.

EFP Chairman Lawrence N. Smith said that Essex Financial Partners, L.P. already has assets of $377 million, and its banks operate in compliance with FIRREA mandates. First South Savings Bank will add approximately $80 million in assets. Smith said EFP's capital infusion into First South will allow it "to expand its core customer deposit base and continue to meet the financial needs of greater Columbia, S.C."

Smith plans to expand acquired savings and loans through networks of small cost-effective office-style branches that offer interest rates at or near the top of the competitive market on Mini-Jumbo, Jumbo and Preferred Money Market Accounts. He said branches will be manned by two or three highly trained professionals who specialize in personalized, one-to-one service and are supported by a state-of-the-art, low-overhead back office.

The EFP fund is financing its savings and loan acquisition drive with capital raised through a limited partnership sponsored by PaineWebber Inc.

ATLANTA (APRIL 25) PR NEWSWIRE - Georgia Gulf Corp. (NYSE: GGC) today affirmed that, in connection with its plan of recapitalization as approved by the company's stockholders at a special meeting held April 19, the minimum stock election condition has been satisfied.

Under the stock election provision, in lieu of receiving cash and securities, each stockholder was entitled to elect on or prior to April 19 with respect of up to 30 percent of his stock holdings, to receive for each share 5.5 shares of the company's new common stock. The election by stockholders with respect to a minimum of 1.5 million shares is a condition for the effectiveness of the plan.

Following the April 19 close of the election period, the company said that the election had been made with respect to approximately 2.1 million shares. While the final election number will be subject to adjustment based upon the receipt of certificates guaranteed for delivery, certificates for more than the required minimum have already been delivered.

Assuming that all shares guaranteed for delivery are received, the company estimates that after the plan of recapitalization is fully implemented, there will be approximately 33.6 million new common shares outstanding. In addition, options for current shares not cancelled pursuant to the plan will be adjusted and become options for approximately 500,000 new common shares.

Georgia Gulf, headquartered in Atlanta and listed on the NYSE (GGC), is a major manufacturer of several highly integrated lines of commodity chemicals and polymers including aromatic, natural gas and electrochemical

products.

#90115p7014 04/25/1990 ~PR Newswire

PITTSBURGH (APRIL 25) PR NEWSWIRE - Landmark Savings Association (AMEX: LSA) reported net income of $1.7 million or $.72 per common share for the first quarter of 1990 compared to $1.2 million or $.52 per common share for the same period in 1989.

The increase in net income was the combined result of a gain recognized on a branch sale, higher net interest income and lower non-interest expenses. These increases were somewhat offset by lower net gains on sales of loans, securities and loan servicing, and higher net income taxes and loan loss provisions compared to the prior year.

Net interest income increased 8 percent to $7.8 million for the first quarter of 1990 compared to $7.2 million for the same period in 1989. J. Richard Eshleman, president and chief executive officer, stated, "Landmark's interest rate margin increased to 2.20 percent during the first quarter of 1990 compared to 1.77 percent for the same quarter in 1989. Sales of mortgage loans with coupons lower than the average portfolio yield and the upward repricing of variable rate loans were the primary reasons for the improvement in the margin."

Income tax expense, net of the benefit of operating loss carryforwards, for the first quarter of 1990 increased to $837,000 compared to $262,000 for the same period in 1989. All remaining book net operating loss carryforwards were utilized in 1989.

Landmark Savings Association is a Pennsylvania state chartered, publicly owned savings association with assets of approximately $1.6 billion. It is the 149th largest thrift institution in the United States. Landmark common stock is listed on the American Stock Exchange (AMEX), trades under the symbol "LSA," and is reported in the financial press as "LdmkSv."

#90115p7017 04/25/1990 ~PR Newswire

NEW ORLEANS (APRIL 25) PR NEWSWIRE - The Louisiana Land and Exploration Co. (NYSE: LLX) ("LL&E") today announced a 64 percent increase in its net earnings from petroleum operations.

Unaudited consolidated net earnings for the first quarter of 1990 were

$13.3 million or $0.47 per share. In 1989's first quarter, LL&E earned $8.1 million excluding a $12.5 million after-tax gain on the sale of real estate. Including the real estate gain, net earnings totaled $20.6 million ($0.68 per share) in the 1989 quarter.

LL&E attributed the increased earnings to higher oil prices and improved operating profits from its refining and marketing operations. Average crude and condensate prices were up $3.14 per barrel to $19.51 in the current quarter, a 19 percent increase from last year. Refining and marketing activities generated pretax operating profits of $9.1 million in the first three months of 1990 as compared to $2.5 million in the year-ago period.

Gross revenues were higher in the first quarter of 1990 mainly as a result of higher oil and refined product prices. Gross revenues in the comparable 1989 period included the aforementioned real estate sale which totaled $19.0 million before tax. The increase in costs and expenses during 1990's first quarter was largely due to higher refinery feedstock costs and cost and expense increases associated with LL&E's significantly higher level of exploration and drilling activity in the current quarter.

H. Leighton Steward, LL&E's chief executive officer, indicated that LL&E's expanded exploration effort was already beginning to yield positive results. "We recently announced two Gulf of Mexico discoveries and we have an active program planned for the remainder of the year," Steward said.

LL&E's operations during the first quarter were financed with internally generated funds. Net cash flow from operating activities totaled $59 million for the quarter.

BALTIMORE (APRIL 25) PR NEWSWIRE - The board of directors of MNC Financial Inc. (NYSE: MNC) at its regular monthly meeting late yesterday approved an increase of 1.5 million shares to the company's stock repurchase plan.

The plan, which was previously announced on Feb. 13, 1990, now permits MNC to repurchase up to a total of 2.5 million shares of its common stock.

The actual number of shares purchased will depend on market prices and other factors. It is anticipated that the repurchased shares will be used in connection with the company's dividend reinvestment and employee benefit plans.

#90115p7023 04/25/1990 ~PR Newswire

CHICAGO (APRIL 25) PR NEWSWIRE - Sara Lee Corporation (NYSE: SLE) today announced record earnings for the third quarter ended March 31.

Net income for the quarter rose 14.6 percent to $108.9 million from the $95.0 million reported for the same period last year. Primary earnings per share increased 10.0 percent to 44 cents, compared with 40 cents a year ago. The lower percentage increase in earnings per share is due to a higher level of preferred dividends and more common shares outstanding in the latest quarter. Net sales for the quarter fell 1.3 percent, from $2.84 billion to $2.80 billion, due to the disposition of a portion of Sara Lee's foodservice business at the beginning of fiscal 1990.

For the first nine months of fiscal 1990, net income rose to $352 million, a 14.3 percent increase over the $307.8 million for the same period last year. Primary earnings per share increased 8.3 percent to $1.43 from $1.32 per share a year earlier. Net sales were even with last year, again due to the disposition of a portion of Sara Lee's foodservice business at the beginning of the fiscal year.

Reported earnings per share for 1989 include a benefit of 5 cents in the second quarter, reflecting the gain on the sale of several businesses, net of restructuring charges. Excluding the nonrecurring gain, net income for the first nine months of fiscal 1990 increased 18.7 percent and primary earnings per share grew 12.6 percent to $1.43 from $1.27.

#90115p7030 04/25/1990 ~PR Newswire

NEW YORK (APRIL 25) PR NEWSWIRE - ITT Corporation (NYSE: ITT) announced today that net income for the first quarter of 1990 rose to $253 million, or $1.77 per common equivalent share on a fully diluted basis, a 26 percent increase over the $200 million, or $1.40 per share in the 1989 quarter.

On a primary basis, net income per share was $1.88 for the 1990 first quarter, a 34 percent increase over the $1.40 per share for the 1989 quarter.

As announced in January, income for the 1990 first quarter included an after-tax gain of $47 million, or 33 cents per share on the sale of the company's approximately 2 million share investment in Paris-based Compagnie Generale d'Electricite.

Consolidated sales and revenues for the first quarter of 1990 were $4.9 billion, compared with $4.8 billion in the year ago period. The sales comparison was impacted by $139 million due to divestitures during 1989, particularly Communications Services Inc., which was sold in the third quarter of 1989.

Operating results for all the company's product businesses, with the exception of Electronic Components, were equal, to or better than, last year.

Income at ITT's Defense segment improved as a result of increased contract margins and product shipments. ITT Automotive posted operating improvements in Europe which were offset by softness in North American markets. ITT Fluid Technology results were even with those reported last year. Pulp and Timber income improved in the quarter reflecting favorable log margins and higher pulp volume. Income at Electronic Components declined substantially, reflecting continuing competitive pressures within the connector and semiconductor businesses resulting in lower sales and margins.

Equity in earnings from Alcatel N.V. rose dramatically during the quarter as a result of improved worldwide performance.

FAIRFIELD, NJ (APRIL 25) PR NEWSWIRE - Ogden Projects, Inc. (OPI), the leading developer of waste-to-energy facilities in the United States, today reported a significant increase in net income for the three months ended March 31, 1990 to $5.9 million from $3.6 million for the same period last year. Income before taxes jumped approximately 70 percent year-over-year to $6.6 million from $3.9 million. Earnings per share doubled to $.18 per share, on significantly greater shares outstanding, from $.09 per share in the year earlier period. Revenues rose to $88.9 million from $58.6 million in last year's first quarter.

The company reported that the proceeds from an additional public offering of 1.5 million OPI shares, which was completed during the first quarter, were used principally to reduce debt to Ogden Corporation.

According to David L. Sokol, president and chief executive officer of OPI, the earnings improvement was primarily attributable to the progression of earnings from the operation and timely construction of waste-to-energy facilities by the company's subsidiary, Ogden Martin Systems, Inc.

Ogden Martin provides communities with long-term solid waste disposal alternatives by building and operating modern waste-to-energy facilities which convert household trash into steam and/or electricity.

The company currently operates 15 such facilities (including two in the start-up operational phase), is constructing 5 and has been awarded 6 more.

WHEELING, WV (APRIL 25) PR NEWSWIRE - Promotion of Errol C. Sambuco to director-engineering has been announced by Paul K. Morrison, vice president-engineering, Wheeling-Pittsburgh Steel Corporation (NYSE: QWHX). The promotion was effective April 1, 1990. Prior to this appointment, Sambuco had served as project manager, 80-inch hot strip mill modernization.

Sambuco, 49, joined the corporation in September 1966, as industrial engineer at the Benwood (W.Va.) Plant. In the years following, he also served as an industrial engineer at Martins Ferry (Ohio) and Steubenville before being named superintendent-shipping, preparation and finishing at Martins Ferry in 1973. Sambuco was promoted to plant manager-Martins Ferry in 1976 and plant manager-Yorkville and Martins Ferry in 1978. In 1983, he was also assigned to assist in the coordination of activities for the joint venture with Nisshin Steel. He became manager-coated products for Wheeling-Pittsburgh in 1986, and continued in that position until October 1989, when he was named to manage the hot strip mill modernization.

Sambuco holds a bachelor's degree in industrial engineering and an M.B.A. degree from Ohio State University. He also attended Ohio University, Belmont Branch, and General Motors Institute of Flint, Mich. He and his wife, Mary Edith live in Martins Ferry and are the parents of four children: Errol, John, Scott and Susan. Sambuco is an Emeritus member of the board of directors of OVHSE, a multi-hospital system serving the Ohio Valley. He also is a member of the Advisory Council of Ohio University, Belmont County Branch, and the Advisory Council of the Ohio Steel Futures program of the Ohio Department of Development.

MIAMI (APRIL 25) PR NEWSWIRE - Pan Am Express, the regional airline subsidiary of Pan Am Corporation (NYSE: PN), will launch its first-ever Florida services on May 15, when it inaugurates flights from Miami to Key West, Ft. Myers, Sarasota/Bradenton, Melbourne and West Palm Beach.

William R. Lange, President of Pan Am Express, is formally announcing the new schedules today during a "Fly-Around-Florida" press conference in each of the cities. Lange and other Pan Am Express executives started their "fly-around" early this morning with a press conference in Key West. From there, they are traveling aboard one of the airline's newly delivered Jetstream 31s -- the aircraft to be used for the new services -- to Ft. Myers, Sarasota/Bradenton, Melbourne, West Palm Beach and Miami.

The 25 daily roundtrip flights from the new destinations will connect with

Pan Am's Miami departures, providing direct service to 30 destinations in Europe, South America and the Caribbean, and 15 destinations in the U.S.

"By providing convenient service to Pan American World Airways' major hub in Miami, we are making the world more accessible than ever before for Florida residents," said Lange. "And just as importantly, we are providing visitors from our international destinations with easy connections to our attractive Florida vacation centers."

The 25 intra-Florida flights include five daily flights from Key West, six from Sarasota/Bradenton, six from Ft. Myers, five from West Palm Beach and three from Melbourne. The flights will be operated with a fleet of British Aerospace Jetstream 31 aircraft.

The inauguration of Pan Am Express flights is the latest move in a major build-up of Pan Am's operations in Florida. Last fall, Pan Am began an increase in Miami that brought total departures during the peak winter months to 66, more than any other airline.

Lange said Pan Am Express plans to further increase its operation out of Miami this fall.

Pan Am Express, formerly Ransome Airlines, was purchased by Pan Am Corporation in 1986 to provide connections to Pan American World Airways' long-haul international and domestic flights. Its route network includes 13 cities in the U.S. Northeast, two in California, 12 in Europe, and -- after the planned start-up of Florida services on May 15 -- six in Florida.

NEW YORK (APRIL 25) PR NEWSWIRE - Whether on land, sea or in the air, investors at York Securities, Inc., who are near a touchtone telephone can now get stock quotes 24 hours a day, seven days a week, thus ending the frustration of being out of touch with their broker when the market is closed.

York Securities, Inc., a deep-discount brokerage, describes its free instant quote service, YORKalert, in a new brochure distributed to its clients. The pocket-sized publication outlines, step-by-step, the simplified method for entering the stock symbol for real-time expanded quotes on stocks, options and mutual funds. The key, found in a conversion table in the brochure, is in the two-digit equivalent for each letter of the alphabet. For example, punch in 43-22-61 for IBM.

YORKalert also provides a market overview including volume, Dow Jones

stock averages and NASDAQ composites. In addition, a YORKalert portfolio service enables the investor to enter up to 20 symbols to obtain the quote and net change on each stock and the market value of the total portfolio.

By pressing a designated key the caller can listen to "York Street Talk," a reminder of the release dates for various economic indicators and bond auctions as well as other timely information.

York Securities, Inc., founded in 1979 by David J. Corcoran, is located at 160 Broadway, New York, N.Y. 10038, Telephone: 212-349-9700; 800-221-3154. FAX: 212-619-1593.

NEW YORK (APRIL 25) PR NEWSWIRE - Investcorp, an international investment group, announced today that it has executed a contract with Batus, Inc., the U.S. holding and management company of B.A.T. Industries plc, to acquire Saks Fifth Avenue, one of the nation's leading retail chains, for approximately $1.5 billion, including the assumption of certain liabilities. The transaction is expected to be completed in approximately 10 weeks.

"Saks Fifth Avenue is one of the premier retailers in the world and we are absolutely delighted to be associated with it," said Paul Soldatos and Savio Tung, the two Investcorp Management Committee members who led the firm's efforts on the acquisition. "We intend to maintain Saks Fifth Avenue's philosophy of quality and service which has made it one of the nation's most successful retailers. Accordingly, we have committed substantial equity to Saks Fifth Avenue in order to provide financial strength and stability, help it maintain its leadership in its industry, and give it the opportunity to grow domestically and internationally", they said.

Investcorp has extensive investment experience in the retail sector through its current or previous ownership of businesses such as Tiffany, Gucci, Pebbles department stores, Catherines, Sports Unlimited, New York Department Stores of Puerto Rico and Color Tile.

Manufacturers Hanover Trust Company is leading the senior financing in the acquisition. A spokesman from the bank said, "This is a very well capitalized transaction which few firms would have been capable of accomplishing. We are pleased to be associated with a strong sponsor like Investcorp."

Investcorp has offices in New York, London, Switzerland and Bahrain. It provides investment and advisory services for international clients. Acting as a principal and intermediary, Investcorp engages in corporate investment, real estate investment, funds management and proprietary trading activities.

ORLANDO, FL (APRIL 25) PR NEWSWIRE - The directors of Westinghouse Electric Corp. (NYSE: WX) today announced an increase in the quarterly dividend on its common stock from 60 to 70 cents a share.

The directors also approved a two-for-one common stock split for shareholders of record at the close of business on May 5, 1990. The

70-cents-per-share dividend is on a pre-split basis.

The new quarterly dividend will be paid on June 1, 1990, to shareholders of record at the close of business on May 5, 1990. Chairman John C. Marous noted that "the quarterly dividend increase achieves our corporate target."

The directors also approved an increase in the number of authorized shares of common stock of the corporation from 240 million to 480 million. Westinghouse had 145,744,576 shares outstanding as of March 31.

NEW YORK (APRIL 25) PR NEWSWIRE - Witco Corporation (NYSE: WIT) today reported net sales for the first quarter 1990 of $395,248,000, compared to $399,546,000 in the same period of 1989.

Net income for the first quarter of 1990 was $14,534,000, or 63 cents per common share, compared to net income of $20,254,000, or 86 cents per common share for the same period of 1989. 1990 income represents a decrease of 15 percent from 1989 income before the special gain of $3,110,000 from the sales of a product line.

"The inability to pass on higher crude oil costs resulted in lower profit margins for the 1990 first quarter," said Witco chairman William Wishnick. "However, these results reflect a two percent improvement over fourth quarter 1989 results before environmental and plant shutdown reserves. Because of the declining cost of crude oil, we are cautiously optimistic about the results for the remainder of the year."

Witco manufacturers specialty chemical and petroleum products and engineered materials with 1989 annual sales of approximately $1.6 billion.

#90115p7061 04/25/1990 ~PR Newswire
WORCESTER, MA and PARIS, FRANCE (APRIL 25) PR NEWSWIRE - Norton Company (NYSE: NRT) and Compagnie de Saint-Gobain today jointly announced that they have signed a definitive merger agreement providing for Norton shareholders to receive $90 in cash for each of their shares.

The merger will take the form of a fully financed cash tender offer to commence by April 30, 1990, in which a wholly owned subsidiary of Saint-Gobain will offer $90 for each of Norton's common shares. The tender offer will be followed by a cash merger at the same price. The offer is conditioned on, among other things, at least two-thirds of Norton's common shares being tendered pursuant to the offer.

The merger was jointly announced by John M. Nelson, chairman of Norton, and Jean-Louis Beffa, chairman of Saint-Gobain.

Norton and Saint-Gobain said the major premises of their merger are that Norton's headquarters will remain in Worcester, other principal manufacturing operations will be maintained, employee policies and benefits will be continued at present levels, and the company will continue to operate under the Norton name.

Both companies said they are committed to achieving the goals of Norton's five-year strategic plan, which provides for growth in both research and development, including advanced ceramics and diamond film, and its capital investment plans. They also said Norton will continue its longstanding policy of increasing charitable contributions and community support.

To achieve continuity of management, Saint-Gobain has requested that Norton enter into employment contracts with Nelson and 12 key executives. It is Saint-Gobain's intention that Norton continue to operate as a separate company with a board of directors consisting of Norton management present outside directors of Norton, and designees of Saint-Gobain, including Beffa.

Saint-Gobain ranks among the top 100 industrial companies in the world. It has annual sales of more than $11 billion. In recent years, it has become one of the strongest world producers of industrial ceramics. It employs 88,000 people and operates 350 plants in the U.S. and 20 other countries.

Norton Company is the world's largest manufacturer of abrasives and a leading producer of engineering materials, including advanced ceramics, performance plastics, and chemical process products. Norton had 1989

sales of approximately $1.5 billion. It employs 16,000 people and operates 113 plants in the United States and 25 other countries.

Norton shareholders will be entitled to the $0.50 per share dividend declared on March 29 and payable June 4 to shareholders of record on May 14, no matter when the tender offer closes.

#90115p7062 04/25/1990 ~PR Newswire

ROCHESTER, NY (APRIL 25) PR NEWSWIRE - Rochester Telephone Corp. (NYSE: RTC) today reported net income of $11.6 million or $.43 per common share for the first quarter of 1990. This compares with net income of $13.7 million or $.51 per common share in the first quarter of 1989.

Total revenues and sales increased 4.9 percent for the quarter, reaching $142.4 million, compared with $135.8 million in the first quarter of 1989. Telephone Group revenues rose 7.5 percent to $93.4 million; Telecommunications Group sales of $49.0 million were virtually even with those of the corresponding quarter of 1989.

Consolidated operating income was $26.1 million for the period, a 3.8 percent decrease from the first quarter of 1989. While operating income for the Telephone Group increased slightly over the year-ago period, to $24.6 million, operating income for the Telecommunications Group declined by $1.2 million for the quarter.

Under the terms of the Rochester company's rate case effective Jan. 3, 1990, the company is allowed higher depreciation rates, which accelerates the rate of recovery of capital assets. Consolidated depreciation expense increased $3.5 million over the year-ago quarter, representing almost half of the $7.6 million increase in consolidated costs and expenses for the quarter.

The acceleration of capital recovery contributed to a 33 percent improvement in cash flow from operations for the quarter. Net cash provided by operating activities was up $5.0 million over the corresponding period last year, reaching $20.0 million.

Two new companies joined Rochester Tel in the first quarter of 1990, another transaction was closed in April, and acqusitions of another four are pending.

Hasselwander announced the results at the company's 1990 Annual Meeting held at the Margaret Woodbury Strong Museum in Rochester.

Rochester Telephone currently has 23 telephone operating companies in New York, Pennsylvania, Indiana, Illinois, Michigan and Wisconsin. Its Telecommunications Group subsidiaries, engaged in long distance services, network systems and radio services, operate in New York State, the Northeast and the Mid-Atlantic region.

EAST BERLIN (APRIL 25) PR NEWSWIRE - Avon Products Inc. (NYSE: AVP) is bringing West European-style cosmetics and the free market system to East Germany this week by introducing its highly successful door-to-door selling operation here.

Avon, the largest selling brand of cosmetics in the world, becomes the first American beauty company and the first direct seller to enter East Germany.

Avon estimates it could capture a five to ten percent share of the East German cosmetics market estimated to be $760 million. The market itself is expected to grow dramatically over the next five years, up to $2 billion by mid-decade.

"East German men and women know and are receptive to Avon because their relatives in the West have been sending them products for years," said Hans Boscheinen, president of Avon Germany. "And surveys show that cosmetics are among the top five items that East Germans will buy with their newly exchanged West marks."

Boscheinen said he has had enthusiastic response from East German women whom Avon contacted in a direct mail test in February to determine whether they were interested in selling or buying Avon products.

"We received some real love letters from East German women," said Boscheinen. "They wrote that they couldn't believe how beautiful our products are and that they didn't know so many products existed."

In a recent survey, East Germans said they need basic products -- shampoo, deodorant, after shave, bath, skin care and make up products -- and said there is great demand for reasonably-priced, quality products.

The company has named a director of East German operations and is creating independent sales organizations in Berlin, Leipzig, Dresden, Erfurt and Karl Marx Stadt. The number of Representatives in East Germany could eventually number 20,000 or more.

Avon is offering consumers some 220 products through a 32-page brochure. Products will be supplied by Avon's distribution center near Munich, West Germany.

The company also is offering a meaningful earning opportunity for East German women. Although about 80 percent of East German women work, Avon expects many to be interested in part-time selling.

Avon, whose products are sold in more than 100 countries around the world, has 1.5 million independent sales representatives. The company's sales last year were $3.3 billion.

NEW YORK (APRIL 25) PR NEWSWIRE - David E. MacWhorter has been appointed vice president-sales and marketing of Image Business Systems Corp., effective immediately.

The announcement was made by David E. Y. Sarna, president and chief executive officer of IBS, the New York City-based developer of ImageSystem(TM), which less than two years after its formation has evolved into a major player in the quickly growing field of transaction- oriented document image processing.

Until the appointment, MacWhorter had been director of worldwide imaging for Wang Laboratories, where he was responsible for the marketing, product planning and management of Wang's imaging product line. After IBM Corp., Wang is generally considered the number 2 imaging vendor.

MacWhorter said, "I'm pleased and pleasantly surprised to be joining IBS, which has become a competitive force in imaging. Leaving Wang was not in my plans, but IBS made a very positive case for where it was headed, and my role in helping get there."

IBS has recently made public a series of product, management and business-relationship developments reflecting a year-long effort to standardize its ImageSystem imaging software platform and bring it to a broad market. IBS announced ImageSystem Version 2.0 available immediately and indicated it would be available in the fourth quarter using the new IBM RISC System/6000(TM) as its CentralStation(TM) server.

MacWhorter had been with Wang for over 11 years; he started in the computer industry with IBM in White Plains, N.Y., for six years. MacWhorter received his B.A. in marketing from Campbell College, North Carolina. MacWhorter, his wife Helene and their two sons will be relocating from Andover, Mass., to the New York area.

IBS is an IBM Business Partner-Cooperative Software Program Supplier for ImageSystem. Headquartered in New York, IBS is owned by its employees and private investors, including IBM and Warburg, Pincus Capital Co. L.P. IBS also has offices in Austin, Texas, Wilmington, Del.; Westport, Conn. and Stillwater, Okla.

PHILADELPHIA (APRIL 25) PR NEWSWIRE - Scott Paper Co. (NYSE: SPP) today announced that it is planning to locate its proposed state-of-the-art U.S. tissue paper mill in the Midwest and is currently optioning land near the Ohio River in Indiana and Kentucky.

Last November, the Scott Board of Directors approved steps which would lead to tissue capacity expansion in support of the Company's consumer and

commercial tissue businesses in the United States. At present Scott does not have the capacity to meet its current demand and sustain the rate of growth in its U.S. tissue business. As part of that expansion, the Board authorized the selection of a site and for the eventual construction of a new papermaking and converting facility. The Board of Directors must still approve the final configuration and funding for the new mill.

According to Philip E. Lippincott, Scott's chairman and chief executive officer, a large part of the new mill's pulp will come from recycled waste paper. The Company will also utilize virgin pulp shipped to the site from other locations. No pulp mill is planned for the site.

"Although Scott currently uses about 20 percent recycled fiber in its tissue products worldwide, the use of additional recycled paper at our new mill will be an important step in our plans to increase our use of this fiber," said Mr. Lippincott.

He also indicated that the Company has acquired or is seeking options for three possible sites for the new mill. One site is located near Charlestown, Indiana which is across the Ohio River from Louisville, Kentucky, and another site is in Posey County, Indiana near Evansville, Indiana. In Kentucky, the Company has options on a site near Owensboro, Kentucky.

According to Mr. Lippincott, the final site selection, which is expected to take place within a year, will be based on a set of criteria which includes site characteristics, access to transportation, gaining environmental and building permits on a timely basis, community acceptance and support, obtaining favorable utility contracts, and economic incentives available from local and state governments.

Scott indicated that the mill, like most U.S. papermaking and converting mills, is expected to cost more than $200 million. It is expected to employ about 300 to 500 people from the surrounding community of the mill site. The Company hopes to begin construction in 1991.

#90115p7080 04/25/1990 ~PR Newswire

NEW YORK (APRIL 25) PR NEWSWIRE - The investment banking firm of Benedetto, Gartland & Company, Inc., announced today that the manager and other key members of the private placement group at Merrill Lynch Capital Markets have joined the firm in a major expansion move.

Benedetto, Gartland said also that the firm's name will change to

Benedetto, Gartland & Greene, Inc. with the addition of this leading private placement team.

Key additions include Jerome P. Greene, formerly managing director of Merrill Lynch and manager of the private placement group; Philip B. Pool, Jr., formerly managing director in the private placement group; and Benjamin J. Sullivan, Jr., formerly director in the private placement group.

M. William Benedetto, co-founder of the firm, said, "We are delighted by the addition of these outstanding professionals. Their arrival positions the firm to build on our current private placement strength with the best talent in the business."

Greene said, "I speak for my colleagues in expressing our excitement about our association with such a fine investment banking firm. The possibilities in the private market are enormous, and now we're poised to take full advantage of them. We feel we've gained a new independence which will enable us to build relationships and serve our clients in an even more personal and effective manner."

Greene noted that the placement of debt and equity in the private market totaled more than $165 billion last year. Growth has been especially rapid in the past few years, with sales of unregistered securities in 1989 totaling more than 35 percent of U.S. corporate financing, while accounting for only 22 percent in 1980.

Greene predicted that the market's growth would continue to be rapid, especially in the institutional investment area where his group has specialized. The group has raised more than $50 billion in private placements over the past five years. It has developed particular expertise in placing institutional partnerships, both domestically and internationally.

Greene noted that the Securities and Exchange Commission has just ordered a change to its Rule 144a to allow the wider trading of unregistered securities for institutions holding securities which cost more than $100 million.

"The growing liquidity, balance, and cost-effectiveness of the private securities market will increasingly draw the major institutional investors " Greene said.

Benedetto, Gartland & Greene, Inc. was founded as Benedetto, Gartland & Company, Inc., in 1988 by Benedetto, a former executive vice president and manager of Dean Witter Reynolds' investment banking division; and by Arthur Gartland, formerly a managing director with Kidder, Peabody & Co., Inc., and also of Dean Witter. Their aim from the start was to build an

investment banking firm providing expert advice and attention to clients in growing niches.

In its first year, Benedetto, Gartland help to complete deals valued at well over $1 billion. Gartland noted that the firm has emphasized the quality and independence of advisory services, instead of putting its own equity capital into play as has been the case with some of the largest Wall Street firms.

Greene, 48, joined Merrill Lynch in 1981. Before then, he had managed the private placement group at Salomon Brothers. He holds a master's degree in business administration from the University of Massachusetts and obtained his undergraduate degree from Boston College. Greene also served as a naval officer for four years.

Pool, 36, joined Merrill Lynch in 1985. Earlier, he was a vice president in the private placement group at Kidder, Peabody, and served as a corporate lending officer of The Bank of New York. Pool holds a M.B.A. degree from Columbia University and a B.S. degree from the University of Virginia.

Sullivan, 36, joined Merrill Lynch in 1986 after serving as a vice president in the investment banking department of Dean Witter Reynolds Inc., and as a corporate lending officer of The Bank of New York. He holds a M.B.A. degree from the University of Virginia and a B.A. degree from the University of North Carolina at Chapel Hill.

In a separate announcement made just last month, the firm said that Warren B. Idsal had joined the firm from Elders Finance Group, where he was co-head and director of its merchant banking and leveraged buyout unit, Elders Capital Partners Inc.

In addition to its enhanced private placement capability, Benedetto, Gartland & Greene, Inc., headquartered in New York City's Rockefeller Center, provides a wide-range of advisory services with respect to valuations, capital structure, mergers and acquisitions, recapitalizations LBOs, shareholder relations, and capital raising activities.

#90115p7084 04/25/1990 ~PR Newswire

ROSLYN HEIGHTS, NY (APRIL 25) PR NEWSWIRE - The Harvey Group Inc. (AMEX: HRA) today reported that revenues and net income for the fiscal year ended Jan. 27, 1990, were $40,131,910 and $873,621 ($.35 per share), respectively, as compared to $35,966,443 and $1,425,811 ($.54 per share) for the prior year. Fiscal 1990 net income also include a gain of $598,499 ($.24 per share) relating to the settlement of certain pension obligations. For the 13 weeks ended Jan. 27, 1990, revenues and net income were $12,436,905 and $447,521 ($.18 per share) as compared to $10,689,443 and $412,811 ($.16 per share) for the same period last year.

The increases in revenues for fiscal 1990 from fiscal 1989 are attributable to the expansion in operations of Harvey Electronics, the consumer electronics business of the company, and additionally, increased commission income of The Boerner Company, the company's food brokerage division, resulting from new principals.

Net income decreased in fiscal 1990 from fiscal 1989 primarily as a result of additional nonrecurring expenses (approximately $380,000) incurred with the reversion of certain leases previously assigned to a competitor on which it defaulted. In addition, there were increases in occupancy costs as a result of the food brokerage division's move to a new location as well as costs and related expenses associated with the hiring of additional manpower necessary to service the food brokerage division.

The Harvey Group Inc. is engaged in the food brokerage business and the retail sale and service of consumer electronic equipment.

WILTON, CT (APRIL 25) PRNEWSWIRE - Preferred Health Care, Ltd. (AMEX: PY) today announced that it has entered into agreement with Raytheon Company (NYSE: RTN) for the delivery of Preferred Health Care's managed mental health and substance abuse service delivery system to Raytheon employees and their families beginning on June 4, 1990.

The Raytheon Company, headquartered in Lexington, Mass., provides health

benefits to about 43,000 employees, and their families, throughout the United States under this program.

"We are very pleased to have been chosen by Raytheon to provide our managed mental health and substance abuse services in support of their health benefit plans," said David J. McDonnell, D.S.W. Preferred's chief executive officer.

Earlier this year Preferred announced it had entered into agreements with Federal Express, The Episcopal Church Clergy and Employees' Benefit Trust and Maricopa County, Ariz., for delivery of its managed mental health and substance abuse delivery system to employees and their families.

Preferred Health Care is the nation's leader in managed mental health and substance abuse care. The clients serviced by Preferred Health Care represent many of the Fortune 500 companies and include over 4.5 million lives.

BUFFALO, NY (APRIL 25) PR NEWSWIRE - The appointment of William A. Buckingham to executive vice president of First Empire State Corporation (AMEX: FES) and M&T Bank was announced by First Empire State Corporation. Buckingham will be responsible for developing and implementing a coordinated business strategy for First Empire's retail banking activities.

Buckingham will assume his new posts on April 30, 1990, after a 17-year career at Manufacturers Hanover Trust Company where, for the past five years, he has been executive vice president in charge of its branch banking division. He had also been responsible for Wheelease, Inc., a nationwide automobile leasing subsidiary, and for Manufacturers Hanover Educational Services, Inc., which markets student loans at colleges and universities throughout the country.

In a companion action, First Empire State Corporation also announced the appointment of Robert E. Sadler, Jr. to executive vice president-commercial banking. In this new position, Sadler will develop and implement a coordinated commercial banking strategy for First Empire State Corporation. He will also continue his current responsibilities at M&T Bank as executive vice president of commercial banking, a position which he has held since affiliating with M&T Bank in October 1983 after a 13-year career with Chemical Bank.

Buckingham is a graduate of Rochester Institute of Technology where he serves as a trustee. He is a member of the board of directors of the Consumers Bankers Association and the Senior Advisory Council of the Conference of State Bank Supervisors. He also serves on the Legislative Policy and Convention Committees of the New York State Bankers Association.

ERIE, PA (APRIL 25) PR NEWSWIRE - Arrendadora International of Mexico has ordered 100 GE Super 7 locomotives, GE Chairman John F. Welch. Jr. announced today at the company's annual shareowners meeting. The $168 million order, which included maintenance parts, is GE's largest locomotive export order in recent years.

Arrendadora International, Mexico's leading leasing company, will lease the locomotives to Mexico's national railroad, Ferrocarriles Nacionales de Mexico. The lease is the largest ever by Arrendadora.

"This order has been approved for Export-Import Bank guarantees," said Michael D. Lockhart, vice president - GE Transportation Systems. "Congressman Tom Ridge provided critical leadership in Washington on this matter. Thanks also go to Senators John Heinz and Arlen Specter, and Representative William Clinger, for their invaluable help with the Mexican delegation."

The GE Super 7 is a 3000 horsepower, six-axle locomotive that incorporates many of the systems of the advanced Dash 8 locomotives in service with many North American railroads. Rebuilt Super 7 locomotives are already in service in Mexico. The last new GE locomotives joined the fleet in 1984.

The locomotives will be built in Erie, headquarters for GE Transportation Systems. The first 50 units are slated for delivery late this year and the remainder will be shipped in early 1991. The order will help balance production at the Erie plant and will require minimal additions to the workforce.

MONTREAL (APRIL 25) PR NEWSWIRE - Dominion Textile Inc. (Montreal: DTX) announced today the establishment of two voluntary programs intended for the corporation's shareholders who hold a small number of shares.

The Common Share Sell Program is offered to shareholders of record on April 24, 1990, who hold less than 100 shares and allows them to sell these shares without incurring brokerage fees or other charges.

The Common Share Buy Program is offered to shareholders of record on April 24, 1990, who hold less than 100 shares. These shareholders can buy additional shares to increase their total holding to 100 shares (board lot) without incurring brokerage fees or other charges.

Dominion Textile said the programs are designed to meet the requests of a number of shareholders and also permit the corporation to reduce administration costs in servicing a large number of small shareholder accounts, while allowing existing odd-lot shareholders to build up their holding to a board lot.

These programs have been accepted by the Toronto Stock Exchange and the Montreal Exchange in accordance with their policies regarding "Small Shareholder Selling and Purchase Arrangements."

The programs will be conducted by the Royal Trust Company acting as Dominion Textile's agent.

The programs are only in effect between May 7 and June 8, 1990.

#90115p7101 04/25/1990 ~PR Newswire

SKOKIE, IL (APRIL 25) PR NEWSWIRE - Brunswick Corporation (NYSE: BC) today reported net earnings of $14.7 million, or 17 cents per share, on sales of $685.6 million for the first quarter ended March 31, 1990. These results compare with sales of $791.1 million and net earnings of $17.2 million, or 20 cents per share, in the first quarter of 1989.

"We are encouraged with our results in light of the continued softness in marine sales," stated Chairman, President and Chief Executive Officer Jack F. Reichert. "The cost and inventory reduction programs we initiated last

year to deal with changing market conditions are favorably impacting our results.

"In our marine segment, sales declined 20 percent to $474.5 million and operating earnings were down 26 percent to $23 million. This sales decline reflects the continued softness in industry retail activity and our ongoing efforts to maintain appropriate dealer inventory levels, " he explained.

Sales in the recreation segment increased 15 percent to $114.4 million and operating earnings were up 28 percent to $18.7 million, according to Reichert.

"These gains reflect strong performances by our two bowling operations, the Brunswick Recreation Centers and Brunswick divisions," he said.

Technical segment sales increased one percent to $96.7 million. Operating earnings were $3.6 million, a one-third decline from the prior year's levels.

The company continues its efforts to sell the businesses of the industrial products and Technetics divisions, both part of the company's technical segment.

"The process is taking longer than we anticipated, but we are moving ahead. We still anticipate that when these sales are completed, they will not have a material impact on earnings," Reichert stated.

Headquartered in Skokie, Ill., Brunswick Corporation serves worldwide markets in the marine power, pleasure boating, recreation, defense/aerospace and industrial areas. Its stock is traded on the New York, Tokyo, London, Pacific and Midwest Stock Exchanges.

CONTACT: William R. McManaman, vice president-finance, 708-470-4840, or Ross H. Stemer, director-investor relations, 708-470-4851, both of Brunswick.

#90115p7104 04/25/1990 ~PR Newswire

CALGARY, ALBERTA (APRIL 25) PR NEWSWIRE - Shell Canada's (Toronto, Alberta, Montreal, Vancouver: SHC) consolidated earnings for the first quarter of 1990 were $63 million or 56 cents per Class "A" Common Share compared with earnings for the first quarter of 1989 of $117 million or $1.04 per share. The first-quarter earnings were in line with the Corporation's 1990 operating plan.

Resources recorded a modest increase in earnings compared with the first

quarter of 1989 primarily on the strength of higher oil prices. Chemicals earnings decreased for the first quarter of 1990 compared with first-quarter 1989 results due to lower chemical prices. Oil Products reported reduced first-quarter earnings as a result of higher selling and general costs and lower sales volumes.

Cash flow from operations for the first quarter of 1990 was $188 million, down from $216 million for the corresponding period of 1989. Lower cash flow from reduced earnings in Oil Products and Chemicals was partially offset by improved cash flow in Resources.

Capital and exploration expenditures were $138 million for the first quarter of 1990 compared with $124 million for 1989. Spending of $98 million in Resources was concentrated on natural gas exploration and development activity in Western Canada, but also included expenditures on a well in the MacKenzie Delta and another in offshore Eastern Canada.

Oil Products expenditures of $21 million included $12 million for marketing projects to enhance Shell's retail and aviation markets and $9 million for manufacturing projects.

Corporate expenditures were $18 million for the first quarter of 1990 and included spending of $10 million on the office building being constructed in Calgary.

Resources earnings were $37 million, up from the first-quarter 1989 results of $35 million. Increases in earnings were a result of higher prices for crude oil and natural gas liquids.

Natural gas prices also improved due to contracted price increases but these positive impacts were partially offset by lower sales volumes for natural gas and natural gas liquids. Exploration expense increased in 1990 compared with the first quarter of 1989.

Natural gas sales volumes decreased three percent to 19.3 million cubic meters a day. Gross production of crude oil and natural gas liquids decreased 12 percent to 9,451 cubic meters a day, primarily as a result of reinjection of ethane due to a decrease in market demand.

Improvements in offshore sulphur demand resulted in a 16 percent increase in sulphur sales volumes to 3,981 tons a day, but overall sulphur earnings were down due to lower prices.

#90115p7105 04/25/1990 ~PR Newswire

HOUSTON (APRIL 25) PR NEWSWIRE - Tenneco Inc. (NYSE: TGT) today reported net income of $134 million or $1.03 per common share for the first quarter of 1990 compared with $109 million or 82 cents per common share for the first quarter of 1989, an increase of 26 percent in earnings per share.

Revenues were $3,602 million for the first quarter of 1990, an increase of $283 million from those reported in the comparable 1989 period.

Operating income (pre-interest, pre-tax) was $315 million for the quarter versus $272 million recorded in the first quarter of 1989. This increase was led by strong performances in the farm and construction equipment and shipbuilding businesses.

Operating income for Tenneco Gas totaled $90 million during the first quarter of 1990 compared to $112 million during the first quarter of 1989. Despite the decline for the quarter, results for the entire year are expected to compare favorably with those of last year.

Transportation volume capacity was limited during the first quarter due to the need to replace stored gas that was depleted during the extremely cold month of December. This limited capacity combined with warmer weather during the quarter contributed to overall lower sales and transportation volumes in both the jurisdictional and non-jurisdictional businesses. Lower rates, implemented in conjunction with the current rate filing, and continued softness in methanol prices also had an adverse impact on operating income.

First-quarter 1990 operating income for J I Case was $49 million versus $1 million for the first quarter of 1989. The increase resulted from higher volumes and prices, primarily for large farm tractors and combines, from the benefits of ongoing cost reduction programs, and from the profit realized from the sale of Case's 50 percent ownership in Intertractor, a German producer of equipment for tracked vehicles.

Tenneco Automotive's operating income was $42 million in the first quarter of 1990, down from $49 million in the first quarter of 1989. Although aftermarket sales improved for both the ride control and exhaust products businesses, operating income declined due to higher manufacturing costs in Europe resulting from a customer's strike, the expected start-up costs associated with Automotive's newly acquired brake business, and adverse economic conditions in Brazil.

#90115p7106 04/25/1990 ~PR Newswire

WEST LONG BRANCH, NJ (APRIL 25) PR NEWSWIRE - First quarter net income of

Electronic Associates, Inc. (NYSE: EA) rose to $960,000 or 34 cents per common share in 1990 from $175,000 or 6 cents per share a year earlier. Pre-tax profits amounted to $1,465,000 in the period ended March 31, 1990, versus $296,000 in 1989. This year's results include a gain of $1,378,000 before tax and $909,000 or 32 cents per share after tax from the sale in February of a former EAI subsidiary in Japan.

Book value climbed to $3.85 per share at March 31, 1990 from $3.35 at year end and $3.19 a year ago.

Sales in 1990 were $8,994,000, compared with $9,536,000 in 1989. A seasonal factor in EAI's two principal businesses, Contract Manufacturing and Field Service, tends to make the first quarter the weakest period of the year. As previously reported, the effect was masked last year by a particularly strong first quarter by the company's third business, Simulation Computers.

Electronic Associates, Inc. sells services of two principal types: manufacturing for products designed and marketed by customers, and independent maintenance of electronic equipment. The company also designs, manufactures and sells specialized computers for complex simulation applications and real-time data handling products.

#90115p7117 04/25/1990 ~PR Newswire

PRINCETON, NJ (APRIL 25) PR NEWSWIRE - Cytogen Corp. (NASDAQ: CYTO) today reported revenues of $1,689,000 for the 13 weeks ended March 31, 1990, which approximates the $1,733,000 in revenues reported for the first quarter of 1989.

These revenues were derived from existing arrangements with Sterling Drug Inc., EuroCetus N.V., and Bracco Chimica Industria S.p.A.

Operating expenditures for the first quarter of 1990 were $5,262,000 or 6 percent below the $5,596,000 reported during the same period in 1989. The reduction is spending was attributable in part to a one-time charge recorded in 1989 of $700,000, incurred when the company discontinued its facilities relocation plans. The net loss of $3,573,000 was 8 percent less than the net loss of $3,863,000 reported for the 13 weeks ended April 1, 1989.

The net loss per share of common stock was 32 cents for the first quarter of 1990 and included accrued preferred stock dividends of 3 cents per share of common stock. The net loss per common share in the first quarter

of 1989 was 32 cents.

In commenting on the financial results, Martin D. Cleary, vice president-finance and administration and chief financial officer, said, "While results for our first quarter were as expected, revenues for the remainder of 1990 will rely more heavily on new partnership arrangements. The timing and certainty of these new arrangements is not predictable and consequently, variability in future revenues can be anticipated."

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in such a way that the function of the antibody as a delivery vehicle is optimized. With major emphasis on human cancer, current development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

#90115p7119 04/25/1990 ~PR Newswire

NEWARK, NJ (APRIL 25) PR NEWSWIRE - The Prudential Insurance Company and The Chase Manhattan Bank (NYSE: CMB) today announced a joint venture which will allow the insurer to transmit health insurance payments and information electronically to hospitals.

The arrangement marks the first time an insurance company and a hospital will be able to exchange claim data, payment information on individual patients and payments, electronically. This will allow hospitals to reconcile their accounts faster.

Electronic payment will also save time and money by eliminating costs for mailing, check printing, security and storage, lost or stolen checks and forged endorsements. There is no charge to the hospital for electronic transmission.

Brandon Hospital in Tampa, Fla., the first Prudential Health Care System network hospital to participate in the pilot, received its first payment on March 23.

The Chase Manhattan Bank is the industry leader in processing automated clearing house (ACH) payments. In 1989, Chase originated more than 100 million payments through its ACH network, more transactions than the next four largest ACH banks combined.

In a 1987 study of insurance industry costs, Chase discovered that processing costs were $5 per claim. "Through our ACH network, we found a way to reduce that cost," said Robert Field, senior vice president of Chase's Worldwide Insurance Division.

Prudential's Joseph N. Carroll, vice president, group operations, said, "The Prudential is excited by the potential of this program. And we expect Chase Manhattan's expertise to save our clients money and to expedite reimbursements to hospitals."

The Prudential Group Department issued more than 33 million claim checks in 1989.

After the three-month pilot program at Brandon Hospital, which is part of Humana Inc., The Prudential and Chase will expand the payment system to other hospitals in the Humana chain. Eventually, the program may extend beyond hospitals to clinics, laboratories and other large health-care providers.

The Prudential, the nation's largest insurer, provides employee benefits to more than 20 million Americans. The Prudential Health Care System

includes Prudential's health maintenance organization, PruCare HMO, and Prudential Plus, its insured managed medical program.

#90115p7121 04/25/1990 ~PR Newswire

ALLENTOWN, PA (APRIL 25) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD) reported sales of $713.1 million and net income of $60.6 million, or $1.09 per share, for the second quarter ended March 31, 1990.

Sales and net income both increased seven percent compared to last year's second quarter sales of $668.9 million and net income of $56.7 million, or $1.04 per share. Substantially higher operating profits in strategic chemical product lines and strong performance in the worldwide gas business more than offset a significant decline in commodity chemical prices in the current quarter which unfavorably affected earnings per share by approximately $.18 compared to last year.

Results in both the current quarter and last year's second quarter included gains from nonrecurring items. The current quarter included after-tax gains of $6.3 million, or $.11 per share, primarily from the disposal of property in Europe. The year-ago quarter included after-tax gains of $5.0 million, or $.09 per share.

In commenting on the second quarter results, Air Products' Chairman Dexter F. Baker said, "Air Products' strong performance in strategic chemicals and gases indicate that our strategies to expand our worldwide gas business and to shift toward higher value chemical product lines are working. Our emerging environmental and energy systems business also showed significant improvement over the year-ago quarter."

In the second quarter, industrial gas sales and operating profits increased nine percent and seven percent, respectively, on higher worldwide merchant and on-site gas volumes. Compared to last year, European merchant prices improved while average U.S. merchant prices were equal to year-ago levels. Merchant gas prices in the United States reached their low point in the second half of last fiscal year.

In chemicals, overall sales were comparable to the year-ago quarter and operating profits were slightly lower. Profits in strategic chemicals increased substantially on higher volumes and margins. These excellent results virtually offset the profit decline in commodity chemicals.

The environmental and energy businesses achieved significantly improved results due to strong performance at the waste-to-energy and cogeneration

operating facilities of our equity affiliates.

The Equipment and Technology segment was profitable during the quarter due to a higher level of activity in the equipment component of the segment. Excluding the profitable sale of a small business in the year-ago quarter, results in the segment were improved over last year.

For the first half of fiscal 1990, Air Products' sales were $1,365.6 million and net income was $110.0 million, or $1.99 per share. The results for the comparable period in fiscal 1989 were sales of $1,309.5 million and net income of $117.8 million, or $2.15 per share. This year's first-half results included nonrecurring items of $6.3 million, or $.11 per share. Last year's first-half results included nonrecurring items worth $9.7 million after-tax or $.18 per share.

BETHLEHEM, PA (APRIL 25) PR NEWSWIRE - Pennsylvania Power & Light Co. (NYSE: PPL) today reported record earnings of $4.14 per share of common stock for the 12-month period ending March 31.

The new high in earnings is 54 cents a share, or 15 percent, above the level recorded during the same period a year ago, and it is 9 cents, or 2.2 percent, higher than the $4.05 a share reported at the end of 1989.

Charles E. Russoli, PP&L executive vice president and chief financial officer, said the main reasons for the earnings improvement can be attributed to the same factors that have had a positive effect on earnings in recent years -- growth in system sales reflecting aggressive marketing and economic development programs, effective cost management and the refinancing of high-cost securities at a lower cost.

In addition, he indicated that the company's strong generating capacity enabled it to add another dimension of revenues by entering into a number of capacity-related and transmission entitlement transactions with other electric utilities, which began in mid-1989.

"The financial health of the company has improved considerably in the last half of the 1980s. And, we expect that the positive factors we have been experiencing should result in a continuation of earnings improvement in 1990," Russoli pointed out.

PP&L supplies electric service to a 10,000-square-mile area of 29 counties of Central Eastern Pennsylvania. Among the communities it serves are Allentown, Bethlehem, Harrisburg, Hazleton, Lancaster, Scranton, Wilkes-Barre and Williamsport.

#90115p7131 04/25/1990 ~PR Newswire

HOUSTON (APRIL 25) PR NEWSWIRE - Noble Drilling Corp. (NASDAQ: NDCO) today announced that its subsidiary, Noble Bawden Drilling (West Africa) Ltd., has entered into contracts with Shell Petroleum Development Co. of Nigeria Limited ("Shell Nigeria") to place a shallow-water jackup rig and a posted barge in service in Nigeria.

The operator's requirements call for refurbishment, renovations, and mobilization of the units from the Gulf of Mexico to Nigeria by late Sept. 1990. The contract for each rig is for a two-year term with an option to extend annually. The company had previously announced and reported the receipt of letters of intent for these two drilling units.

Allan H. Lang has been named vice president and managing director of Noble Bawden Drilling (West Africa) Ltd. and will head the operations in Nigeria. Lang, a 14-year veteran of the energy field, has worked in various capacities in Peru, Colombia, Guatemala, and Madagascar, and most recently as vice president of marketing in the Houston office.

The company anticipates opening offices in Lagos, Port Harcourt and Warri to oversee the operations in Nigeria. Jim Day, president and chief executive officer, said, "These are significant contracts to the company and we are very pleased with the opportunity of working with Shell Nigeria."

In addition, the company has received a letter of intent from Shell Nigeria to enter into contract negotiations for the employment of a third drilling unit - a specially designed, high pressure posted barge.

The company anticipates mobilization of this unit, also located in the Gulf of Mexico at present, to commence early in the fourth quarter of 1990. The movement of the third rig is subject to the conclusion of a definitive agreement, the completion of equipment modifications and the satisfaction

of certain other conditions. Contract terms contemplated by the letter of intent have not been disclosed by the company.

Noble Drilling Corp. is a major drilling contractor providing offshore and onshore drilling services worldwide, with operations in the United States, Canada, the United Kingdom, East Africa, and the Far East. The company's common stock is traded on the NASDAQ/national market system under the symbol "NDCO."

SOUTH PLAINFIELD, NJ (APRIL 25) PR NEWSWIRE - Princeton Diagnostic Laboratories of America, Inc. (AMEX: PDA) (PDLA) announced that David C. Bernot has joined the company as vice president of laboratory operations and research and development.

Dr. Carlton E. Turner, PDLA's president and CEO, stated, "Mr. Bernot's eight years of hands-on experience and technical expertise will be invaluable in continuing PDLA's research and development in both the psychiatric and toxicological areas. Moreover, Mr. Bernot's proven laboratory management ability will allow us to expand our custom- designed laboratory services to meet our clients' unique needs."

Bernot is a graduate of Drew University and is currently working toward his doctoral degree at Rutgers University. PDLA is a specialized laboratory providing top of the line and full range of biomedical testing services to psychiatric hospitals, clinics and private physicians.

PDLA is also a NIDA certified laboratory authorized to provide drug testing services to government agencies and businesses regulated by the U.S. Department of Transportation, contracts for the Department of Defense and other industries subject to Federal drug testing guidelines.

PDLA's diagnostic drug tests utilize a forensic approach and are used as pre-employment drug screenings by businesses involved in transportation, oil and chemical, nuclear power, finance, security, general manufacturing, media and sports.

#90115p7141 04/25/1990 ~PR Newswire

HOUSTON (APRIL 25) PR NEWSWIRE - Sysco Corporation (NYSE: SYY) today

reported results for the fiscal 1990 third quarter and 39 weeks ended March 31, 1990.

During the quarter, sales grew to $1.9 billion, a nine percent increase above the $1.7 billion achieved in the third quarter of the previous year. Net earnings reached $28.5 million, or $0.31 per share, a 27 and 24 percent increase, respectively, over third quarter 1989 net income of $22.5 million, or $0.25 per share.

For the first nine months, sales totaled $5.6 billion, or 12 percent more than those recorded through the third quarter of fiscal 1989. Net income was $93.8 million, or $1.03 per share, a 23 percent increase when compared to the $76.1 million, or $0.84 per share, earned the prior year.

John F. Woodhouse, chairman and chief executive officer of Sysco commented "We are very pleased that the solid progress demonstrated during the initial six months of the fiscal year is being maintained. While the quarter's results are partially attributable to a relatively mild winter, sales momentum continues to build on a company-wide basis. Excluding the effects of acquisitions and inflation, real sales growth in our primary business, traditional foodservice, has gradually increased from about seven percent early in the year to nearly nine percent during the quarter just completed. Additionally, operating pretax margins of this segment registered moderate gains in year-over- year comparisons, as they have consistently since the final quarter of fiscal 1988."

Woodhouse added that Sysco's internal measure of annualized food price inflation remained at slightly less than three percent during the quarter, due to the lingering effects of severe December weather which limited supplies of some products.

Construction, expansion and modernization projects are continuing as planned. A major new facility in Los Angeles has been completed and consolidation of the two companies serving that market was concluded subsequent to the end of the quarter. Sysco's two Pittsburgh companies are in the final stages of merging operations into a recently constructed distribution center. Also a new facility in Phoenix, Ariz. is scheduled to be fully operational by late May.

Sysco is the nation's largest foodservice marketing and distribution organization. The company provides its products and services to approximately 225,000 customers located across the United States and western Canada. The Sysco distribution network currently covers virtually the entire continental United States including all of its 150 largest cities.

LEXINGTON, MA (APRIL 25) PR NEWSWIRE - Raytheon's board of directors today elected Thomas C. Ligon, Jr., a vice president of the $8.8 billion technology company.

Ligon, 53, is the assistant general manager for operations of Raytheon's Equipment Division, headquartered in Marlborough, Mass. The unit has approximately 10,500 employees, with additional major facilities in Wayland, Sudbury and Waltham, Mass., as well as Ontario, Canada.

"Tom has been selected as an officer of the company because of his demonstrated leadership and management performance during his 24 years of dedicated service within our most diversified electronics division," said Thomas L. Phillips, Raytheon's chairman and CEO.

Ligon earned his bachelor of science degree in electrical engineering from Virginia Polytechnic Institute in 1958. He joined the company in 1966 and held a number of increasingly responsible program management positions before being made the assistant general manager of the Equipment Division in 1988. The division builds radar and air traffic control systems, command and control displays; and communications systems for the U.S. and allied governments. The unit is also developing militarized computers under a licensing agreement with Digital Equipment Corporation.

Ligon resides in Wayland, Mass. Raytheon, headquartered in Lexington, Mass., is a diversified, technology-based company active in electronics, aviation, appliances, industry services, publishing and construction. It has more than 76,800 employees worldwide.

#90115p7146 04/25/1990 ~PR Newswire

DANBURY, CT (APRIL 25) PR NEWSWIRE - Union Carbide Corporation's (NYSE: UK) financial performance should be at or near the top of the chemical industry when the chemical business cycle turns up, according to Chairman Robert D. Kennedy.

Speaking to shareholders at the company's annual meeting here today, Kennedy said the business is "profitable and performing well in the face of a deepening chemical downturn that began last year. For the full year in 1989, our return on capital in the chemicals and plastics business placed us second among the top 10 publicly traded chemical companies in the United States."

The realignment of Union Carbide as a holding company underscores the responsibility of each of the company's three businesses to maximize shareholder value, Kennedy said. After examining a range of options for creating shareholder value, Kennedy added, management determined that the best way to add value and strengthen the businesses is to maintain the structure and flexibility we have and continue building our market and technology leadership, and our position as a low-cost producer.

"Maintaining our structure won't keep us from considering strategic alliances -- even for significant parts of our business -- when we believe that such an alliance would greatly add to their strength," he said.

"Carbide's improved performance in recent years is the result of a determined effort to create long-term value for our shareholders," said Kennedy. "We have closed down or sold marginal operations, modernized our plants, increased our investment in the high-value end of the chemical business, introduced new products, and expanded our technology licensing activities.

"Beyond that, with the help of Carbide people everywhere, we've created a far more efficient organization. Carbide is less bureaucratic, more flexible, more innovative, more comfortable with change than at any time in memory. And the entire company is infused with the idea that when it comes to quality and meeting customer needs, we must be the best in the business."

On Bhopal, Kennedy said, "One lesson is that we need to find better and quicker ways of getting help to disaster victims. If politics prevents help from getting through, they become victims a second time." He noted that last year the $470 million settlement was ordered and declared full and final by the Supreme Court of India.

Concerning South Africa, Kennedy said, "We're a lot closer to the end of apartheid than anyone could possibly have imagined a year ago. Now is not the time to quit. The presence of our affiliates in South Africa is important to our employees there. The affiliates, openly opposed to apartheid, benefit blacks generally, and we believe our presence there is in the best interest of stockholders."

Through the Hexagon Trust, which commits the income from Union Carbide investments in South Africa, black students, businesses and community organizations there benefit economically and can prepare for a future without apartheid.

CONTACT: D.N. Kernis, 203-794-6929, or E.W. Van Den Ameele, 203-794-6985, both of Union Carbide.

#90115p7147 04/25/1990 ~PR Newswire

MCDONALD, OH (APRIL 25) PR NEWSWIRE - McDonald Steel Corporation announced today its decision to exercise an option to purchase facilities the firm has leased from USX Realty Development, a division of USX Corporation (NYSE: X). Involved in the purchase agreement are: two rolling mills, several processing warehousing bays, a roll shop, a machine shop, a 25-cycle electric generating plant, three billet yards, railroad track and engines, miscellaneous water pumping, processing and disposal systems and all associated personal property. Of this, approximately 680,000 sq. ft. is under roof.

The company plans to finance the purchase through industrial development first mortgage revenue bond financing valued at $6,500,000...and obtained through the Community Improvement Corporation of Warren and Trumbull County and the Trumbull County Commissioners. Several major banks will administer the bonds.

This method of financing the purchase of industrial manufacturing facilities carries with it a stipulation that 15 percent of the funds be spent within the next two years on capital improvements. McDonald Steel's management plans to spend $600,000 on equipment such as a second or back-up motor generator set in their 25-cycle electric generating plant. An additional $1,000,000 will be used on meaningful improvements and renovation of the buildings and facilities: skylights and roof repairs, painting, lighting, crane repair, etc.

David Tod, chairman of McDonald Steel and chief executive of Torent, Inc., the venture capital company that helped found McDonald Steel, explained the board's decision to purchase the mills: "We weathered the start-up years, learned how to run a steel company with participative management, instituted a company-wide profit sharing plan and proved that we could deliver high quality products on time and at a decent return on our investment.

McDonald Steel Corporation was established in 1980. Twenty local area investors led by Torent, Inc. joined together with the management team to form McDonald Steel out of the ashes of the steel plant closings in the Youngstown area. No Federal, State, County or Municipal funds were used nor were any tax breaks provided.

McDonald Steel leased two bar mills from USX Realty Development. The mills are part of the former U.S. Steel McDonald Works which has been converted into an Industrial Park. In late 1981 the company started up the first of the two mills, a 14" Cross Country Hot Rolled Shape Mill. Then in 1983, it took an 8" Belgian Looping Hot Rolled Bar Mill out of moth balls. Today the company employs 175 people, with approximately 575 spin-off jobs (people who serve the company: contractors, truckers, etc.), ships 36,000

tons of bars and special shapes annually and enjoys a yearly sales volume of $30 million.

Special hot rolled carbon and stainless steel shapes from McDonald Steel are used to manufacture truck wheel rims, automotive ring gears and door hinges, concrete water pipe couplings (spigots), bridge decking and expansion joints, materials handling tram beams, gun barrels, locomotive bearings and railroad car parts. Angles, channels, flats, squares, ovals and half rounds are produced for various applications.

CONTACT: David S. Houck, president of McDonald Steel Corporation, 216-530-9118.

#90115p7150 04/25/1990 ~PR Newswire

WALL, NJ (APRIL 25) PR NEWSWIRE - New Jersey Resources Corporation (NYSE: NJR) today announced its financial results for the second fiscal quarter and the six months ended March 31, 1990.

Consolidated net income for the quarter was $9.5 million versus $13.2 million for the same period last year. Earnings per share were 71 cents in 1990 versus $1.19 in 1989.

For the six months ended March 31, 1990, consolidated earnings were $17.5 million versus $19.9 million in 1989. On a per-share basis, earnings were $1.32 versus $1.81 during the same period last year.

During the second fiscal quarter, NJNG experienced the warmest weather in its history. Weather for the quarter was 16 percent warmer than last year and 22 percent warmer than normal, which is based upon a 10-year average. If weather had been normal during the quarter, earnings would have been higher by $5.3 million, or 40 cents per share.

NJNG added 5,215 new customers during the first six months of the fiscal year, compared with 6,834 during the same period last year. NJNG expects to maintain an annual customer growth rate approaching 3 percent, which is strong compared to many natural gas distribution companies.

On March 21, 1990, the New Jersey Board of Public Utilities (BPU) approved a $17.3 million, or 6 percent, base rate increase for NJNG, or 66 percent of the amount originally requested by the utility. Almost a full year was required to settle this case, which was the longest lag in the past 14 years. While NJNG was generally satisfied with provisions of the BPU's decision, the time delay adversely affects fiscal 1990 earnings. As a result, the base rate increase will not be substantially reflected in earnings until fiscal 1991.

Commercial Realty & Resources Corp. (CR&R), NJR's real estate development subsidiary, showed improved earnings during the six-month period. Although real estate on state and national levels has shown a general decline, CR&R has achieved consistent success due to its focus on high-quality development.

NJR Energy Corporation, NJR's oil and natural gas exploration subsidiary, showed lower earnings for the six-month period due to higher operating and interest costs associated with its increased investment in oil and gas properties. Based upon the results of recent activity, however, NJR Energy expects an improvement in its financial performance during the balance of fiscal 1990.

CONTACT: Laurence M. Downes, 201-938-1483, or Glenn J. Phillips, 201-938-1112, both of New Jersey Resources.

#90115p7164 04/25/1990 ~PR Newswire

PHILADELPHIA (APRIL 25) PR NEWSWIRE - EDS (NYSE: GME) and Westmoreland Coal Company today announced the signing of a 10-year contract under which EDS will provide information technology (IT) services to Westmoreland, the low-sulfur coal producer and marketer headquartered in Philadelphia.

Beginning May 1, 1990, EDS will assume responsibility for all of Westmoreland's data processing and communications operations. Westmoreland's 37 information technology professionals will become EDS employees.

Larry Zalkin, senior vice president and chief financial officer of Westmoreland, said, "We consider this decision supportive of our strategic objectives by reducing our costs, enhancing our informational and technological capabilities, enabling us to provide superior customer service and gaining operational efficiencies."

The contract demonstrates EDS' growing presence in energy-related industries, where it is the largest provider of IT services.

"One of EDS' key strengths is its ability to act as a strategic business partner in delivering IT services that truly enhance its customers' long-term competitive position," said Ken Scott, president of EDS' Energy Division, which is responsible for the contract. "Also important is the addition of industry-specific expertise that comes with the Westmoreland professionals joining our EDS team."

Westmoreland's (NASDAQ: WMOR) coal sales in 1989 were $549.8 million from 19.6 million tons sold, ranking it 15th among the nation's coal producers based on tonnage sold, and 6th among United States coal exporters.

Westmoreland markets 66 percent of its coal to electric utilities and 34 percent to steel manufacturers. The company's own mining facilities are located in West Virginia, Virginia, Kentucky and Montana from which it produced 10.8 million tons. The remaining 8.8 million tons sold are sourced from other coal producers.

EDS has operations in 27 countries and is the leader in providing information technology services to customers around the world. The company employs about 2,200 people in the Philadelphia area. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

#90115p7172 04/25/1990 ~PR Newswire

MONTREAL (APRIL 25) PR NEWSWIRE - Shareholders at the annual meeting of United Westburne Inc. were told today by Chairman and Chief Executive Officer Sam Abramovitch that the company will continue to make new acquisitions in Europe and the United States in 1990. United Westburne is North America's largest integrated wholesaler of electrical, plumbing, heating, refrigeration, electronics and telecommunications supplies.

Over the last five years, the company's gross revenues have increased by a composite growth rate of 27.5 percent from $1.3 billion to $2.7 billion. Net earnings for the same period rose by 28.7 percent, while assets grew from $446 million to $1.24 billion. The company made 19 acquisitions and added 192 branches to its worldwide network during this period.

United Westburne operates in 16 U.S. states and is the second largest company of its kind in California. "Our aim is to become one of the largest distributors in the United States. To do so, we plan to make new acquisitions in the electrical distribution sector and expand the product lines available in our 67 U.S. branches," Abramovitch said.

Established in 1963, the company is expanding into the European market through its partnership with Dumez in CEDZ, a new distribution company based in France. CEDZ recently announced the purchase of 22.5 percent of Groupelec, France's forth largest distributor of electrical supplies, and expects to confirm shortly the acquisition of 66 percent of the capital stock of C.G.E. Distribution, France's third largest electrical supplies distributor with 1989 gross revenues of 2.5 billion francs.

According to Abramovitch, United Westburne's expansion strategy is simple. "As in the past, it consists of acquiring operations directly related to our area of expertise and stimulating interior growth by adding new product lines and expanding existing branch networks in established

markets."

Expanding internationally has proven successful for United Westburne, which now has $2.7 billion in annual gross revenues and 118,000 active customers.

The company has 7,400 employees in 22 independent divisions operating 455 branches in Canada and the United States. It markets 65,000 products and has over 1,300 suppliers in Canada and 600 in the United States.

COCONUT GROVE, FL (APRIL 25) PR NEWSWIRE - Watsco, Inc. (AMEX: WSOA, WSOB) announced today record earnings for its first quarter ended March 31 1990. During the three month period, net income climbed to $469,000 compared to $412,000 last year; primary earnings per share rose to 25 cents compared to 22 cents. Revenues also reached record levels increasing to $22,949,000 during the first quarter, compared to $19,253,000 during the same period last year.

A major contributor to Watsco's growth during the first quarter was its Gemaire subsidiary, which operates in the company's climate control segment. Gemaire's operating results continue to improve and reach record levels.

In the company's personnel services segment, its subsidiary, Dunhill Personnel System, Inc., opened or acquired company-owned offices in Princeton, N.J., St. Louis and Sacramento, Calif. since the beginning of the year. Continued growth through acquisition or opening of company-owned offices is planned for this very exciting segment of the company's business.

Watsco participates in the climate control industry through its distribution subsidiary, Gemaire Distributors, Inc. and various manufacturing subsidiaries which produce components under the Watsco, Cam-Stat and Rho Sigma brand names. The company also participates in the fast-growing personnel services industry through its Dunhill Personnel Sytem, Inc. subsidiary, which operates approximately 280 franchised and company-owned offices in the United States and Canada.

HOUSTON (APRIL 25) PR NEWSWIRE - Galveston-Houston Company (NYSE: GHX) today reported a net earnings increase of 243.5 percent for the first quarter ended March 31, 1990, compared to the similar three- month period in 1989. For the first three months of 1990, the company had net earnings of $1,587,000, or $.09 per share, as compared to $462,000 or $.04 per share for the first quarter of 1989.

Average shares outstanding were 16,988,899 for the first quarter of 1990 vs. 11,505,131 shares for the same period last year. Revenues for the 1990 period were $18,460,000, or 26.1 percent higher than the $14,635,000 of revenues reported for the 1989 first quarter.

The company further reported a 9.7 percent gain in its backlog of orders booked but not shipped for the 1990 first quarter compared to the previous quarter, and a 42.8 percent backlog gain compared to the first quarter of 1989.

During the first quarter of 1990, the company completed a 4.6 million share public common stock offering in which it received net proceeds of $21.4 million. Approximately $18.2 million of such proceeds were used to retire substantially all of the company's long-term bank indebtedness.

Galveston-Houston Company manufactures valve actuators and custom steel castings for the energy and other industrial markets and replacement wear parts and excavation buckets for the construction, mining and other earthmoving industries.

#90115p7197 04/25/1990 ~PR Newswire

DALLAS (APRIL 25) PR NEWSWIRE - TeleCom Corporation (NYSE: TEL) today reported a net loss of $26,000 ($0.01 per share) with revenues of $11,548,000 for the first quarter ended March 31, 1990, compared to net income of $217,000 ($0.06 per share) with revenues of $12,557,000 for the first quarter ended March 31, 1989.

The results for 1990 primarily reflect a $700,000 sales decrease at Meyer Conveyair as the 1989 results included a large shipment for a new can manufacturing facility. Management remains optimistic about Conveyair's outlook for 1990 as the company's backlog was approximately $1.3 million at March 31, 1990, as compared to $1.5 million at March 31, 1989.

Allen-Lewis reported approximately a $300,000 decrease in sales for the three months ended March 31, 1990, as compared to the same period in 1989 as a result of the delay in receipt of certain inventory shipments from the Far East. The company expects the revenue shortfall to be recovered in the near future as Allen-Lewis's backlog as of March 31, 1990, increased by nearly 14 percent as compared to the backlog at March 31,

1989. The lost gross profit dollars on the lower sales along with the impact of certain expenses associated with the company's assets held for sale primarily account for the reduction in the company's earnings.

TeleCom Corporation has interests in the manufacture of conveying and processing equipment for the food, beverage, can manufacturing and chemical industries and the wholesale distribution of air conditioning and heating products as well as souvenir, novelty and gift items.

BASKING RIDGE, NJ (APRIL 25) PR NEWSWIRE - AT&T (NYSE: T) today announced it has recently won contracts to provide long-distance service to more than 1,000 public telephones at five airports that were previously served by other companies.

AT&T already provides long-distance service for public telephones at 20 of the top 25 airports nationwide.

The airports AT&T won back include three Houston Airport System airports, Milwaukee's General William Mitchell International Airport and Omaha's Eppley Airfield. The Houston Airport System contract is valued at approximately $25 million for five years. The General Mitchell International agreement is part of a larger contract with Milwaukee County that is valued at $4.2 million for three years. The contract also includes long-distance service for public telephones at the Milwaukee County Zoo, the County Medical Complex and the County Courthouse.

Financial details of the contract with Eppley Airfield were not disclosed.

"We see these contracts as a sign that airport managers nationwide trust AT&T's ability to deliver the best combination of quality, services and prices to people who travel through their airports," said Gayle Jennings, airport accounts manager, AT&T.

ATLANTA (APRIL 25) PR NEWSWIRE - Shareholders of Equifax Inc. (NYSE: EFX) at the company's annual meeting today, elected J. Claude Chartrand to the Equifax board.

Chartrand is chairman and chief executive officer of Equifax Canada. Based in Montreal, Chartrand heads the operations of Equifax Canada's credit information services, collection services and insurance information services.

Chartrand began his Equifax career in 1956 as a field representative for the company's insurance and special services office in Montreal. He later served as manager in St. Laurent, Sherbrooke and Montreal before he joined the credit reporting and collection services company as national sales manager in 1972. Chartrand was appointed assistant vice president-sales in 1974, and within that same year, elected vice president. He served in that capacity until he was elected president in 1977.

In 1983, Chartrand was elected vice chairman and managing director of Equifax Canada and held that position until assuming his current responsibilities in 1989.

Chartrand is a former president of the Association of Credit Bureaus of Canada and the Credit Granters Association. He is past chairman of the International Credit Association and is a current member of the board of trustees of the National Foundation for Consumer Credit.

A Montreal native, Chartrand and his wife, Huguette, and their family, reside in Boucherville, a suburb of Montreal.

Commenting on the election, C.B. Rogers Jr., Equifax Inc. president and chief executive officer, said:""Mr. Chartrand's knowledge and insight into the North American insurance and credit industries will be a valuable asset to the Equifax board. I am very pleased with the selection of Mr. Chartrand."

Equifax Inc. is the leading provider of information for consumer financial transactions. With 16,000 employees in 1,100 locations in the United States, Canada and in Europe, Equifax provides information services and automated systems that help its customers evaluate risk and market products and services. Equifax's revenues for the year ended Dec. 31, 1989, were $840 million.

MANILA, PHILIPPINES (APRIL 25) PR NEWSWIRE - Atlas Consolidated Mining (AMEX: ACM.B) today reported a net profit of $3.802 million, or $.045 a share, compared to $15,382 million, or $0.184 per share, in the same period a year earlier.

Metals production for the first quarter of 1990 improved significantly compared to the first and fourth quarters of 1989. The lower profit in this year's first quarter compared to last year is due mainly to lower copper prices, the company stated.

Negotiations with foreign currency creditors in connection with the company's proposed financial restructuring plan "continue to be vigorously pursued." The company stated, "The plan essentially calls for the sourcing of external funds through a $30 million long-term loan from Mitsubishi Metal Corporation, which has already been approved by the Central Bank of the Philippines, and a stock rights offering which will be utilized to repay a substantial portion of Atlas foreign currency debts at a discount.

Atlas intends to commence the rights offering as soon as the requirements of the securities and exchange commissions of the Philippines and the United States are completed and upon approval of the financial restructuring plan by the company's foreign currency lenders."

FARMINGDALE, NY (APRIL 25) PR NEWSWIRE - Michael Gorin, president of VTX Electronics Corp. (AMEX: VTX), today announced sales and a 133 percent earnings increase for the third quarter.

Net sales for the quarter were $12,008,000 compared to $11,177,000 for last year's third quarter and net income was $161,000 ($.07 per share) compared to $69,000 ($.03 per share) last year. During the first nine months, sales increased 13 percent and net income was $343,000 versus $282,000 last year.

Gorin stated, "operating results for the quarter showed continued improvement as sales increased and costs continued under tight control. We anticipate further improvements in the fourth quarter."

VTX designs, distributes and assembles a wide variety of electronic wire, cable and related products used primarily in the data communications networking marketplace.

NEW ORLEANS (APRIL 25) PR NEWSWIRE - Ocean Drilling & Exploration Co. (ODECO) (NYSE: ODR) reported net income of $21,960,000, or $0.43 per common share, for the quarter ended March 31.

Such net income included income from discontinued diving operations of $1,487,000, or $0.03 per common share, and an extraordinary credit of $7,113,000, or $0.14 per common share. The extraordinary credit represents the federal income tax benefit resulting from utilization of a financial net operating loss carryforward. An offsetting charge equivalent to the benefit is included in the provision for income taxes.

For the quarter ended March 31, 1989, the company reported a net loss of $3,916,000, or $0.08 per common share. The first quarter 1989 net loss included income from discontinued diving operations of $462,000, or $0.01 per common share, and a loss from discontinued contract drilling operations of $16,608,000, or $0.32 per common share. The first quarter of 1989 also included a benefit of $2 million, or $0.04 per common share, resulting from the reversal of a prior year's provision for a natural gas pricing dispute.

Revenues from continuing operations for the current quarter were $71,216,000 compared to first quarter 1989 revenues of $65,462,000. Such revenues included oil and gas revenues of $66,686,000 ($59,547,000 in 1989), and interest and other revenues of $4,530,000 ($5,915,000 in 1989). Other revenues for the first quarter of 1989 included a benefit of $2 million resulting from the reversal of a prior year's provision for a natural gas pricing dispute. Exploratory expenses including dry hole costs were $3,364,000 in the current quarter compared with $5,241,000 a year earlier.

While the first quarter of 1990 excludes the results of discontinued contract drilling operations, drilling and related revenues totaled $33,301,000 compared to $20,441,000 in 1989. On a pro forma basis, the loss from discontinued contract drilling operations for the first three months of 1990 totaled $3,263,000 compared to the $16,608,000 loss included in the first quarter of 1989. The pro forma 1990 loss included a net gain on the sale of Ocean Benarmin of $43,680,000 and a gain of $993,000 on the sale of the Ocean Odyssey design drawings. In addition, the first quarter of 1990 benefited from a reduction in depreciation of approximately $2,800,000 as a result of an extension in the estimated remaining useful lives of certain drilling barges.

SAN DIEGO (APRIL 25) PR NEWSWIRE - HomeFed Bank (NYSE: HFD) and the City

of San Diego announced a settlement has been reached in their dispute regarding the city's loan on the U.S. Grant Hotel.

Under the terms of the agreement, all pending claims between the two parties will be dismissed, releases exchanged and HomeFed Bank will immediately pay the city $750,000 and defer a payment of $1.25 million for five years from the agreement date.

As part of the settlement, the city will assure and preserve HomeFed's development rights for a period of 10 years to construct a new landmark tower and parking garage on the site of the hotel's existing parking garage. Plans for the 40-story tower and garage complex will be reviewed by the city to ensure design compliance with the Centre City Community Plan for downtown San Diego.

Both HomeFed and city officials have expressed their satisfaction, saying the agreement promotes an effort of goodwill by both parties.

#90115p7227 04/25/1990 ~PR Newswire

EDISON, NJ (APRIL 25) PR NEWSWIRE - Engelhard Corporation (NYSE: EC) today reported net earnings for its first quarter ended March 31, 1990, of $14.8 million, or 33 cents per share, slightly ahead of the $14.4 million, or 32 cents per share, recorded for the first quarter of 1989.

The maker of specialty chemical products and engineered materials reported sales for the 1990 quarter of $658.5 million, vs. $587.3 million a year ago.

"Overall operating results for the quarter reflect higher earnings for both our catalysts and chemicals and engineered materials and precious metals management segments, and a decline in earnings for our pigments and additives segment, said Orin R. Smith, president and chief executive officer.

The catalysts and chemicals businesses posted a 6 percent increase in operating earnings for the quarter and accounted for 40 percent of Engelhard's total operating earnings in the period. Smith noted that manufacturing inventory adjustments substantially increased profit for the company's Environmental Catalysts Group, while reduced expenses moved profits up for chemical catalysts. These gains were largely offset by a significant decrease in profit from lower sales of petroleum catalysts due principally to decreased market consumption in the quarter, he added.

Engelhard's pigments and additives business, which accounted for 36 percent of total operating earnings in the 1990 quarter, recorded a 4 percent decline in earnings, "Higher profits for the company's specialty minerals and colors business, resulting from increased sales to the paints plastics and inks markets, were more than offset by lower profits from pigments sold to the paper industry," said Smith.

A 31 percent increase in first-quarter operating earnings was reported by Engelhard's engineered materials and precious metals management businesses which represented 24 percent of the quarter's total earnings. Smith attributed the very strong first-quarter operating earnings to favorable market conditions for dealing in precious metals raw materials.

Engelhard Corporation is a world-leading provider of specialty chemical products, engineered materials and precious metal management services.

TAMPA, FL (APRIL 25) PR NEWSWIRE - Florida State University alumnus R. Eugene Taylor of Tampa was elected president and a director of NCNB National Bank of Florida Tuesday by the bank's board of directors.

Taylor succeeds Robert L. Kirby effective July 1. Kirby, president for the past two years, has announced his retirement effective June 30.

Hugh L. McColl Jr., NCNB Corp. (NYSE: NCB) chairman, said: "In 1988, following our acquisition of NCNB Texas, we asked Bob Kirby to take the helm at NCNB Florida and we gave him a strong challenge:

-- Establish the bank as a significant force in the Florida communities in which it operates,
-- Increase the deposit and asset base of the statewide bank and add to its earnings potential, and
-- Identify and prepare its next leader.

"And we asked him to accomplish all of that before his preferred retirement age of 60, just two years away at that time. He has met that challenge magnificently."

Under Kirby's leadership during the past two years, NCNB Florida has identified and appointed a senior executive in each community it serves in Florida. They have the assignment to make the bank more visible and effective in their communities and bring leadership to the organization in those communities.

In addition, the bank has increased deposits from $6.8 billion on June 30, 1988 to $9.7 billion in April 1990 and raised statewide assets from $9.3 billion on June 30, 1988 to $12.2 billion in April 1990. In the past year NCNB Florida is the only Florida bank to show a sustained increase in statewide market share of deposits, going from 7.17 percent market share on June 30, 1988 to 8.86 percent at the end of 1989. The number of branches has increased from 203 to 255, primarily through three significant acquisitions -- Freedom Savings & Loan, Southern Floridabanc and seven branches of First American Bank and Trust in Brevard County.

#90115p7231 04/25/1990 ~PR Newswire

CINCINNATI (APRIL 25) PR NEWSWIRE - Chiquita Brands International, Inc. (NYSE: CQB) today announced record first quarter results. It reported that fully diluted earnings per share were $1.02 for the quarter ended March 31, 1990 compared to $.24 per share for the same quarter last year. Net income increased to $42.9 million from $9.7 million for the same quarter last year, and net sales increased to just over $1 billion from $895 million for the same quarter last year.

The company attributed the improvement in operating results primarily to its fresh foods operations, which benefited from increased earnings from the sale of bananas, mainly in Europe and also in North America. These improvements were due to higher local prices and higher volume as the company adjusted to the competitive pressures that were prevalant in Europe in late 1988 and early 1989. The company also noted that (1) prepared foods results increased due to improvements in its meat operations as the benefit of actions taken in 1989 to improve profitability began to be realized, and (2) the first quarter of 1990 includes a pre-tax gain of approximately $8.5 million from the sale of common stock investments.

In commenting on the first quarter results, Keith E. Lindner, president, indicatd that although a quarter to quarter comparison should not be used to forecast a full fiscal year, the company is pleased with the strong beginning for 1990 as it builds on its record of six consecutive years of at least 15 percent growth in fully diluted earnings per share.

#90115p7234 04/25/1990 ~PR Newswire

ST. LOUIS (APRIL 25) PR NEWSWIRE - Anheuser-Busch Companies, Inc. (NYSE: BUD), achieved record sales and earnings during the first quarter of 1990, it was announced today by August A. Busch III, chairman of the board and president.

In commenting on the first quarter results, Busch said, "We believe this strong performance reflects our continuing success in implementing our primary business strategies and the solid financial position of the company."

The company's excellent performance during the first quarter is due largely to the growth of Anheuser-Busch, Inc., the company's brewing subsidiary, and higher profitability of several other subsidiaries, especially Campbell Taggart, Inc. and Metal Container Corporation.

Operating results for the first quarter of 1990 include the following: Gross sales of $2.59 billion, an increase of 8.1 percent over gross sales of $2.40 billion for the first quarter of 1989.

Net income of $182.5 million, an increase of 9.2 percent compared with $167.1 million for the same period a year ago. Earnings per share of 64 cents compared with 58 cents for the first quarter of 1989, an increase of 10.3 percent. The 1990 results reflect the Dec. 1, 1989, acquisition of Sea World. Anheuser-Busch, Inc., also reported record beer sales during the first quarter. Sales to wholesalers were 20.1 million barrels, an increase of 2.9 percent over the 19.6 million barrels sold during the first quarter of 1989. More importantly, during the first quarter of 1990 sales by wholesalers to retailers -- a reflection of consumer demand -- were more than 4 percent ahead of sales a year ago.

The company's share of total brewing industry first quarter sales (including imports), as estimated by the Beer Institute, climbed to 43.6 percent, compared with 43.0 percent a year ago. During the first quarter, beer industry sales were approximately 1.4 percent ahead of the first quarter of 1989.

Campbell Taggart, the company's diversified food subsidiary and the second largest contributor to corporate profit, increased its profit contribution during the first quarter of 1990 versus the same period last year. The increase is due primarily to higher volume, enhanced margins and distribution savings in the bread division and higher volume and profit contribution from international operations.

NEW YORK (APRIL 25) PR NEWSWIRE - In two recent research reports, PaineWebber identifies opportunities in small, or secondary, stocks that have a niche position in their industry. The reports also name 15 attractive "niche" stocks.

Edward M. Kerschner, chairman of PaineWebber's Investment Policy Committee and author of the reports, said, "Over the long-term, small stocks have historically been the best performing financial asset. Furthermore, the relative valuation of small capitalization stocks is almost the best it has been in 25 years. Despite this, small stocks have underperformed the large capitalization stocks in five of the last six years.

"Given this scenario," Kerschner continued, "there may be a temptation to jump blindly into the secondary market. However, timing a market bottom has always been elusive and further near-term downside risk could still exist. Investors should concentrate on select stocks that enjoy niche positions in their industries and are therefore less susceptible to the fluctuations in the economy. When things get tough, it is often these special niche players that are better able to maintain revenues and profits."

PaineWebber has identified the following niche stocks:

AST Research (ASTA)	Centocor Inc. (CNTO)
Intellicall Inc. (INCL)	International Lease Finance (ILFC)
Kirby Exploration Co. (KEX)	Medicine Shoppe International (MSII)
Nordson Corp. (NDSN)	The Vons Companies (VON)
A&W Brands (SODA)	A.L. Laboratories (BMD)
Allen Group (ALN)	Giddings & Lewis (GIDL)
Heartland Express (HTLD)	Interface Inc. (IFSIA)
Shorewood Packaging (SHOR)	

PaineWebber Incorporated is one of the nation's leading full-service securities firms, with 285 offices and more than 4,500 investment executives worldwide. The firm's research department consistently ranks among the best on Wall Street in industry surveys.

CHICAGO (APRIL 25) PR NEWSWIRE - Sears Merchandise Group today named Vermont American Corp., Louisville, Ky., and Levi Strauss and Co., San Francisco, as its top 1989 Sources of the Year.

Michael Bozic, chairman and chief executive officer of Sears Merchandise Group, said the companies won the awards for outstanding performance during 1989 in manufacturing, innovation, marketing and service. They were the top two of the 73 sources named as Partners in Progress winners from among the more than 10,000 companies that supply goods and services to Sears.

A supplier of portable electric and bench tool accessories, Vermont American, named best among all hardline sources, was cited for its dedication to cost-effectiveness while providing outstanding product quality, and improving distribution and service of supply.

Among its manufacturing achievements was the introduction of six lines of improved accessories such as bi-metal saw blades and hole saws which last longer than carbon steel and the development of a new saw blade designed for the miter and radial saw markets. The company also upgraded its packaging and display to maximize space usage and customer convenience.

This is Vermont American's ninth year as a Partners in Progress winner, making it one of only three sources to have earned the distinction every year since the program began.

Levi Strauss and Co., soft lines source of the year, makes dress slacks as well as jeans and other casual pants for Sears. The company was honored for working closely with Sears buyers to develop special products and promotions for boys' and men's apparel. Among its achievements in innovation, it developed a popular new wet-wash process for jeans.

In making the award, Sears cited Levi's "commitment to the American consumer. Quality never goes out of style. This commitment, plus innovative styling, has made it the leader in the industry."

The two top winners were chosen from 73 manufacturers whose performance earned a Sears 1989 Partners in Progress Award. Fewer than 1 percent of Sears 10,000 suppliers received the P.I.P. award this year.

Also cited for achievement were General Electric Appliances for home appliance and home electronics lines; Dynasty Classics Corporation for home fashions; Reebok Brands, women's apparel; Levi Strauss and Co. for men's and children's apparel; Vermont American Corporation for home improvements and Maremont Corporation for automotive.

#90115p7243 04/25/1990 ~PR Newswire

VALLEY FORGE, PA (APRIL 25) PR NEWSWIRE - UGI Corp. (NYSE: UGI) reported a weather-related 2 percent reduction in its net income for the first quarter ended March 31 to $19,198,000 from $19,592,000 for the same period a year ago.

The Pennsylvania gas and electric utility and national propane distributor said earnings per share slipped 3 percent to $1.79 from $1.85, while revenues for the three months increased 8 percent to $122,272,000 from $113,594,000.

Net income for the 12 months ended March 31 increased 12 percent to $35,974,000 from $32,086,000. Earnings per share rose 11 percent to $3.26 from $2.94 and revenues were up 8 percent to $332,380,000 from $308,475,000.

James A. Sutton, chairman and chief executive officer, said UGI's first quarter income from consolidated operations, including the utilities and a wholly owned propane segment, actually increased 15 percent to $17,033,000 from 1989's first quarter, despite the impact of weather which was 19 percent warmer than normal and 11 percent warmer than last year in the gas utility service territory.

"The increase," Sutton explained, "reflects the after-tax contributions of $1,499,000 and $969,000, respectively, from propane acquisitions completed in the third quarter of 1989 and interest income on the remaining proceeds from the sale of UGI's industrial gases businesses during the latter half of the year.

"The improvement in consolidated results, however, was more than offset by a $2,798,000 or 56 percent reduction in equity income from our AP Propane joint venture," he said. "Along with higher operating expenses, the joint venture experienced first quarter weather that was on average 18 percent warmer than normal and 13 percent warmer than a year ago in its markets across the country."

Operating income by UGI's gas utility for the quarter improved by $410,000 to $27,720,000 on volume throughput that was 2.6 percent lower than last year.

"This improvement resulted primarily from increased demand for natural gas and stronger margins in interruptible commercial and industrial markets," he said. "We benefited from a favorable price advantage over alternate fuels, and the growth in interruptible volumes offset the adverse effect of the warmer weather in our heating markets."

Sutton said that UGI's earnings growth for the current 12-month period was due primarily to after-tax income contributions of $2,804,000, $4,076,000 and $4,262,000, respectively, from the recent propane acquisitions,

interest income on the proceeds and a gain from the industrial gases divestiture.

"Because of the adverse weather, first quarter results were well below our expectations," Sutton noted, "and our first quarter is significant in that it generally represents a major portion of UGI's earnings for the full year."

Despite the adverse impact of the warmer weather on earnings to date, UGI's directors, as reported March 27, declared a 4.9 percent increase in the common dividend, effective July 1, and a 2-for-1 stock split, effective on the same date.

UGI cited a "sound financial position and the board's confidence in the continuing strength of our utilities and the earnings potential of our expanding, wholly owned propane operations" as reasons for the dividend increase.

HERNDON, VA (APRIL 25) PR NEWSWIRE - Newbridge Networks (NASDAQ-NMS NNCXF) announced today that they have signed a contract to provide a nationwide, digital T-1 network for Consolidated Freightways (NYSE: CNF), one of the nation's leading freight transportation companies.

"We are extremely pleased to be working with Consolidated," said Newbridge President Peter Madsen. "This is a significant opportunity, and our commitment to provide integrated networking, through our adherence to standards, will provide the required flexibility and growth as technology and communications carrier offerings change."

Consolidated Freightways, with annual revenues exceeding $4 billion, is in the long haul and regional trucking, domestic and international air freight (Emery), intermodal full truckload, and ocean container services businesses.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in the United States, Canada and the United Kingdom. Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

CONTACT: Linda DeLuca of Newbridge Networks, Inc., 703-834-3600; or Dick

PLYMOUTH MEETING, PA (APRIL 25) PR NEWSWIRE - Progress Financial Corp. (NASDAQ-NMS: PFNC) announced today that its board of directors have recently retained the investment banking firm of Alex. Brown & Sons Inc. to evaluate means of enhancing shareholder value.

The board of directors took this step in response to the current level of its stock price relative to book value and as a result of preliminary discussions with persons who may be interested in putting together a group of investors to acquire the company.

These investors would continue to operate it as a local institution under current management.

Virgil P. Moir III, president of the company emphasized, "There are substantial contingencies involved, including agreement on all material terms by the parties and the obtainment of requisite financing, and there can be no assurances that the company will pursue this particular, or any other strategy."

This particular set of preliminary discussions, which is being pursued by a committee of outside directors, has appeal to the company since the board of directors has determined that there is a strong need, within the local communities that progress Federal Savings Bank, the primary subsidiary of Progress Financial Corp., serves, for a community bank that can deliver quality, hands-on, personal service to its customers.

Progress Financial Corp., a Delaware corporation, with its principal executive offices in Plymouth Meeting, is a unitary thrift holding company.

The business of the corporation consists primarily of the operation of progress Federal Savings Bank, headquartered in Plymouth Meeting, as its sole banking subsidiary. The corporation's stock is quoted on the NASDAQ National Market System.

CONTACT: Deborah A. Piotrowicz of Progress Financial, 215-825-8800, ext. 210, or evenings, 215-368-6344.

ALLENTOWN, PA (APRIL 25) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD) has made several changes within its senior management ranks, effective June 1, 1990, unless noted differently.

Harold A. Wagner has been appointed executive vice president-Gases and Equipment. In his new position, Wagner will assume responsibility for Air Products' worldwide gas and equipment business. During almost 30 years with Air Products, Wagner has held senior management positions in the company's U.S. and European industrial gas businesses, the Chemicals Group, and in corporate planning. He is currently president- Air Products Europe, a position he has held since July 1988.

Joseph J. Kaminski, currently vice president-Corporate Planning, will succeed Wagner as president-Air Products Europe and will be responsible for the company's expanding European industrial gas business. During his 25 years with Air Products, Kaminski has held senior controllership positions and served as vice president of the company's international gas division from 1978 through 1988, a period of substantial growth.

Wayne A. Hinman will succeed Kaminski as vice president-Corporate Planning. Hinman has held previous management positions in corporate planning and controllership and has served as a general manager in Air Products' on-site gas business.

James H. Agger has been elected vice president, general counsel and secretary, effective May 1, 1990. In his new position, Agger will assume the responsibilities of Richard A. Gray Jr., vice president and corporate secretary, who is retiring. Agger's current position is vice president and general counsel.

Within Air Products' operating groups, Donald J. Orr has been appointed senior vice president-Chemicals Group. Orr will assume responsibility for the international activities of the Chemicals Group in addition to his current responsibilities as vice president-Business Divisions for the group. In addition, Robert E. Gadomski has been elected group vice president-Process Systems and Stanley R. Roman has been elected group vice president-Gases.

Remarking on the new appointments, Air Products' Chairman Dexter F. Baker said, "These moves, together with the talent which exists throughout our senior management ranks, will enable us to continue to pursue successfully Air Products'global business strategies."

With operations in 22 countries and annual revenues approaching $3 billion Air Products is a major international supplier of industrial gases and related equipment, chemicals, and environmental and energy systems. Air Products' industrial gas and chemical products are used by a very diverse base of customers in manufacturing, process, and service industries. In the environmental and energy businesses, Air Products and its affiliates own and operate facilities to reduce air and water pollution, dispose of solid waste, and generate electrical power.

#90115p7261 04/25/1990 ~PR Newswire

HOUSTON (APRIL 25) PR NEWSWIRE - Panhandle Eastern Corp. (NYSE: PEL) today reported consolidated net income for the three months ended Mar. 31, 1990, of $60.3 million, or 69 cents per share. The results include a gain from the sale of a discontinued operation and a charge from the planned sale of a natural gas compressor station and associated gathering facilities.

These first quarter results compare to $33.0 million, or 58 cents per share, for the like period a year ago, which included an after-tax gain of $19.0 million, or 33 cents per share, for the sale of an investment and after-tax charges of $12.5 million, or 22 cents per share, for interest and other costs. The average number of shares outstanding increased 54 percent from the first three months of 1989 as a result of the acquisition of Texas Eastern Corp.

Consolidated first quarter operating income increased to $176.5 million, compared with $53.3 million for the like period last year. Earnings benefited from Texas Eastern Corp.'s first quarter operating income of $83.1 million, as well as from a new seasonal rate structure for Panhandle Eastern Pipe Line Co. (PEPL) which provides for higher rates during peak demand months. However, the improvement in operating income for the first quarter was partially offset by increased interest expense.

The current quarter includes an after-tax gain of $15.2 million, or 17 cents per share, from the sale of The Youghiogheny and Ohio Coal Co. (Y&O). The Y&O sale completed the divestiture of the company's discontinued coal mining operations. The company also incurred an after-tax charge of $9.4 million, or 11 cents per share, from the planned sale of the Sneed, Texas, compressor station and gathering facilities.

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

#90115p7263 04/25/1990 ~PR Newswire

PARSIPPANY, NJ (APRIL 25) PR NEWSWIRE - Armco Inc. (NYSE: AS) reported net income of $12.9 million for the first quarter of 1990, or $.12 per

share of common stock. In the first quarter of 1989, Armco had net income of $40.9 million, or $.44 per share.

Sales for the period totaled $445.9 million compared to sales of $899.8 million in the first quarter a year ago. The decrease in sales was primarily attributable to Armco no longer including the operating results of its flat-rolled carbon steel business which in May of 1989 became Armco Steel Company, L.P. (ASC), a joint venture formed with Kawasaki Steel Corporation.

Commenting on the first quarter, Robert E. Boni, chairman and chief executive officer, said, "The disappointing results were expected, especially at Armco Steel Company, L.P. Unfortunately, the second quarter is also expected to be weak. However, we are encouraged by the turnaround of our specialty steels business from its poor fourth quarter.

"Also," Boni continued, "we have signed final agreements with Acerinox, S. A. of Madrid, Spain to form two new jointly-owned companies to produce and market stainless steels. One will be in the United States and one in Europe. These ventures will take advantage of the growing worldwide demand for specialty stainless products.

"Other encouraging news was the completely successful startup of the new continuous slab caster on March 27 at the Ashland, Ky., plant of ASC. When fully operational in the second half of this year, ASC should benefit from improved productivity and quality as they will be able to continuously cast about 70 percent of their products versus less than 40 percent currently.

"Just recently," Boni concluded, "Armco Advanced Materials was named as a major domestic supplier of stainless steel for exhaust system components of Toyota cars manufactured in North America -- a continuing sign of the world class status this business unit is striving to achieve and maintain."

#90115p7267 04/25/1990 ~PR Newswire

WHITE PLAINS, NY (APRIL 25) PR NEWSWIRE - American Savings Bank (NYSE: ASB) today reported a net loss for the first quarter of 1990 of $9.4 million, or a net loss per share of $1.78. For the quarter ended Mar. 31, 1989, American reported net income of $6.6 million, or $0.76 per fully diluted share. The bank announced in early April 1990 that it expected to record a net loss for the 1990 first quarter.

Today's board decision does not affect the dividend on the bank's cumulative convertible exchangeable preferred stock, Series A.

The 1990 first quarter results reflect a provision for loan losses of $13.3 million, compared with $2.0 million in the same 1989 period. Approximately $11.0 million was added to real estate reserves, reflecting weakened northeast market conditions. The 1990 provision included a previously announced charge of $4.0 million related to the reacquisition of unsold shares in four residential co-op conversion projects. At AmSave American's commercial finance subsidiary, $1.3 million was added to reserves and its loan to West Point-Pepperell Acquisition Corp. was placed on non-accrual status.

Net interest income before provision for loan losses was $19.5 million for the 1990 first quarter, compared with $25.8 million in the same 1989 period. The net interest margin was 2.05 percent for the latest quarter, compared with 2.46 percent for the year-ago quarter and 1.99 percent for the three months ended Dec. 31, 1989.

Total other income was $4.4 million for the first quarter of 1990, compared with $5.9 million in the first quarter of 1989. The difference is attributable to a decline in fees and other income offset by gains on the sales of loans and mortgage-backed securities in 1990. The first quarter of 1989 included a $1.0 million gain on the sale of other assets.

Operating expenses declined to $18.9 million from $20.5 million comparing the quarters ended Mar. 31, 1990 and 1989, respectively. The decrease in costs was due to the bank's expense reduction program, as well as the reversal of previously established accruals for incentive bonuses which will not be paid. "Our cost reduction efforts have begun to produce a benefit," noted William G. Lillis.

At Mar. 31, 1990, non-performing assets (net of reserves) totaled $205.0 million, representing 4.65 percent of total assets. American's non-performing asset ratio was 3.29 percent a year ago, and 3.92 percent at Dec. 31, 1989. The increase in non-performing assets reflected the $26.2 million principal balance of certain co-op conversion projects and $15.0 million related to AmSave's participation in the West Point-Pepperell financing. The consolidated reserve for possible losses was $41.6 million at Mar. 31, 1990, compared with $29.7 million at Mar. 31, 1989, and $33.2 million at Dec. 31, 1989.

American's regulatory capital ratio was 6.81 percent of assets at Mar. 31, 1990, as compared with the 6.0 percent FDIC requirement. The bank's total assets at Mar. 31, 1990, were $4.4 billion. The bank had $3.6 billion in loans and mortgage-backed securities, and deposits amounted to $3.4 billion.

American Savings Bank is a New York State-chartered savings bank with executive and administrative offices in White Plains, N.Y. Together with

its wholly owned subsidiary, Riverhead Savings Bank, FSB, American operates 39 branch offices in New York City and in Westchester, Nassau and Suffolk Counties. The bank's common stock and $1.8125 cumulative convertible exchangeable preferred stock, Series A are both listed on the New York Stock Exchange.

NEW YORK (APRIL 25) PR NEWSWIRE - The board of directors of Primerica Corporation (NYSE: PA) today declared the regular quarterly dividend on the company's common stock of $.08 per share, payable May 25, 1990, to stockholders of record on May 7, 1990.

Separately, following its annual meeting today, Joseph R. Wright Jr. was elected to Primerica's board of directors.

William S. Woodside, a former chairman of the company, retired from the board. In recognition of his many years of service, he was designated director emeritus.

Wright is vice chairman and a director of W.R. Grace & Co., responsible for its world-wide corporate financial, legal, and investment banking, agricultural chemicals, and environmental services activities.

Sanford I. Weill, Primerica's chairman and chief executive officer, said, "Joe Wright brings a wealth of business experience to our board, coupled with broad administrative experience from his years of cabinet level government service."

From 1988 to 1989, Wright was director, Office of Management and Budget (OMB), a member of President Reagan's Cabinet and a principal policy/economic advisor. Prior to this position, from 1982 to 1988, he was the deputy director of OMB and chairman of the President's Council on Management Improvement, and from 1981 to 1982, deputy secretary of commerce.

Wright joined Citicorp in 1976 as president of Citicorp Retail Services and Retail Consumer Services and from 1971, was assistant secretary for administration, Department of Agriculture. Prior to this, he had been at the Department of Commerce as acting assistant secretary for economic affairs and deputy director of the census bureau, and served as vice president and division head of Booz, Allen and Hamilton, Inc.

Wright is a graduate of the Colorado School of Mines, and has a master's degree in industrial administration from Yale University. He received the President's "Citizenship Award" and was named "Government Executive of the Year" in 1989. He is a member of the Young President's Organization, Chief Executives Organization, World Business Council, National Academy for Public Administration, and the Council for Excellence in Government.

Primerica Corporation is a diversified financial services company engaged in life, credit, accident & health, and property & casualty insurance, investment banking and securities brokerage, mortgage banking, mutual funds, asset management, consumer lending, credit cards and direct marketing.

HOUSTON (APRIL 25) PR NEWSWIRE - Baker Hughes Inc. (NYSE: BHI) Chairman, President and Chief Executive Officer, J.D. Woods today announced that earnings per share for the second fiscal quarter ended March 31, 1990 were 23 cents, compared to 11 cents in the like quarter a year ago reflecting a growth of more than double the previous years quarterly earnings. This 109 percent growth in earnings per share was accomplished on a modest revenue increase of 5.7 percent to $600.9 million. Net income advanced 106 percent to $30.3 million. For the six months earnings per share advanced 75 percent to 42 cents, on a revenue increase of 4.0 percent to $1.180 billion. Net income for the six months increased 73.6 percent to $55.7 million.

Woods stated: "Although our markets and revenues were up modestly our product/service positioning allowed us to participate fully in the increase and we demonstrated how slight improvements in overall activity can generate solid earnings improvements. Additionally our process businesses are performing at record levels and continue to maintain strong backlogs," Woods concluded.

Baker Hughes is a leading provider of products and services for the oil, gas and process industries.

DETROIT (APRIL 25) PR NEWSWIRE - Representatives of Ford Motor Company (NYSE: F) and the United Auto Workers will join hands to launch Ford's new subcompact Escort with a strong product-quality message in major markets throughout the United States on Thursday, April 26.

At a joint news conference in Detroit today, Jeff Washington, president of UAW Local 900, and Tom Wagner, Ford vice president and general manager of Ford Division, said UAW employees will team with Ford executives to visit dealerships in more than 20 cities around the country to introduce Ford's new Escort -- a nameplate that represented nearly 25 percent of Ford Division's new-car sales volume during the past decade.

Cities included on the nationwide intro blitz are Boston, Newark, N.J.; Washington, D.C.; Philadelphia; Pittsburgh; Nashville, Tenn.; New Orleans; Austin, Texas; Des Moines, Iowa; Los Angeles; San Francisco and Seattle. (A complete listing of cities along with the names and phone numbers of a Ford public affairs contact and UAW team member follows.)

"The UAW and its membership have played an important role in bringing the 1991 Escort to market," Wagner said. "UAW employees helped redesign our manufacturing facilities and they've also helped us introduce the Escort to our dealers and to thousands of 1990 auto show visitors as well.

"In the process, all of us at Ford Motor Company, especially those of us

at Ford Division, have developed a much stronger appreciation and respect for the UAW, its membership and their commitment to producing the highest quality automotive products in the world."

Washington, who heads UAW Local 900 at Ford's Wayne (Mich.) Integral Stamping and Assembly Plant, will drive a 1991 Escort from Detroit to Washington, D.C., today to demonstrate the union's commitment to building small cars with world-class quality in the United States.

"Our objective is to build the finest quality cars in the world," Washington said. "Our membership is committed to that objective and we plan to broadcast that message to thousands of Ford dealers, dealership employees and their customers in the next several days."

NEW YORK (APRIL 25) PR NEWSWIRE - Alliance Capital Management L.P. (NYSE: AC) today announced a distribution of 40 cents per unit for the first quarter. The partnership distributed 35 cents per unit for the first quarter of 1989.

The distribution is payable on May 11, 1990, to holders of units at the close of business on May 4, 1990.

Revenues increased from $35,919,000 to $44,334,000 for the quarters ended Mar. 31, 1989 and 1990, respectively. Assets under management as of Mar. 31, 1990, were approximately $43.9 billion, up approximately $100 million from Dec. 31, 1989.

The partnership is required to distribute its available cash flow, which was $11,313,000 or 40 cents per unit for the quarter ended Mar. 31, 1990. Because expenses deducted in determining net income include non-cash items and certain employee compensation and benefits expenses that are funded by the partnership's general partner through capital contributions, available cash flow was significantly in excess of net income per unit.

Net income for the first quarter was $5,507,000 or 19 cents per unit. Net income was $4,480,000 or 16 cents per unit for the first quarter of 1989.

Alliance Capital Management L.P. is a leading international investment adviser, providing investment management services to institutions, primarily pension funds and endowments, and to individual investors through a broad line of mutual funds and cash management products. The partnership's general partner and majority unitholder is a wholly owned subsidiary of The Equitable Life Assurance Society of the United States.

MIDLAND, MI (APRIL 25) PR NEWSWIRE - Dow Corning Corporation today reported sales and profits for the first quarter of 1990. Sales were $413.5 million, up 6.1 percent from the $389.4 million in the first quarter of 1989. Earnings of $42.5 million were reported, up 3.6 percent from $41.1 million in the same period in 1989.

"In most parts of the world, sales were up modestly," Edward Steinhoff, vice president for finance and chief financial officer, said. "The main exception was Europe where economic growth is strong in anticipation of a larger and more unified European Common Market. In the U.S., sales to our customers related to auto production were particularly slow. As the year progresses, we expect our performance to reflect the anticipated improvement in the U.S. economy.

"In this sluggish economy, attention to each customer, both in quality and service, is what sustains growth," Steinhoff said. "This continues to be where our employees are focusing their efforts and attention."

Dow Corning is a leading manufacturer of silicone products. Headquartered in Midland, Dow Corning is a 50-50 joint venture of The Dow Chemical Company and Corning, Incorporated.

LOS ANGELES (APRIL 25) PR NEWSWIRE - Two national advertising sales organizations, Million Market Newspapers/Times Mirror National Marketing (MMN/TMNM) and Knight-Ridder Newspaper Sales Inc. (KRNS), announced today that they will merge on June 4 to become a single company called Newspapers First. The new company will represent newspapers reaching

about 20 percent of the U.S. adult newspaper readers.

Announcing the merger were Reg Murphy, chairman of MMN/TMNM and publisher of The Baltimore Sun Company, both subsidiaries of The Times Mirror Company, and Jerome S. Tilis, KRNS chairman and vice president - marketing for Knight-Ridder Inc.

"This merger will enable major national advertisers to use their campaigns and resources to the best possible advantage by providing them with one-stop shopping," said Murphy. "Newspapers First will represent papers from coast to coast and in many of the largest metropolitan areas in the country."

Said Tilis: "I'm enthusiastic about developing an association that offers multimarket advertisers an easy way to do business with a large number of newspapers providing great coverage and significant readership."

Million Market Newspapers Inc., a group of major independent newspapers, and Times Mirror National Marketing were consolidated in July of 1986. Based in New York City, MMN/TMNM currently sells the advertising space of more than a dozen newspapers across the country to national advertisers. Knight-Ridder Newspaper Sales, also based in New York City, serves 26 newspaper markets.

Newspapers First will be headquartered in New York City with additional offices in Chicago, Detroit, Miami, Dallas, Los Angeles, San Francisco, Minneapolis and Atlanta. The company will serve 37 newspaper markets with a total combined circulation of 9,551,129 daily and 11,872,251 on Sunday. Estimated total readership will be 22,290,200 daily and 26,617,680 on Sunday, representing 12.5 percent and 14.9 percent of the U.S. adult population, respectively. Of the U.S. adults who read newspapers, Newspapers First will reach 19.7 percent daily and 22.3 percent on Sunday.

Serving as president and chief executive officer of Newspapers First will be G. Kingsley Anthony, who presently holds that position at MMN/TMNM. John Kosanke, current president and chief executive officer of KRNS, will be executive vice president of Newspapers First.

Knight-Ridder (NYSE: KRI) is an international information and communications company engaged in newspaper publishing, business news and information services, cable television operations and newsprint production.

Times Mirror (NYSE: TMC) is a media and information company which publishes the Los Angeles Times, Newsday and New York Newsday, the Baltimore Sun newspapers, The Hartford Courant, The Morning Call, The (Stamford) Advocate and Greenwich Time.

The independent newspapers participating in Newspapers First are The

Boston Globe, The Denver Post, The Indianapolis Star and News, The Milwaukee Journal and Sentinel, The Arizona Republic and Phoenix Gazette, The Seattle Times and The Seattle Post Intelligencer.

DALLAS (APRIL 25) PR NEWSWIRE - American Airlines, the United States' largest air carrier, will invest more than $11 billion over the next five years to expand its global presence, Michael W. Gunn, senior vice president - marketing for the airline, said today.

"We feel there is a place in the market for a premier United States international airline, and our ambition is to be that -- to become known as THE U.S. flag carrier," he said. "We intend to compete with the best international airlines in the world."

The airline is mounting a concerted, company-wide thrust, encompassing new aircraft, new facilities, new routes and extensive research and development of new products and services.

"Not only are we adding the newest international aircraft available in the market and increasing our international route system, we're committing considerable resources to the details of both inflight and ground services " he added.

"In order to reach our goal, we are today formally launching our new International Flagship Service," Gunn announced.

Over the next five years, American will take these steps in its global expansion:

-- invest $7.7 billion in international aircraft, including MD-11s, Boeing 767-300 ERs, and Airbus A300s;
-- invest up to $655 million in overall terminal expansion and upgrading for international service; and
-- continue development of a whole new premium International Flagship Service, costing $3.4 billion and including:
  -- redesigned seats for first and business class;
  -- individual VCRs in first class with a full library of tapes available on board;
  -- award-winning food and wine with customized meals;
  -- innovative food concepts in first and business class, including an "Executive Meal" option;

-- extra attention to detail such as warm roasted cocktail nuts, fresh bread baked on board, increased use of fresh flowers, specially designed ticket jackets;
-- increased flight attendant staffing in business class;
-- extra airport staffing and expedited check-in procedures at class-specific counters;
-- enriched cultural sensitivity training for flight attendants and agents;
-- language capability identifiers for flight attendants and agents;
-- improved amenity kits with brand-name toiletries in both first and business class.

NEW YORK (APRIL 25) PR NEWSWIRE - Five directors were elected today to the board of McGraw-Hill, Inc. (NYSe: MHP), at the corporation's annual meeting of shareholders. All five will serve a three-year term expiring in 1993.

The five are:

-- Vernon R. Alden, former chairman of The Boston Company, Inc.
-- Joseph L. Dionne, chairman, president and chief executive officer of McGraw-Hill, Inc.

-- Don Johnston, former chairman and chief executive officer of JWT Group, Inc.

-- Harold W. McGraw III, executive vice president-operations of McGraw-Hill, Inc.

-- Alva O. Way, chairman of the board of IBJ Schroder Bank & Trust Company

In addition to the five directors elected today at McGraw-Hill's annual meeting, ten continue to serve on the company's board, half of whose terms will expire in 1991 and the rest in 1992. Those whose terms will expire at the 1992 annual meeting are:

-- George B. Harvey, chairman, president and chief executive officer of Pitney Bowes, Inc.

-- William J. McGill, president emeritus of Columbia University
-- John L. McGraw, private business ventures
-- Alan J. Pifer, chairman and president of Southport Institute for

Policy Analysis and former chairman of the Carnegie Corporation of New York

-- Lois Dickson Rice, senior vice president for government affairs and a director of Control Data Corporation.

The remaining five directors' terms will expire in 1991. They are:

-- John T. Hartley, chairman, president and chief executive officer of Harris Corporation

-- Peter O. Lawson-Johnston, general partner, Guggenheim Brothers, and chairman of Zemex Corporation

-- David L. Luke III, chairman of Westvaco Corporation
-- Paul J. Rizzo, dean of the graduate school of business administration, University of North Carolina

-- James H. Ross, president and chief executive officer of BP America, Inc., a subsidiary of the British Petroleum Company, plc.

McGraw-Hill, Inc., with headquarters in New York City, is one of the world's leading publishing and information services companies. The company celebrated its 100th anniversary in 1988 and provides information in print, on line and over the air. Sales for 1989 were $1.8 billion.

NORFOLK, VA (APRIL 25) PR NEWSWIRE - Norfolk Southern Corporation (NYSE: NSC) today reported record first-quarter net income of $140.2 million, or 84 cents per common share, for the first quarter of 1990.

Net income was up 4.8 percent from $133.8 million in the first quarter of 1989, which was the previous record for a first quarter. Earnings per common share were up 12 percent from the 75 cents per common share in the first quarter of 1989.

"Strong coal traffic has continued into 1990, with coal, coke and iron ore revenues up 11.1 percent over last year," said Arnold B. McKinnon, chairman, president and chief executive officer. "This more than offsets the 1.3 percent decline in merchandise revenues and a 2.4 percent decline in revenues from our North American Van Lines subsidiary for the first quarter."

Total transportation operating revenues for the quarter were $1.14 billion up 2.4 percent from the $1.11 billion last year. Total rail operating

revenues were $954.1 million, up 3.4 percent from the previous first quarter, while motor carrier revenues of $184.2 million declined 2.4 percent from the $188.7 million in the comparable quarter.

In addition to the increase in coal, coke and iron ore, revenues increased in the first quarter for the following commodities: agriculture, up 7.0 percent; chemicals, up 5.4 percent; intermodal, up 3.9 percent; and paper, up 2.6 percent.

Total transportation operating expenses in the first quarter were $934.7 million, a 2.0 percent increase over the $916.3 million last year. Railway expenses for the period were $744.3 million, up 2.4 percent from $726.7 million last year. Motor carrier expenses were $190.4 million, up 0.4 percent from $189.6 million last year.

The first-quarter railway operating ratio -- the percentage of revenues that goes into operating the railroads -- was 78.0, an improvement from the 78.7 in the first quarter of 1989.

MENLO PARK, CA (APRIL 25) PR NEWSWIRE - Consolidated Freightways Inc. (NYSE: CNF) today reported a loss for the first quarter of $37.1 million on revenues of $997.7 million. The per share loss was $1.06 after paying preferred dividends of $3.2 million.

The results compare to the year earlier net earnings of $32.5 million, or 86 cents per share. Net income for the first quarter of 1989 was

restated for the adoption of Financial Accounting Standards Board Statement No. 96, Accounting for Income Taxes.

Revenues of $997.7 million were up 37.4 percent compared with last year's $726.1 million, primarily reflecting the acquisition of Emery Worldwide. Lary R. Scott, president and chief executive officer, said the unsatisfactory results were due to losses at Emery Worldwide, the company's air freight component, which reported an operating loss of $69.5 million on revenues of $317.8 million for the quarter.

"Although we were disappointed in Emery's performance, there has been some positive customer response to our new schedule integrity program, which has improved service and helped stabilize shipment volumes," Scott noted. "We remain focused on further increasing business levels and reducing Emery's losses."

In the company's long-haul and regional trucking businesses, revenues increased although yields remained under pressure because of ongoing rate discounting in the less-than-truckload market.

"Our trucking operations are doing an excellent job providing top-quality service while increasing market share in a very competitive environment," Scott said.

He noted, however, that operating costs were affected by fuel expenses, which remain higher than last year but have declined from peak levels in December and January.

CF Motor Freight, the company's North American long-haul trucking unit, had operating income of $21.6 million in the quarter, down 20.6 percent from a year earlier. Revenues rose 6.9 percent to $523.1 million from last year's $489.5 million.

Scott said that a mid-year rate increase is needed. "CF Motor Freight supports tariff bureau proposals for a 4.1 percent rate increase in June, to offset increased fuel and labor costs, and to bring returns more in line with the value of the premium services being provided to customers."

NEW YORK, (APRIL 25) PR NEWSWIRE - Allegheny Power System, Inc., (NYSE: AYP) today reported consolidated net income for the 1990 first quarter and the 12 months ended March 1990 of $63.6 million ($1.20 per share) and $196.0 million ($3.73 per share), respectively, compared with $62.5 million ($1.20 per share) and $200.7 million ($3.87 per share for the corresponding 1989 periods.

Net income for both the three and twelve months ended March 31, 1990, reflects the continued growth in kilowatthour sales and the elimination in early January of the previously reported temporary $20 million reduction in annual revenues in Pennsylvania. The resulting higher revenues were partly offset in the first quarter, and more than offset in the twelve months, by increases in maintenance and other expenses.

West Penn Power on March 15, 1990, filed for rate increases designed to produce $56.9 million in additional annual revenues. The Pennsylvania Public Utility Commission is expected to hold hearings and issue an order on the rate increases by Dec. 15, 1990.

#90115p7361 04/25/1990 ~PR Newswire

COATESVILLE, PA (APRIL 25) PR NEWSWIRE - W. R. Wilson, chairman and chief executive officer of Lukens Inc. (NYSE: LUC), told stockholders at the company's annual stockholders' meeting, that capital spending in the United States this year, including orders for new natural gas transmission pipelines, provide a bright sales and earnings outlook for Lukens Inc. results.

Stockholders re-elected Wilson, Frederick M. Myers and Nancy Huston Hansen to the board of directors for three-year terms at the meeting, which was held in the company's Administrative Resources Center. Myers first became a director in 1957 and served as chairman from 1981 until 1988, when he became vice chairman. He is a partner in Cain, Hibbard, Myers & Cook, a law firm in Pittsfield, Mass. Hansen became a director in 1985. She is vice president of Evangelical Affairs of the Huston Foundation and chief executive officer of Hansen Development Corp., which is a land development and construction company. Samuel A. Cann, a director since 1972 and a Savannah, Ga., attorney, retired from the board. He was not replaced.

After commenting on achieving record sales and earnings for the years 1987 through 1989 and again for the first quarter of 1990, Wilson singled out trends that point toward continued growth opportunities in the company's markets.

Wilson said the company, which had sales of $645 million in 1989 has a goal to reach $1 billion in sales during the 1990s. He said other goals are to maintain a return on equity of at least 15 percent and to pay out 35 percent of earnings as dividends.

In his remarks regarding the company outlook, Wilson said, "If the federal government shifts from building tanks and ships to building bridges, highways and other infrastructure, we expect to share in these markets. There are also growing opportunities to provide steel for heavy construction equipment and power plants."

The Lukens executive said the plate business is already getting a boost from the growth in pipeline construction, which has some years to go before peaking. In addition, he said shipbuilding appears to be ready for a resurgence. One oil company has already made plans to go to double-hulled tanker ships.

"Pushed by pipeline construction, we believe our Corrosion Protection Group will nearly double its sales over the next several years and generate attractive earnings," said Wilson.

The revitalization of Eastern Europe was also cited by Wilson as providing future worldwide demand for all of the company's products.

The Lukens chairman said the company plans to invest $35 million in new plant and equipment during 1990 and about $22 million of the total is earmarked for the Steel Group. He said that $12 million -- $3 million in 1990 and $9 million in 1991 -- will be spent to further upgrade environmental systems. "We expect to be able to meet any requirements of the new law (Clean Air Act)," said Wilson.

"While we are concerned about specific provisions of the Clean Air Act, we heartily support efforts to improve the environment. We are spending the money needed to stay ahead of the requirements. We have spent millions of dollars for environmental facilities and we spend millions more each year to operate and maintain those facilities."

Regarding the Clean Air Act, Wilson said the Senate-imposed standards for coke ovens that go beyond "Maximum Available Technology" (or MACT) and require technology which exists nowhere in the world are unrealistic and "would be devastating to integrated steel producers."

Although the Lukens Steel subsidiary of Lukens Inc. is an electric arc

furnace steel producer, which makes steel entirely from recycled scrap iron and steel, and operates no coke ovens, Wilson said the coke oven standards would have a long-term impact on Lukens.

He said, "Our raw material, scrap, begins as steel produced at an earlier time by those steel producers who start with ore, coal and limestone. Without those producers there is ultimately no scrap. If those integrated producers are forced out of business in this country, the manufacturing plants that depend on them for steel -- and from which Lukens receives a good portion of its high-grade scrap -- would no longer remain in this country either. We would lose access to this high-grade scrap, which is essential to our production process."

Wilson noted that imposing an unattainable standard would shift the steel production to countries where there are less stringent environmental standards and the global environment would not benefit at all.

Lukens is a "Fortune 500" company with subsidiaries that provide plate steels, pipe coating services, cathodic corrosion protection services, highway construction-zone safety products, industrial screening and heavy materials-handling equipment.

#90115p7364 04/25/1990 ~PR Newswire

COLUMBIA, SC (APRIL 25) PR NEWSWIRE - SCANA Corporation (NYSE: SCG) today reported the following consolidated earnings for the three (3) and twelve (12) months ended March 31, 1990:

Consolidated Earnings Summary

	3 Months Ended		12 Months Ended	
	3/31/90	3/31/89	3/31/90	3/31/89
Operating Revenues (000)	$287,438	$285,814	$1,124,908	$1,066,902
Net Income (000)	$ 33,782	$ 33,909	$ 122,498	$ 115,727
Number of Common Shares Outstanding (000)	40,296	40,296	40,296	40,296
Earnings Per Share	$ .84	$ .84	$3.04	$2.87

Unseasonably mild weather during the first quarter of 1990 resulted in a slight decrease in total kilowatt-hour sales of electricity by South Carolina Electric & Gas Company (SCE&G), SCANA's principal subsidiary. Reduced sales levels, combined with higher non-fuel operating and maintenance expenses offset the favorable impact of higher retail electric

and firm retail natural gas rates which were placed into effect in July 1989 and November 1989, respectively. Although weather-driven sales of natural gas to residential and commercial customers during the first quarter were also down in comparison to the first quarter of 1989, a 31 percent increase in industrial sales contributed to a 9.3 percent increase in total therm sales of natural gas by SCE&G and South Carolina Pipeline Corporation, SCANA's gas transmission subsidiary.

At SCANA's 1990 Annual Meeting of Stockholders held today in Columbia, Directors H.M. Chapman, L.M. Gressette, Jr. and John A. Warren were re-elected to three-year terms that will expire at the Company's Annual Meeting in 1993. Stockholders also elected new Directors B.L. Amick, Chairman of the Board and Chief Executive Officer of Amick Farms, Inc., in Batesburg, S.C. and W.T. Cassels, Jr., Chairman of the Board of Southeastern Freight Lines in Columbia, to three-year terms on the Company's Board of Directors. Directors J.K. Addy, J.B. Guess, III, E.W. Pike, Jr., and V.C. Summer, each of whom will attain the mandatory retirement age of 70 prior to the date of the Company's 1993 Annual Meeting, did not stand for re-election. Stockholders also approved the appointment of Deloitte & Touche as independent public accountants to audit the books of the Company for the year ending December 31, 1990.

Immediately following the Annual Meeting, SCANA's Board of Directors met and declared the regular dividend of 63 cents per share of common stock for the quarter ending June 30, 1990. The dividend is payable July 1, 1990 to stockholders of record at the close of business on June 8, 1990. The Board also declared the regular quarterly dividends on the following classes of SCE&G's cumulative preferred stock for the quarter ending June 30, 1990: 62 1/2 cents per share on the 5 percent Series; 56 1/4 cents per share on the 4.50 percent Series; 57 1/2 cents per share on the 4.60 percent Series; 57 1/2 cents per share on the 4.60 percent Series A; 57 1/2 cents per share on the 4.60 percent Series B; 64 1/16 cents per share on the 5.125 percent Series; 75 cents per share on the 6 percent Series; $1.175 per share on the 9.40 percent Series; $2.03 per share on the 8.12 percent Series; $1.925 per share on the 7.70 percent Series; $2.10 per share on the 8.40 percent Series; and $1.09 per share on the 8.72 percent Series.

Dividends on the preferred stocks are also payable July 1, 1990 to stockholders of record on June 8, 1990. The 5 percent Series is listed on the New York Stock Exchange -- the ticker symbol is "SAC Pr."

SCANA Corporation, headquartered in Columbia, S.C., is a diversified holding company engaged, through subsidiaries, in regulated utility businesses and other non-regulated businesses.

MEMPHIS, TN (APRIL 25) PR NEWSWIRE - Sara Lee Corporation (NYSE: SLE) today announced its Packaged Meats division is an underwriting sponsor for the 1990 Children's Miracle Network Telethon.

Sara Lee is the first meat products sponsor in the eight-year history of the Children's Miracle Network. The company, which produces Ball Park, Bryan and Kahn's hot dogs, is contributing $300,000, plus additional support from matching donations on behalf of retailers.

Sara Lee also will support the Children's Miracle Network by sponsoring a series of events benefitting local children's hospitals in 27 cities. The cities are Atlanta; Baltimore; Birmingham; Boston; Chicago; Cincinnati; Cleveland; Columbus; Denver; Hartford, Conn.; Indianapolis; Jackson, Miss.; Jacksonville; Lexington, Ky.; Los Angeles; Memphis; Miami; Mobile; Nashville; New Orleans; New York; Pittsburgh; Portland; San Jose; Seattle; Springfield, Mass.; and Tampa.

The Children's Miracle Network is the national fundraising effort for more than 160 hospitals for children in the U.S. and Canada. These hospitals are the primary care facilities for children from infancy through adolescence suffering from ailments such as muscular dystrophy, cystic fibrosis, birth defects, heart diesase, leukemia, AIDS, abuse, burns and cancer.

The focus of the children's hospital fundraising effort is the Children's Miracle Network Telethon, broadcast live from Disneyland. This year, the telethon will air on June 2 and June 3 in more than 180 markets. In 1989, the telethon raised $77 million.

Sara Lee is a leading producer of hot dogs in the United States. The three Sara Lee brands participating in the Children's Miracle Network -- Ball Park, Bryan and Kahn's -- are the company's premium branded meat and beef franks.

When stores support Ball Park, Bryan or Kahn's hot dogs with displays, Sara Lee will make a donation in the retailer's name to the local children's hospital. In addition, the company will support the fundraising with a 15-second national TV commercial for the Children's Miracle Network and a freestanding insert in newspapers on May 20, offering consumers a free Children's Miracle Network emergency telephone refrigerator magnet with proof-of-purchase.

George Bryan, senior vice president of Sara Lee Corporation, said, "Sara Lee Corporation is very proud to be associated with the Children's Miracle Network and the fine work it does to help children all over the country. The telecast already has established itself as the most successful telethon of all time. What also attracted us was each local hospital receives 100 percent of the proceeds from the local broadcast and 100 percent of corporate donations."

Bryan said that, based on other companies' experience with Children's Miracle Network sponsorship, Sara lee expects strong retailer merchandising support. "The merchandising really enables us to be even more supportive of local children's hospitals, and that's what's most gratifying about our commitment."

Sara Lee Corporation is an international packaged food and consumer products company based in Chicago, Illinois.

WILMINGTON, DE (APRIL 25) PR NEWSWIRE - Airgas Inc. (NYSE: ARG), a distributor of industrial gases and related products, today announced an increase in the retail price of acetylene gas of $1 per hundred cubic feet -- or about 7 percent -- and a $1 per month increase in acetylene cylinder rental charges.

The increases will affect all acetylene manufactured at any of Airgas' 13 manufacturing facilities, or distributed through any of Airgas' 225 retail stores nationwide.

Thomas Mason, executive vice president of Airgas, said the reason for the 7 percent acetylene gas price increase is due to recent increases in the cost of calcium carbide, the raw material used to produce acetylene and higher liability insurance premiums because of the potentially hazardous nature of acetylene gas. Mason went on to say that the cylinder rent increase is necessary to cover the significant costs of complying with

environmental regulations governing lime slurry, a by-product of acetylene and acetone storage tanks and, most importantly, because of a recent federal directive that all acetylene cylinders be requalified periodically.

Airgas Inc., through its subsidiaries, distributes industrial, medical and specialty gases and manufactures protective equipment and various products for sale to the industrial gas industry.

#90115p7377 04/25/1990 ~PR Newswire

BOSTON (APRIL 25) PR NEWSWIRE - Houghton Mifflin Company's (NYSE: HTN) annual meeting, held here today, marked the retirement of Harold T. Miller as chairman and chief executive officer as well as the election to its board of directors of DeRoy C. Thomas, president and chief operating officer of ITT Corporation. Thomas replaces David S. Saxon, chairman of the Corporation of Massachusetts Institute of Technology, who retired from Houghton Mifflin's board today after six years as a director.

Nader F. Darehshori, vice chairman of the board and Miller's successor as chairman and chief executive officer, reviewed early 1990 results for Houghton Mifflin publications. In the elementary school market, he noted that the company's reading/language arts program has continued to do well following its adoption last year by 70 percent of the school districts in California, and that the 1990 editions of "Houghton Mifflin English" and "Houghton Mifflin Spelling and Vocabulary" are competing strongly in states and school districts across the country. At the secondary school level, Darehshori pointed to the new "Houghton Mifflin English" for grades 9-12 and new editions of the company's algebra and geometry textbooks as programs for which early sales reports have been very positive.

For the college market, Darehshori described the company's 1990 list of publications as "the strongest in Houghton Mifflin's history, with exceptional opportunity for increasing our market share." And in trade publishing, he announced that David Macaulay's bestselling "The Way Things Work" has been optioned to the Children's Television Workship for possible development into both commercial and public television programs.

DeRoy C. Thomas was one of five directors elected to serve a three-year term on Houghton Mifflin's board. He was named executive vice president of ITT Corporation and chairman and chief executive officer of the Hartford Insurance Group in 1983, after 19 years with the Hartford Fire Insurance Company. He was promoted to vice chairman of ITT in 1985 and he became president and chief operating officer in 1988.

In other business at the meeting, Houghton Mifflin shareholders ratified

the selection of Ernst & Young as independent auditors.

NORTHBROOK, IL (APRIL 25) PR NEWSWIRE - Christopher J. Brennan, president and chief executive officer of Pegasus Broadcasting, Inc., announced today that it has entered into an agreement whereby GE Capital will acquire the stock of Pegasus Broadcasting, Inc. GE Capital has been an investor in Pegasus since 1986. The transaction is subject to regulatory approvals, and the parties anticipate a closing by July 1990.

Pegasus Broadcasting is a privately held communications company comprised of WAPA-TV, a leading Spanish language independent station with production facilities in San Juan, Puerto Rico; WJBF-TV in Augusta, Ga., an ABC affiliate; KSCH-TV, an independent station in Sacramento, Calif.; and two radio stations KCAP-AM and KZMT-FM in Helena, Mont. The current shareholders will also retain ownership of the radios after closing.

"GE Capital is one of the most experienced investors in the broadcasting industry and their additional investment in Pegasus will continue the growth each station has enjoyed in their respective markets," said Brennan.

GE Capital, headquartered in Stamford, Conn., is one of the nation's largest diversified financial services company, with assets of $58.7 billion.

HARRISBURG, PA (APRIL 25) PR NEWSWIRE - AMP Inc. (NYSE: AMP) today reported first quarter results were closely in line with estimates made at several meetings with financial analysts last month.

Sales, orders and backlog set new highs -- advancing over both the year-earlier quarter and the fourth quarter of 1989. Worldwide sales rose 7 percent to a record $764 million from $713 million in the year- earlier period. Sales were also well above the fourth quarter of 1989, when we reported $680 million after excluding $40 million sales because of the changeover of several Asia/Pacific subsidiaries to a Nov. 30 fiscal year.

International sales set a new quarterly high -- with good year- to-year growth in local currencies in the Americas, Asia/Pacific, and Europe. U.S. sales, while up from the fourth quarter because of the usual seasonal strengthening, were down slightly from the record high of the 1989 first quarter.

After setting that high, U.S. sales declined modestly in each of the remaining three quarters in 1989.

Earnings per share of $0.75, up 4 percent from $0.72 in the first quarter of 1989, were the third highest in our history. They were exceeded only by the $0.78/share earned in the second quarter of 1988 on $687 million sales, and the $0.79/share on $695 million sales in the fourth quarter 1988, when receipt of a patent infringement suit payment added $0.06 to earnings. Margins continue below our historical norms because of continued product price erosion, rising wage rate and benefit costs, and lower than expected sales growth in the U.S.

On April 25, 1990, the board of directors of AMP Inc. declared a regular quarterly dividend of $0.34/share, payable June 1, 1990, to shareholders of record May 7, 1990. The current rate indicates an annual dividend of $1.36 for 1990 compared to $1.20 in 1989 and $1.00 in 1988 -- and would result in the 37th consecutive annual increase.

Harrisburg-based AMP Inc. is the world's leading producer of electrical/electronic connection devices.

#90115p7410 04/25/1990 ~PR Newswire

PITTSBURGH (APRIL 25) PR NEWSWIRE - National Intergroup, Inc. (NYSE: NII) and NKK Corp. of Japan, announced today that their boards of directors have approved an agreement in principle by which NII will sell an additional 20 percent ownership of National Steel Corp. (NSC) to NKK for approximately $147 million, equivalent to book value at Dec. 31, 1989.

Upon completion of this initial transaction, NII will own 30 percent and NKK will own 70 percent of NSC.

In addition, NII will exchange 20 percent of NSC common stock for a newly issued preferred stock of NSC which will represent two thirds of NII's remaining 30 percent ownership of NSC. The preferred stock will have a face value of approximately $147 million and a minimum redemption value of approximately $122 million. The preferred stock will have an 11 percent cumulative annual dividend, totaling approximately $16 million per year. Under the agreement, half of NII's preferred NSC stock is required to be redeemed by the fifth anniversary of issuance with the balance redeemable by the 10th anniversary.

NII will continue to own common stock of NSC representing the balance of their interest in NSC.

Under the terms of the agreement, NII will transfer to NSC the $147 million in proceeds and will be relieved of its obligation to reimburse NSC for $147 million of Weirton liabilities. NII will continue to be obligated to reimburse NSC for the remaining Weirton liabilities, which will be met through the dividends on and redemption of its NSC preferred stock. Weirton retirees and employees will continue to receive payment of full benefits, as in the past. NII estimates that the combination of preferred dividends and the reduction in Weirton liability payments will result in approximately $30 million of improved cash flow for NII per year.

This transaction is expected to result in a non-recurring charge of approximately $13 million in NII's first fiscal quarter ending June 30, 1990, to reflect the fair market value of the preferred stock and expenses of the transaction.

Changes in NSC's board representation reflecting NKK's increased ownership position will occur after the final closing of the transaction, which is contingent on the parties reaching a definitive agreement.

NII is a wholesale distribution company with sales in fiscal year 1989 of $3.1 billion. In addition to pharmaceuticals, NII is also in the businesses of oil gathering and general merchandise distribution. During the first nine months of fiscal 1990, ended Dec. 31, 1989, NII earned $52.3 million, or $2.21 per share, vs. a loss of $18.4 million, or $1.04 per share, in the comparable period last year. In the first nine months of fiscal 1990, NII's core wholesale pharmaceutical distribution business, FoxMeyer Drug Co., had sales of $1.9 billion and operating profits of $23 million. FoxMeyer's sales are expected to continue to grow at double-digit rates. In recent years, NII has been implementing its strategy of divesting its metals businesses in order to reduce debt and concentrate on pharmaceutical distribution. Towards this objective, the company recently sold its entire aluminum subsidiary.

NKK Corp. had sales of $9.6 billion and net income of $318 million in the fiscal year ended March 31, 1989. Steelmaking accounted for approximately 74 percent of its revenues. NKK acquired a 50 percent equity interest in NSC in 1984.

In the year ending Dec. 31, 1989, NSC earned net income of $83.2 million on sales of $2.6 billion. Steel shipments totaled 4,957,000 tons and raw steel production totaled 5,394,000 tons. NSC's flat-rolled carbon steel products were shipped to a variety of consumer and industrial markets. In 1989, nearly 28 percent of National's shipments were delivered to the automotive market, another 23 percent went to steel service centers and 15 percent to industrial and electrical equipment manufacturers. It is the sixth largest integrated steel company in America.

VANCOUVER, B.C. (APRIL 25) PR NEWSWIRE - Eric V. Friedland, chairman & chief executive officer of Fairbanks Gold Ltd. (Vancouver: FX) announced today that the private placement through Yorkton Capital Markets of 500,000 units at CDN $6.50 per unit for total proceeds of CDN $3,250,000 has closed.

The proceeds, in combination with existing cash in the Fairbanks treasury, will be used to fund Fairbanks Gold's share of the 1990 US $9.3 million dollar development budget on the Fort Knox gold deposit near Fairbanks, Alaska.

Three diamond core drill rigs have arrived. Two reverse circulation drill rigs with the capacity to drill to 2,000 feet are en route and should arrive by April 30. Drilling on a 24 hour-per- day basis is scheduled to commence on May 1. Step-out holes to determine the boundaries of the open-ended gold mineralization will be drilled first. Holes will also be drilled on Gilmore Dome, the second gold bearing porphyry intrusive on the Fort Knox property.

BIRMINGHAM, AL (APRIL 25) PR NEWSWIRE - Energen Corp. (NYSE: EGN) announced today that earnings for the second fiscal quarter improved 12 percent over the same period last year.

For the quarter ended March 31, Energen reported net income of $11,124,000, or $1.14 per share on 9,751,000 average shares outstanding. This compares with net income of $9,655,000, or $1.02 per share on 9,505,000 average shares outstanding, for the same period last year.

Income from continuing operations for the second quarter of 1990 totaled $11,124,000, or $1.14 per share, compared with $9,806,000, or $1.03 per share, for the same period last year.

Net income for the 12 months ending March 31 totaled $9,644,000 (including a fourth quarter 1989 loss of $2,061,000 on the disposal of Energen's specialty well drilling company), or 99 cents per share on 9,697,000 average shares outstanding. This compares with $11,222,000, or $1.27 per share on 8,869,000 average shares outstanding, for the same period last year.

Energen also announced that its board of directors, during today's regular monthly meeting, declared a quarterly dividend of 22 cents per share, payable June 1 to shareholders of record on May 15.

TECO/Gulf States Coalbed Methane Project Progressing Energen also released today an update on the coalbed methane activities of Taurus Exploration, the company's oil and gas exploration and production company.

When Taurus announced its joint project with TECO Energy Inc. and Gulf States Paper Corp. in August 1989, project plans called for an initial 50-well drilling program in the immediate vicinity of 17 existing production wells, and two, five-well pilot programs in other areas of the leased property.

A total of 51 wells in the initial development program, including the existing 17 production wells, are currently producing approximately 11 million cubic feet of gas per day. Production from the new wells is being delivered into a new pipeline owned by Sonat Intrastate-Alabama Inc. The pipeline was placed in service March 31.

Taurus holds a 14 percent working interest in this project. Energen Corp. is a diversified energy holding company engaged primarily in natural gas distribution, exploration and production.

GERMANTOWN, MD (APRIL 25) PR NEWSWIRE - Directors of Fairchild Space & Defense Corp. have elected Richard E. Brackeen chairman of the board and chief executive officer of the corporation.

He succeeds Richard D. DeLauer who passed away earlier this week. Brackeen was vice chairman of the board and deputy chief executive officer, directing the expansion of Fairchild's business and technology bases.

Brackeen, 51, had been president and chief executive officer of Matra Aerospace Inc., the U.S. subsidiary responsible for Matra's aerospace business in the United States, including the Matra acquisition of Fairchild's space and defense operations in August 1989.

Prior to joining Matra, he spent more than 20 years with Martin Marietta, serving in several key management positions in the aerospace divisions and in the corporate offices. At the company's aerospace headquarters, he served as vice president of Strategic Planning from 1976 to 1978, when he was named president of International Operations.

In 1980 Brackeen was named vice president of Business Development for the Astronautics Group and starting in 1983 he served as president of Martin's Space Launch Systems Co. He established Martin Marietta's Commercial Titan Inc., a new commercial venture to enter the market for the launch of commercial satellites, which marketed launch services primarily to export customers.

Brackeen was awarded a bachelor of science degree in aeronautical engineering from the University of Oklahoma (1962), a master's degree in aerospace engineering from the University of Southern California (1964), and a master's degree in business from MIT's Sloan School of Management (1975).

Fairchild Space & Defense Corp., a member of the Matra Group, is a U.S. space and defense electronics company with operations in Germantown, and Manhattan Beach, Calif. The company, with a workforce of 2,000, has annual revenues of approximately $230 million. Matra, headquartered in Paris, France, is an internationally diversified company with annual revenues in 1989 of approximately $3.6 billion. Matra's lines of business include aerospace, telecommunications and transportation.

PHILADELPHIA (APRIL 25) PR NEWSWIRE - CIGNA Corp. (NYSE: CI) today announced that its shareholders approved the election of five directors to serve for a term ending in April 1993.

The directors re-elected were Evelyn Berezin, James F. English Jr., Stafford R. Grady, Gerald D. Laubach and Ezra K. Zilkha. Each director re ceived more than 97 percent of the shares voted at the meeting.

Shareholders also ratified the appointment of Price Waterhouse as independent public accountants by more than 99 percent of the shares voted.

Reviewing the outlook for the company in his remarks to shareholders at the annual meeting, Wilson H. Taylor, CIGNA's chairman and chief executive officer, noted that he expected "basic earnings improvement this year over 1989. This improvement will include continued gains in key businesses such as health care, special benefits and group pension.

"First quarter results, however, were affected by severe winter storms in Europe earlier this year which will have a negative impact of approximately $34 million (after tax) on property and casualty results. Absent further unusual levels of catastrophes, we should see improvement in our overall P/C earnings as compared to 1989," Taylor concluded.

CIGNA plans to release first quarter results on Thursday, May 3, 1990.

EAST HARTFORD, CT (APRIL 25) PR NEWSWIRE - Thai Airways International and the Royal Thai Air Force have ordered Pratt & Whitney PW4000 engines to power Airbus A300s, A310s and A330s they are buying. The orders, including options, could be worth as much as $240 million.

Thai Airways has placed firm orders for four A330s, each powered by two PW4000s, with options for four additional aircraft. The engine buy is worth about $78 million in firm orders for eight PW4000s plus spares. If

the options (with spares) are exercised, the order will be worth an additional $80 million.

The airline also has converted existing options for five PW4000-powered A300-600R twinjets into firm orders, worth about $70 million for 10 installed engines plus spares. Delivery of the A300s is scheduled to begin in 1992, and the A330s in 1994.

The Royal Thai Air Force also has placed a $12 million order for two PW4000s to power its new Airbus A310. The aircraft will be delivered in 1991.

The PW4000 is Pratt & Whitney's newest and most powerful turbofan engine for wide-body transports. The engine is gaining wide recognition for the advantages it provides airlines in terms of lower operating and maintenance costs, higher thrust growth potential and high degree of commonality on all wide-body aircraft types.

Pratt & Whitney is a unit of United Technologies Corporation (NYSE: UTX) of Hartford, Conn.

FRANKFURT, GERMANY (APRIL 25) PR NEWSWIRE - The Frankfurt-based TELENORMA GmbH, a company of the Bosch Group, has been awarded the contract by Bancomer S.N.C., Mexico City, following an international tender, for setting up a network compound of digital ISDN telecommunication (TK) systems worth several million U.S. dollars. The project calls for equipping with TK systems the head office, as well as a number of office buildings of the bank, located in different districts of Mexico City. These nodes, with a total of 3,500 exchange and tie lines and 8,000 extensions are networked by means of digital PCM 30 long-distance lines, so that they can operate as one large communication system in spite of

being separated by distances of up to 15 km.

A comparable communication network with 10 systems and 14,000 connecting units (lines) was supplied and installed by TELENORMA for the City of Frankfurt am Main last year.

The Bancomer project is expected to be completed in early 1991. Negotiations to include Bancomer branches with an additional 15,000 connecting units in the communication compound are still being conducted. With more than 26,000 connecting units, Bancomer would be the largest ISDN TK-system compound worldwide.

Within the network compound, not only voice communication, but also text communication between personal computers, fast data traffic provided by the connection of two host computers, as well as video communication with the TELENORMA TX 90 Video multi-communication terminal, are possible.

A UNIX operating control computer at the main node manages, among other things, the current call data, carries out traffic measurements, controls the entire cable network of the compound and acts as service center for modifying system data (functional performance features, names, telephone numbers, etc.).

TELENORMA is a member of the Bosch Group, the 57th-largest corporation in the world, with 1989 worldwide sales of approximately $17 billion and 170,000 employees. In the United States, the Bosch Group employs more than 5,000 people at subsidiaries and affiliates in 18 cities and 11 states. In 1989, its American sales exceeded $1 billion.

#90115p7431 04/25/1990 ~PR Newswire

CHICAGO (APRIL 25) PR NEWSWIRE - More than 35 million Americans suffer from allergies, but most are not tested. However, much of the inconvenience associated with allergy testing now can be reduced with new, cost-effective diagnostic technology, which facilitates accurate diagnosis of allergy from a single blood sample.

Introduced today by Abbott Laboratories (NYSE: ABT), the new product, called Abbott Matrix, is compact, automated and well suited for laboratories in hospitals, clinics or physician's groups.

The instrument can run several assays simultaneously on a single blood sample. The first application for the new technology will be allergy, and future capabilities will include testing for aids, hepatitis and HTLV I.

For allergy, the Abbott system performs tests to detect antibodies to several common allergens -- grasses, weeds, molds, dust, pet hairs, etc. -- and provides results in less than 24 hours.

Abbott Matrix is designed as an alternative or adjunct testing method to commonly performed skin tests. It can be used as a first- line diagnostic aid when skin testing is undesired by the patient or not possible.

The current worldwide market for in vitro allergy testing is estimated at $120 million. It is a new market for Abbott, world leader in diagnostics.

Abbott Matrix provides results comparable in sensitivity and specificity to labor intensive laboratory methods. With the Abbott system, an operator adds the sample and reagents and everything else is automated. As a result, training time, operator errors and costs are reduced. Factory-set calibrations further simplify operation.

Test cells for Abbott Matrix contain panels of specific allergy tests, and up to 10 patient samples can be tested in a single run. A special panel for Europe has been developed.

Abbott Laboratories is a worldwide manufacturer of healthcare products employing 41,000 people. In 1989 the company's sales and net earnings were $5.4 billion and $860 million respectively, with earnings per share of $3.85.

SKOKIE, IL (APRIL 25) PR NEWSWIRE - Jack F. Reichert, chairman, president and chief executive officer, announced today that Brunswick Corp. (NYSE: BC) has entered into a Letter of Intent to acquire the assets of Kiekhaefer Aeromarine, Inc., Fond du Lac, Wis. Terms of the transaction were not disclosed.

Kiekhaefer Aeromarine is a major supplier of high performance propulsion units to the marine industry. "The acquisition is consistent with our strategy to focus on upscale performance-oriented products and will significantly accelerate our efforts in the area of advanced marine technology," Reichert stated.

Fred Kiekhaefer, 42, principal owner, will remain as president of Kiekhaefer Aeromarine and will be responsible for all Brunswick Marine high performance propulsion products. "Fred is highly respected within the industry because of his engineering and entrepreneurial skills in the manufacture and marketing of high performance propulsion products. As the son of the founder of Mercury Marine, he also brings back to Brunswick the Kiekhaefer heritage," Reichert added. In his new capacity, Kiekhaefer will report to David Jones, president of Brunswick's Marine Power Division.

Headquartered in Skokie, Brunswick Corp. serves worldwide markets in the marine power, pleasure boating, recreation, defense/aerospace and

industrial areas. Its stock is traded on the New York, Tokyo, London, Pacific and Midwest Stock Exchanges.

JACKSONVILLE, FL (APRIL 25) PR NEWSWIRE - Barnett Banks, Inc. (NYSE: BBI) has announced the election of Clarence V. McKee Jr. to its board of directors.

McKee, 47 is chairman, chief executive officer and co-owner of WTVT Holdings, Inc., licensee of WTVT, Channel 13, the CBS affiliate in Tampa. He is also chairman, president and chief executive officer of McKee Communications of Florida, Inc.

Prior to purchase of WTVT in Tampa, McKee practiced communications law in Washington, D.C. and served in a variety of political and appointive posts. In 1982, he was appointed by President Reagan to the Board of the Legal Services Corporation, the federally funded agency which administers government legal assistance to the poor. Earlier, he served on the staff of two U.S. Senate Committees as well as the Federal Communications Commission where he was legal counsel to the commissioner.

In Tampa, he is a director of Barnett Bank of Tampa, Florida Progress Corporation, the Florida Power Corporation and Talquin Corporation. He is a member of the Board of Governors of the Florida Association of Broadcasters and a trustee of the Florida Network on Youth and Family.

Born in Buffalo, N.Y., McKee holds a bachelor's degree from Hobart College in New York and earned his doctor of Jurisprudence degree from Howard University School of Law in Washington, D.C.

Barnett is a $29.3-billion-asset, two-state banking organization. It is the leading financial institution in Florida and the eighth-largest in Georgia. The company's stock (BBI) is listed on the New York Stock Exchange.

NEW YORK (APRIL 25) PR NEWSWIRE - At Witco Corporation's (NYSE: WIT) annual meeting held today in New York City, stockholders were told the company expects to spend in excess of $75 million on internal capital expenditures in 1990. This tops the company's previous record of nearly $72 million spent in 1988.

Witco President Denis Andreuzzi spoke of the continuation of Witco's policy of "investing in itself". In addition to previously announced projects which are underway, Andreuzzi announced the approval by the board of directors of an expansion at Witco's Perth Amboy, N.J., facility which will increase polyester capacity and a new coating product line which will be added to the company's Beacon, N.Y., production.

Andreuzzi spoke also of the company's intent to build upon its strengths as a global manufacturer and marketer. "We are competing in a global economy where no market is secure, where the competition is fierce and where opportunity for the strong will be great. Witco's mission is to build on our strengths and to compete aggressively on a global scale."

"Witco started as a sales organization and we have grown by being close to our customers and providing quality products and good customer service," Andreuzzi continued. "We must become even more customer driven. We are ready for the opportunities that a global economy present."

In business conducted at the meeting, stockholders re-elected five directors for three-year terms.

Witco manufactures specialty chemical and petroleum products and engineered materials with annual sales of approximately $1.6 billion.

WASHINGTON (APRIL 25) PR NEWSWIRE - Unit Investment Trusts, investment companies that purchase fixed portfolios of selected bonds or stocks, increased their deposits through offerings in March of $561.6 million for a year-to-date total of $1.61 billion in 1990 compared to $3.13 billion through March 1989, according to statistics compiled by the Investment Company Institute.

Tax-free bond trusts issued shares in March with deposits of $430.2 million for a year-to-date total of $1.10 billion compared to $2.37 billion year-to-date in 1989. Taxable bond trusts totaled $104.7 million in March for a 1990 total of $333.0 million compared to $500.3 million for the prior year-to-date. Offerings in equity trusts totaled $26.8 million for $174.3 million for the year-to-date compared to $261.9 million for the previous year.

There were 74 new tax-free bond trusts issuing shares in March, two new taxable bond trusts, and three new equity trusts.

In terms of maturity, long-term bond trusts with an average weighted maturity of more than 15 years were the most commonly offered in March with $445.0 million in shareholder deposits.

DALLAS (APRIL 25) PR NEWSWIRE - Hicks, Muse & Co. Incorporated announced today the formation of a joint venture to purchase companies in the

industrial sector.

"The new venture will focus on acquiring and managing high-quality, leading niche industrial companies," said Thomas O. Hicks, who is chairman and chief executive officer of Hicks, Muse, a firm specializing in leveraged transactions. "Our targets will be companies that require a strong capital base and a new management direction. We hope to purchase several industrial companies with aggregate revenues in excess of $1 billion over the next three to five years."

Hicks stated that several of the acquisition candidates he is considering include companies purchased in the last two years in transactions involving too much leverage. "These companies will be forced to restructure their balance sheets to survive," he said.

According to Hicks, his new venture will be called HMD Partners, Inc., combining the capital and deal-making skills of Hicks, Muse and the management capabilities of a group headed by Ray C. Davis, who has 16 years of senior management experience with industrial companies.

"Through the combination of our capital resources and the considerable operating experience of Ray Davis and his associates, we should have an edge in buying the best industrial companies available," said John R. Muse partner and managing director of Hicks, Muse. He said that equity financing for HMD Partners acquisitions will be provided by the Hicks, Muse Equity Fund.

Davis currently heads his own consulting firm in Dallas composed of seasoned executives who have held senior operating management positions and have proven operating track records. He spent his manufacturing career in various key management positions at Colt Industries, Inc., a major diversified industrial manufacturer. During his last five years at Colt he served as a group vice president responsible for 11 divisions with operations in 15 countries and revenues of more than $1 billion.

Davis stated that he was pleased to be aligned with the partners of Hicks, Muse. "The firm has financial credibility and has demonstrated an ability to attract top-quality institutional investors, he said.

HMD Partners will be based in Dallas, as is Hicks, Muse. The principals of Hicks, Muse, Messrs. Hicks and Muse and Jack D. Furst, have completed in excess of $5 billion of acquisition transactions since 1984.

#90115p7478 04/25/1990 ~PR Newswire

DENVER (APRIL 25) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) today reported earnings for the 1990 first quarter of $30.1 million, or 65 cents per share, on revenues of $429.5 million. Earnings for the 1989 first quarter were $81 million, or $1.96 per share, on revenues of $435.8 million. Of the $51 million after-tax earnings difference, $41 million was due to lower 1990 copper and molybdenum realizations, and higher 1989 first quarter income due to the $5 million gain on the sale of Cyprus' clay operations.

Copper/Molybdenum/Gold earned $38.7 million in the first quarter, a $70.1 million decrease from the $108.8 million reported in the like period in 1989. Reduced copper and molybdenum realizations were responsible for approximately $54 million of the decrease in pre-tax earnings, while higher costs and lower sales of produced copper were equally responsible for approximately $20 million of the decline. Copper realizations averaged

$1.13 per pound during the first quarter of 1990, down 34 cents per pound from the first quarter of 1989. Cyprus' average mine production costs for copper, including depreciation, averaged 77 cents per pound during the quarter, compared with 1989 costs of 70 cents per pound. The higher costs in 1990 primarily resulted from reduced recoveries at the Sierrita/Twin Buttes operation where milling difficulties, the result of blending ore from four different pits, were encountered during the 1989 fourth quarter and continued in early 1990. Sierrita's recoveries are expected to improve during the second quarter.

Costs were also impacted by lower ore grades than last year at Cyprus Miami, but this had improved by the end of the quarter. First quarter results from Cyprus' primary molybdenum mines, Thompson Creek in Idaho and Tonopah in Nevada, were lower than the comparable 1989 quarter due to substantially lower realizations and higher costs.

First quarter 1990 copper sales totaled 191 million pounds, up 32 percent over 1989 levels. Included in first quarter 1990 sales were 57 million pounds of purchased copper, including copper scrap for Warrenton and refined copper needed to meet customer commitments.

Cyprus Minerals, headquartered in Englewood, Colo., is a major producer of copper, molybdenum, lithium, coal, and talc. The Company employs approximately 8,500 people worldwide.

#90115p7485 04/25/1990 ~PR Newswire

BETHLEHEM, PA (APRIL 25) PR NEWSWIRE - 1989 was a record-setting year for Pennsylvania Power & Light Co. (NYSE: PPL), closing out a successful decade and fostering a strong sense of confidence for the '90s, the company's top executive said here today.

"We are in a good position to serve our customers effectively for the '90s. Our strategy is to continue to be the low-cost, high-quality producer of electric power that our customers have come to rely on," said Robert K. Campbell, PP&L's chairman, president and chief executive officer.

Campbell's remarks were directed to the 625 shareowners attending the company's 70th annual meeting, held at Lehigh University's Stabler Arena. During the meeting, shareowners elected four members to PP&L's board of directors and ratified the appointment of independent auditors.

"A year ago, I was telling you that 1988 was our best year ever. Because of a lot of good PP&L people, 1989 was even better," said Campbell in his annual state-of-the-business address. "Kilowatt-hour sales, revenues, earnings and dividends for 1989 were at the highest levels in our history."

These results, he said, give the company added confidence that the strategy it put in place during the '80s will fuel continuing success against the challenges of the '90s.

PP&L's strategy, Campbell pointed out, is based on a commitment to marketing and economic development, effective cost management and operational excellence.

Looking to the future, Campbell said that the quality and economy of electric service will assume even greater importance in the '90s.

"Satisfying customers is the essential element in meeting our mission," he said. "Achieving the revenue growth that is part of our strategy depends on reliable service and stable rates. Achieving revenue growth by increasing rates is the option of last resort. We met our pledge to not raise base rates in the last half of the '80s, and we are striving to extend that pledge into 1993 and beyond."

Following Campbell's remarks, John T. Kauffman, PP&L executive vice president and chief operating officer, presented highlights of the company's operational performance during the past year.

"In 1989, our total sales increased by 2.7 percent, paced by the commercial and residential areas," he said. "Our marketing program topped its goal and actually generated new annual sales of 1 billion kilowatt-hours, the first time the marketing effort has topped that important mark."

Electricity sales within the 29 counties served by PP&L rose to 28.4 billion kwh, up 1.6 percent over the year before. Total sales, including sales to other utilities, amounted to almost 35 billion kwh, a 2.7 percent increase. Total operating revenues in 1989 jumped 6.4 percent, to almost $2.4 billion.

"Sales to our residential customers continued to be strong in 1989," Kauffman pointed out. "In fact, 15 out of every 20 dwelling units built in our service area during the year were all-electric. As part of our residential marketing effort, we're experiencing continued success in the installation of off-peak heating systems that help us delay the need for construction of new power plants."

1989 was a watershed year for another kind of marketing at PP&L, he told shareowners: "We have expanded our bulk-power marketing through the development of non-traditional sales and contracts with other utilities. Through innovative marketing, we've managed to increase revenues from bulk-power transactions by $23 million."

Charles E. Russoli, PP&L executive vice president and chief financial officer, reported that the company's 1989 earnings of $4.05 per share set a record and that earnings for the 12-month period ending March 31, 1990, were even higher -- $4.14 a share.

"The earnings improvement," he said, "can be attributed to the same factors that had a positive impact on earnings in recent years: growth in system sales reflecting aggressive marketing and economic development programs, effective cost management and the refinancing of high-cost securities at a lower cost."

Earnings also were enhanced through capacity- and transmission- related transactions with other utilities.

"The financial health of the company has improved considerably in the last half of the 1980s," said Russoli. "And we expect that the positive factors we have been experiencing should result in continued earnings improvement in 1990.

"Because we've maintained our focus on the electric business, we're healthier financially than we've ever been. Key financial indicators -- earnings, common stock dividends, common stock price and book value -- reached their highest year-end levels ever at the end of 1989."

PP&L raised its annual dividend by 8 cents a share during most of the years in the '80s, Russoli noted. Last year, the company increased the annual dividend by 10 cents a share, and this year the dividend was increased by 12 cents, bringing it to $2.98.

With 66 million of the nearly 82 million eligible shares represented in the voting, shareowners elected four company directors to terms of three years.

Elected were Kauffman; William J. Flood, secretary-treasurer of Highway Equipment & Supply Co. of Harrisburg and Hazleton; the Rev. Daniel G. Gambet, president of Allentown College of St. Francis de Sales, Center Valley; and David L. Tressler, chairman of the board and chief executive officer of Northeastern Bank of Pennsylvania, Scranton. Flood was elected by the board during the past year and was up for shareowner election for the first time.

Shareowners also ratified the appointment of Deloitte & Touche as the company's independent auditors.

PP&L supplies electric service to a 10,000-square-mile area of 29 counties of central eastern Pennsylvania. Among the communities it serves are Allentown, Bethlehem, Harrisburg, Hazleton, Lancaster, Scranton, Wilkes-Barre and Williamsport.

ARLINGTON, VA (APRIL 25) PR NEWSWIRE - In response to today's announcement by the Gannett Foundation of its decision to engage an investment banking firm to negotiate the possible sale of its 10 percent holdings in Gannett common stock, Gannett Co., Inc. said that its board of directors previously announced that it authorized a stock repurchase program to acquire up to 7.5 million shares of Gannett common stock. To date, 2,957,000 shares have been acquired under that repurchase program.

From time to time, the company has expressed its continuing interest in buying back its stock, subject to market price.

Gannett has not yet decided whether it will be in a position to be a purchaser of the stock that may be sold by the foundation.

Gannett is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services, and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems, and a national group of commercial

printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

#90115p7503 04/25/1990 ~PR Newswire

BROOKFIELD, WI (APRIL 25) PR NEWSWIRE - Automated Systems, Inc. (NASDAQ: ASII) (ASI), announced today a net loss of $620,000 (19 cents per share) on net sales of $4,072,000 for third quarter operations ending March 31, 1990.

For the nine months ending March 31, ASI reported a net loss of $1,034,000 (32 cents per share) on sales of $13,259,000.

For the corresponding periods last year, ASI reported a third quarter net loss of $1,052,000 (33 cents per share) on net sales of $3,394,000, and a nine month net loss of $2,157,000 (68 cents per share) on sales of $10,641,000.

The company's improved sales performance (a 20 percent quarterly increase and a 25 percent jump for the nine months) is a result of increased capacity and process improvements in the fabrication division. The sales increases have helped reduce losses by 41 percent for the quarter, and 52 percent for the first nine months, compared to corresponding periods last year.

Automated Systems, Inc. announced, on April 10, an agreement to merge with Cadence Design Systems, Inc. (NASDAQ: CDNC), San Jose, Calif.

Under terms of the agreement, ASI will merge into Cadence in a transaction that will be accounted for as a pooling of interests. Cadence will issue approximately one million shares of its common stock in exchange for all outstanding shares of ASI common stock at an exchange ratio of 0.3 shares of Cadence for each ASI share. Cadence will assume all existing ASI stock options at the exchange rate. Cadence's stock closed at $21.125 yesterday.

The merger, subject to approval by certain government regulatory agencies and ASI stockholders, is expected to be completed by the end of July 1990.

BURBANK, CA (APRIL 25) PR NEWSWIRE - The Walt Disney Company (NYSE: DIS) today reported record-level revenues and net income for both the second quarter and six-month periods ended March 31, 1990. These results were the highest for any comparable period in the company's history.

For the quarter, revenues rose to $1,303,795,000, a 26 percent increase from $1,037,886,000 for the comparable prior year period. Net income increased 20 percent to $178,487,000, or $1.29 per share, compared to $149,018,000, or $1.08 per share reported a year ago.

For the six-month period, revenues climbed to $2,591,946,000, a 25 percent increase from $2,081,447,000 for the comparable prior year period. Net income increased 19 percent to $352,897,000, or $2.55 per share, compared to $297,307,000, or $2.16 per share, reported a year ago.

Operating income climbed 20 percent to $311,454,000 compared to $260,182,000 for the quarter and 22 percent to $620,694,000 from $510,101,000 for the six-month period.

In a joint statement, Michael D. Eisner, chairman and chief executive officer, and Frank G. Wells, president and chief operating officer, said Disney's record performance for the quarter and six months was achieved by contributions from each of Disney's business segments: Theme Parks and Resorts, Filmed Entertainment and Consumer Products.

Revenues for Theme Parks and Resorts rose 22 percent to $710,311,000 for the quarter compared to $580,098,000 in the prior year. Operating income increased 14 percent to $194,460,000 compared to $170,939,000 a year ago. For the six-month period, revenues rose 22 percent to $1,329,724,000 from $1,091,709,000 and operating income increased 23 percent to $358,507,000 compared to $292,161,000 a year ago.

Record attendance at the Disney theme parks, combined with higher per capita guest spending and expanded resort operations, were factors in the increased operating results for the quarter and six- month periods. The Disney-MGM Studios Theme Park, which opened in May 1989, was a major contributor to performance. The prior year operating results included the effects of the Easter Holiday, which falls in the third quarter of 1990.

Revenues for Filmed Entertainment rose 30 percent to $468,951,000 for the quarter compared to $361,045,000 in the prior year. Operating income increased 40 percent for the quarter to $57,798,000 compared to $41,319,000 a year ago. For the six-month period, revenues rose 26 percent to $972,353,000 from $770,931,000 and operating income increased 16 percent to $135,031,000 from $116,156,000.

CINCINNATI (APRIL 25) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) today announced that net earnings for the January-March quarter were $404,000,000, an increase of 30 percent compared with net earnings of $310,000,000 in the same quarter a year ago. The increase in net earnings was due primarily to greater unit volume and, to a lesser extent, a lower effective tax rate. Net earnings per share were $1.14, a 24 percent increase over $.92 for the third quarter last year.

Worldwide net sales for the January-March period, the third quarter of

Procter & Gamble's fiscal year, were $6,123,000,000, an increase of 13 percent over net sales of $5,430,000,000 for the same three months a year ago. The increase in sales was due to higher unit volume.

Worldwide net sales for the first nine months of the 1989-90 fiscal year were $17,865,000,000, an increase of 12 percent over sales of $15,965,000,000 for the same period a year ago. Net earnings amounted to $1,318,000,000, an increase of 27 percent over net earnings of $1,035,000,000 for the nine months a year ago. Net earnings per share were $3.71, a 21 percent increase over $3.06 for the same period last year.

The growth in earnings was greater than the increase in earnings per share primarily due to the acquisition of Noxell for common shares of the company.

Procter & Gamble had sales of $21,398,000,000 during fiscal 1988-89. The company manufactures and markets a wide range of laundry and cleaning products, personal care products including pharmaceuticals, food and beverage products, and a variety of products for business and industry.

#90115p7512 04/25/1990 ~PR Newswire

DENVER (APRIL 25) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) today reported earnings for the 1990 first quarter of $30.1 million, or 65 cents per share, on revenues of $429.5 million.

Earnings for the 1989 first quarter were $81 million, or $1.96 per share, on revenues of $435.8 million.

Of the $51 million after-tax earnings difference, $41 million was due to lower 1990 copper and molybdenum realizations, and higher 1989 first quarter income due to the $5 million gain on the sale of Cyprus' clay operations.

Segment income -- earnings before exploration expense, corporate overhead, equity and other, and income taxes -- for Cyprus' operations is as follows:

Copper/Molybdenum/Gold earned $38.7 million in the first quarter, a $70.1 million decrease from the $108.8 million reported in the like period in 1989.

Reduced copper and molybdenum realizations were responsible for approximately $54 million of the decrease in pre-tax earnings, while higher costs and lower sales of produced copper were equally responsible

for approximately $20 million of the decline.

Copper realizations averaged $1.13 per pound during the first quarter of 1990, down 34 cents per pound from the first quarter of 1989. Cyprus' average mine production costs for copper, including depreciation, averaged 77 cents per pound during the quarter, compared with 1989 costs of 70 cents per pound.

The higher costs in 1990 primarily resulted from reduced recoveries at the Sierrita/Twin Buttes operation where milling difficulties, the result of blending ore from four different pits, were encountered during the 1989 fourth quarter and continued in early 1990. Sierrita's recoveries are expected to improve during the second quarter.

Costs were also impacted by lower ore grades than last year at Cyprus Miami, but this had improved by the end of the quarter. First quarter results from Cyprus' primary molybdenum mines, Thompson Creek in Idaho and Tonopah in Nevada, were lower than the comparable 1989 quarter due to substantially lower realizations and higher costs.

First quarter 1990 copper sales totaled 191 million pounds, up 32 percent over 1989 levels. Included in first quarter 1990 sales were 57 million pounds of purchased copper, including copper scrap for Warrenton and refined copper needed to meet customer commitments.

In February 1990 Cyprus purchased MCR Inc., a Chicago-based producer of high quality copper rod. Renamed "Cyprus Rod Chicago," it doubles Cyprus' rod producing capacity to 520 million pounds. Gold operations earned $2.7 million in the first quarter of 1990, up $3.6 million over the 1989 first quarter. This improvement was attributable to lower costs and higher gold prices.

Cyprus' gold realizations averaged $416 per ounce in the 1990 quarter, compared with $398 per ounce in the 1989 first quarter. Sales volumes totaled 28,400 ounces in 1990, about even with 1989. Cyprus has received a mining license to begin development of its 80 percent-owned Golden Cross project in New Zealand but due to wet seasonal conditions, primary construction will be delayed until the third quarter. Gold production from this mine could be as much as 85,000 ounces annually for Cyprus.

Lithium/Talc earned $5.5 million in the quarter, compared with earnings of $10.7 million in the 1989 first quarter. Included in 1989 earnings was a pre-tax gain of $6.7 million on the sale of Cyprus' clay operations. Excluding this gain, Lithium/Talc earnings were $1.5 million higher in 1990 than in 1989 as a result of continued strength in lithium markets and improvement in Cyprus' domestic talc operations. Lithium earned $4.7 million in the 1990 quarter, while Talc contributed $.8 million.

Coal/Iron Ore earned $8.1 million in the 1990 first quarter, compared with earnings of $2.6 million in the like period in 1989. Earnings were generated by coal operations only, as Cyprus' Northshore iron ore facility continued in development through the first quarter of 1990. Commercial quality pellets were produced and shipped in April 1990.

Coal earnings of $8.1 million improved $5.5 million over the first quarter of 1989. Cyprus' Kentucky operations showed improvement over the prior year due to reduced unit costs, primarily a result of the consolidation of operations during 1989. Earnings also improved at Cyprus' Twentymile mine in Colorado because of increased productivity from new longwall equipment and profits from a short-term sales contract.

At the Emerald coal mine in Pennsylvania, operating problems continued due to old equipment and difficult mining conditions. Cyprus' Board of Directors approved the purchase of new longwall mining equipment reflecting new mine and marketing plans. Cyprus discontinued depreciating its current $83 million investment in Emerald and assigned this cost basis to Cyprus' $505 million claim against LTV which was recently approved in U.S. Bankruptcy Court. The approval of the claim has been appealed.

Cyprus' ultimate recovery is uncertain but expected to be substantially less than the approved claim.

Corporate expenses were $7.1 million in the 1990 first quarter, compared with $10.1 million in 1989. The difference is due to lower accruals for employee incentive compensation reflecting Cyprus' lower earnings and Cyprus' policy tying compensation to performance.

Equity and Other includes interest expense, net of interest income, activity in equity investments, and minority interests. The decrease of $2.6 million over the 1989 level relates to reduced interest income on lower cash balances and higher exploration expense at Bismark, a Mexican zinc and silver property in which Cyprus has a 40 percent interest.

In February 1990 Cyprus amended its existing employee savings plan to establish a new leveraged Employee Stock Ownership Plan (ESOP), which now holds approximately 4.2 million shares of Cyprus common stock. The shares will be used to fund Company matching contributions to the employee savings plan.

In connection with the new leveraged ESOP, Cyprus announced a plan to repurchase approximately 4.2 million common shares by the end of 1990. To date, approximately one million shares have been repurchased under this program. To fund these repurchases and other general corporate needs, Cyprus successfully completed a public offering in April 1990 of $150 million of 10 1/8 percent Notes due in the year 2002.

Kenneth J. Barr, Cyprus Minerals president and chief executive officer, said, "With the outlook for a growing U.S. economy, Cyprus Minerals enters the 1990's expecting continued optimism in spite of worrisome cost problems at some copper/molybdenum mines. Recent improvement has been seen in reducing these unacceptable costs. Coal and gold earned more in the first quarter than in all of 1989. Talc showed definite improvement. Lithium continued strong, and iron ore and zinc neared routine operation. Therefore, Cyprus' outlook for 1990 earnings is good, but not record breaking."

Cyprus Minerals, headquartered in Englewood, Colo., is a major producer of copper, molybdenum, lithium, coal, and talc. The Company employs approximately 8,500 people worldwide.

CYPRUS MINERALS COMPANY

Financial and Statistical Data Summary

LOS ANGELES (APRIL 25) PR NEWSWIRE - Trustees of the Gannett Foundation, largest shareholder in Gannett Co., Inc. (NYSE: GCI), today voted unanimously to engage an investment banking firm to negotiate possible sale of its 10 percent block of stock.

"Within the limits of our fiduciary responsibility, we would prefer a transaction that puts the block in the hands of the Gannett Company or an employee stock-ownership plan (ESOP). But our financial advisers will explore all alternatives," the foundation announcement said.

At Tuesday's New York Stock Exchange closing price of $35-1/2 a share, the present market value of the foundation's 15,940,185 shares was about $566 million. The market value of the shares has ranged as high as $900 million.

A joint statement by Gannett Foundation Chairman Allen H. Neuharth, who served as Gannett Company chairman or president for 19 years before retiring last year, and President and CEO Charles L. Overby said:

"We are confident the media in general and Gannett in particular are poised for unprecedented financial success in this decade.

"But IRS regulations, which require foundations to pay out an amount equal to 5 percent of their assets annually, force us to seek higher income than common-stock dividends pay.

"With increased income, we will expand the work of the USA's largest

information-based foundation, especially broadening programs in education, literacy and First Amendment freedoms."

The Washington-area-based foundation held its annual meeting here in connection with the convention of the American Newspaper Publishers Association.

The Gannett Foundation of Arlington, Va., spent about $30 million on grants, programs and operations in 1989.

It funds national programs to improve the teaching and practice of journalism, programs promoting adult literacy, community projects, programs encouraging philanthropy and volunteerism, and scholarships.

Its two operating programs are the Gannett Center for Media Studies, the nation's premier institute for the advanced study of mass communication and technological change, at Columbia University in New York; and the Paul Miller Washington Reporting Fellowships in Washington. The foundation was created in 1935 by Frank Gannett, founder of Gannett Co., Inc.

DENVER (APRIL 25) PR NEWSWIRE - Newmont Mining Corp. (NYSE: NEM) today reported first quarter net income of $57.4 million, or 85 cents a share, compared with $9.4 million, or 14 cents a share in the first quarter of 1989. The 1990 quarter included $14.7 million, or 22 cents a share, of net income from the corporation's investment in Peabody Holding Co. Inc., which now is reflected as a discontinued operation. The corporation recognized $12.1 million, or 18 cents a share, of net income from its Peabody investment in 1989's first quarter. The Peabody investment is under contract for sale to a U.S. affiliate of Hanson PLC. On a pretax basis, the corporation had $48.9 million of income from continuing operations in the first quarter of 1990, compared to $66,000 loss in the first quarter of 1989. The first quarter of 1990 included a $16.4 million gain on Newmont Australia Ltd.'s sale and issuance of common stock.

Newmont Mining's consolidated sales in the first quarter were $165.5 million, compared with $111.3 million in the first quarter of the previous year. The 1990 first quarter sales include $4.8 million of revenue realized in connection with the payment of the first installment of the corporation's gold loan. The average consolidated sales price received for gold during the first quarter of 1990, including the gain recognized on the gold loan payment, was $414 per ounce, compared with $405 per ounce in the first quarter of 1989. Newmont Mining's equity in gold production,

including Newmont Australia which is accounted for by the equity method, was 390,000 ounces in the first quarter of 1990, compared with 283,000 ounces in the first quarter of 1989.

Newmont Mining's 90.1 percent interest in Newmont Gold Co. contributed $46.8 million in pretax income during the quarter compared with $21.7 million in the first quarter of 1989. Newmont Gold's production increased in the first quarter to 395,700 ounces, 46 percent above the 271,600 ounces in the comparable 1989 period. Newmont Gold's price received for gold averaged $405 an ounce in the first quarter, up $7 an ounce from the price received in the first quarter of 1989.

Newmont Australia, a major Australian gold producer, provided $3.3 million of income before tax during the first quarter on Newmont's 44.5 percent equity interest, compared with $2.7 million in the 1989 first quarter when Newmont Mining had a 75 percent interest in Newmont Australia. Newmont Australia produced 73,200 ounces in the first quarter, up sharply from the 51,300 ounces produced in the first quarter of 1989. The price received for gold by Newmont Australia was $420 an ounce in the first quarter of 1990 compared with $407 an ounce for the first quarter of 1989.

DEVON, PA (APRIL 25) PR NEWSWIRE - First Sterling Bank, founded less than two years ago and headquartered in Devon, has just achieved its first profitable quarter, it announced today.

Net income was $81,553 for the period ending Mar. 31. Bank President and Chief Executive Officer William H. Bromley said a profit was budgeted in the first quarter, but it was 35 percent greater than projected.

"It is particularly gratifying that we were able to achieve accelerated profit with no sacrifice in the quality of our loan portfolio nor in the all-important level of service that we provide," Bromley said.

Bromley also noted that during 1989 deposits increased 189 percent from $14.2 million to $41.1 million, and that loans increased 380 percent from $6.2 million to $29.8 million. The bank's total assets grew 129 percent from $20.7 million to $47.4 million.

"We believe that the results of the first quarter of 1990 are a preview of things to come at First Sterling," Bromley said. "After our successful opening of the St. Davids office in 1989, further branch expansion is planned later this year with the opening of an office in Bryn Mawr."

First Sterling Bank offers a full range of accounts and services to individuals and businesses while "actually providing what most banks promise, quality personal service," Bromley said.

DALLAS (APRIL 25) PR NEWSWIRE - Chili's Inc. (NYSE: EAT) reported record revenues and net income for its third fiscal quarter ended Mar. 31, 1990. Revenues were $85.5 million, an increase of 23 percent over the $69.7 million reported for the same quarter of fiscal 1989. Net Income rose 23 percent, to $3.8 million in the third fiscal quarter of 1990 from $3.1 million during the third fiscal quarter of 1989. Primary earnings per share increased 17 percent to 35 cents per share from the 30 cents reported for the third quarter of fiscal 1989.

The cost of tomato products increased during the quarter due to severe freeze damage and impacted the results of the third fiscal quarter ended Mar. 31, 1990. This cost increase was short-lived, however, and these costs returned to more normal levels by the end of the quarter.

For the nine-month period ended Mar. 31, 1990, revenues rose 21 percent to $251 million over the $207 million reported for the same period last year. Net income increased 36 percent to $12.5 million from $9.2 million between the two nine-month periods, while primary earnings per share increased 29 percent from 90 cents to $1.16.

Chili's opened six company-operated restaurants, and an additional two joint venture and franchised units began operation during the quarter. The total number of restaurants in the Chili's Grill and Bar system is 200 operating in 33 states, of which 154 are company-operated units.

Grady's Inc., a subsidiary of Chili's Inc., operates eight restaurants in the Southeast United States. Under the new operating name of Regas Grill, a restaurant opened in Dallas during the third fiscal quarter ended Mar. 31, 1990. Shortly after the end of the third quarter, the ninth Regas Grill opened in Little Rock, Ark.

Chili's operates full service restaurants featuring a casual atmosphere and a limited menu of freshly prepared chicken, beef and seafood entrees, hamburgers, fajitas, sandwiches, appetizers, desserts and a full-service bar. Grady's/Regas Grill operates full service upscale dinner house restaurants serving fresh seafood, prime rib, steak, chicken and pasta entrees, appetizers, salads, dessert and a full service bar. Macaroni Grill operates a full service restaurant featuring Italian seafood, meat

and pasta entrees and offers a limited beer and wine selection.

CHARLOTTE, NC (APRIL 25) PR NEWSWIRE - Interstate/Johnson Lane, Inc. (NYSE: IS) today reported a net loss of $1.3 million, or 19 cents per share, on revenues of $33.5 million for the quarter ended Mar. 31. This compares to a loss of $619,000, or nine cents per share on revenues of $37.8 million for the same quarter a year ago.

For the six-month period ended the same date, the company reported a net loss of $2.3 million, or 33 cents per share, on revenues of $68.3 million, compared to a $335,000 loss, or five cents per share, on revenues of $73.1 million the prior year.

In other action, the board of directors renewed its earlier approval to repurchase up to 1,000,000 shares of the company's common stock, which is listed on The New York Stock Exchange.

Interstate/Johnson Lane is the largest broker-dealer and investment banking firm headquartered in the Southeast, with over 1,100 employees. This includes more than 500 account executives serving individual and institutional investors through more than 70 sales offices in six southeastern states and New York City.

DENVER (APRIL 25) PR NEWSWIRE - Newmont Gold Co. (NYSE: NGC) today announced first quarter net income of $42.5 million, or 41 cents a share, compared with $16.5 million, or 16 cents a share in the first quarter of 1989. The average price for gold realized by Newmont Gold was $405 an ounce compared with $398 an ounce in the previous first quarter. Gold sales during the quarter increased 46 percent to 395,700 ounces, a record for any first quarter, from 271,600 ounces in the first quarter of 1989.

The company's cash costs per ounce of production, including royalty expense, were $224 an ounce in the first quarter compared with $254 an ounce in the first quarter of the prior year. Due to the treatment of a greater proportion of non-royalty ore, particularly in the South Area, costs for royalties averaged $26 an ounce in the first quarter of 1990 compared with $48 an ounce in the first quarter of 1989.

In all, 39 million tons were mined in the first quarter, up 46 percent from the 26.7 million tons mined in the first quarter of 1989.

The company's five mills treated 3.7 million tons of ore and produced 272,500 ounces in the first quarter, up from 2.5 million tons treated and 168,400 ounces produced in the first quarter of 1989. The increase in the 1990 quarter was due primarily to the contribution of Mill Number 4, which came on line in June 1989.

Leach operations resulted in 6.9 million tons placed on pads, and 123,200 ounces produced in the first quarter, including output from the original South Area leach pad on which no ore was placed during the quarter. This compares with 6.1 million tons placed and 103,200 ounces produced in the first quarter the previous year.

Newmont Gold is the largest producer in North America at 1.5 million ounces annually, and has the largest announced proven and probable reserve position, which at the end of 1989 was at 20.7 million ounces.

OIL CITY, PA (APRIL 25) PR NEWSWIRE - Quaker State Corp. (NYSE: KSF) announced at a press conference in Tokyo that it will begin to market premium quality Quaker State brand motor oils in Japan.

A new, wholly owned subsidiary, Quaker State Japan Co. Ltd., has been incorporated to sell the U.S. company's motor oils and lubricant products throughout Japan.

Initial products will include the grades of motor oil and automatic transmission fluids which are most popular with Japanese motorists. Future plans call for the development of new products to address special needs of the Japanese marketplace, especially the demand for superior quality motorcycle lubricants.

All motor oils will be formulated to Quaker State Corp.'s specifications. They will be packaged in Japan in containers specially designed for the Japanese market.

The new Quaker State subsidiary will be located in Tokyo. Operations will begin with a totally Japanese staff, experienced in the motor oil lubricants industry in their country.

Toyoharu Nitta has been elected president of Quaker State Japan Co. Ltd. Nitta has extensive advertising, sales and marketing management experience in Japan to which he returned after receiving a graduate degree in world trade in 1978 from the University of Dallas, Texas. He is a native of Osaka, Japan, and a graduate of St. Andrews University, Osaka.

Quaker State Corp. is primarily a manufacturer and marketer of motor oils and automotive lubricants, which it markets under the Quaker State brand name. Subsidiaries produce and/or market coal, insurance, safety lighting equipment for cars and trucks, and fast lube services.

SEATTLE, (APRIL 25) PR NEWSWIRE - Dallas-based Southwest Airlines has converted 10 737-500s from options to firm orders, the Boeing Commercial Airplane Group announced today.

Southwest also reconfirmed six previously announced 737-300s. Currently Southwest has on firm order 14 737-300s and 45 737-500s. The airline holds 68 options for 737s with the model to be determined at a later date.

Southwest has taken delivery of 51 new-generation Boeing 737s.

Southwest Airlines Chairman, President and Chief Executive Officer Herbert D. Kelleher said: "We're committed to owning a very young, very neighborly fleet of airplanes. These 737-300s and 737-500s will be quiet, fuel efficient good neighbors in our 30 destination cities."

The nation's eighth largest carrier and a launch customer for both the -300 and -500, Southwest was the first airline to put the new 737-500 into service with inaugural flights on March 5.

Equipped with CFM56 engines, Southwest's -500s carry 122 passengers; their -300s carry 137 passengers.

This announcement brings total Boeing 737 family orders to 2,788 from 147 customers.

#90115p7551 04/25/1990 ~PR Newswire

BEDFORD, MA (APRIL 25) PR NEWSWIRE - Atex Publishing Systems today announced it has been selected by Newsday, the sixth-largest local daily newspaper in the United States, for a full pagination solution based on the state-of-the-art ATEX Publication Production Node (PPN) database system integrated with industry standard hardware.

The landmark agreement calls for installation to begin immediately and to continue over the next three years.

Said Harland LaVigne, Atex president, "Over the next three years, we will be installing a pagination system that will meet all of Newsday's business and production needs from ad dummying, news layout, and ad tracking to full integration of graphics and text." Competition Makes Total Pagination a Necessity

"For Newsday, pagination is no longer a dream, an ideal, or a hope. It's a necessity," said Stanley Asimov, Newsday's vice president/ Editorial Administration, at a recent gathering of European newspaper executives. "We have to find a way to produce our daily display ads, classified ads, feature pages, sports pages, and news pages in an efficient way that will hold down our costs and keep us competitive with the large dailies in New York City and the tiny advertising publications on Long Island." Asimov said that growth and the zoning issue forced Newsday to consider moving to a total pagination solution. Competition with other newspapers and media, both on Long Island and New York City, convinced Newsday that it must produce zoned editions in order to continue its growth. Newsday Employs

Zoning to Meet the Competitive Challenge

Newsday, which has long dominated its market, faced serious competition beginning in 1988 when a rival organization began to purchase and merge free delivery advertising publications distributed throughout Long Island.

To meet this competition, Newsday initially started zoning its daily editions and later added separate Sunday regional sections. On Long Island a Newsday advertiser currently can purchase ads in any of 12 regions. In New York City, a Newsday advertiser can buy either the Queens or Brooklyn sections as well as the full-run city edition. Agreement Calls for State-of-the-Art Atex Applications, Standard Hardware

The agreement calls for installation of the state-of-the-art ATEX Publication Production Node (PPN) database. Part of the package includes ATEX News Layout 6300 Software and 25 News Layout workstations, ATEX Architect 6300 Software and six Architect workstations, and ATEX Tracker 6500 Software.

Newsday also anticipates utilizing ATEX Design Software, which employs the APPLE Macintosh platform to design color feature pages, as part of the system.

Furthermore, the contract calls for Atex to interface the system to the paper's current CAMEX Breeze Display Ad Terminals and Supersetter Output Devices, SCITEX color workstations and output devices, a Digital Equipment Corporation VAX-based library system, as well as an electronic darkroom system. Newsday: One of Atex's Oldest Customers

The business relationship between Atex and Newsday goes back more than a decade. The paper was instrumental in the development of the original ATEX Editorial Software text-entry system for newspapers in the 1970s, and more recently, its Design Software product. Newsday currently uses ATEX News Layout R2 Software, ATEX Architect Software, and ATEX Classified Pagination Software.

Newsday currently has 350 Atex editorial terminals on Long Island and another 200 in New York City; it also has 17 R2 News Layout terminals and 180 Atex advertising order-entry terminals in its Long Island operation.

BIRMINGHAM, AL (APRIL 25) PR NEWSWIRE - Torchmark Corporation (NYSE: TMK) reported that Catherine S. Mulholland, director of company regulation for the Delaware Department of Insurance, today issued a letter stating that

Torchmark is not required to file a Form A in order to solicit proxies for independent nominees for director at American General Corporation's (NYSE: AGC) annual meeting on May 2, 1990. The letter went on to say that the commissioner will hold a hearing to determine whether the holding of proxies by Torchmark for more than 10 percent of American General stock would constitute a change of control. Torchmark does not interpret the department's letter as requiring any hearing prior to May 2.

Torchmark stated that it is confident that it will prevail in any hearing, and said it is continuing with its proxy solicitation for both the nominees and its shareholder resolution.

Torchmark emphasized that, to date, all injunctive applications brought in the various states by or at the behest of American General have been denied.

CONTACT: William T. Graves of Torchmark, 205-325-4251, or Andrew R. Baer or Mary T. Conway of Kekst and Company, 212-593-2655, for Torchmark

#90115p7591 04/25/1990 ~PR Newswire
HOUSTON (APRIL 25) PR NEWSWIRE - Sterling Chemicals Inc. (NYSE: STX) reported revenues and earnings for the second quarter of its 1990 fiscal year ended March 31, 1990.

Revenues for the second quarter were $117.1 million compared to revenues of $161.9 million for the second quarter of fiscal 1989, a decrease of 27.7 percent. Net income was $10.9 million for the quarter vs. $31.7

million for the like quarter of the previous fiscal year, a decrease of 65.6 percent. On a per share basis, net income was 20 cents for the second quarter of fiscal 1990 vs. 53 cents for the second quarter of fiscal 1989.

In comparison with the first fiscal quarter of 1990, revenues for the second quarter improved from $88.0 million to $117.1 million and earnings per share improved from 8 cents to 20 cents.

On a year to date basis, revenues for the six-month period ended March 31, 1990 were $205.1 million compared to revenues of $327.6 million for the like period of fiscal 1989, a decrease of 37.4 percent. Net income was $15.3 million for the six-month period ended March 31, 1990 vs. $78.7 million for the same period in the previous fiscal year, a decrease of 80.6 percent. On a per share basis, net income was 28 cents for the six-month period ended March 31, 1990 vs. $1.31 for the like period in fiscal 1989.

Sterling attributed the decrease in revenues and earnings for the quarter from the second quarter of its 1989 fiscal year to several factors. The company's performance was negatively impacted by the carryover effect of the December freeze damage. This caused inefficient operations and lost sales in several key product areas. The company indicated that the financial effect of the freeze-related production inefficiencies and lost sales was lessened somewhat by payments and accruals to date under existing insurance coverage.

Revenues and earnings were further impacted negatively by the continued strong dollar, generally lower styrene prices when compared to the previous year and continued lower worldwide demand for acrylic fiber. Revenues were further impacted by movement from normal sales to more conversion transactions.

Sterling Chemicals is a major producer of seven intermediate petrochemical products -- styrene monomer, acrylonitrile, acetic acid, plasticizers, lactic acid, tertiary butylamine and sodium cyanide. Sterling Chemicals is headquartered in Houston. The company's stock trades on the New York Stock Exchange under the symbol STX.

PITTSBURGH (APRIL 25) PR NEWSWIRE - Charles A. Corry, chairman and chief executive officer of USX Corp. (NYSE: X), said that in his view Icahn's statment today that he would be willing to purchase additional shares of USX stock if his proposal to break up USX is approved "sounded like a ploy."

Corry said, "It seems to me that Icahn is simply trying to buy votes and distract stockholders from the serious questions that we and a number of prominent analysts have raised about his proposal to break up USX."

Corry cautioned that the possibility of Icahn purchasing additional shares should not persuade stockholders to support a proposal that could seriously threaten the value of 100 percent of the USX stock.

Corry also said that "Icahn's announcement is totally conditional and subject to his sole discretion. It does not commit him to pay any particular price and is subject to a standstill agreement with USX that would have to be satisfactory to him. Icahn could obviously refuse to buy any shares saying the company was not willing to give him satisfactory terms for such a standstill agreement."

Corry concluded that he "remains strongly opposed to Icahn's proposal to break up USX. Icahn's analysis in support of his proposal is flawed and the whole concept would in our view be very negative for our stockholders at this time."

PHILADELPHIA (APRIL 25) PR NEWSWIRE - Midway Airlines (NYSE: MDW) and Acme Markets Inc. today announced a joint promotion designed to reinforce with the public the low price, high value appeal of their products and services.

''We are pleased to be associated with Midway in providing our customers the opportunity to fly on one of the country's premier airlines. We feel that the promotion will provide the best flying value in our marketing today,'' said Ed Spragg, vice president of sales and special marketing.

Beginning April 29, customers who spend a minimum of $50 at any of 286 Acme stores in the Greater Philadelphia Area, New Jersey and Delaware will be eligible to purchase coupons valid for reduced rate travel on Midway Airlines.

''This promotion with Acme Markets allows Midway to team up with a widely known tri-state retailer. Like Acme, Midway believes its low prices and quality service provide the general public with high value for each dollar spent,'' said John P. Tague, Midway Airlines' vice president of marketing and planning. ''This agreement allows Midway to introduce its air transportation service to a broadended segment of the traveling public.''

To purchase a coupon, a cash register receipt as proof of the $50 purchase must be presented by customers at redemption centers located in each Acme store. Coupons are priced according to destination. From Philadelphia to Albany, Boston, Buffalo, Hartford, Providence and Rochester, coupons for travel one-way cost $49.95. From Philadelphia to Chicago and Midway's destinations in the Midwest, coupons for one-way travel cost $79.95. From Philadelphia to the eight destinations Midway servies in Florida, coupons for one-way travel cost $89.95. From Philadelphia to Freeport and Nassau in the Bahams, St. Thomas and St. Croix in the U.S. Virgin Islands, Denver, Las Vegas, Phoenix and Los Angeles, coupons for one-way travel cost $139.95.

The coupon may be redeemed for a Midway Airlines ticket at a travel agency or a Midway Airlines ticket counter. Once issued, tickets are non-refundable. Reservations must be made at least 7 days prior to departure. Flights from Philadelphia International Airport to or through Chicago's Midway Airport require a Friday or Saturday night stay. Passengers may also originate travel from New York's LaGuardia and/or Washington National Airports. A Friday or Saturday night stay is required.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 59 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

LONG BEACH, CA (APRIL 25) PR NEWSWIRE - Four McDonnell Douglas (NYSE: MD) MD-87s equipped with a 21-screen, entertainment system -- thought to be the first of its kind provided on a commercial aircraft -- have been delivered to Iberia, Spain's international air carrier.

"All 24 of the MD-87 twin-jets we are acquiring are being equipped with this system and other special features," said Francisco Escarti, managing director of Iberia. "The special equipment underscores our continuing commitment to being a customer service and convenience leader."

According to Escarti, the two-channel monitor screens are linked to two videotape playback machines operated by a flight attendant in the forward galley.

"Passengers may listen to the program in Spanish or English," he said. Iberia's MD-87s feature a typical five-abreast, single aisle seating arrangement with monitors installed in the overhead compartments on both sides of the aisle. Each five-inch (12.7 cm) monitor serves two rows of passengers, so a ratio of four passengers or six passengers per monitor is possible, depending on the seating assignment.

The monitors, made by Matsushita Video Entertainment Systems, are fully retractable for safe taxi, takeoff and landing.

Iberia will use its new twin-jets for intra-European service, replacing its DC-9s. The MD-87s offer lower noise levels, greater nonstop range and better fuel economy.

The Iberia MD-87s are equipped with the most advanced cockpit available in the MD-80 family of aircraft. Among its features is an electronic flight instrument system with cathode-ray tube displays that replaces the conventional attitude direction indicator and navigation instruments.

Two Pratt & Whitney JT8D-217C engines, each developing 20,000 pounds of takeoff thrust, power the aircraft. These engines provide outstanding performance from short airfields and over extended ranges.

Iberia's two-class seating arrangement will provide a total passenger capacity of 109. MD-87s with standard features are capable of nonstop ranges up to 2,730 miles (4,395 kilometers) with full payloads.

Iberia is the ninth airline to order MD-87s. As of April 1, 1990, McDonnell Doulgas had received 1,594 orders and other commitments from more than 50 customers for MD-80 series aircraft.

#90115p7610 04/25/1990 ~PR Newswire

MINNEAPOLIS (APRIL 25) PR NEWSWIRE - The American Government Term Trust (NYSE: AGT) today declared its May dividend. The monthly dividend of 8 cents per share on the common stock will be paid May 23, 1990, to shareholders of record on May 7, 1990.

The American Government Term Trust's investment objective is high current income and the return of $10 per share (the initial offering price) to shareholders in August 2001. The trust intends to seek this objective through a diversified portfolio of mortgage-backed securities and zero coupon bonds.

Since inception, the trust has distributed 10.42 percent on a bond equivalent basis. During the same time period the average yield on 10-year Treasuries has been 8.45 percent. Also during most of the time since inception, the yield curve (a graph comparing interest rates across bond maturities) has been either inverted or flat. Part of the income distribution comes from fee income earned through active management strategies which cannot generate as much income in an inverted or flat yield curve environment. It is difficult to anticipate when the yield curve will resume an upward sloping configuration which would provide a more favorable environment for the American Government Term Trust.

Due to the abnormal yield curve environment at this time and the Trust's objective to return the shareholder's originals investment of $10 per share, the board directors of the American Government Term Trust voted to lower the monthly dividend rate from $0.085 per share to $0.08 per share. This results in a reduction of the annualized distribution rate based on the $10 initial offering price from 10.20 percent to 9.60 percent and a corresponding reduction in the current distribution rate from 10.33 percent to 9.72 percent based on the April 25, 1990, stock price of $9.88. At this new dividend level, the trust's current distribution rate on a bond equivalent basis (9.92 percent) is 100 basis points above the 10-year Treasury bond.

Additional information on the trust's assets and performance will be included in the semi-annual report dated May 31, 1990, which will be distributed to shareholders in late July. For more information on the trust, call 612-342-6348.

The American Government Term Trust is managed by Piper Capital Management Inc. based in Minneapolis. Founded in 1985, Piper Capital Management Inc., a full-service money management firm, has more than $3.3 billion under management as of March 31, 1990. PCM is an independent, wholly owned subsidiary of Piper Jaffray Incorporated, an investment banking firm founded in 1895.

TWINSBURG, OH (APRIL 25) PR NEWSWIRE - Revco D.S., Inc, today announced that the proposed Joint Plan of Reorganization for its wholly owned subsidiary Odd Lot Parent, Inc., and 54 of Odd Lot's subsidiaries was confirmed yesterday by Judge Harold F. White of the U.S. Bankruptcy Court for the Northern District of Ohio.

The Odd Lot plan provides for payment to be made as follows:

- Administrative, Reclamation and Tax claims (excluding claims by the IRS) will be paid in the full amount, approximately $1.9 million.

- The IRS claims will be paid in full up to a maximum of $4 million.
- General unsecured claims will be paid in an amount equal to 80 percent of the allowed claims (plus interest from Sept. 13, 1989 at the company's average investment interest rate), approximately $11 million.

- The remaining assets of Odd Lot (estimated at $19 million) will be distributed to Revco D.S., Inc. Approximately $4.5 million of that amount will be distributed to reclamation vendors in Revco's Chapter 11 reorganization.

It is anticipated that distributions under the Odd Lot plan will commence within 40 days, unless a stay of implementation is granted in an appeal of the order.

Odd Lot voluntarily filed for Chapter 11 protection on July 28, 1988. Revco sold substantially all of the assets of Odd Lot to Riklis Family Corporation in November of 1988.

LA COSTA, CA (APRIL 25) PR NEWSWIRE - Maureen Carroll- Gonzalez has been named director of public relations for the luxury health/fitness La Costa Hotel & Spa.

"Ms. Carroll-Gonzalez formerly held the position of Assistant Director of Public Relations for La Costa and has done an outstanding job," said Klaus Ottman, senior executive vice president and managing director. "Where possible we prefer to promote from within the La Costa workforce. This promotion is both well deserved by Ms. Carroll-Gonzalez and fortunate for La Costa Hotel & Spa."

Prior to joining La Costa two years ago, Carroll-Gonzalez, a native of the Republic of Ireland, had a successful career in international tourism promotion.

She was director of overseas marketing and public relations for the British Waterways Board; worked for United Nations agencies in Geneva, including the International Trade Commission, World Health Organization and GATT, handling diplomatic protocol and accreditation. She also was involved in special donor-funded literacy and journalism programs for UNESCO in Paris.

Studies at universities in Ireland and England led to a distinguished Master of Arts degree in Irish and English literature.

An accomplished lecturer on travel journalism and communications, Carroll-Gonzalez is a frequently-published travel journalist. Her work appears in major newspapers and magazines throughout the world.

#90115p7639 04/25/1990 ~PR Newswire

DALLAS (APRIL 25) PR NEWSWIRE - Mesa Limited Partnership (NYSE: MLP) today reported revenues from production of natural gas, natural gas liquids and oil and condensate of $96.4 million, operating income of $22.0 million and a net loss of $18.2 million for the first quarter of 1990 compared with natural gas, natural gas liquids and oil and condensate revenues of $99.4 million, operating income of $18.4 million and net income of $14.6 million a year earlier. Results for the first quarter of 1989 included $41.9 million of gains from marketable securities transactions, compared to $3.8 million of securities gains in the first quarter of 1990.

Mesa's average daily production and prices received are summarized below.

	Three Months Ended March 31,	
	1990	1989
Natural gas (Mcf/day)	428,727	449,371
Natural gas liquids (Bbl/day)	10,891	9,605
Oil and condensate (Bbl/day)	4,181	10,210
Natural gas (per Mcf)	$ 1.90	$ 1.82
Natural gas liquids (per Bbl)	$ 13.16	$ 9.24
Oil and condensate (per Bbl)	$ 20.48	$ 16.35

The decrease in natural gas production is primarily attributable to the continued decline in deliverability from Gulf Coast properties and the sale of properties during 1989 partially offset by increased production from the Hugoton properties. Oil and condensate production declined in 1990 as a result of the sale of properties during 1989.

On March 19, Mesa announced that the 1990 first quarter distribution on its preference units had been declared and would be paid on May 15, 1990. After payment of the first quarter distribution, Mesa intends to suspend payment of cash distributions to the preference units until natural gas prices increase and cash flow improves. After the first quarter payment,

preference units will be entitled to receive cash distributions of $.375 per unit per quarter for five additional quarters. Preference unit distributions are cumulative and any accumulated preference dsitributions will be paid before any distributions are paid on common units.

Since the partnership was formed in 1985, Mesa has distributed over $1 billion to its unitholders even though Mesa's average gas prices have declined from $2.68 per Mcf in 1985 to $1.65 per Mcf in 1989.

SAN FRANCISCO (APRIL 25) PR NEWSWIRE - Chevron U.S.A. Inc. announced a change in the posted prices it will pay for crude oil from California and Alaska fields. Postings are decreased by $0.50.

The change was effective today at 7:00 a.m.

Chevron will now pay:

for 35 API -- Cook Inlet -- $13.15
26 API -- Buena Vista -- $12.95
19 API -- Huntington Beach -- $12.15
13 API -- Kern River -- $10.75
27 API -- Long Beach -- $13.35
13 API -- Midway Sunset -- $10.75
17 API -- Wilmington -- $11.85

The gravity adjustment scale is as follows:

Above 40.0 deg. -- $0.000 per tenth degree API
20.0 to 40.0 -- $0.015 per tenth degree API
Below 20.0 -- $0.015 per tenth degree API

New prices for all fields are reflected in Chevron's California and Alaska Crude Oil Price Bulletin 90-CA13. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

DUBLIN, IRELAND (APRIL 25) PR NEWSWIRE - The Jefferson Smurfit Group has announced the successful completion of a feasibility study to construct a

new, world-class recycled newsprint mill in the northeastern U.S. It is now intended to proceed with detailed engineering and it is expected that the potential site will be announced in the near future. The project is a further extension of the Jefferson Smurfit Group's strategy to increase the supply of recycled newsprint to United States newsprint users.

The 250,000 metric ton facility is planned to be a joint venture between a Jefferson Smurfit Group subsidiary or affiliate and a group of leading newspaper publishers in the Northeast U.S. Advance Publications (Newhouse Newspapers), The Boston Globe, Dow Jones & Co. Inc., Ottaway Newspapers Inc. and Times Mirror Co. are among those who have indicated interest in the project. Officials of Jefferson Smurfit Group said they were extremely pleased with the outstanding calibre of the publishers supporting the project.

The new mill will make a major impact on the recovery and reuse of waste paper throughout the Northeastern U.S. The plans have received enthusiastic support from agencies and officials of various states. The 300,000 metric tons of waste paper the new mill will consume each year demonstrates the commitment of the Smurfit Group and its potential partners to play a leading role in the recovery and reuse of waste paper.

SAN MATEO, CA (APRIL 25) PR NEWSWIRE - Airlease Ltd., A California Limited Partnership (NYSE: FLY), said today that its first quarter net income increased nearly 4 percent from last year's.

The partnership reported earnings of $2.3 million or 49 cents per unit in the quarter ended March 31, 1990, compared with earnings of $2.2 million or 47 cents per unit in the 1989 quarter.

Revenues of $4.1 million for the first quarter were down from last year's $4.4 million. This decline was more than offset by lower first quarter expenses (primarily lower borrowing costs) which decreased 17 percent from $2.2 million to $1.8 million. These changes largely reflect the sale last December of an aircraft, the proceeds from which were used to reduce borrowings.

The partnership will make a quarterly cash distribution of 60 cents per unit, payable May 15, 1990, to unitholders of record on March 30, 1990. This distribution represents the partnership's seventh consecutive quarterly distribution at this rate.

Airlease Ltd. presently has interest in 16 aircraft leased to five domestic airlines.

For the three months ended March 31
(unaudited)

	1990	1989
Revenues	$4,114,000	$4,405,000
Expenses	1,846,000	2,217,000

#90115p7652 04/25/1990 ~PR Newswire

CLEVELAND (APRIL 25) PR NEWSWIRE - HyPoint Technology Inc., an eight-person computer service company located in Cleveland today obtained a jury verdict of $500,000 against computer giant, Hewlett- Packard (HP) (1989 profits $825,000,000). The verdict was rendered in federal district court in Cleveland and, according to the antitrust laws, it will be tripled to $1.5 million. Also according to the antitrust laws, HyPoint is entitled to its attorneys fees and costs, which will increase the judgment to more than $2 million.

The case was filed in September 1987 under section 2 of the Sherman act, which prohibits monopolization. HyPoint complained that HP stopped servicing HyPoint customers on a four-hour response basis in order to eliminate HyPoint as a service competitor and to monopolize the market for the service of HP mini-computers.

The six-person jury in Cleveland rendered a verdict and responded in writing to six interrogatories posed to them by U.S. district court judge, Alvin I. Krenzler. The interrogatory answers revealed that the jury found "...that HP had no legitimate business reason whatsoever for its August 1987 modification of its Premium Response option..." As a result, according to the answer to another interrogatory, the jury found "...that HP has monopoly power in the alleged market," which in another interrogatory was defined as "...the repair and maintenance of Hewlett Packard computer systems..." In response to yet another interrogatory, the jury also found that HP's conduct "...caused either (a) a marketwide increase in the price of service for HP systems, or (b) a marketwide reduction in the total number of firms servicing HP systems."

Michael Mason, the president of HyPoint, stated that "We would have loved to settle this case, but HP simply would not listen." Ronald S. Katz of Coudert Brothers, HyPoint's attorneys, added that "HP violated its own

standards of business conduct against a much smaller competitor and obviously the jurors did not approve of that conduct. This should send a strong message to other manufacturers who may be acting in a similar way or contemplating such behavior."

(APRIL 25) UPI - The Islamic Jihad Movement is threatening to kill Americans living in Moslem countries unless the U-S Senate withdraws a resolution, passed last month, recognizing Jerusalem as Israel's capital. The statement from the pro-Iranian organization was released in Beirut Tuesday... the same day the U-S House overwhelmingly adopted a similar NON-binding resolution on Jerusalem.

Police in DeKalb County, Georgia, say they've been UNable to locate the elderly man witnesses say talked a gunman out of shooting anyone else at a suburban Atlanta shopping mall Tuesday. They say the man ''possibly is the hero of this situation.'' The gunman... who may've been a newly released mental patient... killed one person and wounded four others before surrendering.

A demonstration by several hundred animal-rights activists at the National Institutes of Health in Bethesda, Maryland, ended Tuesday with the arrests of 27 people. An N-I-H spokesman says the protesters were taken into custody when they tried to enter a building where animals are housed. The protest was part of a nationwide commemoration of World Animal Liberation Day.

Midwesterners Tuesday enjoyed summer-like warmth as record-high temperatures in 15 cities were broken or equalled. Strong thunderstorms and some hail pounded parts of Texas and Oklahoma. The National Weather Service has posted a flash flood watch for northern Texas. On the flip

side, agriculture officials in Florida, California and North Dakota predict crop damage unless adequate rain falls soon.

(APRIL 25) UPI - Two stuntmen are suing actor-director Sylvester Stallone for assault and battery. They allege a professional boxer smashed their faces during last month's filming of a fight scene in the movie ''Rocky Five.'' The lawsuit... which was filed Tuesday in Los Angeles Superior Court and seeks unspecified damages... says the plaintiffs were told repeatedly during rehersals they would NOT be hurt.

The Charlotte, North Carolina, federal judge who angered Australians last week by suggesting those who spread AIDS be exiled to the Land Down Under has decided to shut up. A spokesman says U-S District Judge Robert Potter will have NO more pronouncements on AIDS. Potter is known as ''Maximum Bob'' for the tough sentences he hands out. Last fall, he threw the book at evangelist Jim Bakker... sentencing him to 45 years in prison for fleecing his P-T-L flock.

WASHINGTON (APRIL 25) UPI - Dramatic changes in Eastern Europe will pose threats as well as opportunities for the world's 15 million refugees, according to an annual report by the U.S. Committee for Refugees.

The report was released Tuesday by the non-governmental committee and examined the plight of refugees worldwide in 1989.

In Eastern Europe the apparent end of the Cold War will have mixed results on the world's refugees, the report said.

''How will changes taking place in Germany disrupt the planned coordination of immigration controls in Europe after 1992?'' the report asked. ''Will Western nations give a lower priority to refugees and humanitarian concerns in the Third World now that geo-political competition is waning and Eastern Europe is garnering such sympathetic concern?''

The committee also said that major donor nations, including Western Europeans and the United States, are backing away from their responsibilities to fund the U.N. High Commission for Refugees, the major organization in the world coordinating refugee relief.

''In 1989, one looked for but could not find vigorous humanitarian leadership backed by adequate money from the United States, Western Europe

and others.''

The report said, ''This is no false alarm. ... Refugees and displaced people will die preventable deaths, their futures will be permanently maimed, if we do not succeed.''

The report estimated that the number of refugees increased by 50 percent in the last five years. In that same period, the report said, the U.S. contribution for refugees overseas assistance did not go up.

The committee figured that the United States gave $20 per refugee in 1985. In 1989, because of increases in refugees and inflation, the per capita U.S. assistance for refugees dropped to $10, according to the Committee.

The report said, ''It doesn't take a math wizard to see that fewer dollars divided by more desperate people equals disaster.''

The report also said 1989 will be remembered as a year when an earlier agreement that would have permitted the orderly departure of Vietnamese refugees unraveled.

#90115u0324 04/25/1990 ~United Press International

NENANA, Alaska (APRIL 25) UPI - Spring arrived unusually early in Alaska this year according to the unofficial but popular method of marking winter's end: the breakup of ice on the Tanana River in central Alaska.

Every year Alaskans bet on what day, hour and minute the ice will go out on the river. This year spring came early, the second earliest breakup on record, said Wayne Taylor, manager of the Nenana Ice Classic.

The ice went out Tuesday at 5:19 p.m. Alaska standard time, determined by a tripod clock mounted on the river ice. The clock is rigged to stop at the minute the ice breaks up and begins to move after half a year of winter.

Five winners who came closest to guessing the correct breakup time will share a $138,000 prize.

''I just got lucky,'' said Nick Kollias, a Greek immigrant who has been guessing the breakup time ever since he came to Alaska 30 years ago, buying up to 50 guesses per year at $2 per guess.

Two weeks of unseasonably warm weather, with temperatures ranging from the mid-40s to the mid-50s, brought the early spring breakup.

Only once before has the Tanana River ice gone out so early - April 20, 1940. Until this year, the second earliest was April 26, 1926.

In the 74 years that the small town of Nenana has run the ice breakup betting game, the ice has never before gone out on April 24.

Breakup usually comes about the first week of May and most guessers this year put their money on times from May 2 to May 5, Taylor said.

Of the 152,000 guesses purchased this year, 90 percent figured the river would break up later than it did, Taylor said.

But the mild weather and thinning ice made it apparent that the river was going to go early, Taylor said. Some 200 people were watching when the ice cracked, broke and began moving out.

Each bettor pays $2 to guess by buying a Nenana Ice Classic ticket and writes in a prediction for the correct date, hour and minute for breakup. Tickets are sold in Alaska during February and March.

Half the ticket earnings pay off the correct guess or guesses. After costs of running the game are paid, the rest of the money goes to benefit non-profit projects in Nenana, a town of 500 located about 40 miles south of Fairbanks.

At breakup Tuesday evening, the temperature was 45 degrees - 10 degrees above normal - and the ice was 12 inches thick - half the normal thickness Taylor said.

Most years, with more normal breakup times, the winner or winners guess the exact minute of breakup. This year, no one guessed the right minute. So, under Nenana Ice Classic rules, the next closest minute made winners out of five guessers who selected 5:18 and 5:20, one minute off.

Kollias, of Anchorage, a retired construction worker from Thiva, Greece, said he buys multiple tickets to guess every year and just got lucky this time after 30 years of guessing. He won one-fifth of the pot, or $27,600.

The other winners were Annie Friendly of Quinhagak, Ted and Dot Leonard of Salcha, and two guessers from Fairbanks, Judy Rodgers and Shirlee Foster.

(APRIL 25) UPI - It's only a matter of hours now before the long-awaited Hubble Space Telescope is deployed by the crew of the shuttle Discovery. Before bedding down for the night, the astronauts finalized preparations for the launch of the one-point-five-BILLION-dollar telescope. The first image from the telescope... an engineering photo of a star cluster known as N-G-C 3532... was scheduled to be beamed down to Earth early next week.

Vice President Quayle is to arrive Wednesday morning in Nicaragua for the inauguration later in the day of President-elect Violeta Chamorro. The

ceremony will mark the end of a decade of Sandinista rule. On Tuesday, President Ortega held his last meetings as president... greeting foreign heads of state as they arrived in Managua.

Internal Bush administration documents confirm the state of Alaska blocked a Justice Department deal with Exxon aimed at settling criminal charges stemming from last year's oil spill. The documents were released Tuesday by Democratic Congressman George Miller of California. The agreement reportedly would have made the oil company pay up to 550-Million dollars in damages. A Justice Department spokeswoman denies Alaska's objections killed the deal. NO comment from Exxon or Alaskan officials.

One worker was killed in Minneapolis Tuesday evening when part of a bridge under construction collapsed. Officials say the construction crew was pouring concrete into wood forms built into the river when one collapsed, taking part of the west span with it. Several other workers were thrown into the river in the accident, but were rescued.

#90115u0364 04/25/1990 ~United Press International

(APRIL 25) UPI - And on the fifth day the Boston Red Sox had Roger Clemens. Before that, who knows?

The Red Sox, who entered the season without a qualified fifth starter are searching for anyone to follow Clemens this season. Five other starters have combined for a 1-3 record to back up their ace righthander's fast start.

Clemens, 4-0, improved on his perfect record Tuesday night, by pitching 8 1/3 innings in leading the Red Sox to a 4-2 triumph over Mark Langston and the California Angels.

Jeff Reardon, relieving Rob Murphy in the ninth, posted his first save in a Red Sox uniform and put an end to a two-run rally by California. RBI singles by Chili Davis and Johnny Ray gave the Angels their only runs of the game.

''If we lose a game when Roger's out there when we're shorthanded, there's no telling what can happen,'' said Boston manager Joe Morgan. ''They were getting wood on him early and then he put a silencing act on it.''

The game marked the first time that Clemens has won his first four decisions since 1986 when he went 14-0 to start the season.

''Right now I'm not looking at anything great from myself,'' said Clemens, who is being relied upon to carry the staff. ''We still need a little help out there.''

The Red Sox have already lost spot starter Wes Gardner to the disabled list and third starter John Dopson has a sore elbow that was examined yesterday, bringing more question marks for Morgan and an already questionable staff.

Clemens gave up four hits, two runs, walked one and struck out eight. The California hitters were kept off balance by Clemens' mix of off-speed pitches and an over-powering fastball.

''It's tough to look for a breaking ball with with a guy that throws 90-something m.p.h. fastballs,'' said the Angels Claudell Washington. ''You have to guess good or you'll take a seat on the bench next to the the last hitter.''

A throwing error by Angels' starter Langston led to three unearned runs in the sixth for Boston. Tony Pena's two-out, two-run single capped the outburst that evened Langston's record at 1-1.

''It was a great duel until I made the error that cost the game,'' said Langston. ''It was a simple play that will stay in my head.''

Boston broke through against Langston and snapped the scoreless deadlock in the sixth. Marty Barrett led off with a single to right and Langston fired Wade Boggs's bunt attempt into centerfield for an error, putting runners on first and second. After failing to sacrifice twice, Jody Reed slapped an RBI double into the left-field corner. Two outs later, Dwight Evans drew a walk to load the bases for Pena, who grounded a two-run single off the third-base bag, making it 3-0.

Elsewhere in the American League, Milwaukee beat Kansas City 7-3, Minnesota walloped Detroit 16-4, New York sunk the Seattle 6-2, Toronto edged Cleveland 4-3, Oakland grounded Baltimore 7-1 and Texas overran Chicago 5-4.

In the NL, it was: New York 2, Atlanta 1; Philadelphia 6, Cincinnati 3; Montreal 5, Houston 3; San Diego 13, Chicago 3; Pittsburgh 4, San Francisco 1; Los Angeles 3, St. Louis 0.

-- AROUND THE AL --

Brewers 7, Royals 3

At Milwaukee, Dave Parker, who signed as a free agent during the winter, drove in three runs with a home run to lead the Brewers. Chris Bosio, 2-0, scattered six hits over seven innings before giving way to Chuck Crim who pitched one inning before he was ejected for hitting Frank White with a pitch. Richard Dotson, 0-1, took the loss.

Twins 16, Tigers 4

At Minnesota, Gene Larkin led a 19-hit attack by going 4-for-5 and Greg Gagne hit a two-run homer to power the Twins. John Candelaria, 1-0, relieved in the fifth for Minnesota and pitched four innings. Seven Minnesota batters had at least two hits in the game, which featured a seven-run sixth inning when they sent 14 batters to the plate. Detroit starter Kevin Ritz, 0-4, failed to retire a batter.

Yankees 6 Mariners 2

At, New York, Jesse Barfield, who had been hitless in his previous 13 at-bats, smacked a first inning three-run homer to help snap a five-game losing streak for New York. Dave LaPoint, 1-1, scattered six hits over 6 2/3 innings and allowed only one runner past second base before giving up a run in the seventh. Matt Young, 0-3, took the loss.

Blue Jays 4, Indians 3

At Toronto, Kelly Gruber drove in all four runs and homered twice to spark the Blue Jays. Jimmy Key, 2-0, gave up five hits over five innings and David Wells recorded the final three outs for his third save. Toronto beat Cleveland for the fifth time in as many meetings at the SkyDome.

Oakland 7, Baltimore 1

At Baltimore, Mark McGwire drove in five runs on a pair of homers, the 11th time in his career that he's done that, and rookie Felix Jose cracked his first home run to help Oakland remain unbeaten in five road games. Dave Stewart, 4-0, allowed only one run and six hits while walking four and striking out five in seven innings. In 19 games in Baltimore, McGwire has belted 10 homers while driving in 25 runs. Dave Johnson, 2-1, took the loss.

Rangers 5, White Sox 4

At Arlington, Texas, Pete Incaviglia capped a five-run rally with a one-out, two-run homer to catapult Texas to its fourth win in a row. Ruben Sierra also homered in the ninth off loser Bobby Thigpen, 0-1. Kenny Rogers, 1-0, gave up one hit over the last 2 1/3 innings.

#90115u0392 04/25/1990 ~United Press International

(APRIL 25) UPI - Mike Scott, the 1986 Cy Young award winner, has yet to go six innings this season, and his earned run average is now 7.32. Scott, 0-2, was the loser Tuesday night when Montreal defeated Houston 5-3.

''This is probably the worst I've pitched all year,'' Scott said. ''We were behind 3-0 before we ever got to swing and they hit the ball hard in every inning. I was probably lucky to go as far as I did.'' Scott was pulled after five innings.

Tim Wallach homered and drove in three runs. Kevin Gross, 1-1, allowed one run and five hits over six innings for the victory. Tim Burke pitched the final two innings for his fourth save. Scott surrendered four runs and five hits over five innings.

Montreal stole five bases and exposed a major weakness of Houston - its inabilty to throw out runners. Houston catchers have thrown out seven of 28 runners attempting to steal.

''We've been running all year,'' said Montreal Manager Buck Rodgers, whose team has won nine of its last 10 games in the Astrodome. ''We didn't do it tonight particularly because of the Astros. We did it because it's our style.''

''Montreal is a very fast club,'' said Houston Manager Art Howe. ''They have more speed this year than last. We're just going to have to throw them out. We picked one off tonight.''

The Expos struck for three runs in the first inning. Marquis Grissom hit a one-out single, stole second and scored on a single by Tim Raines. After Raines stole second, Wallach lifted a 1-1 pitch over the left-field fence for his first homer of the season.

''I hit a forkball that he got up,'' said Wallach. ''More times than not, I chase that ball down in the dirt. In the first inning, I don't think (his) velocity was there. You get guys on base and it makes a pitcher think.''

''When we play, we have to take chances,'' Raines said. ''Early in the game, we got guys on and we ran. Usually it's hard just to get on against Scott.''

Elsewhere in the NL Tuesday night, Pittsburgh stopped San Francisco 4-1, New York edged Atlanta 2-1, Philadelphia got by Cincinnati 6-3, San Diego stomped Chicago 13-3, and Los Angeles blanked St. Louis 3-0.

In the AL it was Milwaukee 7, Kansas City 3; New York 6, Seattle 2; Toronto 4, Cleveland 3; Boston 4, California 2; Oakland 7, Baltimore 1; Minnesota 16, Detroit 4; and Texas 5, Chicago 4.

-- AROUND THE NL --

Pirates 4, Giants 1

At San Francisco, Doug Drabek hit his first career home run - a 375-foot, two-run, tie-breaking shot in the seventh inning - giving Pittsburgh the victory. Drabek, 3-1, held the Giants scoreless through seven innings and then connected off starter Scott Garrelts, 0-1, last year's ERA leader in the National League. Reliever Bill Landrum pitched 1 2-3 innings to earn his second save.

Mets 2, Braves 1

At New York, Mark Carreon scored on Mike Marshall's fielder's choice in the ninth inning, helping the Mets reach the .500 mark. Pinch hitter Carreon led off with a double off Mike Stanton, 0-1, and went to third on Howard Johnson's Texas leaguer. Mike Marshall then grounded the ball up the middle, where shortstop Jeff Blauser grabbed it and threw to second for the force. But Jeff Treadway's relay to first was too late to double Marshall, making a winner of Julio Machado, 2-0. Atlanta has won two of its first 11 games. Braves Manager Russ Nixon was ejected from the game.

Phillies 6, Reds 3

At Philadelphia, John Kruk drove in three runs with a double and a home run to lead the Phillies to their fourth straight win. Ken Howell, 2-1, allowed six hits over six innings to pick up the victory. Jeff Parrett relieved in the seventh and Roger McDowell got the final out for his fifth save. Jose Rijo, 0-1, was the loser as the Reds dropped their second straight game after opening the season with nine victories. The Phillies banged out 15 hits.

Padres 13, Cubs 3

At San Diego, Tony Gwynn, Benito Santiago and Garry Templeton led a 19-hit barrage with three hits each, giving San Diego a victory over Chicago. The Padres defeated San Francisco Monday night by the same score. Dennis Rasmussen, 1-0, pitched eight innings for the win. Greg Maddux, 2-1 took the loss. Two of the hits off Rasmussen were homers by Andre Dawson in the

fourth and by Shawon Dunston in the seventh.

Dodgers 3, Cardinals 0

At Los Angeles, Mike Morgan, off to the best start of his career, fired a three-hitter leading the Dodgers the the victory. Morgan, 3-0, posted his first complete game of the season. The right-hander retired the last 16 batters and lowered his ERA to 1.14. Joe Magrane, 0-3, lasted five innings and gave up all three runs. Juan Samuel stole two bases in the game to give him the league lead with 11.

#90115u0433 04/25/1990 ~United Press International

(APRIL 25) UPI - The Edmonton Oilers avenged last year's first-round defeat at the hands of the Los Angeles Kings Tuesday night, using a 6-5 overtime victory to complete a four-game sweep of their Stanley Cup quarter-final series.

Joe Murphy scored at 4:42 of overtime. After Reijo Ruotsalainen's slap shot was blocked by goaltender Kelly Hrudey, Murphy pounced on the rebound and blasted a 25-foot shot over the glove hand of Hrudey for his third playoff goal.

''I just picked it up, cut to the middle and shot it over Hrudey's glove '' Murphy said. ''It was great.''

Edmonton advanced to the Campbell Conference final for the sixth time in the last eight years. The Oilers, who will meet either Chicago or St. Louis, have won seven straight games since falling behind Winnipeg 3-1 in the opening round.

Former Oiler Wayne Gretzy missed Game 4 of the Smythe Division championship series with a bad back.

''The loss last year (after blowing a 3-1 series lead) really hurt,'' Oilers veteran Kevin Lowe said. ''Tonight was a way to sever all previous ties with Wayne.

''We're the Edmonton Oilers, and we have our own identity.''

The Kings, swept in the division final for the second straight year, have never advanced past the second round in six tries.

Esa Tikkanen scored with 2:55 remaining in regulation to send the game into overtime. The left wing, shooting from a near-impossible angle along the boards, managed to squirt a 25-foot shot between the legs of Hrudey for his eighth goal of the playoffs.

The Kings staged a four-goal rally to take the lead after falling behind 4-1 halfway through the game.

In the Norris Division final, Wayne Presley and Michel Goulet scored 36 seconds apart early in the second period and goaltender Ed Belfour, making his first start in the series, made 19 of his 31 saves in the third period to lift the Chicago Blackhawks to a 3-2 victory over the St. Louis Blues and deadlock their series at two games apiece.

The best-of-seven series resumes Thursday in Chicago. The series winner will meet Edmonton in the Campbell Conference finals.

Presley, who leads the Blackhawks with seven playoff goals, opened the scoring at 2:06 of the second period, wristing a shot from the top of the left circle above the blocker of befuddled Blues goaltender Vincent Riendeau.

Seconds later, Riendeau failed to corral a puck that bounced slowly across the crease and Goulet tipped in the easy goal at 2:42.

Rod Brind'Amour, who leads all rookies in points and is second in goals, cut the deficit to 2-1 at 12:53 of the second, converting on a nifty end-to-end rush.

Brett Hull, who led the NHL with 72 regular-season goals, drew a game-misconduct and five-minute penalty at 16:47 of the second after high-sticking Jocelyn Lemieux.

In the Wales Conference, play resumes Wednesday with the Boston Bruins at the Montreal Canadiens in the Adams Division finals and the New York Rangers at the Washington Capitals in the Patrick Division finals.

Boston, leading 3-0, looks to hand Montreal its first four-game sweep since 1952.

Boston has taken advantage of Montreal's anemic power play, which has accounted for only two goals in 40 chances during the playoffs.

''We know our power play stinks,'' Montreal forward Brian Skrudland said. ''But we still beat Buffalo in that other series. We have to worry about beating Boston five-on-five.''

The Bruins are cautious entering Game 4. Boston last swept Montreal in 1929, and the Bruins have won only three of 24 playoff series against the Canadiens.

''It's not over until it's over,'' Bruins captain Raymond Bourque said.

''There is no sense in us becoming overconfident going into the fourth game. Far too much has gone down in the history between our two teams for us to be overconfident.''

Washington, leading the Patrick Division finals 2-1, will play Game 4 without goaltender Don Beaupre, out with a groin injury; forward Michal Pivonka, sidelined with kidney stones; and forward Dino Ciccarelli, out for the series with a knee injury.

Washington is bidding to advance past the second round of the playoffs for the first time in club history.

#90115u0471 04/25/1990 ~United Press International

BY UNITED PRESS INTERNATIONAL

(APRIL 25) UPI - Violeta Chamorro, a 60-year-old widow, mother of four, publisher and politician, was carried to the presidency by the memory of her martyred husband.

On Feb. 25, Chamorro captured the votes and apparently the hearts of Nicaraguans, putting across a motherly image in a nation that has been wracked by violence and war for the better part of two decades.

Campaigning from a wheelchair after falling down and shattering her kneecap, Chamorro told voters: ''I want the same thing for the Nicaraguan family as I want for my own family ... peace and reconciliation.''

Chamorro's late husband and predecessor as publisher, Pedro Joaquin Chamorro, was a leading critic of the regime under dictator Anastasio Somoza, and was assassinated in 1978 for his bitter opposition to the government.

His slaying is regarded as the spark that set into motion a popular insurrection that brought the Sandinistas to power a year later.

Of the couple's four children, two sided with the Sandinista revolution and two chose to work against it. As a result, the Chamorros currently dominate Nicaraguan journalism - pro- and anti-Sandinista.

The eldest son, Pedro Joaquin Jr., was editor of La Prensa before becoming a director of the U.S.-backed Contra rebel movement. The paper's current editor is daughter Cristiana.

At the beginning of the campaign, U.S. officials looking for an alternative to Sandinista rule enthusiastically embraced Chamorro as Central America's Corazon Aquino.

Like the Philippine president who rallied that country's public to oust Ferdinand Marcos, Chamorro's late husband also is a popular martyr.

Chamorro entered the presidential race with little political experience but ample reknown as a rival to the ruling Sandinista Front.

She wielded substantial clout as the publisher of La Prensa, the afternoon daily that is the main voice of the Nicaraguan opposition, and used the paper to criticize and harass the Sandinista government at every turn.

''It's true she has little political experience, but she is very popular '' said Andres Zuniga, a member of her National Opposition Union, or UNO, a 14-party coalition that embraces ideas from across the political spectrum.

Chamorro and her vice-presidential running mate, Virgilio Godoy of the Independent Liberal Party, collaborated with the Sandinista Front after it took power in a July 1979 uprising, but later turned against it.

Chamorro served on a five-member governing junta after the Sandinista-led uprising overthrew Somoza, but resigned in April 1980 and gradually became one of the government's most outspoken critics.

Chamorro was born Oct. 18, 1929, into a wealthy farming family. Through her marriage to a Chamorro, she joined another wealthy and influential family that had provided Nicaragua with several of its past presidents.

#90115u0475 04/25/1990 ~United Press International
BY UNITED PRESS INTERNATIOAL

(APRIL 25) UPI - Population: 3,058,000 (U.N. estimate 1986) Area: 57,143 square miles Capital: Managua

History - Ruled by Spain from 1552 until 1821, Nicaragua united briefly with Mexico before becoming an independent republic in 1838. The American adventurer William Walker led an armed band into Nicaragua in 1855 and had himself inaugurated as president the following year but was driven out in 1857. In 1912, President William Howard Taft ordered U.S. Marines into Nicaragua to protect U.S. interests during a rebellion and U.S. military involvement continued until 1933. Following a protracted civil war that killed 15,000, President Anastasio Somoza Debayle fled to the United States July 17, 1979, ending his family's 43-year-old dictatorship.

Geography - Slightly larger than Wisconsin, tropical Nicaragua is the largest nation in Central America. Nicaragua shares a border with Honduras

to the north, Costa Rica to the south and has Caribbean and Pacific coasts. Managua, the capital, has nearly 1 million inhabitants.

People - About half of Nicaragua's more than 3 million inhabitants live in urban areas. Ninety-five percent are Roman Catholic, 69 percent Mestizo, 17 percent white, 9 percent black and 5 percent Indian. Spanish is the official language. Literacy is 52 percent.

Government - The Sandinista National Liberation Front ousted Somoza in 1979 and named a junta as the provisional government. Daniel Ortega won elections in November 1984 and was sworn in as president Jan. 10, 1985. The strongest opposition group, the three-party Democratic Coordinating Council, boycotted the contest and charged that government restrictions denied voters a free election. The Sandinistas won 63 percent of the vote.

On Feb. 25, Violeta Chamorro won the presidency as the head of a 14-party coalition known as the National Opposition Union, or UNO.

Politics - Following the Sandinista victory in 1979, Nicaragua-U.S. relations deteriorated steadily. The Reagan administration charged Soviet and Cuban interference in Nicaragua, and accused Nicaragua of supporting leftist guerrillas in El Salvador. U.S. support for Nicaragua's anti-government Contras stirred opposition in Congress and elsewhere in the United States and Latin America.

Since Chamorro's election, Contra rebels have agreed to disband and disarm by June 10, the United States has withdrawn economic sanctions and approved a $300 million aid package and problems.

As Chamorro's inauguration approaches, Nicaragua faces a brighter future if divisions within the UNO can be resolved and the Contras keep to their agreements to disarm and disband.

Economy - Agriculture and fishing account for nearly half of Nicaragua's gross national product, and manufacturing for about 10 percent. Principal crops are sugarcane, corn, cotton, sorghum and rice.

In December 1972, earthquakes destroyed much of Managua, killing 10,000 people, injuring 15,000 and leaving half the capital's population homeless.

Inflation in 1989 was a whopping 1,700 percent, down from 1988's mind-boggling 33,000 percent.

Sandinistas - The Sandinista National Liberation Front, founded in 1961 to overthrow the Somoza dynasty, took its name from Augusto Cesar Sandino who from 1928-33 led a guerrilla war against U.S. Marines occupying Nicaragua. Sandino was slain in 1934 on orders of Anastasio Somoza Garcia, founder of the Somoza dictatorship.

A rebel war against the leftist Sandinistas went into full swing in late 1981 when the Reagan administration authorized CIA funds to be channeled to right-wing guerrillas in Honduras, some of them members of Somoza's disbanded national guard.

The Sandinistas accepted electoral defeat Feb. 25, and negotiated a transition of power to Chamorro.

-30- 3991

#90115u0483 04/25/1990 ~United Press International

BELGRADE, Yugoslavia (APRIL 25) UPI - Communist leaders refused to concede defeat to a right-wing nationalist party, projected as a landslide winner of parliamentary elections in the state of Croatia during Yugoslavia's first free elections in 50 years.

Candidates of the Croatian Democratic Community won between 70 percent and 90 percent of the seats in two of Parliament's three houses, election officials said Tuesday in Zagreb, the western republic's capital 250 miles west of Belgrade.

Officials based the projection on a count of 75 percent of the estimated 3.5 million ballots cast during the multi-party voting Sunday and Monday in Croatia, the second-largest and most populous of Yugoslavia's six republics.

Ivica Racan, president of the ruling Communist Party of Democratic Changes would not concede defeat at a Zagreb news conference and appealed to left-wing supporters to vote for the communists in a second round of elections May 6.

''The elections have not been completed yet,'' Racan said.

Results of the voting for Parliament's third chamber, the House of Laborers, were to be known later this week, but officials doubted the momentum would shift.

An opposition coalition already replaced the ruling Communist Party in the northwestern republic of Slovenia, which on April 8 and April 22 held its first free elections since the communists took power after World War II.

But the Slovenian communists at least found consolation in the victory of veteran communist official Milan Kucan, who was elected the republic's president, solidly defeating opposition candidate Joze Pucnik, 59 percent to 41 percent.

In Zagreb, Croatian Democratic Community leader Franjo Tudjman said his

party was willing to work with other parties to build political pluralism. ''We shall take into account other parties in case they wish to cooperate with us and if we need them for a democratic transformation of Croatia,'' he said.

Tudjman said he envisions a loosening of central control over Yugoslavia's constituent republics, which would enjoy full autonomy.

''I see it only as a confederation, as an alliance of states with full rights of every nation on self-determination,'' he said. ''Our first practical steps will be preparations for working out a new Croatian constitution and talks with representatives of other peoples in Yugoslavia on establishing new relations.''

Tudjman, 67, was a communist official and army general of Marshal Yosip Broz Tito's World War II partisans, but was jailed and stripped of his military and civilian rank in the early 1970s by a Zagreb court that found him guilty of advocating Croatian nationalism.

Over the past year, Yugoslavia has opened its political system and scores of political parties were formed in Croatia.

Tudjman succeeded in forming a nationalist political organization of right- and left-wing extremists who are ready to defend Croatia from aggressive nationalist policies of Serbian communist leader Slobodan Milosevic. Milosevic does not hide his desire to impose Serbian domination over the rest of the Yugoslav federation of 23 million people.

It appears that the recent rise of Serbian nationalism actually helped Tudjman and his Croatian nationalists topple the communists in Croatia.

Serbia is the biggest of Yugoslavia's states with 10 million people. In December it held single-party elections that strengthened the ruling Communist Party's power.

#90115u0592 04/25/1990 ~United Press International

(APRIL 25) UPI - Around the world... around the clock... U-P-I brings you the world, next:

Astronauts aboard the shuttle Discovery are preparing the Hubble Space Telescope for its long-awaited launch today. Veteran shuttle flier Steven Hawley will use Discovery's 50-foot robot arm to release the giant telescope into orbit. Two astronauts will stand by for an emergency spacewalk if needed.

Project astronomers are elated at seeing success so near after years of

effort frustrated by repeated delays. William Jeffreys of the University of Texas said he ''was thrilled beyond belief'' by the launch. The telescope is capable of seeing the glow of a common flashlight from 250-thousand miles away.

A National Transportastion Safety Board officials says the onsite investigation of Monday's derailment of an Amtrak passenger train in southeast Iowa will take about one week. Susan Coughlin said the N-T-S-B would release its findings of the probable cause of the accident in about nine months.

President Bush says he's still undecided about what action to take against the Soviet Union for its economic intimidation of Lithuania. He said- ''I've NOT decided what will be done.'' Bush apparently has the backing of Congress and U-S allies in what he calls ''a highly complex situation.''

Officials in Atlanta are questioning a gunman who killed one man and wounded four others after opening fire into a crowd at a shopping mall yesterday. There is some question as to the gunman's identity. Police say he carried documents saying he had been released from a mental hospital on Monday.

-30- 1772

#90115u0596 04/25/1990 ~United Press International

(APRIL 25) UPI - East and West German officials meeting in East Berlin begin talks today for the economic, monetary and social unification of East and West Germany. West German Chancellor Kohl and East German Prime Minister de Maiziere held private talks yesterday in Bonn to discuss the broad outlines of unification.

There are further signs from the Middle East that more Western hostages, including an American, could be freed soon. Moslem sources say two Swiss Red Cross workers could be freed by Friday... and a radical Palestinian group offered to free four Belgians, if Belgium releases a captive Palestinian.

The Senate Appropriations Committee yesterday approved 720-Million dollars in aid for Panama and Nicaragua. In doing so, the panel rejected a Democratic plan that would have spent more money in Eastern Europe and less in Central America. President Bush had sought 800-Million for Panama and Nicaragua.

In Washington, the nation's mayors are calling for a wide-ranging anti-drug effort that includes job training, education and treatment on demand. After a two-day conference of mayors and police chiefs on crime and drugs... the mayors linked the rise of drug abuse to the failure of the war on poverty.

U-S military personnel who participated in the ill-fated attempt to rescue American hostages from Iran will be in Washington today to honor the eight soldiers who died during the April 1980 mission. It was NOT until nine months later, in January 1981, that the hostages finally were released.

-30- 1697

#90115u0620 04/25/1990 ~United Press International

SINGAPORE (APRIL 25) UPI - A ship launched in France by Chinese dissidents can dock in Singapore before it heads to international waters off the China coast to broadcast pro-democracy messages, officials announced Wednesday.

The announcement eased fears that Singapore, anxious to normalize relations with China, would comply with Beijing's warning a week ago that it would not tolerate support for the Goddess of Democracy, which left France March 17 equipped with one television and two radio studios.

''Singapore is a free port and we are open to any ship calling at our port as long as it does not violate our law or threaten our national security '' said Valerie Mok, spokeswoman for the Port of Singapore Authority.

''This is great news,'' said Christophe Nick, a French journalist and one of the mission's originators. ''We weren't sure of anything for a while. Now we're very relieved.''

The ship is due to arrive in Singapore Friday. Taiwanese officials have said the vessel will be allowed to dock there and refuel before it heads to international waters off the China coast.

Singapore Prime Minister Lee Kuan Yew has said repeatedly the island republic hopes to normalize relations with China after Indonesia restores ties with Beijing this year.

The Goddess of Democracy, named after a statue built by pro-democracy students in Beijing's Tiananmen Square last June, is sponsored by a coalition of groups headed by the French news magazine Actuel, with the cooperation of the Federation for a Democratic China, a Paris-based Chinese dissident organization.

The organization was formed by Chinese students and intellectuals who fled after the Chinese army's brutal crackdown on the student-led democracy movement.

Chinese Foreign Ministry spokesman Li Jinhua told a news conference last week, ''The activities of this ship are aimed at subverting the people's government and are against the norms of international relations. It is

something we can't tolerate.''

Li did not rule out the use of force to stop the broadcasts.

''We are not afraid of an attack'' in international waters, said Nick, who is boarding the 1,200-ton Goddess of Democracy in Singapore. ''The Chinese won't try anything against the ship because they know how strong world reaction would be against an aggressive act.''

Nick said music, news and pro-democracy reports will be broadcast to the more than 1 billion mainland Chinese. ''We'll start at 6 a.m. with broadcasts of international news and news events in China.

''We'll also tell what really happened in Tiananmen Square,'' Nick said. The bloody crackdown flashed onto television screens around the world but not on the Chinese mainland.

The ship also will broadcast a 20-minute message from fugitive dissident Chai Ling, who has been given sanctuary in France after 10 months on the run.

#90115u0627 04/25/1990 ~United Press International

SAN DIEGO (APRIL 25) UPI - Mass media campaigns designed to curb smoking, like the California advertising blitz launched this month, are highly effective, said a study published Wednesday in the American Journal of Public Health.

Researchers found that an Australian anti-tobacco campaign generated a 2.5 percent reduction in smoking during its first year in two cities in that nation.

The Australian campaign, which served as the prototype for California's new $28.6 million effort, relied heavily on television commercials that deliver hard-hitting messages to smokers.

''In the 10 years before this campaign was launched, there was no real drop in the number of smokers. Then, in two cities, we show exactly the same effect, a 2.5 percent decrease in smoking in both men and women,'' said John Pierce of the University of California, San Diego School of Medicine.

''That's an enormous drop, five times the effect we've been seeing in the United States in a single year,'' said Pierce, principal author of the study.

''If the campaign can achieve similar results here, it means there would

be 660,000 fewer smokers in California by mid-1991,'' he added.

Pierce's findings were presented to the California Legislature in closed session last August.

The next month, the legislators decided to spend a portion of funds generated by Proposition 99's quarter-a-pack cigarette tax on a statewide anti-smoking campaign modeled after the Australian program.

In the Australian campaign, television ads that emphasized smoking's health hazards aired during prime-time six to eight weeks each year, reaching an estimated 50 percent of the population.

The media campaign was launched in Sydney in 1983; Melbourne, which did not air the spots, was used as a control city. Random surveys conducted six months after the ads first ran showed a 2.6 percent drop in smoking in Sydney but found no such decrease in Melbourne.

In 1984, the media campaign began in Melbourne. Six months later, smoking among Melbourne men declined by 2.9 percent but smoking patterns among Melbourne women were less clear, the researchers found.

''Our primary conclusion from this study is that there was a drop in the prevalence of smoking of 2.5 percentage points in the campaign's first year,'' said Pierce.

''This effect was remarkably consistent in men and women in both cities, despite the one-year lag period in the start of the campaign between the two cities,'' he added.

Long-term analysis of survey results showed that ''for men in both cities, continued anti-smoking campaigns were associated with an average continued decrease in smoking prevalence of approximately 1.5 percent per year,'' the study noted.

Pierce, who previously served as the chief epidemiologist for the U.S. Office of Smoking and Health, said the California campaign ''is aiming to take the best things from the Australian campaign and not make the same mistakes,'' such as neglecting to keep a continued focus on messages to women smokers.

''If we're successful, we could be below a 5 percent prevalence rate by the year 1998,'' he said.

Pierce has received a $2 million grant from the California Department of Health to develop a survey which will gauge how the media blitz is affecting the state's 7 million smokers.

''California is really the test market now for the whole developed world. A lot of people are watching very closely to see what happens here,'' he said.

NEW YORK (APRIL 25) UPI - A police lieutenant who filed the incorporation papers for the illegal Bronx social club where 87 people died in an arson fire has been brought up on departmental charges, The New York Times reported Wednesday.

The report came as Julio Gonzalez, the Cuban immigrant charged with 174 counts of murder for allegedly setting the blaze at the Happy Land social club last month, was scheduled to appear in state Supreme Court in the Bronx for pretial motions.

Lt. Primo Flores was charged with giving ''evasive answers'' when questioned about his off-duty employment, Chief Daniel Sullivan, head of the department's inspection services, told the Times.

Flores, a lawyer and a 23-year police veteran, works in the Department's Advocate's office.

Gonzalez, 36, is accused of dousing the the club with $1 worth of gasoline in a jealous rage March 25 after quarreling with his ex-girlfriend, Lydia Feliciano, 46, an employee at the illegal social club.

The club, jammed mostly with Honduran immigrants, had no rear exit, and its windows were barred, trapping 87 people in a smoky tomb.

Most perished on the second floor, where many were found on the dance floor or with their legs still entwined around bar stools where they had been seated.

#90115u0692 04/25/1990 ~United Press International

WINNETKA, IL (APRIL 25) UPI - A couple skeptical that the Holocaust ever occurred pulled their 13-year-old daughter out of school because of a new state law requiring schools to teach about the Nazi atrocities of World War II.

Safet and Ingeborg Sarich said they will allow their daughter, Sanya, to return to eighth-grade classes at Washburne School only if she does not have to learn about what they called the ''hate materials,'' The Chicago Sun-Times reported Wednesday.

Donald Monroe, the school's superintendent, said the complaint ''is under investigation'' but added, ''We intend to continue those programs.

''It is our hope that she'll be back in school,'' Monroe said after talking with the Sarich family.

At issue is a state law that went into effect in January requiring all public schools to teach about the ''Nazi atrocities of 1933 to 1945, the Holocaust, during which 6 million Jews and millions of non-Jews were exterminated.''

The Sarich family mailed letters objecting to Holocaust teachings to all Washburne teachers, 500 parents and the media.

Safet Sarich, 58, told the newspaper most accounts of the Holocaust are ''false, with gross exaggerations and distortions.''

West Germany acknowledged years ago the Holocaust and the slaughter of million of people occured. The East German Parliament on April 12 shared the blame for the first time.

#90115u0759 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - The sudden resignation of American University President Richard Berendzen came after police had traced a series of obscene phone calls to his private office phone, reports said Wednesday.

Berendzen, who quit April 10 after 10 years on the job, was asked to step down because of allegations surrounding ''personal actions,'' Edward Carr, chairman of the university's board of trustees.

Robert Horan Jr., a prosecutor in Fairfax County, Va., a suburban Washington area, said Tuesday that police are ''looking into certain complaints'' against Berendzen.

WUSA-TV reported that obsene telephone calls allegedly began after a county woman placed an advertisement in The Washington Post saying she would take children into her home for daycare. Police then launched an investigation and put a tap on the woman's telephone. A series of calls were then allegedly traced to Berendzen's office.

''On April 6, 1990, I first became aware of allegations of improper behavior by Dr. Berendzen,'' Carr said in the statement. ''I want to emphasize that these allegations concerned personal actions of Dr. Berendzen and were in no way related to his role as president of the university.''

On April 10, Carr had said he was unaware of reasons behind what was then presented to the public as Berendzen's unforced resignation.

''Despite the private nature of Berendzen's problems, it was concluded that his resignation would be in the best interest of the university so that the university did not become involved in their resolution,'' Carr's statement said.

Berendzen's whereabouts have been unknown since his resignation.

On April 10, Berendzen, 51, said in a statement he was stepping down because of exhaustion.

He is a noted astronomer who received his undergraduate degree in 1961 from the Massachussetts Institute of Technology. He received a masters degree from Harvard University in 1967 and a Ph.D. in 1969. He taught at Harvard and Boston University until 1974 when he became dean of American University's College of Arts and Sciences.

#90115u0768 04/25/1990 ~United Press International

(APRIL 25) UPI - Nicaragua ends a decade of Sandinista rule today.

Vice President Quayle will arrive in Managua later this morning to represent the United States at the inauguration of President-elect Violeta Chamorro.

Nearly a dozen heads of state are expected at the swearing-in, including the presidents of El Salvador and Venezuela, who met with outgoing President Daniel Ortega yesterday.

The official Radio Sandino says Venezuela's President Carlos Andres Perez has promised the first shipment of Venezuelan oil is heading for Nicaragua under an agreement signed with the new government.

Both Venezuela and Mexico stopped selling oil to Managua years ago because they were NOT paid by the Marxist-led Sandinistas.

The transition of power from Ortega to Chamorro is expected to be smooth, although there's a flap over who will head the armed forces.

The Sandinista newspaper, Barricada, says Humberto Ortega- the president's brother- will resign his Sandinista Party post to stay on as army chief.

But the Political Council of Chamorro's 14-party UNO coaltion says that is NOT acceptable. Chamorro earlier said Humberto Ortega and other top

Sandinista army leaders would be replaced.

#90115u0771 04/25/1990 ~United Press International

GENEVA (APRIL 25) UPI - U.S. and Soviet negotiators reported basic accord Wednesday on slashing arsenals of chemical weapons with only ''loose ends'' to be resolved by foreign ministers and at the May 30 Washington summit between President Bush and Soviet leader Mikhail Gorbachev.

''It is the jointly expresed hope of both countries that the bilateral chemical weapons convention can be signed at the (summit) meeting,'' a joint statement said.

The two military superpowers agreed to cut their stockpiles to 5,000 tons of lethal nerve gas and other chemical arms.

That limit will mean a huge cut of 45,000 tons or 90 percent in the 50,000 tons that the Soviet Union admits to possessing, American negotiator Stephen Ledogar said.

For the United States, Ledogar said, the 5,000-ton level will represent ''roughly 20 percent of the current U.S. stockpile.''

That would put the U.S. total at about 25,000 tons, of which 20,000 tons or 80 percent would be destroyed.

In terms of tonnage, however, the Soviets will be scrapping more than twice as much as the United States.

Ledogar's statement was approved beforehand by his Soviet counterpart, Sergei Batsanov, making it a joint declaration.

It made clear the negotiators in Geneva went as far as they could in preparing a final text at their latest 15th round of talks, which began April 10 and formally conclude Thursday.

''Bilateral discussions will continue during the meeting of ministers scheduled for mid-May and at their summit between President Bush and President Mikhail Gorbachev,'' the statement said.

Neither side officially disclosed the specific issues that must be resolved at the political level when Secretary of State James Baker meets in Moscow May 16-19 with Soviet Foreign Minister Eduard Shevardnadze.

But one delegation member said privately ''one of the delicate loose ends which must still be tied up'' is Moscow's opposition to U.S. deployment of the most modern chemical arms within the 5,000-ton ceiling, while

scrapping older weapons.

''That probably will have to be resolved at the very highest level,'' one involved diplomat said, apparently referring to Bush and Gorbachev themselves.

At the latest Geneva round - apparently the last before the summit - the two powers exchanged ''detailed information'' to prepare visits in June to each other's chemical arms storage facilities, the official statement said.

''Planning continued for the additional visits that will take place in August and in early 1991,'' it said. ''Overall there will be seven visits in each country.''

Experts also ''exchanged detailed information'' on chemical weapons destruction programs under way on both sides, the statement said.

That information included ''the technology employed and the special difficulties that need to be dealt with,'' it said. ''Highest priority'' will go to human and environmental protection during destruction.

The two superpowers emphasized their bilateral agreement would be superseded as soon as an international chemical weapons ban can be completed.

Such a global ban has been under discussion for 20 years at the multilateral 40-nation Disarmament Conference in Geneva, although a text is finally taking shape because of U.S.-Soviet progress.

Washington proposed the United States and Soviet Union cut back to minimal stockpiles once an international convention is signed.

The United States insists on retaining at least some weapons as a safeguard, however, until all nations known to possess or able to produce chemical arms have adhered to the projected global ban.

#90115u0786 04/25/1990 ~United Press International

MINNEAPOLIS (APRIL 25) UPI - An 80-foot section of a bridge under construction over the Mississippi River collapsed Tuesday night, killing a construction worker.

Several other workers, all employees of C.S. McCrossan Inc. of Maple Grove fell 90 feet into the river but were rescued and not seriously injured, officials said.

The dead man was identified as Robert Moser Sr., 45, Inver Grove Heights,

a welding foreman who had been sent to inspect the bridge's truss system after workers noticed that a box beam had moved slightly out of place.

''There was no warning,'' said Stan Anderson, a crane operator who witnessed the accident. ''It all went down in piles of concrete, scaffolding and carpentry.''

Transportation Commissioner Leonard Levine said Moser was under the bridge when one of two arches fell.

''We know the one man who died was underneath and when the section fell, everything fell on top of him,'' Levine said.

Transportation Department district engineer Bill Crawford said a worker noticed something amiss and shouted a warning, and construction workers tried to flee before the collapse.

''I've been in this business 42 years and this is highly unusal,'' Crawford said. ''The only other time I have seen somethig like this was in Chaska in 1960.''

Levine said one theory of the cause of the accident was that wooden forms couldn't handle the weight of concrete that had been poured about two hours earlier.

The new span is being built just north of the old bridge that connects Lake Street in Minneapolis with Marshall Avenue in St. Paul. Each arch is 555 feet long for an overall bridge length of 1,483 feet.

Tom Pashina, an employee of Twin City Concrete Pumping, said he and a couple of other men were standing along the edge of the old bridge when they heard a ''big crack.''

''We looked over and all of a sudden, down it went,'' Pashina said. ''We turned around to run because we thought we were going with it. I'd never heard a crack that loud and ugly.''

Richard Jones, who was nearby when the accident occurred, said he heard a ''whoosh.''

''I was sitting on the balcony when I heard a rushing noise,'' Jones. ''I got up as the lat bits of rods or structural steel wee falling into the water. At first I thought it was something that was planned; that they were knocking out supports that were temporary. Then I realized it was part of the arch.''

#90115u0795 04/25/1990 ~United Press International
(APRIL 25) UPI - The Senate Appropriations Committee approved a two-point-three-BILLION-dollar emergency spending bill yesterday.

Among its provisions, the measure earmarks 720-Million dollars in aid for Panama and Nicaragua... which is 80-Million dollars less than requested by the White House.

President Bush wanted 500-Million dollars for Panama and 300-Million for Nicaragua... and hoped to have the money O-K'd before today's inauguration of Violeta Chamorro as president of Nicaragua.

A Democratic plan, which was rejected, called for spending more money in Eastern Europe and less in Central America.

The committee also recommended 10-Million dollars to build an embassy in Lithuania in the event the United States recognizes the breakaway Soviet republic as an independent state. Republicans say the Bush administration had reservations about appropriating money for an embassy in Lithuania.

Democratic leader George Mitchell says he wants to begin action in the Senate today on foreign aid, with a vote tomorrow.

The House yesterday overwhelmingly adopted a resolution that recognizes Jerusalem as Israel's capital. The House vote came as controversy continued over the Senate's approval last month of a similar resolution.

The non-binding resolution came under attack from Senate Republican leader Robert Dole, who co-sponsored the Senate measure.

Dole returned last week from a Middle East trip saying he'd made a mistake and called the resolution- in his words- ''dangerous nonsense.''

Dole may be right. A pro-Iranian terrorist group in Lebanon responded to the Senate resolution by threatening Americans living in Islamic countries.

Israel captured East Jerusalem in the 1967 Six-Day War and considers the unified city to be its capital. The United States recognizes Tel Aviv as Israel's capital and believes that although Jerusalem should stay unified... its status should be determined by Arab-Israeli negotiation.

The House says the resolution, which was adopted 378-34... is necessary to calm Israeli fears that Washington would support a divided city.

#90115u0825 04/25/1990 ~United Press International
(APRIL 25) UPI - A Lithuanian delegation in Moscow seeking to open talks

with the Kremlin has yet to make contact with any high-level Soviet officials.

The four-member Lithuanian delegation hopes to discuss the Baltic republic's March 11th declaration of independence but has yet to encounter even one senior Soviet official.

While the delegation was in Moscow yesterday, Soviet K-G-B forces and the navy tightened control over Lithuania's land and sea borders. The latest actions by the Kremlin against Lithuania came just before President Bush chose to hold off on economic sanctions against Moscow to protest intimidation of the rebellious republic.

Bush consulted congressional leaders on possible economic measures against Moscow, but he withheld any decision on firm action... a stance apparently backed by Congress and U-S allies.

In his words- ''This is a highly complex situation that we're facing, and there's a lot at stake in this situation.''

A man discharged from a mental hospital walked into a crowded Atlanta-area mall yesterday and emptied a six-shot revolver at lunch customers, killing one man and wounding four other people.

Police say the gunman had been released from a hospital on Monday.

Authorities said the gunman entered the food court in Perimeter Mall in Atlanta's affluent northern suburbs, drew a .38-caliber revolver and began firing at random into a crowd of about 200 panicked shoppers.

The gunman calmly surrendered outside the mall, and authorities say documents found on him indicated he'd been released from Georgia Regional Hospital, a mental institution.

Police say the gunman had been diagnosed as homicidal and suicidal. The hospital declined comment.

Police identified the gunman as 30-year-old Reginald Moreman of Anniston, Alabama, but he also carried papers identifying him as 31-year-old James Calvin Brady of Atlanta. He was charged with one count of murder and three counts of aggravated assault.

#90115u0828 04/25/1990 ~United Press International

(APRIL 25) UPI - Prices on the Tokyo Stock Exchange Wednesday closed slightly higher in relatively active trading.

The blue-chip Nikkei Average of 225 selected issues, which declined 177.69 points Tuesday, recovered 62.98 points or 0.2 percent to 29,564.36.

The broader-based Tokyo Stock Exchange Index of all listed major shares gained 7.42 points to 2,200.51.

An estimated 700 million shares changed hands, compared with 509 million shares Tuesday.

Advances edged out declines 492 to 441, with 177 issues unchanged.

Elsewhere in Asia, prices were slightly higher in listless trading on the Hong Konmg Stock Exchange as outside pressures dampened prices and overseas investors stayed on the sidelines.

The Hang Seng Index, which tumbled 41.02 points Tuesday, added 2.74 points to 3,018.58. Utilities gained 8.50 points, financials lost 15.48, industrials rose 0.72 and properties climbed 30.23 points.

Turnover amounted to 1.16 billion shares, compared with 1.08 billion shares changing hands Tuesday.

Prices on the Singapore Stock Exchange eased in light trading as investors stayed on the sidelines.

The key Straits Times Industrial Index, which lost 25.60 points Tuesday, lost 11.17 points to 1,467.84. The narrower All Singapore Index fell 2.69 points to 402.58.

Turnover amounted to 62.06 million shares, compared with 54.06 million shares Tuesday.

Markets in Australia were closed for the ANZAC (Memorial) Day holiday. Trading will resume Thursday.

#90115u0917 04/25/1990 ~United Press International

MIAMI (APRIL 25) UPI - A bankruptcy judge has thwarted shareholders' efforts to oust the board of General Development Corp., ruling despite objections from the federal Securities and Exchange Commission.

Judge A. Jay Cristol denied a motion Tuesday that would have allowed shareholders to pursue two related lawsuits in Delaware. Those suits could have cleared the way for a proxy fight with GDC directors.

''It would be counterproductive to allow these suits to go forward at this time in the state courts,'' Cristol said.

He ruled that the automatic stay on litigation that protects companies in Chapter 11 should not be breached for at least another 60 days. At the same time, Cristol ordered that GDC's annual meeting be postponed to September from June.

''I'm disappointed to say the least,'' said Attilio Petrocelli, the real estate company's biggest shareholder and the plaintiff in one of the Delaware actions.

Petrocelli's attorney said he would appeal Cristol's ruling.

The ruling came over objections from the U.S. Securities and Exchange Commission, which flew in a staff lawyer from Atlanta to argue for the motion.

SEC lawyer E. Gordon Robinson Jr. argued that the bankruptcy court cannot stand in the way of shareholders' rights unless the company has been shown to be insolvent, which GDC has not.

Robinson said afterward that Cristol's decision had implications beyond the GDC case.

''What's so disturbing to us is, what if everybody who wants to avoid a proxy contest can do so by filing Chapter 11?'' Robinson said.

Petrocelli attorney Robert Schatzman said GDC does not have the management it needs to go forward.

''The board that's in place today is the board that led the company into this,'' Schatzman said.

GDC filed for Chapter 11 protection from creditors April 6. Two weeks earlier, the company pleaded guilty to charges that it conspired to defraud thousands of home buyers.

Six of GDC's nine directors were on the board while the company was sytematically engaging in fraudulent sales practices. The three new board members were appointed by those six.

''The company has no management,'' Schatzman said.

Also at Tuesday's hearing, the U.S. Trustee Office appointed and Cristol approved a Tampa accountant to act as examiner in the case.

Kathleen Durdin, a CPA with Peterson & Co. Consulting, was apointed to review the salaries and duties of GDC executives, investigate any allegations ofud, mismanagement or incompetence and analyze the company's

finances.

CHICAGO (APRIL 25) UPI - Traders will begin handling oat futures-options contracts beginning May 1, the Chicago Board of Trade announced.

''Options contracts have become an essential part of our agricultural complex since they were first introduced in 1984,'' CBOT Chairman Karsten Mahlmann said Tuesday.

The introduction of the oat futures-option contract gives every CBOT agricultural futures contract a companion options market. The options will be available for the same months there are futures contracts beginning July 1990. The contract will be opened and closed every trading day with a public call.

#90115u0978 04/25/1990 ~United Press International
(APRIL 25) UPI - NASA sounded reveille this morning for the astronauts aboard the shuttle Discovery with a song called ''Space is Our World,'' written by a Houston band called Private Numbers, along with members of the shuttle training crew. The crew today will deploy the one-BILLION 500-Million-dollar Hubble Space Telescope in orbit, a procedure that will take about six hours.

Today's the big day for Violeta Chamorro, who will be inaugurated as president of Nicaragua. Vice President Quayle and 11 heads of state will be on hand to watch the inauguration. The U-S-backed Chamorro scored a stunning victory in Nicaragua's February 25th elections by defeating incumbent President Ortega with 55 percent of the vote compared to Ortega's 41 percent.

Police in Atlanta say the gunman in yesterday's shopping mall shooting had been discharged from a mental hospital 24 hours earlier. Police identified the gunman as 30-year-old Reginald Moreman of Anniston, Alabama... but said he also carried papers identifying him as 31-year-old James Brady of Atlanta. One person was killed and four wounded in the noontime shooting.

There's a new abortion law in England. The House of Commons yesterday voted to trim four weeks from the period in which legal abortions may be performed... but overwhelmingly rejected a proposal to ban the procedure. Commons voted to reduce the period for legal abortions to the first 24 weeks of pregnancy from the first 28, except in the case of proven fetal defects.

Scientists say that plastic devices implanted under the skin for releasing drugs on a long-term, controlled basis are increasingly being used to treat a variety of disorders. The drug delivery systems were pioneered by M-I-T chemical engineer Robert Langer, who yesterday addressed a meeting of the American Chemical Society in Boston on his latest research.

The 25th annual Academy of Country Music Awards ceremonies will be held tonight in Los Angeles. Clint Black, whose black cowboy hat often camouflages his sleepy eyes... has five nominations, which is the most ever for a rookie in the competitive country recording industry. Black took the country music charts by storm with his debut album, ''Killin' Time.''

#90115u1000 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - Archbishop Roger Mahony of Los Angeles told the Soviet Union Wednesday its economic sanctions against Lithuania are unjustified, and he urged Moscow to grant the Lithuanians their ''morally legitimate'' right to self-determination.

In a terse letter to Soviet Ambassador to the United States Yuri Dubinin, Mahony, chairman of the U.S. Catholic Conference Committee on International Policy, also urged the Soviet Union to enter into meaningful dialogue with the Lithuanians.

It is unusual, but not unprecedented, for top U.S. church officials to directly correspond with foreign officials.

Mahony said U.S. bishops ''deeply regret'' the Soviet Union's decision to cut oil and gas supplies to Lithuania.

''The action imposes unnecessary and unjustified suffering on the Lithuanian people and is incompatible with the process of sincere dialogue and the willingness to compromise that is necessary for a just and peaceful solution to this crisis,'' Mahony said.

He urged Moscow to ''abandon sanctions and intimidation and, with all responsible parties, to take ever more concerted steps to find an appropriate and effective means of realizing the morally legitimate aspirations of the Lithuanian people for self-determination.''

#90115u1071 04/25/1990 ~United Press International

TOKYO (APRIL 25) UPI - U.S. companies, which fought Japan for two years to win the right to bid on the construction of Kansai International Airport, have won only 0.09 percent of the $2.8 billion worth of contracts given out

so far, airport officials said Wednesday.

Japan agreed to open its closed construction market to foreign companies in March 1988 after two years of often heated negotiations with the United States. Construction of the $8 billion Kansai International Airport, which will serve Japan's second largest city of Osaka, was a focus of the negotiations.

Foreign firms have won one percent, or $20.8 million, of the contracts as of the end of March, said a spokesman in the International Affairs Division of the Kansai International Airport Co. Ltd.

U.S. companies - including American Telephone & Telegraph Co., Bechtel Group, Inc., and General Motors Corp. - have received $2.6 million worth of contracts, or 0.09 percent of the total contracts assigned to date, the spokesman said.

Airport officials said the size of the contracts awarded to foreign firms was relatively small as many major contracts were signed before Japan agreed to open bids to foreign companies in May 1988. U.S. and Japanese officials will hold a meeting in May to review progress on foreign firms' access to the Japanese construction market.

#90115u1103 04/25/1990 ~United Press International

BUCHAREST, ROMANIA (APRIL 25) UPI - Security forces withdrew Wednesday from a main Bucharest square where a few hundred anti-communist protesters continued to demonstrate for the ouster of Romania's interim government.

Traffic around University Square resumed at dawn as most of the 2,000 demonstrators who flooded the square Tuesday after clashing with police apparently went home.

It was not clear why police and troops left the square Wednesday morning while some protesters remained. The Yugoslav news agency Tanjug said they chanted slogans against interim President Ion Iliescu and communism.

Some passers-by began shouting insults at the demonstrators, Tanjug said.

Tuesday, a delegation from the ruling National Unity Council listened to demands of the protesters that interim President Ion Iliescu resign. The protesters also demand the interior minister's resignation, autonomy for the television station and the dismantling of Communist Party structures and the hated secret police.

But Tuesday night, protestors in the square who had seen a television broadcast of a National Unity Council session shouted anti-government and

anti-communist slogans, Romania's official news agency Rompres said.

About dawn Tuesday, rows of police and soldiers charged about 100 demonstrators in the square, beating and arresting them, witnesses said. By midday, some 2,000 protesters regrouped, paralyzing local traffic and some demonstrators reportedly broke through a police line.

An Interior Ministry official said authorities did not interfere or use force against demonstrators, but said protesters injured three police cadets.

The turmoil was reminiscent of the Dec. 21-22 revolution when soldiers and protesters clashed repeatedly during the overthrow of communist dictator Nicolae Ceausescu, who was shot by a firing squad Christmas Day.

The Interior Ministry was requested by parliament to show more firmness in ensuring public order in Bucharest because ''in no country with democratic traditions, such meetings or unauthorized demonstrations, which hinder a smooth run of activities, would be tolerated,'' Rompres said.

Anti-communist protesters began demonstrating in the square Sunday, waving Romanian flags and shouting slogans against Iliescu, the government and Iliescu's National Salvation Front.

The demonstrators charge the front is run by former members of Ceausescu's communist government. They have called for daily mass protests until national elections May 20 to force the front to surrender power to non-communists.

Iliescu condemned the demonstrations during Tuesday's session of the National Unity Council, saying ''the disorder is preventing the government from ensuring normal conditions for the election campaign.''

Iliescu and two other men have secured 100,000 signatures needed to participate in the presidential balloting May 20. The other two are Radu Campeanu, president of the National Liberal Party, and Ion Raciu, president of the World Association of Romanian Emigrant Organizations.

Iliescu is considered responsible for many of Romania's changes since the revolution, but also is blamed as mainly responsible for failing to achieve some of the revolution's promises.

An anti-communist demonstration is planned for Bucharest and Timisoara on Saturday to commemorate a Jan. 28 protest in Bucharest by tens of thousands of anti-Iliescu demonstrators, the biggest such protest since the revolution.

(APRIL 25) UPI - Authorities in Atlanta say a man diagnosed as homicidal and suicidal was responsible for yesterday's shopping mall shooting rampage that left one person dead and four wounded. Police say the man... who has NOT been precisely identified... was discharged from a mental hospital on Monday.

Published reports quote sources in Congress as saying the Pentagon admits that nine Salvadoran soldiers charged in the slaying of six Jesuit priests had U-S military training. Their training reportedly included courses in unconventional warfare.

Nicaragua gets a new president today. Violeta Chamorro will be sworn in today before an international delegation that includes Vice President Quayle. Chamorro... who was considered an underdog in the February elections... won 55 percent of the vote to defeat Daniel Ortega.

Today is the 10th anniversary of the attempted rescue mission of the U-S hostages in Lebanon. Ceremonies will be held at Arlington National Cemetery to honor the eight men who died in Iran during the attempt to rescue 52 hostages who were being held in the American Embassy in Tehran.

Czechoslovak President Havel arrived in Israel today for the first state visit by an Eastern European leader since 1967. Relations between Israel and non-communist Czechoslovakia were re-established in February. The Soviet Union and East bloc nations broke ties with Israel after the 1967 Israeli-Arab war.

Reports from England say riot police stormed Manchester's Strangeways Prison today... capturing one inmate and forcing the last five prisoners refusing to end their 24-day occupation of the jail onto the roof. Relatives of the five stood at the prison fence, calling out for the convicts to surrender.

A University of Kentucky researcher told a meeting of the American Chemical Society in Boston that tobacco could provide a valuable nutrition source for areas of the world where protein is scarce. Shuh Sheen says tobacco can be reduced to a high-protein, calorie-free powder for use in a variety of foods.

#90115u1157 04/25/1990 ~United Press International
TOKYO (APRIL 25) UPI - The Finance Ministry will allow foreign securities firms to open banking branches in Japan, the national daily Asahi Shimbun reported Wednesday.

The daily said the decision is in response to a request by Morgan Stanley Group Inc. of New York for permission to open its branch in Japan to engage in banking services. The paper said formal approval was expected in the summer.

Three other U.S. securities firms, Merrill Lynch & Co, Goldman Sachs & Co. and Salomon Brothers Inc., have also made preparations for opening banking branches in Japan in anticipation of the ministry's decision, it said.

Japan's Federation of Bankers' Association last week called for a lowering of barriers that currently prevent commercial banks from engaging in the brokerage business.

The government is studying ways of easing restrictions that have divided the nation's financial markets since the end of World War II.

#90115u1200 04/25/1990 ~United Press International
KATMANDU, NEPAL (APRIL 25) UPI - Fears of new unrest Wednesday gripped Katmandu as police vowed to avenge the slayings of eight officers by supporters of the new government, doctors received threats from alleged officers and gunmen fired shots at a hospital.

Rumors that police planned revenge attacks flew like wildfire across the Nepalese capital in the late afternoon, prompting downtown shops to close and office workers to hasten home in droves.

State-run Radio Nepal announced a 10-hour curfew for a third night and said it was also imposing it on the neighboring town of Patan.

Soldiers ordered to shoot violators on sight fanned out around the capital to enforce the curfew and hurriedly pitched tents on roadsides for shelter against a driving rain that erupted in the early evening.

The tension came after about 150 police shouting, ''We will retaliate for the murders'' and ''Stop the atrocities against police'' marched in a morning funeral procession to a cremation ground to burn the bodies of six of eight officers killed by government supporters Monday.

The violence began after attempted robberies and perceived acts of subversion by men in police uniforms believed to have been thugs known as ''mandalays.'' They are believed controlled by hardline elements of the former partyless panchayat government, which King Birendra was forced to replace on April 16 with a multi-party government following six weeks of pro-democracy protests.

Vigilante groups and protesters also turned on police, believing they were protecting the mandalays, killing at least eight during street clashes that claimed at least 18 lives. Fifteen police officers remain missing.

Hours after the funeral procession, doctors at Teku and Bir hospitals reported receiving threats over the telephone from callers who identified themselves as police and accused them of providing improper care for officers injured in Monday's violence.

The hospitals were hotbeds of support of the pro-democracy demonstrations led by the Nepali Congress Party and a seven-party United Left Front, which formed the new ruling interim government.

Following the threats, soldiers were posted around the hospitals.

Shots were fired through a window of Katmandu Teaching Hospital by unidentified gunmen. There were no injuries.

Tensions were further stoked by the discoveries of two badly mutilated bodies - one of them headless - in Patan, residents said. A third was found in the nearby town of Bhaktapur. It was not known when the three were killed or who they were.

In yet another incident, a vigilante band stopped a car in the Baneshwor area of Katmandu and detained its five occupants, several of whom were badly beaten. The vehicle was set ablaze.

State radio later reported that the five possessed pistols and chains, suggesting the vigilantes may have believed they were mandalays.

The developments came despite a plea from Birendra for Nepal's 16.6 million people to support the new governmnet.

''In the political environment obtaining in the country, it should be everybody's concern to see multi-party democracy succeed,'' Birendra said in a message to the nation issued by the royal palace.

''The government headed by Prime Minister Krishna Prasad Bhattarai should be fully supported in preparing for early general elections,'' he said.

The Nepali Congress Party's central committee discussed the political situation at its first legal meeting in 29 years. Emerging from the session, Bhattarai said the discussions on the recent unrest and the party's future would continue.

WASHINGTON (APRIL 25) UPI - President Bush canceled plans to give the May 31 commencement speech at West Point because of his scheduled summit with Soviet President Mikhail Gorbachev, the White House said Wednesday.

Gen. Colin Powell, chairman of the Joint Chiefs of Staff, was expected to be the substitute speaker at the U.S. Military Academy.The Bush-Gorbachev summit will be held May 30-June 3, mainly in Washington.

White House press secretary Marlin Fitwater said that Bush will speak at

five other college graduation ceremonies next month, traveling nearly every weekend in May.

Bush is scheduled to appear at the following graduation ceremonies:

May 4 - Okalahoma State University at Stillwater. Later he will attend a Republican fund-raiser in Tulsa and visit the Oklahoma Foundation, which provides student scholarships.

May 11 - Texas Agriculture and Industrial College at Kingsville, Texas.

May 12 - University of South Carolina, Columbia, S.C., and the Rev. Jerry Falwell's Liberty College at Lynchburg, Va.

May 19 - University of Texas at Austin.

NEW YORK (APRIL 25) UPI - Umpire Bob Engel, arrested for allegedly shoplifting boxes of baseball cards, was given an indefinite leave of absence Wednesday by the National League.

Engel, 56, who lives in Bakersfield, Calif., is accused of stealing seven boxes of baseball cards made by Score from a discount department last weekend. He was scheduled to work a Dodgers game Saturday but missed the assignment because he was in jail. He worked Sunday's game after being released on $5,000 bail.

A statement from the National League said Engel was given the leave of absence ''so that he can direct his energies toward the charges that have been leveled against him.'' The statement said Engel was ''in complete agreement with the decision.''

The retail value of the 4,000 cards was reportedly $144 but card experts said Score has stopped making its 1990 cards because of a dispute with Nike over Score's use of a picture of Bo Jackson, who has an endorsement contract with the shoe manufacturer. That has made the 1990 Score cards, especially those with Jackson's likeness, more valuable, dealers said.

Engel, who has been a National League umpire since 1965, worked Tuesday night's game in San Diego between the Padres and the Chicago Cubs, but the league ordered the umpires' room at the stadium closed and Engel was unavailable for comment.

He is scheduled to be arraigned May 2.

WASHINGTON (APRIL 25) UPI - The United States has reached a tentative agreement with Japan to provide greater access for U.S. wood products to Japanese markets, U.S. Trade Representative Carla Hills said Wednesday.

The agreement is expected to increase exports of U.S. wood products to Japan by between $1 billion and $2 billion annually. Hills said the agreement offers major benefits to U.S. wood exporters.

"Not only will it result in millions of dollars of U.S. exports, but it will offer lower-cost and high-quality wood housing to Japanese consumers " she said.

The tentative agreement is expected to improve U.S. access to Japanese markets by changing the tariff classifications of most structural laminated wood products, streamlining the system of product certification and revising Japanese building codes.

On June 1, the classification of most structural laminated wood products, such as laminated veneer lumber, will be changed from a high tariff category to a category that carries a lower tariff.

Most of these wood products are now charged duties of as much as 20 percent. Under the agreement, these products will be classified at a category that carries a tariff of 3.9 percent. Trade officials said this change will expand the potential for profitable U.S. wood exports.

By streamlining the product certification process, which recognized the quality of U.S. wood products, U.S. exports will face less of a financial and time burden when seeking a Japanese Agricultural Standard quality

seal. The Japanese government also has agreed to accept the testing methodologies of U.S. wood grading organizations.

Japanese building codes also will be revised to recognize the safety levels of wood and to take advantage of the economies of modern wood frame construction in Japan.

Trade officials said regulations will be eliminated that impede introduction of new products and building systems. Changes also will be made to allow the greater use of wood in three-story buildings for residential, commercial or retail uses.

Testifying before the Senate Finance Committee, Hills said the administration has made significant progress in its trade negotiations with Japan. "In recent weeks, we have seen months of negotiations garner new market-opening agreements with the Japanese and substantial progress toward others," she said.

Last month, trade negotiators hammered out an agreement to open Japanese markets to U.S. supercomputers. In other negotiations, the Japanese government has agreed to open its market to U.S. commercial communication and boradcast satellies.

"We are encouraged by the considerable effort and determination shown by the government of Japan to take action that will open its market and to resolve certain outstanding trade matters," Hills said.

#90115u1345 04/25/1990 ~United Press International

EAST BERLIN (APRIL 25) UPI - Experts from East Germany and West Germany began talks Wednesday designed to form a monetary and economic union by July 2, a key step toward German unification.

Senior financial, banking, economic, legal, and social affairs officials held their first meeting, in East Berlin's Council of Ministers building.

The session had been arranged Tuesday in Bonn at the first summit meeting between West German Chancellor Helmut Kohl and East German Prime Minister Lothar de Maiziere.

Monetary, economic and social union is a key step toward unification of the country, split since the end of World War II. If the plan works out, it will be followed by a political union next year and all-German elections in the fall of 1991.

De Maiziere reported to his Cabinet Wednesday on the three-hour talk with Kohl and then made a surprise appearance at the experts' meeting in the same building.

The experts are to implement the agreement reached in Bonn to establish a ''monetary, economic and social union'' by July 2 that will substitute the strong West mark for the weak East mark.

State Secretary Guenter Krause, the head of the East German delegation of experts, described the first meeting as an ''exploratory'' one to set a timetable and agenda for the talks.

The West Germans have proposed a 1-to-1 mark conversion rate for wages, pensions, and personal savings up to 4,000 marks, the equivalent of $2,367.

East German government spokesman Matthias Gehler told reporters the Cabinet Wednesday recommended that the experts try to raise the 4,000-mark ceiling on conversion of personal savings.

Earlier, de Maiziere told West German television the West German conversion proposal met some of the East Germans' most important demands.

The publication of the West German proposal strengthened the East mark on the free market. In Frankfurt, the financial center of Germany, 100 East marks traded for 29 to 31 West marks. Last week 100 East marks bought 24 West marks. Last November shortly after the Berlin Wall opened, 100 East marks bought only 7 West marks.

The Bundesbank, the West German central bank, had recommended a general 2-to-1 mark conversion rate. But Kohl's government, because of East German government demands and demonstrations for parity overruled the bank.

In another development, East Germany announced de Maiziere will fly to Moscow Saturday on the invitation of Soviet President Mikhail Gorbachev and confer with the Soviet leader Sunday. De Maiziere is to be accompanied by Foreign Minister Markus Meckel, Defense Minister Rainer Eppelmann and Economics Minister Gerhard Pohl.

#90115u1379 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - President Bush urged Congress Wednesday to pass constitutional amendments requiring a balanced budget and give the president ''line-item'' veto power. ''Getting our fiscal house in order is crucial,'' he said.

At a ceremony in the Roosevelt Room, Bush said he needed the power ''to make the tough decisions'' on federal spending ''and take the heat'' for the consequences.

The administration's legislative package includes a proposal for a constitutional amendment to create a line-item veto applicable to bills containing spending authority. This would premit the president to veto individual spending items in a bill rather than being forced to veto the entire measure.

Bush also repeated his call for a balanced budget amendment, endorsing a Senate joint resolution providing for such an amendment that was introduced by Sen. Strom Thurmond, R-S.C.

Bush said ''these tools together with political courage and discpline are vital'' to restoring fiscal credibility.

Bush noted that 43 governors have the line-item veto authority and more than 30 state legislatures have called for a constitutional convention for the purpose of adopting a balanced budget amendment.

President Reagan spent eight years in office trying to promote the line item veto and balanced budget amendment to no avail, but continues to make both proposals the centerpiece of the speeches of his past presidency.

#90115u1392 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - Last fall's San Francisco earthquake rocked the muddy ground underneath the collapsed Nimitz Freeway like ''jello on a

plate,'' seismologists reported Wednesday.

Engineers have already determined that the 2-mile section of the double-decked freeway that collapsed in the Oct. 17, 1989 quake had its foundations in a mud flat, while sections that survived the 7.1 temblor were built into hard packed dirt and rock.

The first scientific study on the Nimitz collapse, published in the British science journal Nature, indicates the muddy soil amplified the quake's shock waves, making them three to five times stronger than shock waves across solid ground.

''The analogy I think of is jello on a plate,'' said one of the paper's co-authors, Roger Borcherdt, a seismologist at the U.S. Geological Survey's western regional office in Menlo Park, Calif.

''Jello on a shaking plate shakes more than ... a lump of clay on a plate '' he said. ''It really can get going when the shocks come in measured waves.''

Within hours after the Loma Prieta earthquake - named after its epicenter - hundreds of scientists from around the world descended on the San Francisco area to study the country's worst quake in almost 40 years.

Susan Hough, a seismologist at the Lamont-Doherty Geological Observatory of Colombia University in New York, led a 10-member team that measured aftershocks near the Nimitz Freeway with state-of-the-art equipment known as seismometers.

''We had a geological map where the ground conditions changed from mud to stiffer sediments to rock,'' said Hough, who employed six portable seismometers roughly the shape of oversized tuna cans. ''We tried to put them (the instruments) as close to the freeway as possible but on different types of ground conditions and measure the aftershocks.''

She described the ground under the collapsed section as, ''San Francisco mud flat - real gooey stuff.''

Hough's group recorded 16 sizeable aftershocks and fed their data into a computer, which determined the muddy soil had amplified the earthquake's shocks, making them stronger and stronger with each wave.

''It's sort of like pushing a swing - each measured push gets it going faster and higher, faster and higher,'' she said. She said the computer predicted the quake, which measured 7.1 on the Richter scale, was rocking the mud at a velocity of 1 mph.

''That may not sound like much, but it is,'' she said.

Her instruments showed the aftershocks in the muddy soil were up to eight times stronger than in other areas. But she said the data indicated the shocks in the same area during the 7.1 quake were probably only three to five times stronger.

''Soil tends to lose its elasticity under such great stress, so the rate of amplification decreases as the force increases,'' she said.

Jim Drago, spokesman for the California Department of Transportation, said the department was studying the results of the Nature study and others to determine how best to rebuild the Nimitz and safeguard existing structures built on mud flats.

The 2-mile section of the Nimitz that collapsed, crushing to death at least 40 people, had 12-foot thick foundations, sunk as deep as 60 feet to harder sediment underneath the mud.

''We will incorporate all of the information we receive into the (re-)design process,'' Drago said.

#90115u1406 04/25/1990 ~United Press International

LAWRENCEVILLE, GA (APRIL 25) UPI - A window shattered in a car carrying a U.S. appeals judge under federal protection Wednesday but officials said it apparently was caused by a freak accident and not a gunman.

Local police had earlier reported a drive-by gunman shot the judge's window out about 9:50 a.m., triggering a search for the assailant by state and local police.

Stephen Boyle, spokesman for the U.S. Marshals Service in Washington, said reports by Gwinnett County police that U.S. 11th Circuit Court of Appeals Judge J.L. Edmondson was shot at were inaccurate and a ''gross distortion'' of the facts.

Boyle said federal investigators at the scene now believe the window in Edmondson's car simply shattered.

''At this time, investigators are unable to determine if it was a defective window or caused by temperature change,'' Boyle said. ''But they have found no projectile or bullet in the car or elsewhere that might have been the cause of the shattered window.''

Boyle said the judge was being escorted by two deputy marshals.

Gwinnett police spokesman Larry Walton also altered his earlier statement

that the judge's car was shot.

''They thought something had struck the very back window of his car, shattering the window,'' Walton said. ''The first reaction was a bullet had struck the window. Now they are checking on that.''

He also said the search for a suspect involving state and local police was not necessary.

''There was no suspect involved,'' Walton said. The people officers followed ''were just some people in the area.''

The Marshals Service spokesman said some confusion may have occurred because about the time the window in the car shattered, a disturbance caused by an ''unusually dressed man'' occurred at a nearby office building.

Officers from several police agencies searched the area near the incident for an assailant. The search continued after federal agents said they believed no bullet was fired.

It was originally reported by authorities that Edmondson was being escorted by police in a car when a man pulled alongside him in another vehicle and opened fire.

After the report of the shooting, FBI agents descended on the scene, in part to search for links between the believed attack and the Dec. 16 bombing death of 11th Circuit Judge Robert Vance at his home in Birmingham Ala.

A mail bomb also killed Savannah civil rights attorney Robert Robinson, and two similar bombs were disarmed at the federal courthouse in Atlanta and the NAACP office in Jacksonville, Fla.

ERIE, Pa. (APRIL 25) UPI - A General Electric Corp. subsidiary in Erie has signed a contract to build 100 locomotives for Mexico's national railroad as part of a $168 million deal, company executives said Wednesday.

GE Transportation Systems officials announced at their annual shareholders meeting the agreement with Mexico's leading leasing company, Arrendadora International. The Mexican company will lease the 100 GE Super 7 locomotives to that country's national railroad, Ferrocarriles Nacionales de Mexico.

The deal also includes maintenance parts, officials said.

GE officials said the locomotives will be built in Erie and require a minimal increase in the workforce. The first 50 engines are scheduled to be delivered late this year with the remainder shipped in early 1991.

#90115u1423 04/25/1990 ~United Press International
NEW DELHI, INDIA (APRIL 25) UPI - Fires erupted in three illegal New Delhi shantytowns Wednesday, destroying the makeshift homes of more than 1,500 impoverished families but causing no deaths, the New Delhi Fire Service reported.

The fire in one of the colonies was the second there in as many days. On Monday, a blaze in another shanty community burned down hundreds of huts and left 11 people dead.

Wednesday's blazes broke out in illegal squatter communities in three separate parts of the Indian capital, a spokesman for the New Delhi Fire Service said.

The worst fire occurred in the shantytown of Shahabad, where 65 firefighters battled a blaze that destroyed 1,200 homes, the spokesman said.

On Tuesday, a fire in the Shahabad area burned down 3,500 huts.

Some 200 other firefighters used 41 firetrucks to battle blazes in colonies in the Jahangirpuri and Seelampur areas that destroyed 372 shelters of corregated iron sheets, plastic and wood, the spokesman said.

He said that there were no deaths in the fires, but the Press Trust of India news agency said that a 6-year-old girl was burned in Jahangirpuri.

The causes of the fires were not immediately known.

Tens of thousands of impoverished Indians, most of them migrants from the countryside seeking employment, reside in illegal colonies of makeshift huts built on vacant lots or government land around New Delhi.

JERUSALEM (APRIL 25) UPI - Israelis began setting up the first prefabricated buildings for a new Jewish neighborhood in the Israeli-occupied West Bank Wednesday despite criticism on expanding settlement activity.

Settlement officials maintain the new neighborhood of Allon is an extension of Kfar Adumim, established in 1979 about 9 miles northeast of Jerusalem. Allon is less than one mile east of the older settlement.

Critics, including U.S. officials, have said the establishment of new Jewish settlements in the Israeli-occupied territories is an obstacle to the Middle East peace process.

On Sunday, Israelis began setting up a new settlement called Dugit in the Gaza Strip. Families who plan to live in Dugit and Allon are expected to move in before Israeli Independence Day Monday.

The Israeli government maintains the new Jewish areas are within the guidelines of the 1988 government coalition agreement, which allowed for the establishment of eight new settlements. But opponents say that right-wing Likud Prime Minister Yitzhak Shamir is speeding up the process of establishing settlements in the wake of the Likud-Labor coalition collapse.

In reaction to the controversy surrounding the Jewish occupation of a church-owned building in the Christian Quarter of Jerusalem's Old City, the prime minister's office issued a statement ''to clarify a number of matters.''

More than 100 Jews moved into the 72-room building, known as St. John's Hospice, April 11 during the Christian Holy Week.

The announcement late Tuesday emphasized that the disputed building owned by the Greek-Orthodox Patriarchate was not a church or holy site but had been used as a hostel.

Israel ''respects the churches and freedom of worship,'' the statement said, adding, ''Jerusalem is open to all and members of all religions feel at home.''

Israeli courts are in the process of deciding whether the lease of the property was valid and whether the Jewish newcomers may be evicted, with a

hearing on the possibility of eviction scheduled before the High Court Thursday. The prime minister's office characterized the dispute as involving an ''ordinary commercial real estate transaction.''

''Presenting the leasing as an affront to the Greek-Orthodox Church or (an infringement of) its rights contradicts the facts,'' the statement said.

''It goes without saying that there neither is nor was any intention to offend Christians, and anyone who presents it as such is motivated by considerations foreign (to the matter at hand) and is interested in inflaming relations between Jews and the other communities residing in the country,'' the statement said.

OSHAWA, ONTARIO (APRIL 25) UPI - An illegal walkout over a suspended union representative halted production at a car plant in General Motors' Oshawa complex for a second day Wednesday.

Nick Hall, spokesman for General Motors of Canada Ltd., said a small group of workers walked off the job at Car Plant No. 1 late Tuesday morning which led to a decision to send the remaining employees home.

Hall said about 3,800 workers were idled at the plant which assembles the Chevrolet Lumina and Buick Regal mid-sized cars.

Bob Nickerson, spokesman for the Canadian Auto Workers in Toronto, said the local plant committee walked off the job to protest the suspension of one of its members.

''The result is that there has been a withdrawl of representation by the local union,'' Nickerson said, resulting in a number of people in the plant refusing to work.

''We've instructed our leadership in the local union to advise the employees to return to work Wednesday,'' Nickerson said, adding ''we have a collective agreement and a procedure under that agreement to resolve any problems.'' ''Anybody who gets a suspension who's a worker, a grievance goes in. We don't have a walkout over those issues,'' the union official said. ''Whether it's a committee man or a regular worker we'll take it up through the grievance procedure.''

Hall called the halt ''an illegal work stoppage'' and said it was in violation of the collective agreement with the CAW.

''These are critical times for us right now in the auto industry and we need every bit of production we can find and every sale we can find,''

Hall said. ''We really don't need this kind of thing.''

The GM spokesman said production at Oshawa's other car, truck and parts plants were also disrupted Tuesday but returned to normal Wednesday.

#90115u1483 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - American women have made gains in wages, business and politics, but economic progress still eludes millions of minority women and female heads of families, a report said Wednesday.

The ongoing study, ''The American Woman 1990-91: A Status Report,'' by the Women's Research and Education Institute found that a main barrier to economic security for many women is constant sex and racial segregation in the U.S. workplace.

''Despite significant progress toward greater integration, some projections suggest that at current rates of change, it would take between 75 and 100 years to achieve complete occupational integration,'' wrote Deborah Rhode, one of the report's 19 authors.

The report also found that women are disproportionately affected by a lack of affordable housing in the United States.

In 1985, nearly 7 million female-led renter families had a median income less than half that of married-couple renters and a poverty rate nearly three times as high, the report said.

The study noted that elderly single women renters were especially vulnerable, with a 1985 median income of $6,446 and a poverty rate of 40.2 percent.

Actress Jean Stapleton, who for several years played the working-class wife Edith Bunker on the television show ''All in the Family,'' said Wednesday the statistics have a tempering effect on the gains made by women.

''The presence of left-out and left-behind women in our society prevents self-congratulation about how far we've come,'' said Stapleton, who is president of the institute's board of directors.

The report found that the average black female college graduate in a full-time job receives less than 90 percent of her white counterpart's salary, and the average female college graduate still earns less than the average male with no more than a high school diploma.

But the statistics were not all dismal.

The study found that in such professions as law, medicine and management the number of women increased between 20 percent and 40 percent in the late 1980s from between 3 percent and 14 percent in the early 1960s.

The study found that the current 25 percent of businesses owned by women may reach 50 percent in the year 2000, while the number of female physicians has exceeded 100,000.

Newport News, Va., Mayor Jessie Rattley, the first black female mayor of that city, said that while women have made great strides in the political arena, economic power is necessary to obtain full equality for American women.

''Political equality does not put food on the table. It does not provide access to high-level corporate employment positions, and it does not provide access to the housing market,'' Rattley said. ''Only economic equality can guarantee women full equality in American society.''

UNITED NATIONS (APRIL 25) UPI - Angolan Foreign Minister Pedro de Castro Van Dunem announced Wednesday that peace negotiations with rebels will take place in the ''next few days'' despite increased military aid to the rebels from the United States and South Africa.

Van Dunem said his government was upset that those two countries have decided to increase the aid after they were informed of the coming talks between Angola and UNITA rebels.

''We have decided to enter into direct talks with UNITA,'' Van Dunem told reporters. ''That's the fastest and best way to solve this problem.''

He said the talks will take place without conditions and the Portuguese government is arranging for the two sides to meet. He said the exact date and location will be announced later.

''We have informed the United States that the talks will take place in the next few days, but we have received at the same time an information that the U.S. administration has given additional support to UNITA,'' Van Dunem said.

He said South Africa has also resumed its logistic support and sent military advisers to fight ''side by side'' with the rebels.

''The other side (UNITA) has agreed to the talks,'' Van Dunem said.

UNITA's representative in Washington, Jardo Muekalia, issued a statement Tuesday confirming his group's willingness to participate in the peace process.

Earlier this year Angolan President Jose Eduardo Dos Santos launched an eight-point plant to open a direct dialogue with the rebels and allow them to participate in elections.

The measures include also amnesty for the rebels and an increase in private foreign investment in Angola. The United States is the leading trade partner with Angola.

NEW YORK (APRIL 25) UPI - Sotheby's auction house and Acquavella gallery have joined forces to purchase the inventory of the Pierre Matisse Gallery in Manhattan for $142.8 million, it was announced Wednesday.

The purchase was made by Acquavella Modern Art, a joint commerical venture formed by Sotheby's and dealer William Acquavella, according to Sotheby spokesman Mastthew Weigman. The transaction was financed by Sotheby's and Acquavella will be managing partner of the art dealing venture.

The collection was sold by the estate of dealer Pierre Matisse, son of French post-Impressionist Henri Matisse, who died last year at the age of 89. It includes works by some of the major artists of the 20th cnetury including Chagall, Giacometti, Tanguy, Miro, Lam, Matta, Riopelle and Saura.

''My husband had a life-long association with most of his artists and was very concerned that the proper marketing of their work should continue after his death,'' said Matisse's widow, Maria-Gaetana Matisse.

''We feel that the expertise, marketing and financial capabilities of both Sotheby's and Acquavella will be idea to carry out my husbad's wishes.''

Controlling interest in Sotheby's is held by A. Alfred Taubman, a real estate developer originally from Michigan.

''This is an important venture for Sotheby's and one which we believe will be very successful for the company,'' said a statement issued by Weigman.

''It provides us with an opporunity to work with one of the preeminent international paintings dealers and to use our joint resources and marketing capabilities to enhance the value of the art and to effect its orderly disposition.''

#90115u1509 04/25/1990 ~United Press International
BONN, WEST GERMANY (APRIL 25) UPI - Nearly 20,000 angry farmers demonstrated against the European Community's policy on agricultural prices Wednesday, blocking borders and highways with farm equipment and livestock police reported.

The farmers organizations called the demonstrations to protest dropping prices for milk, grain and meat.

Some German border crossings were blocked for hours and West German police reported heavy traffic jams in some areas.

Pigs, cows, sheep, tractors, combine harvesters and haulers jammed roads around West Germany.

In the northern state of Schleswig-Holstein, farmers blocked the German-Danish border. In Lower Saxony, 4,000 demonstrators took to the streets in tractors blocking eight German-Dutch border clearance points.

In the capital city of Bonn, farmers went to the Chancellory in tractors to hold a protest demonstration.

Protests also took place on the German-French border near Schweigen, where farmers demanded stable wine prices. In the southern German-French border town of Kehl, farmers gave away free milk, cheese, and yogurt.

#90115u1519 04/25/1990 ~United Press International
WASHINGTON (APRIL 25) UPI - The Food and Drug Administration gave approval Wednesday to a new laboratory test to detect a rare AIDS-causing virus and said it was considering approving an AIDS virus test that could be conducted at home.

The agency rejected a home test kit for the AIDS virus in 1988, but a recent court case prompted it to take a new look at the much debated issue of whether people should be able to test for the virus that causes the deadly disease in their own homes, rather than go to health clinics or a doctor's office.

The new test licensed by the FDA Wednesday detects antibodies to the human immunodeficiency virus 2, or HIV-2, which is a second but far less common cause of AIDS than the HIV-1 virus. There have only been 16 confirmed cases of HIV-2 infection in the United States since it was first reported in 1987.

Standard laboratory tests for HIV-1 already detect the presence of HIV-2, but do not distinguish between the two similar viruses.

Epidemiologists, however, would like to know which AIDS cases are caused by which virus to determine if the HIV-2 virus is spreading from Africa, where it is most common.

FDA spokesman Brad Stone said Wednesday the agency had informed several companies interested in marketing home AIDS testing kits that it was reviewing its current policy concerning the products.

University Hospital Laboratories Corp. of Bethesda, Md., which had an application for a home test kit rejected by the FDA in March 1988, had filed a lawsuit against the agency in U.S. District Court in Washington.

The court case was dismissed earlier this month and the FDA agreed to review University Hospital's application and that of other home test kit companies interested in marketing an AIDS product.

''Basically we have to determine whether confidentiality and adequate counseling are ensured, especially for those who test positive,'' Stone said.

Elliott Millenson, president of the Bethesda company, said consumers who took the test would send blood samples to a laboratory that would conduct the standard ELISA test for the HIV virus. Samples that proved positive would be tested again using the much more accurate Western blot format.

He said consumers would be able to find out the results of their tests by calling a toll-free phone number and identifying themselves by codes contained in the over-the-counter kits.

Opponents of the home tests argue it will be difficult to provide adequate counseling to people who test positive.

Millenson counters that those who want counseling from the company will receive it over the telephone. He quoted studies indicating many people who test positive in clinic tests never receive counseling, usually because they don't want it.

The FDA has 120 days to rule on the home test kits, Stone said.

#90115u1525 04/25/1990 ~United Press International

NEW YORK (APRIL 25) UPI - After 20 years of sexual and social revolution, American women say they still experience job discrimination and feel stress trying to balance careers and family life, a survey reported

Wednesday.

The poll of 3,000 women across the country by the Roper Organization for Virginia Slims also reflected an increasing tolerance toward extra-marital sex and children outside of marriage.

It also showed that women's opinions of men have dropped considerably.

In 1970, the ''You've Come a Long Way, Baby'' cigarette manufacturers commissioned Louis Harris and Associates for their first survey, in which 40 percent of the women questioned said they experienced discrimination in obtaining top profession jobs. The current poll reports 61 percent of the women believe this.

Twenty years ago, 51 percent of the women polled said they experienced discrimination in obtaining top government jobs. This year, the number jumped to 64 percent.

In the current survey, 46 percent of the women said they thought pre-marital sex was immoral, compared with 1970's 65 percent.

Forty-two percent said they believed it permissible for adults to have children without getting married, compared with 1970's 11 percent.

In 1970, 67 percent of the women questioned said they believed men ''are basically kind, gentle and thoughtful.'' In 1990, 51 percent think so.

In 1970, 32 percent said they felt men ''are basically selfish and self-centered.'' This year, 42 percent believe it.

Fifty-eight percent said they believe men think only their own opinions about the world are important, compared with 1970's 50 percent.

Sixty-one percent of women working full time said they felt stress in balancing family and career.

Of these, 55 percent said the nature of their jobs makes it harder for them to devote themselves fully to their family needs. Nearly half of the women said they had to work overtime or late hours.

Thirty-one percent of the women working full time said they wished their families were more understanding about their work demands. Twenty-nine percent said their families made it hard for them to devote their complete attention to work.

However, 79 percent rejected the idea of less demanding ''mommy track'' career jobs.

Asked what would make life better, 60 percent of the women said more money.

-30- 2567
#90115u1527 04/25/1990 ~United Press International
WASHINGTON (APRIL 25) UPI - A study of human-sized turtles suggests dinosaurs were able to regulate their body temperatures in warm and cool climates much like large mammals, researchers reported Wednesday.

The new study has added to a growing body of evidence that dinosaurs were not the sluggish, lumbering cold-blooded reptiles depicted in Godzilla movies, but lively, sociable beasts that acted much like animals do today.

Reporting in the British scientific journal Nature, researchers said the physiology of the reptilian leatherback turtles - which inhabit both hemispheres from the tropics to the Artic circles - probably explains how dinosaurs were able to survive in warm and icey conditions over 65 million years ago.

When confronted by cold weather, most modern-day reptiles slow their metabolisms to the point of inertia.

The body temperature of cold blooded reptiles changes with the environment while warm blooded animals maintain an independent body temperature, usually higher than the surrounding environment, that inevitably gives them the advantage of a more active metabolism.

But the reptilian leatherbacks, which are usually about 6 feet long but have been known to reach 9-feet in length and weigh up to 2,000 pounds, are able to withstand freezing water because of their sheer size and by regulating their blood flow to conserve energy, the scientists said.

''Because of their large body size, dinosaurs were able to use their bulk as insulation and as a counter-current heat exchanger,'' said physiologist James Spotila of Drexel University in Philadelphia, one of the authors of the paper in Nature.

His studies of living leatherbacks indicate the massive reptiles are able to control their internal thermostat by controlling their blood flow, which would would enable them to remain active. When the turtles are in colder waters, their blood vessels tend to contract away from their extremities, conserving energy.

''They can basically cut off most of the blood flow to their flippers,'' he said.

Humans and other mammals also regulate their blood flow - their vessels contracting inward in the cold and, conversely, moving toward the surface

in warm weather to shed excess body heat.

''Leatherbacks, and presumably dinosaurs, have the same ability,'' Spotila said. ''Physically, dinosaurs had tremendous opportunities to throw off heat through their long arms and tails. The Stegosaurus had all those plates on his back, which would have been an ideal heat exchanger.''

The dinosaurs' ability to weather hot and cold climates have led some paleonotologists to conclude they were warm blooded animals.

But Spotila, like most in the field, disputes the theory.

''At a certain bulk level, warm blooded and cold blooded aren't that much different,'' he said.

Spotila said the giant leatherbacks are considered an endangered species but their numbers have never been established because they are so rarely seen.

#90115u1558 04/25/1990 ~United Press International

BEIRUT, LEBANON (APRIL 25) UPI - Citing an act of ''bad intention'' by the United States, a pro-Iranian fundamentalist leader Wednesday urged all groups holding Western hostages in Lebanon to hold onto them.

''I hope that the groups holding Westerners will not free any of them,'' said Seyyed Hussein Musawi, leader of the Iranian-backed Islamic Amal who on Tuesday indicated another American hostage would be freed.

In a turnaround of his earlier remarks, Musawi told the Voice of People radio that Washington responded to the release Sunday of U.S. hostage Robert Polhill with ''proof of bad intention since the U.S. House of Representatives adopted a resolution recognizing Jerusalem as Israel's capital.''

''Moslems are making concessions and in response, they are being stoned,'' he said.

A delegate of the International Committee of the Red Cross, however, arrived in Beirut from Switzerland amid reports of an imminent release of two Swiss workers of the Red Cross kidnapped last year in Lebanon.

Moslem sources said Tuesday the Swiss workers, Emmanuel Christen and Elio Erriquez, could be freed by Friday.

Marjolane Martin, the Red Cross press attache, arrived at Beirut International Airport on a mission reportedly aimed at mediating the

release, saying that Red Cross officials were ''pleased and optimistic.''

Christen, 32, and Erriquez, 23, were kidnapped Oct. 6 near the refugee camp of Ein El Helweh on the outskirts of Sidon, 24 milessouth of Beirut.

There was no claim for their abduction but the camp is controlled by various guerrilla factions loyal to PLO leader Yasser Arafat and radical groups supported by Syria, Libya and Iran.

''We are very optimistic but so far it is just an appeal,'' said Martin, alluding to a recent appeal by Libyan strongman Moammar Qadhafi to free all foreign hostages.

''We consider it very positive ... but I think we have to wait,'' Martin said. ''So far we got nothing concrete but we are more optimistic than we were last week.''

Tuesday, there were signs that more Western hostages, including an American, could soon follow Polhill to freedom. But groups close to the kidnappers have linked the releases to demands of freedom for other Arab prisoners.

The pro-Iranian cleric, Musawi, had said the release of Polhill was only a ''goodwill gesture'' and urged the West to reciprocate by pressuring Israel and Kuwait to free the Arab prisoners.

Saying the release of Sheikh Abdel Karim Obeid, a key fundamentalist figure abducted last July by Israeli commandos, would not be enough, he said the captors of the seven Americans and 10 other Westerners also wanted freedom for 400 Arabs held in Israel and the release of 16 Shiite Moslems convicted and imprisoned since 1983 for bombing Western and Kuwaiti targets.

Late Tuesday, a pro-Israeli militia said it freed four Arab prisoners from a jail in southern Lebanon but denied the move was part of a deal tied to Polhill's release.

A London newspaper, The Independent, quoted Lebanese militia sources as saying Shiite prisoners were expected to be released from the Khiam jail as part of a secret deal for Polhill's release.

#90115u1559 04/25/1990 ~United Press International

SRINAGAR, India (APRIL 25) UPI - The government Wednesday contended it has re-established its authority in Kashmir, while more than 60 newspapers in the strife-torn area ceased publishing to protest curbs on press freedom.

Home Minister Mufti Mohammad Sayeed, in a major statement to the lower house of Parliament during debate on his ministry's new budget, claimed success for an ongoing crackdown on militants engineering a popular uprising against Indian rule of Kashmir.

Sayeed said the arrest of hundreds of suspected extremists and other measures had resulted in restoring ''the authority of the administration in Kashmir.''

''There is a distinct improvement in the situation in the (Kashmir) valley and its people will soon be starting their journey back to the national mainstream,'' said Sayeed, himself a native Kashmiri.

Meanwhile, police reported that Moslem separatists killed three suspected police informers in Kashmir, a Moslem-dominated region in northern India. Police said the three were shot dead in Srinagar, a city 400 miles north of New Delhi that is the capital of the Indian state of Jammu and Kashmir.

Moslem militants claim the Hindu-dominated New Delhi government has consistently neglected Kashmiris and demand a state seperate from India. They also complain New Delhi reneged on a promise to hold a plebiscite to determine whether Kashmir should become independent.

The fighting has brought a crackdown on the press. The Kashmir Editors Conference, which represents 69 newspapers, met Wednesday in Srinagar, and decided to stop publication of newspapers until the government restores press freedom.

The government earlier this month closed Aftab - the largest circulated Urdu daily - and four other local newspapers in Kashmir, claiming they were propagating the views of separatists and published news detrimental to the unity and integrity of India.

The editors' decision against publishing came hours after the Jammu and Kashmir state high court quashed a state government order sealing the printing press of Aftab. The court said the government's closing of Aftab was illegal.

In still another development Wednesday, a Foreign Ministry spokesman in New Delhi denied Pakistani press reports that India had increased the number of troops along the Indo-Pakistan border. He said the reports were attempts to create war hysteria.

India and Pakistan have accused each other of boosting troop deployments along the border as tensions over the Kashmir situation have increased in recent weeks, raising fears of a fourth conflict between the neighbors.

New Delhi has repeatedly accused Islamabad of arming and training Moslem separatists as part of a plan to realize its claim to all of Kashmir, which has been divided between the rivals since they fought their first war in 1948.

Pakistan denies the Indian allegation, but openly provides moral support to the separatist movement.

Indian Foreign Minister Inder Kumar Gujral and his Pakistani counterpart, Shahabzada Yaqub Khan, were scheduled to meet in New York later Wednesday for talks aimed at easing tensions over Kashmir.

The city has remained under curfew laws since April 6, when it was imposed to assist security forces in a search for three hostages and their Moslem separatist abductors. The hostages were killed April 11 and security forces are still looking for the culprits.

In Srinagar, authorities Wednesday described the situation as peaceful.

The Moslem-dominated Kashmir region has been gripped by separatist violence since 1988. The situation deteriorated in mid-January following firing on demonstrators by security forces.

The firing sparked a civil uprising against New Delhi by virtually all 4 million Moslem residents. Since then, more than 250 people have died, mostly demonstrators in firing by security forces.

#90115u1560 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - A House panel voted to amend U.S. food aid and export programs Wednesday to allow forgiveness of debts held by some struggling countries and to earmark export credit funds for emerging democracies.

The House Agriculture subcommittee also voted to extend the Export Enhancement Program - the major U.S. export subsidy program - and to broaden the goals of the Targeted Export Assistance Program, which encourages sale of U.S. goods in countries where they face unfair trade practices.

EEP would get at least $500 million a year under the subcommittee plan and TEA would get $325 million a year. At present, EEP is allowed to spend $566 milllion and TEA $200 million. The administration opposes any limit on EEP funding. The subcommittee's proposals now go to the full Agriculture Committee for action.

They include the chance for forgiveness of food debts held by poor nations,

donation of food to struggling nations and alloting $2.5 billion in export credit guarantees for agricultural trade with emerging democracies.

By contrast, the Senate Agriculture Committee wants to create a Food for Freedom program that would donate up to $100 million in food to assist nations in switching to democracy and economic freedom.

Rep. Dan Glickman, D-Kan., said his travels convinced him the emerging democracies prefer credit aid. "We are doing exactly what they need, which is not a gift," Glickman said.

The Senate committee and the Bush administration also have endorsed revisions in the Food for Peace program to allow direct donations and debt forgiveness. Food for Peace, created in 1954, is the mainstay of U.S. food aid programs.

Under the House panel version, nations that owe money from past purchases of U.S. food could have the debt wiped out if they are in sub-Saharan Africa or have low per-capita incomes and are undertaking economic reforms approved by the International Monetary Fund. Current law contains a debt forgiveness mechanism but it has been too complex for most nations to use.

The House panel also approved the use of food donations to friendly countries and lesser developed countries. Rep. Jim Jontz, D-Ind., persuaded the panel to broaden the definition, arguing that U.S. food aid too often was determined by foreign policy goals, rather than helping the neediest people.

U.S. food aid programs have four goals - humanitarian aid, economic development, development of markets for U.S. products and promotion of U.S. foreign policy.

Subcommittee members also approved tighter rules for operation of EEP and TEA. One provision would bar the use of more than ten percent of EEP funding to aid the sale of high-value commodities containing foreign components.

NEW DELHI, INDIA (APRIL 25) UPI - Delegates at an international conference called on devloped countries Wednesday to make environmentally-safe technology available at low cost to the economically-strapped Third World.

About 20 developing countries from Asia, Africa and Latin America participated in the conference, called by India to forge a united front before a larger international conference on the environment is held in London in June.

Indian Environment Secretary Mahesh Prasad told reporters that the delegates wanted assurances that environmentally-safe equipment and technology will be made available to developing countries on a non-commercial basis.

Prasad said the cost of changing over to environmentally safe industrial equipment will be a heavy financial burden that should be borne by developed countries.

The delegates said developed countries were the main contributors to the world's enviornmental problems, and should bear the responsibility for cleaning up the atmosphere.

WASHINGTON (APRIL 25) UPI - A member of the Soviet Union's Congress of People's Deputies publicly criticized Soviet leader Mikhail Gorbachev's crackdown in Lithuania during an appearance Wednesday before a congressional committee.

Vladimir Tikhonov told a Joint Economic Committee hearing on the Soviet economic crisis that Gorbachev currently faces greater pressure from conservatives in his government than from forces supporting democracy.

Tikhonov, the first Soviet economist ever to appear before the committee, said through a translator that ''all of us'' who want democracy in the Soviet Union support Gorbachev and his democratization efforts.

''But we don't appreciate the fact that instead of dialogue with Lithuania he uses violence,'' Tikhonov said. ''Our democratic forces are not strong enough perhaps that Gorbachev would realize that the prestige of acts taken depends not only on the fact that you want to preserve your colony.''

The member of the Soviet parliament added, ''Whether the dialogue is going to take place or not is an open question. But the deterioration of the situation in Lithuania is a real fact of the day.''

Tikhonov, whose testimony was hailed by committee members as evidence of the great changes made by Gorbachev, also criticized the Soviet leader for delaying economic reforms, warning that the Soviet economy is in ''extremely bad'' shape and could collapse unless delivery of consumer goods improves.

''If the government does not start reforms today, tomorrow or the day after, we will have a breakdown, and the crash will cause anti-government social movements,'' he said, adding that government repression could

result.

Tikhonov and Western economists told the committee Gorbachev is hesitant to make changes necessary to improve the economy in the long run - such as the closing of state-owned businesses and a transition to market pricing - because of fears of growing unemployment and rising prices in the short-term.

Tikhonov gave as an example of Gorbachev's dilemma a factory employing 4,000 people that makes ball bearings that ''cannot be used by anybody.''

The economist said the government now pays for the ball bearings and sends them to a steel factory, which converts them back into unfinished steel and ships the steel to the same factory for processing again into ball bearings.

He said that however laughable such economic practices might be, they are widespread in the Soviet Union, and 10 million to 12 million people would lose their jobs if the ball-bearing factory and similar facilities were shut down.

BOGOTA, COLOMBIA (APRIL 25) UPI - Some 3,500 workers demanding higher wages struck the El Cerrejon coal mine Wednesday, the largest open-pit coal mine in Latin America.

The mine produces one million tons of coal a month, and exports 35,000 tons daily to Europe and the United States, according to the Ministry of Mines and Energy.

The workers approved the strike two weeks ago after negotiations with the Intercor company broke down. The company, an affiliate of Exxon, announced it would not negotiate during the strike.

The mine is located in the state of La Guajira on the Caribbean, 385 miles north of Bogota. Reserves are three billion tons. The government estimates losses at $1.4 million per day.

#90115u1631 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - A House panel voted to amend U.S. food aid and export programs Wednesday to allow forgiveness of debts held by some struggling countries and to earmark export credit funds for emerging democracies.

The House Agriculture subcommittee also voted to extend the Export Enhancement Program - the major U.S. export subsidy program - and to broaden the goals of the Targeted Export Assistance Program, which encourages sale of U.S. goods in countries where they face unfair trade practices.

EEP would get at least $500 million a year under the subcommittee plan and TEA would get $325 million a year. At present, EEP is allowed to spend $566 milllion and TEA $200 million. The administration opposes any limit on EEP funding.

The subcommittee's proposals now go to the full Agriculture Committee for action.

They include the chance for forgiveness of food debts held by poor nations donation of food to struggling nations and alloting $2.5 billion in export credit guarantees for agricultural trade with emerging democracies.

By contrast, the Senate Agriculture Committee wants to create a Food for Freedom program that would donate up to $100 million in food to assist nations in switching to democracy and economic freedom.

Rep. Dan Glickman, D-Kan., said his travels convinced him the emerging democracies prefer credit aid.

''We are doing exactly what they need, which is not a gift,'' Glickman said.

The Senate committee and the Bush administration also have endorsed revisions in the Food for Peace program to allow direct donations and debt forgiveness. Food for Peace, created in 1954, is the mainstay of U.S. food aid programs.

Under the House panel version, nations that owe money from past purchases of U.S. food could have the debt wiped out if they are in sub-Saharan Africa or have low per-capita incomes and are undertaking economic reforms approved by the International Monetary Fund.

Current law contains a debt forgiveness mechanism but it has been too complex for most nations to use.

The House panel also approved the use of food donations to friendly countries and lesser developed countries. Rep. Jim Jontz, D-Ind., persuaded the panel to broaden the definition, arguing that U.S. food aid too often was determined by foreign policy goals, rather than helping the neediest people.

BRUSSELS, BELGIUM (APRIL 25) UPI - Belgium, the Netherlands and Luxembourg intend to join the international control regime for export of missile technology and components, a joint press statement said Wednesday.

The Missile Technology Control Regime was set up in 1987 to prevent an increase in the number of countries possessing ballistic missiles for military purposes.

Several Western countries have already adhered to the MTCR, which requires that export of missile components or the technology to make them be subject to licensing. Participating nations also have to keep each other informed on relevant developments in the field.

''The governments of the Benelux countries consider the current proliferation of missiles and missile technology a very worrying development, particularly when it involves efforts to obtain nuclear weapons as well,'' the statement said.

''But not only in combination with nuclear weapons, but also in view of the spreading of chemical and biological weapons, ballistic missiles represent a great danger to stability in several parts of the world,'' the statement said.

The three governments emphasized the control regime is not aimed at peaceful development of space travel and thus does not prevent cooperation in this field, providing there are sufficient guarantees the transferred technology is not used for military purposes.

(APRIL 25) UPI - A study shows that anti-smoking ad campaigns like the California advertising blitz this month are highly effective. The study looked at an Australian anti-tobacco blitz used a model for the one in California. Results in the American Journal of Public Health show that the Australian anti-smoking drive generated a two and one-half percent reduction in smoking during its first year in two cities.

Federal authorities say they have identified the man who maimed a five-year-old girl last year with a bomb hidden in a toothpaste tube. They say they matched tools found in the man's auto trunk with tool marks on fragments of the bomb. They identified the man as 19-year-old David Swinford of Noblesville, Indiana. The toothpaste tube exploded in an Indianapolis K-mart store on April 17th, 1989. Five-year-old Erin Bower lost her left hand in the blast and may be permanently blind in her left eye. Police say Swinford killed himself two days after the blast, when he found out who the victim was.

WASHINGTON (APRIL 25) UPI - In one of the most visible attempts ever to sway Congress to a cause, the prototype V-22 Osprey hovered over Capitol

Hill Wednesday. Then it flew up, down, forward, backward and sideways.

The XV-15 was built by Bell Helicopter and Boeing's helicopter division for the National Aeronautics and Space Administration. The forerunner of the V-22 the Pentagon has decided not to buy because of budget constraints got a workout on and over the Capitol Plaza to the delight of a crowd of tourists and its congressional backers.

The members of Congress, who hope to reverse Defense Secretary Dick Cheney's decision to cancel the program, argued it has extensive uses in civilian aviation and is vital to the military.

The plane can take off and hover like a helicopter, using wing-tip engine pods with large propellers to provide vertical lift. One airborne, the pods rotate forward and the aircraft shifts to forward flight just like an airplane. It is touted as excellent both for dropping troops into tight areas after trips longer than helicopters can make, and billed as good for hauling commuters between cities, avoiding overcrowded airports.

The demonstration was arranged by the aviation subcommittee of the House's Public Works Committee and was an obvious boon to Bell and Boeing - and their congressional supporters - in their effort to win a renewed life for the aircraft.

''We have witnessed the dawn of a new age in aviation,'' said subcommittee Chairman James Oberstar, D-Minn. ''This is the most exciting new technology since the development of the jet engine. It is the military's most significant contribution to civil aviation.''

Rep. Jim Lightfoot, R-Iowa, a pilot who has flown the XV-15, called it ''a real sweetheart to operate'' and added, ''The question is: are we going to let the V-22 become the VCR of the '90s?'' - a reference to how Japanese cashed in on video cassette recorder technology developed in the United States.

And Rep. Curt Weldon, R-Pa., a strident cheerleader for the plane, noted that a senior Japanese official who toured the Boeing operation in Pennsylvania emerged to say, '''If you build it, we'll buy it. If you don't, we'll build it and sell it to you.'''

Before the project was canceled by Cheney, after a $2 billion research and development investment, the Pentagon had planned to spend about $27 billion to buy over 600 aircraft. It now says it will continue to use helicopters for missions it would have given to the V-22.

Following the V-22's demonstration of about three minutes, it was given a round of applause from members of Congress and tourists ringing the plaza.

MANAGUA, NICARAGUA (APRIL 25) UPI - Violeta Chamorro, the U.S.-backed candidate who surprised the world with her election victory over President Daniel Ortega two months ago, assumed the Nicaraguan presidency Wednesday, ending more than a decade of leftist Sandinista rule.

Chamorro was given the oath of office by newly elected National Assembly President Miriam Arguello, and Ortega then removed the blue and white presidential sash from himself and placed it over Chamorro.

Earlier, Chamorro, dressed in a white suit and supported by crutches she uses because of a broken knee, arrived for the inaugural ceremonies at a crowded outdoor stadium in a white pickup truck. Supporters greeted her with chants of ''UNO, UNO,'' the Spanish acronym of her National Opposition Union coalition.

She was welcomed by Ortega, who had entered the stadium earlier to loud applause and the waving of red and black flags, the colors of his Sandinista National Liberation Front. Ortega, dressed in black jeans and a red shirt, had a blue and white banner draped across his chest - the colors of the Nicaraguan flag and the banner of Chamorro's UNO coalition.

As Chamorro arrived in the stadium before the start of the ceremonies, the two leaders embraced. Roman Catholic Cardinal Miguel Obando y Bravo led a prayer to begin the ceremonies at 10:50 a.m. (12:50 p.m. EDT), 35 minutes behind the original schedule.

The ceremonies were attended by Vice President Dan Quayle and 11 heads of state, including all the Central American presidents.

Quayle, his wife, Marilyn, and other members of the U.S. delegation arrived at the stadium in a black limousine an hour ahead of the inaugural. There was applause at first, but then some of the crowd began to chant ''Assassin, assassin'' and ''Here, there, the Yankee will die'' - apparent references to U.S. backing for the now-ended Contra insurgence against Sandinista rule.

Chamorro, a one-time member of the Sandinista-led junta whose presidential candidacy was a tribute to the memory of her assassinated husband, Pedro Joaquin Chamorro, defeated Ortega in the Feb. 25 elections. She garnered 55 percent of the vote to Ortega's 41 percent in the Feb. 25 election.

Hours before she was to be inaugurated, a controversy over who would be the next chief of staff of the army created divisions with Chamorro's UNO coalition.

Newly named Agriculture Minister Jaime Cuadra and Construction Minister Gilberto Cuadra announced they would not accept their posts if Sandinista Defense Minister Humberto Ortega, brother of Daniel Ortega, remains as head of the largely Sandinista armed forces.

On Tuesday, the Political Council of the 14-party UNO coalition also said it was unacceptable for Ortega to remain as chief of staff. Reliable political sources told UPI Wednesday that Chamorro had apparently agreed to keep Humberto Ortega as army chief of staff while naming a new defense minister.

In Washington, White House Marlin Fitzwater reacted to reports of Chamorro's decision to retain Ortega, saying, ''That's a decision that she has every right to make.''

Chamorro has fought the Sandinistas for most of the past decade and has used her late husband's newspaper, La Prensa, as a mouthpiece for that criticism. Her husband, a leading critic of the Somoza regime, was assassinated in 1978, and his death helped spark the Sandinista revolution that brought Ortega to power.

Ortega, a long-time foe of the United States who has led Nicaragua for most of the past decade, Tuesday asked the incoming Chamorro government and the U.S.-funded Contra rebels to comply with a cease-fire and disarmament agreement. The pact calls for the Contras to completely disarm and disband by June 10.

''If they don't comply with the agreements, we can't have stability,'' he said. ''There are pressures, strong pressures from representatives of the United States government that these agreements not be complied with.''

The United States recently lifted trade restrictions against Nicaragua as a result of Chamorro's victory and the Senate Appropriations Committee Tuesday approved a $300 million aid package for Nicaragua.

''We are confident that in President Chamorro's leadership, Nicaragua will enjoy prosperity and national reconciliation,'' the White House spokesman told reporters in Washington Wednesday.

#90115u1663 04/25/1990 ~United Press International

BEIRUT, LEBANON (APRIL 25) UPI - Rival Christian forces fought fiercely for a second day Wednesday, waging wide-scale artillery battles that killed eight people and wounded 15 others, police said.

Police said troops loyal to dissident Gen. Michel Aoun and Samir Geagea's Lebanese Forces militiamen battled with heavy machine guns and artillery

batteries along a 4-mile front in the mountainous district of Kesrouwane northeast of Beirut.

The forces battled fiercely around the war-demolished village of Qlaiat, 12 miles northeast of Beirut, as shells slammed into the nearby residential areas of Daraya and Ajaltoun, police said.

Intermittent clashes occurred simultaneously on the deserted streets of east Beirut, sending civilians seeking refuge in underground sand-bagged shelters, police said.

Hundreds of shells and rockets unleashed by the rivals' 155mm and 130mm cannons ripped through apartment buildings and other properties, starting fires, police said.

Aoun's gunners pounded the militia-controlled Beirut port, as the militiamen targeted Aoun's headquarters in the suburban district of Baabda with rockets, police said.

At least seven inhabited areas were engulfed in the wide-scale bombardment police said.

Police said eight people were killed and 15 others were wounded in the latest round of fighting that began Tuesday. The wide-scale artillery exchanges hit the two sectors of the Lebanese capital.

Police said shells slammed into residential areas close to the ''Green Line'' separating west Beirut from the city Christian sector, raising the death toll of two days of fighting to 14 dead and 36 wounded.

Security sources in east Beirut said the rival forces recently have brought reinforcements to the battlefronts in Kesrouwane and east Beirut, apparently preparing for an imminent big battle.

The sources said the violence was triggered by the seizure of a passenger ship by the Lebanese Forces militia Monday. The ferry carrying travelers from Cyprus to the harbor of Antellias, north of Beirut, was intercepted and forced to dock at the militia-controlled port of Jounieh, 12 miles north of Beirut.

The Antellias harbor was the only sea outlet under the control of Aoun's forces. Beirut and Jounieh ports fell to militia control at the beginning of the inter-Christian fighting Jan. 31.

Aoun warned Geagea's militia to release the ship at midnight (Wednesday) or face a wide-scale offensive against militia positions in east Beirut and the Kesrouwane mountains.

The militia said it intercepted the ship because it was carrying military hardware for Aoun's forces, an accusation strongly denied by a source close to the general.

Aoun, who commands 15,000 regular troops, had vowed to crush the 10,000-member militia to establish himself as the sole strongman in the Christian enclave.

At least 933 people were killed and 3,049 were wounded since the fighting broke out between Aoun's troops and Geagea's militiamen Jan. 31.

#90115u1666 04/25/1990 ~United Press International

DETROIT (APRIL 25) UPI - Another Earth Day has come and gone, making us painfully aware of all that's wrong with this planet. It's now time to do something about it, and a good place to start might be with your car or truck.

That's the message from David E. Cole, director of the Office of the Study for Automotive Transportation at the University of Michigan, who said Wednesday this country has a pool of over 150 million vehicles that - if properly maintained - could immediately cut auto pollutants by over 50 percent.

Congress is now grappling with effective clean air legislation, yet prevailing ideas like improved emission controls and reformulated fuels will not be in effect for another three to five years, Cole told UPI in a telephone interview.

"Even then, such legislation will only affect the ten or 15 million new vehicles sold each year, while we still have an in-use fleet of 150 million cars, half of which are five years or older," he said.

Several million of those cars are mid-1980 models with computer controls and other modern engine technology. They are now entering the aftermarket - in other words, many are out of warranty and being serviced at facilities that may not have proper emissions diagnostic equipment.

"This is a very crucial time," Cole said, because motorists who have grown used to longer service intervals and reduced maintenance must still be responsible for proper vehicle operation if they want a cleaner environment.

"People have grown to assume that their cars will take care of themselves " he said, adding that self-service gasoline pumps, extended oil change and tuneup intervals, and electronic engine controls have all but wiped out the days of regular underhood checkups. "If you just do what the owner

manual suggests, there would be an immediate 50 percent or more reduction in auto pollutants," he said.

Studies showed that the cost of a proper engine tune-up and filter change was in most cases equal to the amount of money saved in annual fuel costs, with the environment getting the dividend.

Those studies showed most motorists were unaware that the oxygen sensor, used on late-model cars to monitor the air and fuel mixture, should be replaced every three years.

Cole acknowledged many vehicle owners were afraid of being cheated by garages or dealers who may unnecessarily replace expensive electronic components. "There is not a terribly high level of trust in new car dealers," he said. "But more and more dealers realize they have a vested interest in servicing older cars because they represent potential customers."

Cole said Congress should improve and expand vehicle emission inspection procedures now in effect in many urban areas - but the issue is very unpopular with vote-conscious politicians at the local level.

"These tests are very superficial and only check the vehicle engine at idle instead of running, when they emit much more pollutants," he said.

By contrast, Japan has a rigorous inspection procedure that becomes more expensive as the car ages - in fact so expensive that most motorists buy a new automobile after only three years, with the used models sold out of the country.

"It is a great employment and sales act for Japan," Cole said, noting that by contrast, the average age of the U.S. car population is between seven and eight years.

While most Earth Day activities focused on how bad things were on this planet, Cole said not much was being done of a prescriptive nature. "Better car care gives Americans more power to clean up the environment," he said. "Everybody is for improving the air, but there's a poor understanding of what can be done about it."

#90115u1712 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - The United States and Japan have reached a tentative agreement to provide greater access for some U.S. wood products to Japanese markets, U.S. Trade Representative Carla Hills said Wednesday.

The agreement is expected to increase exports of U.S. wood products to

Japan by between $1 billion and $2 billion annually. Hills said the agreement offers major benefits to U.S. wood exporters.

''Not only will it result in millions of dollars of U.S. exports,'' she added, ''but it will offer lower cost and high quality wood housing to Japanese consumers.''

The nagging trade imbalance between Japan and the United States has generated considerable sentiment in Congress to impose sanctions on Tokyo. The Bush administration has been pushing for new accords with Japan to avert such punitive moves.

The U.S. trade deficit with Japan was $3.1 billion in February, the latest monthly figure available. The total 1989 U.S. trade deficit was $108 billion, with nearly half - $49 billion - attributed to Japan.

Hills said the agreement resolves the final outstanding trade dispute with Japan under the 1988 Trade law that calls for sanctions if outstanding disputes are not resolved.

In addition, the Japanese have promised to lower tariff rates on a wide range of U.S.-finished wood products as part of the latest round of international negotiations under the General Agreement on Tariffs and Trade, or GATT, according to Sen. Bob Packwood, R-Ore.

The new tariff rates and the products to be covered were not specified by Hills, but a telegram from representatives of the American forest products industry said the terms as described by U.S. officials were acceptable to them.

The tentative wood agreement calls for changing tariff classifications of most structural laminated wood products, streamlining the system of product certification and revising Japanese building codes.

On June 1, the classification of most structural laminated wood products, larger and heavier than plywood but made in a similar manner, will be changed to a category that carries a lower tariff, officials said.

Most of these wood products are now charged duties of as much as 20 percent. Under the agreement, these products will be classified at a category that carries a tariff of 3.9 percent.

Trade officials said the change will expand the potential for profitable U.S. wood exports.

Streamlining of the product certification process would mean reduced financial and time burdens for U.S. products seeking a Japanese Agricultural Standard quality seal.

The Japanese government also has agreed to accept the testing methodes of U.S. wood grading organizations.

Japanese building codes also are to be revised to recognize the safety levels of wood and to take advantage of the economies of modern wood-frame construction in Japan.

Trade officials said regulations would be eliminated that impede introduction of new products and building systems. Other changes would allow the greater use of wood in three-story residential, commercial or retail buildings.

Testifying before the Senate Finance Committee, Hills said, ''In recent weeks, we have seen months of negotiations garner new market-opening agreements with the Japanese and substantial progress toward others.''

Agreements have been reached recently to open Japanese markets to U.S. supercomputers, commercial communications gear and broadcast satellites.

''We are encouraged by the considerable effort and determination shown by the government of Japan to take action that will open its market and to resolve certain outstanding trade matters,'' Hills said.

#90115u1716 04/25/1990 ~United Press International

NEW YORK (APRIL 25) UPI - Billionaire real estate develper Donald Trump and his estranged wife Ivana are free to commit adultery if they want to under the terms of a 60-day agreement they signed, it was announced Wednesday.

Sanford Lotwin, Trump's attorney, said the couple signed the agreement Monday, to be renewed at the end of the 60-day period unless one or the other cancels it.

Lotwin said the agreement provided that ''no action taken or failure to act during the period this agreement is in effect will ever be considered in whole or in part as grounds for divorce or separation between Mr. and Mrs. Trump, regardless of when such an action is commenced.''

''In laymen's words, it means that either one can live like a single person, doing whatever single people do,'' Lotwin added.

''Does that include adultery?'' he was asked.

''Yes, it would include that,'' the attorney replied.

Mrs. Trump has charged in papers seeking an accounting of her husband's net worth that he has been carrying on an adulterous affair with a Georgia-born model, Marla Maples. Maples said last week in a television interview that she loves Trump but is not kept by him.

Trump walked out on his Czech-born former model wife in February.

According to an updated pre-marital agreement, she would receive about $10 million and some valuable property if they are divorced, but she now claims to have been her husband's partner in building a fortune and thus deserving of 50 percent, estimated at some $2.5 billion.

#90115u1717 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - Soviet experts told Congress Wednesday Moscow may pull its nuclear forces back within the Russian republics, predicted the Soviets are unlikely to invade Eastern Europe, and said the senior military leadership may soon change.

Defense analyst John Hines of the RAND Corp. and Stephen Meyer of the Center for International Studies at the Massachusetts Institute of Technology also described the Soviet military as under siege and in a crisis.

They cited a series of problems within the Soviet military establishment that have damaged morale, such as a lack of housing, and noted the unrest within various Soviet republics, particularly the civil problems in the southern republics north of Iran and Turkey.

Although Meyer said the concern of Soviet strategic rocket forces ''getting loose is not a serious issue,'' Hines told the House Armed Services Committee's defense policy panel that within the next several months he thinks there could be a ''change in where the weapons are deployed. The problems are not lost on the Ministry of Defense.''

Hines said that Kazakhstan, the republic where much of Moscow's nuclear missiles are stationed, would be the world's third largest nuclear power if it were an independent nation. Kazakhstan is heavily populated by Kazakhs, Moslems who speak a Turkic language, and Hines suggested the missiles there might be moved back toward the core Russian republics.

Both men thought it virtually impossible that Moscow, once withdrawn from Eastern Europe, could return in force. More likely, they said, is the possible introduction of smaller numbers of crack troops to help restore order in a country - perhaps years from now in an environment of tacit U.S. cooperation to keep order in an increasingly fractionalized Eastern Europe.

Meyer said he thinks there will be a ''major change'' in Moscow's military leadership, with younger officers moving up.

Hines said senior Soviet military sources tell him that once a current reduction of 500,000 troops is accomplished by the end of the year that it ''will be followed by the continued unilateral reduction of an additional 1 million men over a period of several years.''

By the year 2000, he said, the Soviet army could be down to one-third to one-half of its current size, down to as few as 1.5 million men.

Meyer said the Soviet army is split along a number of lines, including civilian-military lines, interservice lines and between senior and junior officers. Junior officers are leaving to get better-paying jobs in the civilian sector.

Military authorities supported President Mikhail Gorbachev's perestroika policy on the premise that what they gave up in military spending would be rewarded later in higher technology for the armed forces, said Myer.

''We're now in Perestroika 5 or 6 and this is not what the military signed on for. I'm sure they now feel they were swindled,'' he said.

''The institutional crisis ... is multifaceted and cuts across all levels of the Soviet military establishment,'' said Meyer, predicting that for the next five to eight years things will get worse, not better in the Soviet military.

#90115u1719 04/25/1990 ~United Press International

LONDON (APRIL 25) UPI - The Monopolies and Mergers Commission will investigate whether major soft drinks suppliers are squeezing out smaller suppliers in Britain, government officials announced Wednesday.

The Office of Fair Trading said the MMC will examine whether leading suppliers Coca-Cola and Schweppes Beverages Ltd. and Britvic Soft Drinks Ltd. are holding a monopoly in Britain's soft drinks market, where sales are almost $5 billion a year.

The MCC said it "will be investigating whether a monopoly situation exists and, if so, whether any aspect of the supply of carbonated soft drinks operates against the public interest."

Director General of Fair Trading, Sir Gordon Borrie, said the probe will cover soft drinks including colas, mixers and syrups, but exclude mineral waters, alcoholic drinks, and low or non-alcoholic beers.

"There is a trend towards increasing concentration in the hands of the major suppliers," Borrie said. "There are indications that smaller suppliers, at local and regional levels, are being squeezed out."

"Whether this is a result of anti-competitive practices or by one or the other of the major suppliers - as has been alleged - or the success of the bigger manufacturers in competing for consumers' custom is a question which I have concluded can only be settled after a full investigation by the MMC," he said.

Under the Fair Trading Act of 1973, a 'scale monopoly' exists if one person or company supplies or is supplied with at least one quarter of the specific goods or services.

A spokesman for Cadbury-Schweppes said Coca Cola Schweppes would cooperate fully with the MMC in the inquiry. A spokesman for Britannia, which makes Britvic products, said he thought the monopolies referral unjustified. The MMC is expected to complete its investigation and make a report to the Secretary of State for Trade and Industry by the end of April 1991.

TORONTO (APRIL 25) UPI - Phoenix-based America West Airlines ordered ten additional Dash 8 Series 100 regional airliners worth $90 million from Boeing Canada Ltd., it was announced Wednesday.

America West previously ordered 12 of the aircraft and currently has nine in service, Boeing said. The aircraft maker said America West has options on another 15 Dash 8's and that by 1995 the carrier would have 37 of the regional airliners in its fleet.

The turbo-prop powered Dash 8 Series 100, built at Boeing's de Havilland division near Toronto, is used mostly for flights in the 200 to 300 mile range and will carry 36 to 40 passengers. The ten firm orders with spares are valued at $90 million, Boeing said.

America West has an all-Boeing fleet which includes a number of 737s, 757s and 747s for longer-haul routes out of its twin hubs in Phoenix and Las Vegas.

#90115u1750 04/25/1990 ~United Press International

SEOUL, SOUTH KOREA (APRIL 25) UPI - A Seoul court sentenced opposition lawmaker Suh Kyung-won to 10 years in prison Wednesday for secretly

visiting North Korea in violation of the National Security Law.

A three-judge panel at the Appealate Court reduced Suh's lower court sentence of 15 years by five years on grounds that what he told North Korean officials during his trip was not highly sensitive information.

Suh, 53, formerly a member of the opposition Party for Peace and Democracy led by Kim Dae Jung, made an unauthorized visit to North Korea Aug. 18-20, 1988, and met President Kim Il-sung and other ranking North Korean officials.

Suh reported his secret North Korean trip to authorities in June last year. He was subsequently indicted on charges of receiving instructions and money from North Korean sources and spying for North Korea. He appealed the 15-year term he received Dec. 20 in the Seoul District Criminal Court.

Presiding Judge Yun Jae-shik announcing the reduced sentence said Suh was guilty of violating the National Security Law which forbids unauthorized contacts and visits with North Koreans but he added that the lower court sentence was too severe because the information Suh provided to the North was not of highly classified nature.

The appeals court also sentenced one of Suh's secretaries to a seven-year term for involvement in the case. It upheld lower court sentences of suspended prison terms ranging from 10 months to a year for six other defendants convicted for failure to report Suh's illegal North Korean trip to authorities.

LONDON (APRIL 25) UPI - The battered electric guitar used by Jimi Hendrix to play the ''Star Spangled Banner'' at the 1969 Woodstock Festival fetched $324,000 in a Wednesday auction of rock memorabilia.

But some items that belonged to Elvis Presley - a cream flared jumpsuit he wore in 1972 and a Rolls-Royce automobile - had no buyers.

An official of Sotheby's auction house said Richard Pugliese, an Italian collector, paid $324,000 for the Fender Stratocaster electric guitar owned by Hendrix. It was three times the expected price and made it the world's most expensive guitar.

The guitar, scratched and marked by cigarette burns from Hendrix, had been owned by Mitch Mitchell, who played the drums for the musician, later to die of a drug overdose.

''The guitar is a pedigree, it is absolutely gold,'' Mitchell told the British Broadcasting Corp.

Mitchell said he told Hendrix he would like to own a Fender, and was immediately offered the item.

''I said I'll take it before you break it,'' Mitchell said. ''Anyway I didn't get it for another year, but he said 'look just one thing, I need a drum kit for my studio,' so I gave him a drum kit of mine and that went to his studio in New York and I ended up with his guitar.''

Officials said a gold disc presented to The Beatles in 1964 for their song ''A Hard Day's Night'' fetched $13,530.

Other items included fixtures from London's Marquee Club, where many bands earned fame, and stage items related to the Rolling Stones, Madonna, Elton John, The Jacksons, Status Quo, David Bowie and Eric Clapton.

#90115u1781 04/25/1990 ~United Press International
WASHINGTON (APRIL 25) UPI - America's popular savings bond program recorded a loss of more than $7.6 billion in 1989 and is failing to generate significant amounts of cash for the government, officials said Wednesday.

"In recent years after accounting for administrative expenses and the difference between redemptions and purchases, the savings bond program has not raised a significant amount of new funds," said Michael Basham, a deputy assistant secretary of the Treasury.

"In fact, when the accrual of interest is added, the program has resulted in a net outflow of funds for budget purposes," Basham said in testimony to the House Ways and Means Committee on a proposed bond to finance the nation's war against drugs.

The Treasury Department is opposed to the "drug bond" concept for a variety of reasons and cited disappointing results with the variable interest savings bonds, which are sold for as little as $25, as an example.

"A special borrowing done in the same manner as savings bonds would most likely over time not generate substantial funds," Basham said, noting, "special purpose bonds would be viewed as a competitor to savings bonds."

Savings bonds are guaranteed to pay interest for 30 years, return the face amount in at least 12 years and are "backed by the full faith and credit of the United States."

According to figures provided by the Treasury Department, the government sold $7.6 billion in savings bonds in 1989 and redeemed $7.2 billion. But after accruing interest of nearly $7.8 billion on outstanding bonds and paying administrative costs of $150 million, it recorded a loss of $7.6 billion for the year.

Basham's testimony caused some surprise. "We don't have anything here to substantiate it," said Steve Myerhardt, a spokesman for the U.S. Savings Bond program, which is charged with selling the bonds. "That's news to me."

But the Treasury Department statistics showe that in many years, especially during periods of high inflation in the late 1970s and early 1980s, the savings bond program drained government cash flow.

Nonetheless, Charles Haworth, director of government finance for the Treasury, said it is cheaper to raise cash through savings bonds because the interest is below market rates on larger denomination government securities. "We pay 85 percent of what marketable securities pay," Haworth said.

In 1982, savings bonds, once considered stodgy investments, started paying more competitive rates to attract small investors. The current rate is 6.98 percent and will change May 1.

The bonds, sold by banks, savings and loans and through a payroll deduction program, are free of state and local taxes, and starting with bonds purchased this year, free of federal taxes when used to pay college tuition.

#90115u1783 04/25/1990 ~United Press International

CHICAGO (APRIL 25) UPI - Aggressive selling rallied soybeans to session highs at the close Wednesday on the Chicago Board of Trade.

Soybeans were sharply higher and generally were at their highest level since late last year. Professional buying and spillover from soybean meal supported the beans.

Meal prices also closed at the day's highs on rumors the Soviet Union may be in the market for soymeal. Commercials dominated the buying in meal.

Corn took its cue from soybeans and closed higher across the board. Selling interest was light, although gains were limited by liquidation and positioning ahead of the first notice day for the May contract on Monday.

New-crop wheat prices were virtually unchanged. July and September wheat were pressured by favorable growing conditions in the Wheat Belt and the l'cg of export sales.

Light country movement contributed to the gains across the floor as farmers concern themselves with field work rather than marketing any grain.

Basis levels generally were steady.

At the close, corn was up 2 3/4 to 4, soybeans up 10 3/4 to 13, wheat unchanged to up 3 1/4 and oats up 1 3/4 to 2 1/2 cents.

MOSCOW (APRIL 25) UPI - Chinese Premier Li Peng said Wednesday China has no intention of establishing diplomatic relations with the Vatican.

In one of the most rapid answers at his news conference in Moscow, the visiting Li ruled out ties with the Roman Catholic see.

''China has no relations and does not have any intention of establishing relations with the Vatican,'' he said.

The rejection differs from the approach of Moscow, which has virtually normalized relations with the Vatican.

MOSCOW (APRIL 25) UPI - Chinese Premier Li Peng skirted over differences with the Soviet Union on perestroika, and the two nations signed agreements Wednesday on trade and credits for building two nuclear power plants in China.

The two sides ended the official part of Li's trip to the Soviet Union without issuing a joint statement, but Li said the first visit by a Chinese prime minister to the Soviet Union in 25 years had been ''very successful.''

Li, who was to be in Leningrad Thursday on the last day of his four-day visit, blamed ''technical reasons'' and the trip's brevity and full agenda for the absence of a joint communique. He said the two separate statements that were to be issued would show ''no radical differences.''

In the first major credit agreement between the two countries since the early 1950s, Li said the Soviet Union will issue long-term credits to Beijing to build two 1 million-megawatt nuclear power stations, while China will provide short-term credits for textile production and other light industries.

Li said the two countries will set up industrial enterprises that can be run jointly or individually to process the raw materials of either nation. Moscow and Beijing already have a flourishing cross-border trade over what was a frontier of suspicion and enmity during the 30-year Sino-Soviet split.

''The visit opened new vistas for movement ahead in all directions,'' Li told reporters.

He said Soviet President Mikhail Gorbachev's visit to Beijing last May marked the opening that ended the split between the Communist giants, and ''the present visit continues the opening to the future.''

During the current visit, China and the Soviet Union also signed an agreement limiting troops along their 4,175 mile border, but details of the specific cutbacks on the world's longest frontier were not provided.

Li's apparent differences with Moscow concerned Eastern Europe. The Chinese premier said he is not convinced that the former East bloc nations have been irrevocably lost to the socialist world, a position enunciated almost identically in the Soviet press by Politburo hard-liner Yegor Ligachev.

''I believe it is too early to say that they have abandoned socialism and socialist policy,'' Li said.

''In any case, the People's Republic of China will maintain normal state relations with those countries,'' he said.

Asked direcly whether Gorbachev's ''perestroika'' reform program is forsaking socialism, Li responded: ''I believe the process of perestroika that now obtains in the Soviet Union is of a socialist orientation.''

''How socialism should be built is an issue for each socialist country,'' he added.

Gorbachev and Li, who learned Russian while he was a student in Moscow in

the 1950s, exchanged views on their domestic policies during a meeting Wedneday.

Li said the Soviet Union's introduction of a multi-party system is not a barrier for China, which formally has other parties besides the all-powerful Communist Party, and that Beijing has relations with many parties in other countries.

Asked about the current political situation in China, Li said his visit was proof of stability and added, ''We hope that stability will proceed in the Soviet Union and that Gorbachev will be able to solve his problems.''

Also Wednesday, Li visited Star City, the Soviets' cosmonaut-training center outside Moscow, and later praised the Soviet space program.

China itself has suddenly become a competitor for commercial satellite launche business with its Long March rocket. Western restrictions on sensitive technology exports have so far prevented Moscow from launching Western firms' satellites.

A Soviet official who speaks Chinese and worked in China said the two sides had agreed to technological exchanges, ''but had not yet got to the idea'' of a Chinese cosmonaut flying into space on a joint flight with the Russians.

''Of course, they would be interested in a cosmonaut flight,'' the Soviet official said. ''And we do not exclude the possibility.''

Unlike such flights in the 1970s, the Soviets are now demanding hard cash for joint trips to their Mir space station.

Li's visit was marked by small protests because of his connection with the massacre of pro-democracy demonstrators last June in Beijing.

(APRIL 25) UPI - Lithuania says the United States sold out the independence-minded Baltic republic by refusing to retaliate for the partial Soviet blockade of Lithuania. President Vytautas Landsbergis compared President Bush's cautious policy to efforts to appease Adolf Hitler before World War Two.

In Washington today, White House news secretary Marlin Fitzwater says the adminstration sympathizes with what he termed Lithuanian ''frustration.'' Fitzwater reiterated the U-S stance that President Bush wants to see a peaceful solution to the Lithuanian crisis.

The Hubble Space Telescope is in position and ready for astronauts to set the observatory into orbit on a quest to probe the universe. The one and one-half-BILLION-dollar telescope will be deployed this afternoon. Shuttle Discovery astronauts Kathryn Sullivan and Bruce McCandless are standing by for an emergency spacewalk, if necessary.

U-S and Soviet bargainers cut a deal on reducing chemical weapons with only the ''loose ends'' of the agreement to be wrapped up at a super-power summit next month. The basic deal reached in Switzerland calls for the super-powers to cut their stockpiles to five-thousand tons of lethal nerve gas and other chemical arms.

#90115u1882 04/25/1990 ~United Press International

NEW YORK (APRIL 25) UPI - Coca-Cola Co. Chairman Roberto Goizueta was the highest paid U.S. executive in 1989 and received $10.8 million in salary and compensation, Forbes said Wednesday.

"Goizueta realized $5.9 million in stock gains in 1989, to add to $2.5 million in cash salary and bonus, and his other compensation of $2.4 million," the business magazine said.

Forbes disclosed in its May 14 issue the money earned last year by chief executive officers at 50 leading U.S. corporations. Although Goizueta was the highest paid executive, his company was the last on the "Forbes Super 50," which lists top U.S. corporations ranked according to their revenues and overall business performance.

A chairman's compensation does not always reflect the size of the company, the magazine said, and some of the largest corporations pay their CEOs what could be regarded as relatively little for the job. For instance, Chairman Lawrence Rawl received a mere $1.45 million from Exxon Corp. last year, although the oil company is the third-highest ranked corporation on the Forbes list.

"Roger Smith of General Motors, whose company ranked No. 1 among the Forbes Super 50 in overall performance, ranked 22nd among the Super 50 CEOs in total pay with $2.1 million," Forbes said.

Goizueta's bonanza was way above the level of his distant No. 2, David Glass at Wal-Mart Stores, who collected $6.75 million last year. Also in the six-million-dollar category was Hamish Maxwell, who heads Philip Morris Cos., the tobacco-based conglomerate ranked No. 6.

Maurice Greenberg at American International Group, and David Maxwell at Federal National Mortgage were No. 4 and No. 5, with $5.1 million and $4.7 million respectively.

Six CEOs earned a $3-million salary: James Kinnear at Texaco; Rand Araskog at ITT; John Welch Jr. at General Electric; James Robinson at American Express; John Young at Hewlett-Packard; and John Marous at Westhinghouse. Only five CEOs in the top 50 companies made less than $1 million, with billionaire Laurence Tisch of Loews Corp. earning a small $249,000.

John Akers, chairman of International Business Machines Corp., had his combined salaries and bonuses slashed by more than 50 percent to $1.8 million last year, while Raymond Smith at Bell Atlantic registered a 221 percent increase to $1.7 million. Forbes said it will report on total compensation of 800 CEOs in its May 28 issue focusing on "Corporate America's most powerful people."

(APRIL 25) UPI - British riot police stormed a Manchester jail and used

water jets to corner five inmates... the last holdouts in the longest siege in British prison history. Authorities entered Strangeways Prison 200 miles northwest of London to end the 25-day uprising. The rioters threatened to set fire to the prison.

President Bush is set to receive more tests from outside medical experts to confirm an earlier diagnosis of glaucoma in his left eye. The White House says Bush will be examined at Bethesda Naval Hospital by two Mayo Clinic doctors who may re-evaluate a treatment regimen of eye drops twice daily.

Police in Washington, D-C, say the president of American University quit earlier this month after police traced a series of obscene phone calls to his office. The head of the school's board of trustees says Richard Berendzen was asked to step down because of allegations surrounding what are termed ''personal actions.''

An emotional trial resumed today in New York, where two men are charged with second-degree murder in a racial slaying in Bensonhurst last summer. A resident of the Brooklyn neighborhood where Yusuf Hawkings was slain by a gang of whites identified one of the defendents as the trigger man yesterday.

#90115u1926 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - The Treasury Department auctioned $10.5 billion in 2-year notes Wednesday at an average yield of 8.90 percent, the highest since 9.34 percent April 26, 1989.

At the last auction of 2-year notes, March 27, the average yield was 8.59 percent.

The 8.875 percent interest rate notes sold at an average of $99.955, with 100 equaling the face value and one point representing $10 on each $1,000 investment, the Treasury Department said.

#90115u1938 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - President Bush said Wednesday his decision to hold off on sanctions against the Soviet Union has ''strong support'' and Secretary of State James Baker said possible U.S. responses - including helping Lithuania obtain oil - were still under review.

Bush's decision not to act, announced Tuesday, triggered a scathing response from Lithuanian President Vytautas Landsbergis, who compared the U.S. action to the 1938 Munich agreement that sacrificed Czechoslovakia to

Nazi Germany.

When invited to defend his decision against that criticism, Bush told reporters Wednesday: ''I don't need any defense. The policy decisions I've taken have had strong support from the American people and that's who I work for.''

Baker, testifying before a Senate Appropriations subcommittee, pointed out that Bush was responding to the situation ''at this stage'' and Baker did not rule out future action. If there were to be an American response, he said, ''It would be in the economic area.''

Baker said the preferred course of action ''would be to assist Lithuania '' rather than attempt to punish Moscow for the economic crackdown against the rebellious Baltic republic.

In reference to a suggestion the United States send petroleum to Lithuania to break the Soviet economic blockade, Baker said, ''You have a major problem. The basic problem is: How do you get it in?''

Subcommittee Chairman Ernest Hollings, D-S.C., quipped, ''We can't even get d'Amato in,'' a reference to the failed bid by Sen. Alfonse D'Amato, R-N.Y., to enter Lithuania from Poland.

Baker confirmed the United States is reviewing other options, including supporting nearby Scandanavian countries, such as Norway, if they try to ship petroleum supplies to Lithuania.

''If the United States were to decide to help, this would be one appropriate way,'' Baker said.

Soviet President Mikhail Gorbachev cut off oil and sharply curtailed natural gas supplies to Lithuania, as well as raw materials and some foodstuffs, to force Lithuania to rescind a declaration of independence.

While Bush has called repeatedly for the conflict to be resolved through a peaceful dialogue, Moscow has steadily escalated the pressure and Bush has faced some criticism for his go-easy approach.

Breaking their silence, GOP conservatives, including D-Amato, Sens. Steve Symms, R-Idaho, and Gordon Humprhey, R-N.H., criticized the administration. They were joined by Sen. Alan Dixon, D-Ill.

Dixon said Lithuania ''deserves a better and more effective policy'' and D'Amato said Lithuania's fight for freedom ''deserves our all-out support '' even if that sours superpower relations.

Humphrey, predicting more and more members of Congress will break with

Bush on the issue, said the United States has ''cruelly let down the people of Lithuania ... not a shred of meaningful support has been forthcoming.''

In a Senate speech, Sen. William Armstrong, R-Colo., said, ''We're just conveying the impression we don't really care'' by not taking any action.

Armstrong said there are some steps the United States can take that would not lead to a ''catastrophic rupture'' in relations with Moscow, and he called for immediate recognition of Lithuania and an exchange of ambassadors.

He also suggested taking the matter to the United Nations, withholding economic and technological assistance to the Soviet Union and - if other measures fail - Bush should consider scrubbing his summit next month with Gorbachev.

Baker had addressed those points earlier, telling the subcommittee he saw little hope for U.N. involvement since Secretary-General Javier Perez de Cuellar has already described the Lithuanian situation as an internal Soviet matter.

On diplomatic recognition and sending in an ambassador or high level envoy, Baker repeated his earlier question: ''How do you get get them in?''

On a related point, Baker said Lithuanian Prime Minister Kazimiera Prunskiene would be granted a visa to visit the United States when she applies for one at the U.S. Consulate in Leningrad.

Baker emphasized that the United States, Eastern Europe and other nations have benefitted from Gorbahcev's program of glasnost and perestroika - openness and economic restructuring.

#90115u1939 04/25/1990 ~United Press International

CAPE CANAVERAL, FL (APRIL 25) UPI - The $1.5 billion Hubble Space Telescope was launched from the shuttle Discovery at 3:38 p.m. EDT Wednesday, one orbit late because of a stuck solar panel. Astronaut Steven Hawley, operating Discovery's fragile 50-foot robot arm, released the 12-ton space telescope into a record 381-mile-high orbit at 3:38 p.m. EDT, kicking off a 15-year quest to wrest the secrets of creation from the depths of space and time.

''The Hubble Space Telescope is released. The first of NASA's great observatories is now on station ... above the Earth,'' said NASA commentator Jeff Carr from mission control in Houston.

Leaving nothing to chance, astronauts Kathryn Sullivan and Bruce

McCandless were decked out in bulky white spacesuits and stationed inside Discovery's airlock, where they had been preparing for an emergency spacewalk to free a stuck solar panel on the telescope if so ordered by mission control.

But with time running out, engineers at the Goddard Space Flight Center in Greenbelt, Md., radioed a last-ditch set of commands to the telescope that succeeded in getting the second of two European-built solar panels unfurled and in operation after a tense period of troubleshooting.

A few minutes later, the 12-ton space telescope, the most expensive satellite ever built, was released into space, about an hour and 40 minutes later than planned.

''All right!'' shouted NASA scientist Edward Weiler, jumping to his feet at the Goddard control center after the balky solar panel was successfully unfurled. ''That almost equals when they took off Tuesday.''

With both solar panels drawing life-giving power from the sun, the Hubble Space Telescope's computers immediately began orienting the instrument to keep it pointed well away from the sun as shuttle skipper Loren Shriver carefully backed Discovery away.

Shriver, co-pilot Charles Bolden, Sullivan, McCandless and Hawley planned to remain close by aboard Discovery in case additional problems required a rendezvous and a repair attempt.

The telescope's launch was was a triumphant moment for hundreds of scientists and engineers who in many cases have devoted their professional careers to a project running seven years behind schedule and $1 billion over budget.

But with the telescope finally in its element and operating properly, the project's tortured history took a back seat to the triumph of the moment, the dawning of a new era in humanity's age-old search for clues about the creation, evolution and fate of the universe.

The first image from the telescope, a focussing test photo of a nondescript star cluster known as NGC 3532, is scheduled to be beamed down to Earth early next week. Full time science observations will not begin until an eight-month calibration and checkout period is completed.

The telescope's sensitive instruments and other electronic gear require a steady source of power and without both solar panels fully deployed and generating 2,400 watts of electricity, the observatory's six high-tech nickel-hydrogen batteries could be drained, possibly damaging the instruments.

The telescope was switched to battery power shortly after 7 a.m. EDT when Hawley first plucked it from Discovery's payload bay using the shuttle's robot arm. At that point, with the solar arrays closed and unable to recharge the powerpacks, the telescope had just eight hours of battery life.

While engineers developed alternative procedures to deploy the stuck solar panel, NASA played it safe, ordering the astronauts to proceed in the meantime with plans for a spacewalk.

''With the panels that you've got out there right now, it's not satisfactory to stay overnight so we're going to have to move out on the EVA,'' radioed astronaut Story Musgrave from mission control in Houston.

''We copy you will be trying more commands ... but to proceed with EVA,'' replied Shriver.

The solar arrays were rolled up like windowshades and folded back against the telescope's side during Discovery's ground-shaking launch Tuesday from the Kennedy Space Center.

During checkout Wednesday, one array worked properly, exposing 10 panels of solar cells to sunlight, but the second failed to unwind on radio command from the Goddard.

A second attempt to get the high-tech European solar array to unwind also failed after pulling a few feet of the array out of its canister. The third try was successful.

Equipped with a near-perfect 94.5-inch mirror, the electronic observatory will be able to study planets, stars and galaxies with 10 times the clarity of ground-based instruments, allowing astronomers to study objects created shortly after the big bang explosion thought to have created the universe.

Priority projects for the observatory include determining the age of the universe to within 10 percent, studying the size of the cosmos and the rate at which it is expanding and searching for black holes and other enigmatic objects on the frontiers of modern physics.

Capable of seeing stars and galaxies up to 14 billion light years away, the Hubble Space Telescope may be able to see signs of galactic evolution to help scientists figure out how the universe evolved from a featureless fireball into the relatively lumpy cosmos observed today.

Closer to home, the telescope may find conclusive proof of planets orbiting other stars, a discovery that would have profound philosophical, scientific and religious implications.

#90115u1947 04/25/1990 ~United Press International
COLUMBIA, SC (APRIL 25) UPI - Ronald ''Rusty'' Woomer, scheduled to die Friday for the 1979 slaying of a convenience store clerk during a three-county crime spree, appeared Wednesday to have come to grips with his fate, prison officials said.

State Corrections Department spokesman Francis Archibald, who kept in close contact with the warden at the correctional institution where Woomer awaited his date with the electric chair, said the prisoner continued to meet with family members and friends as the hours ticked away.

''The warden's impression is that Woomer is resigned (to his fate),'' Archibald said. ''He knows that his chances (of another stay) are very slim. He has made his peace with himself and with God. I think he's scared but I think he's also resigned.''

Woomer, 35, of Huntington, W.Va., also met with his attorneys, whose plans for another appeal, if any, were not immediately clear.

On Tuesday, a panel of the 4th U.S. Circuit Court of Appeals in Richmond, Va., rejected Woomer's two pending appeals and denied his attorneys' request for a stay of execution. That left the lawyers with two possible avenues: a petition to the full appeals court or another request to the U.S. Supreme Court.

Last June, with Woomer just 13 hours away from an earlier execution date, the nation's highest court granted a stay. However, the court dissolved the action several weeks ago after refusing to consider any further arguments in Woomer's case.

As officials at the Broad River Correctional Center made final preparations for the scheduled 1 a.m. Friday execution, opponents of the death penalty made their own plans for a Thursday night service at a Columbia church and a candlelight vigil at the Statehouse.

The latter appearance will not have any effect on Gov. Carroll Campbell, a death penalty advocate who previously stated his unwillingness to get involved in the case.

Corrections officials have set aside two areas at the Broad River facility one for supporters of capital punishment and another for opponents of the death penalty. ''They will be kept separate,'' Archibald said.

Woomer was convicted and sentenced to die in 1979 for the shotgun slaying of Della Sellers, one of two women abducted from a Pawleys Island, S.C.,

convenience store, raped and left for dead by Woomer and an accomplice. The second woman, Wanda Summers, survived to testify against Woomer despite having most of her jaw blown away by the same gun blast that killed her friend.

Earlier, Woomer and accomplice Eugene Skaar, also of Huntington, robbed and killed Cottageville, S.C., coin collector John Turner before driving into rural Georgetown County, where they gunned down Arnie Lee Richardson and his sister-in-law, Earldean Wright.

Richardson's 5-year-old daughter was wounded by the assailants but managed to crawl out from under her father's body and ride her bicycle five miles in a valiant bid to get help.

Skaar committed suicide hours after the killings when he and Woomer were cornered by police at a Myrtle Beach motel.

Authorities said the two men came to South Carolina with a plan to steal and sell valuable coins. The scheme was hatched by Fred Whitehead of Myrtle Beach and John Fisher of Huntington, who were sentenced to 25 years and 5 years in prison, respectively.

Barring a further stay, Woomer would become the 244th person to die in the state's electric chair since 1912 and the third since the death penalty was reinstated in 1976.

#90115u1970 04/25/1990 ~United Press International

TEANECK, NJ (APRIL 25) UPI - If the white police officer who shot and killed a black youth is not indicted and convicted, ''justice has collapsed,'' civil rights leader Jesse Jackson said Wednesday.

Jackson also met Wednesday with the family of Phillip Pannell in Englewood for the second time in as many weeks, before addressing an audience of 1,200 students and teachers in the gymnasium of Teaneck High School.

A grand jury meeting in Trenton also began hearing evidence Wednesday in the death of Pannell, 16, who was killed by a police bullet Apr. 10.

The grand jury was shifted from Bergen County to the state capitol by Attorney General Robert Del Tufo after black activists demanded an outside investigation into the shooting. However, state officials have rejected calls for the naming of a special prosecutor in the case.

Police say officers Gary Spath and Wayne Blanco were responding to a call that a teen who fit Pannell's description was displaying a gun at an outdoor basketball court when the shooting occurred. Police say Blanco

felt a gun in Pannell's pocket as the officer frisked the youth, who then ran and was shot in the back by Spath after he ignored the officers' calls to stop.

However, witnesses at the scene have variously said Pannell was not frisked, was begging for his life and had his hands in the air when he was killed.

''The circumstantial evidence is quite substantial. The bullet did go in the back and it did come from a police officer,'' Jackson told reporters. ''If there is no indictment it is a signal justice has collapsed.

''My visit is to keep a focus on the grand jury process taking place in Trenton,'' he added. ''I seek to bring justice and change. The man who killed Phillip needs to face a grand jury, indictment and conviction.''

In response to a question on whether he should have referred to Spath during his earlier visit as an 'assassin,' Jackson said, ''I should have said executioner.''

Jackson said he would counsel young people to avoid a repetition of the violence that marred a candlelight memorial service the day after Pannell's death if the grand jury does not return an indictment.

''All of us must abide by the law,'' he said. ''However, if the process does not work we have returned to the law of the jungle. That is not a civilized situation.''

In his speech before the standing-room only crowd of students and educators, Jackson called on them to give up on drugs and ''turn to each other, not on each other.''

''We have lost more lives to dope than we have to the rope,'' he said, and led the students in repeating his trademark chant, ''I am somebody.''

#90115u1978 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - Senate action on a bill to send $720 million in emergency aid to Panama and Nicaragua was held up Wednesday by a dispute over whether Washington should be allowed to use its own money for abortions.

The aid for Panama and Nicaragua as well as emergency appropriations for a host of domestic purposes are all contained in a $2.3 billion supplemental spending bill approved late Tuesday by the Senate Appropriations Committee.

President Bush had hoped Congress would approve his request for emergency

aid for the new U.S.-backed governments of the Central American countries in time for Violetta Chamorro's inauguration Wedneday as president of Nicaragua.

But infighting over child-care legislation in the Senate held up the supplemental spending bill for several days, and the dispute over abortion language in the supplemental measure led to the latest delay.

Bush sought $500 million for Panama and $300 million for Nicaragua. The House earlier this month gave him $420 million for Panmana and $300 million for Nicaragua, and the Senate committee approved a similar package Tuesday.

Senate Democratic leader George Mitchell hoped to begin floor debate on the supplemental bill Wednesday - in hopes of voting Thursday - but needed the unamimous consent of the Senate to do so.

However, Republican leader Robert Dole said two GOP members, who he did not name, objected to the provision in the supplemental bill that would allow Washington to use city money to finance abortions.

Dole said the Republicans would take up the legislation if the abortion language was removed, and said he would hold meetings on the dispute. Without a resolution, the Senate would have to wait until Friday to consider the bill.

During the Senate Appropriations Committee meeting Tuesday, Sen. Phil Gramm, R-Texas, offered an amendment striking the language affecting abortions in Washington. But Gramm's proposal was defeated on a voice vote.

Bush last year vetoed the regular appropriations bill for the District of Columbia because it contained similar language, eventually forcing Congress to remove it. Other laws prevent the district from using federal funds for abortions except in cases in which the mother's life is at stake.

The administration's impatience with the lack of congressional action on its aid request for Nicaragua prompted Bush to approve $2.5 million in special contingency funds for emergency medical supplies.

Some of that aid was carried to Nicaragua Wenesday by Vice President Dan Quayle and other members of the U.S. delegation to Chamorro's inauguration.

On Tuesday, the Senate Appropriations Committee also approved a amendment providing $10 million for an embassy in Lithuania in the event that the United States recognizes the breakaway Baltic republic as an independent state.

The committee voted 15-14 against a Democratic plan that would have given

more aid to Eastern Europe and less to Panama. Democrats Dennis DiConcini of Arizona and Ernest Hollings of South Carolina joined with all 13 Republicans on the panel to defeat the proposal.

#90115u1987 04/25/1990 ~United Press International

NEW YORK (APRIL 25) UPI - ''Elvis'' will return to the ABC schedule, but ''Sunset Beat'' sets after its second airing and ''China Beach'' and ''Capital News'' go on hiatus, the network announced Wednesday.

''China Beach'' definitely will return; the fates of ''Sunset Beat'' and ''Capital News are uncertain.

''Sunset Beat,'' which premiered Saturday, Apr. 21, has its second and last performance on Apr. 28, 8-9 p.m. Eastern time. A special one-hour ''Elvis'' will air in the time period on May 5, then ''Elvis'' will settle into the 8-8:30 p.m. Eastern time period, teamed with a second half-hour show to be announced.

''China Beach'' and ''Capital News'' go off the air after their episodes of Monday, Apr. 30, 9-11 p.m. Eastern time. The theatrical film ''Ruthless People'' with Bette Midler will air in the time period on May 7, a special two-hour ''Columbo'' will fill the time on May 14, and programming after that has not yet been announced.

#90115u2027 04/25/1990 ~United Press International

WIESBADEN, WEST GERMANY (APRIL 25) UPI - Freed U.S. hostage Robert Polhill, recovering from 39 months as the hostage of Moslem extremists, smiled, waved and gave the V-for-victory sign Wednesday to cheering hospital patients and military personnel.

The professor looked thin and tired but seemed in good spirits as he

appeared on the balcony of the U.S. military hospital in Wiesbaden, where he is undergoing medical examination and military debriefing.

Polhill is scheduled to return to the United States at Andrews Air Force Base Thursday afternoon. Joe Reap, a spokesman for the counterterrorism bureau of the U.S. State Department, said no big welcome was planned and Polhill would be taken immediately to Walter Reed Hospital for further medical tests.

Polhill, 55, received a warm greeting Wednesday from dozens of patients and military personnel at Wiesbaden. The group cheered as he emerged from his hospital room Wednesday with his wife, Ferial, and his two grown sons, as well as a group of small children and their teachers visiting him.

Polhill did not address the crowd but his younger son, Brian, 23, told gatherers, ''He says you make him feel really wonderful and thanks.''

Polhill smiled on several occasions and gave the V-for-victory sign.

The 16 boys and girls visiting Polhill were children of U.S. forces personnel.

''He did not talk very much, his voice was soft ... he seemed a little weak,'' said Kim Miller, the children's kindergarten teacher.

''I told him it was nice to have him back,'' said Richard Houser III, 6.

Polhill, joking and in good spirits, apparently is recovering rapidly following his long captivity by Moslem extremists in Lebanon. He had lunch Tuesday with his sons and wife in a reunion serenaded by an accordionist, said a U.S. official at the military hospital.

Doctors say Polhill was physically fatigued but in good spirits and very hungry.

Polhill, Alann Steen, 51, and Jesse Turner, 42, all American professors at the U.S.-affiliated Beirut University College, were abducted Jan. 24, 1987 by gunmen disguised as police officers.

Also taken with the three American professors and released in October 1988 was Mithileshwar Singh, an Indian-born U.S. resident in his 60s and Beirut University College chairman of business studies.

Polhill, who was released in Beirut Sunday and flown to Wiesbaden Monday, was being interviewed by U.S. intelligence officials seeking to establish the pattern of kidnappings in Lebanon. An official said Polhill indicated willingness to talk but was concerned about endangering comrades still held hostage.

Before his public appearance Wednesday, Polhill met with city of Wiesbaden director Reinhold Edel, who gave him a book about the medieval town and a crate of wine and, according to a military spokesman, ''apologized for the cloudy weather.''

Polhill told Edel he hoped a reorder form had been included with the wine.

The spokesman said that Polhill also told Edel that he and fellow hostages Turner and Steen had often talked about coming to Wiesbaden, hoping it would be at the time of the October beer festival.

In its Wednesday edition, the Boston Herald reported that Polhill said fellow captive Steen escaped from his kidnappers in Beirut in 1987, but was recaptured quickly and beaten.

Steen's brother, Craig, told the newspaper that in a telephone call to Steen's wife, Virginia Rose, Polhill also said Steen had been very ill at one point early in his captivity, but recovered from the unspecified sickness.

Steen's flight was first reported by Newsweek in November 1988, but had not been independently confirmed. The kidnappers had claimed Steen was near death in 1987, but that also had not been independently confirmed.

The newspaper reported that Polhill called Rose Monday at her home in Jackson, Mich., after he arrived in West Germany, Craig Steen said.

Polhill was released to Syrian hands by the Islamic Jihad for the Liberation of Palestine, the pro-Iranian Moslem fundamentalist group that kidnapped him and the other educators from Beirut University College.

Islamic Jihad for the Liberation of Palestine took responsibility for the kidnappings and said their captives would be freed only in exchange for the release of hundreds of Arabs jailed in Israel.

BOGOTA, COLOMBIA (APRIL 25) UPI - A remote-control car bomb exploded Wednesday on a busy street in the cocaine cartel headquarters city of Medellin as members of an elite anti-drug police force passed by, killing at one police officer and eight passersby.

The bomb exploded just before 9 a.m. in a commercial area of Medellin, the city 160 miles northwest of Bogota that is headquarters of a warring cocaine cartel.

Officials said police officer Carlos Santos Marin died in the fiery explosion as a panel truck carrying the police squad passed the bomb in a car parked at the site by two men.

Seven other people also died and a girl died at a local hospital shortly after the bomb went off, Mayor Juan Gomez said.

''And the situation is such that it (the number of dead) tends to grow,'' Gomez said.

The National Police office in Medellin also confirmed one police officer and eight other people were killed. A spokesman said eight officers and 35 other people were wounded, while radio stations reported rescuers had to extract some of the wounded from the wreckage of cars and damaged buildings.

''We were going by, with the car of the Elite Forces in front of us, when we heard an explosion,'' Alexander Lopez, who was in a car with his boss, told a Bogota radio station.

''When we heard the explosion we stopped the car and we ducked and nothing

happened to us, thank God.''

Dozens of police have been killed this year in Medellin, where the Medellin cartel offered a reward of some $4,200 for each officer killed as part of its war on the nation. At least 42 police officers have been killed in April alone in Medellin.

A bomb also exploded April 11 in the nearby town of Itagui, killing 22 people, including 12 members of the Elite Force who were in a vehicle. The Elite Force was created by President Virgilio Barco to battle the cocaine cartels and other terrorist groups.

Francisco Zulaga Tobon, secretary of the Antioquia state government, said the explosion Wednesday was a ''car bomb activated by remote control at 8:50 a.m. by unidentified terrorists.''

The bombing came after the government declared an emergency in two areas where 26 people, including seven police officers, have been killed by cocaine-financed gangs in recent weeks.

The areas of Bello and La Estrella in Antioquia state were placed under military control Tuesday. Medellin is the capital of Antioquia.

A poll published by the newspaper El Tiempo showed that Liberal Party presidential candidate Cesar Gaviria Trujillo, who has taken the strongest stand of any candidate against Colombia's powerful cocaine cartels, has a huge lead in advance of the May 27 election.

The poll gave Gaviria Trujillo 60.1 percent of the vote. His nearest rival Alvaro Gomez Hurtado, son of a former president, trailed with 18.3 percent. Gomez Hurtado has proposed legalization of the cocaine trade.

In third place with 13 percent was Rodrigo Lloreda Caicedo, who has proposed a dialogue with cocaine traffickers. Lloreda Caicedo and Gomez Hurtado were members of the opposition Social Conservative Party before Gomez Hurtado formed his National Salvation Party and split the Social Conservative vote.

Gaviria Trujillo has said he favors continued extradition of suspected drug traffickers to the United States and opposes any negotiations with the cartels.

He campaigns in the name of Sen. Luis Carlos Galan, who was assassinated Aug. 18 of last year by a cocaine hit squad. The killing strengthened a government crackdown and led to a bloody war with the cartels.

A fourth candidate, former M-19 leftist guerrilla leader Carlos Pizarro, had the support of 4.3 percent of the electorate, according to the poll,

while the rest of the vote was divided between other candidates.

The poll of 1,835 people of voting age was taken between April 12 and April 19. The percentage of possible error was not published.

Police also reported that Diego Salazar Uribe, director of health for the state-owned oil company Ecopetrol, was killed Tuesday during an apparent kidnapping attempt. The slaying took place in the city Barrancabermeja in the state of Santander, 175 miles north of Bogota.

In the capital, police also reported the kidnapping Tuesday of Armando Barberi Abadia, president of a chemical company, by men who falsely identified themselves as agents of the secret police.

MOSCOW (APRIL 25) UPI - A Baptist congregation in Byelorussia, heeding the biblical admonition to beat swords into plowshares, tore down an army barracks and is using the bricks to build a badly needed church.

Alexander Firisyuk, secretary of the Union of Evangelical Christian Baptists, said Wednesday that the congregation in the city of Kobrin, near the Polish border about 600 miles southwest of Moscow, has been without a proper church for many years.

''In a city of 20,000 people, there were two Russian Orthodox churches, one Catholic church and a very old, dilapidated building used as a Baptist prayer house by a congregation of more than 500,'' Firisyuk told United Press International.

As open religious activity became more acceptable in the officially atheist Soviet Union under President Mikhail Gorbachev's reforms, the need for a church became greater and demands for permission to build one more insistent.

''For many years on end, the believers have been trying to get permission for building a new church,'' Firisyuk said. ''At last they got permission, but could not build because construction materials are in a very short supply.''

Fortunately for the congregation, Gorbachev's reforms also led to cutbacks in the Soviet military.

The congregation noticed that a recently disbanded military unit had left an empty barracks behind ''made of very durable material,'' Firisyk said.

Local authorities said they would sell the used bricks to the church for a

nominal amount if the congregation arranged for the demolition.

Firisyuk, who traveled to Kobrin to participate in the project, said most of the work was done by church members, with some help from a few professional builders.

''All those wishing to lend a hand take part,'' he said.

The barracks is now down and work on the new church has begun. The congregation hopes to have it finished by winter.

The pastor, identified only as the Rev. Trubchik, told the Baptist newspaper Khristianskoye Slovo, or Christian Word, that the bricks were an answer to prayers.

''Thank God there is disarmament,'' Trubchik said. ''Now churches are being built from materials which were previously used for war purposes.''

(APRIL 25) UPI - Violence in the form of a car-bombing struck Colombia today, once again in Medellin- the headquarters of the nation's leading cocaine cartel. Officials say at least five people were killed in the

explosion, which came as a vehicle carrying members of an elite police squad passed. News reports say others were injured in the blast, which destroyed cars and caused significant damage.

Patients and military personnel at a Wiesbaden, West Germany, hospital cheered as freed U-S hostage Robert Polhill appeared on a hospital balcony. Pohill smiled and waved, then gave the V-for-victory sign. Polhill did NOT speak, but his son Brian told the crowd- ''You make him feel realy wonderful and thanks.'' Polhill is undergoing medical tests and a debriefing after 39 months in the hands of a pro-Iranian group in Lebanon.

WASHINGTON (APRIL 25) UPI - President Bush underwent an extensive one-hour examination Wednesday to confirm a previous diagnosis of early glaucoma in his left eye, but he insisted that ''it's OK.''

Wearing dark glasses when he stepped off the helicopter on the south lawn of the White House following the short trip from Bethesda Naval Hospital, Bush told reporters his eyes were dilated during his checkup.

Two out of town experts, Drs. Harry Quigley of Johns Hopkins and Richard Brubaker of Mayo Clinic conducted the checkup to confirm the early glaucoma first detected when the president underwent his annual physical examination April 12.

Asked about the eye exam, Bush put a thumb up and said: ''It's OK. It's dilated.''

The 65-year-old president, wearing a dark blue suit, headed back to the Oval Office on his return to the White House to resume a busy day of appointments, including two events spotlighting National Volunteer Week.

The examination also was conducted to re-evaluate a treatment regimen of twice-a-day eye drops.

''I wish to re-emphasize that there are no problems with the president's

vision,'' White House physician Burton Lee said in a statement read by presidential spokesman Marlin Fitzwater. ''His vision remains excellent, but I feel that it is prudent to have outside experts assess the treatment strategy.''

During a brief visit to a local food bank warehouse, Bush told reporters he had no problems with his eyes and was ''just trying to find out a little bit more'' about the glaucoma by undergoing the additional tests.

Lee pronounced Bush to be ''in truly excellent health'' after an April 12 routine physical examination at Bethesda Naval Hospital, despite the discovery of early glaucoma of the left eye.

Glaucoma is characterized by abnormally high fluid pressure within the eye. If uncorrected, it can impair peripheral vision. In Bush's case, however, the White House said extensive testing ''revealed no loss of any aspect of his visual acuity.''

Since the physical, Bush has taken Betagan eye drops, a common form of treatment, every 12 hours. The medication is to continue permanently.

Fitzwater said Lee indicated at the time of the original diagnosis that he would want it confirmed by experts.

''It's been the doctor's intention all along,'' he added.

#90115u2129 04/25/1990 ~United Press International

GREENBELT, MD (APRIL 25) UPI - NASA engineers began a painstaking eight-month chore Wednesday of fine-tuning the Hubble Space Telescope to ensure the high-tech orbiting outpost is focused, aimed and aligned properly to peer into space.

''We have to crawl before we walk, walk before we run,'' said NASA scientist Albert Boggess. ''It's a very complicated process.''

The work began after the railroad-car sized telescope was placed safely into orbit 380 miles above Earth's surface by the crew of the shuttle Discovery, which blasted off Tuesday from Kennedy Space Center in Florida.

After extending the telescope's two main communications antennas, technicians overcame technical problems to finally coax open the telescope's balky 40-foot-long wing-like solar panels to collect power for the craft.

The astronauts then released the 24,322-pound telescope, setting the stage for opening the telescope's ''aperture door,'' a hatch that opens and

closes like a camera shutter to allow the light to hit the telescope's mirror.

Technicians will also begin focusing the telescope's mirrors and activating and checking the telescope's computers and precise guidance system, which includes three sensitive sensors.

''This is a process that is very much like adjusting the sight on a rifle so that you can make sure that the rifle is actually aiming to where the crosshairs are pointed,'' Boggess said. ''In this case it's much more complicated.''

Those critical steps will be followed by about eight months of intense work that includes systematically calibrating the telescope's two cameras, two light-splitting spectrographs and a high-tech light meter called a photometer.

Scientists at NASA's Marshall Space Flight Center in Huntsville, Ala., relay computer commands through the agency's Goddard Space Flight Center in Greenbelt to conduct the extensive testing.

''The precision steps of Hubble Space Telescope verification could be compared to those required for cutting a fine diamond,'' a NASA information sheet says. ''Each step is important. Each must be completed correctly. Rushing or skipping a step could be disastrous. But in the end the finished product is one of incalculable value.''

The first phase includes checking the system that propels the telescope - 23-inch wheels on either side that spin in opposite directions in a gyro effect that moves the telescope about the speed of a clock's minute hand.

Scientists will complete a series of trial runs with the telescope's various instruments, pointing them at targets and checking the accuracy of what they receive, he said.

''As in any kind of endeavor of this sort, the proof of the pudding is in the eating. We want to ... try it out in conducting some scientific research to make sure the results make sense to us (and) give us confidence that what we have done is correct and are ready to go on to the next stage,'' Boggess said.

One test will entail aiming one of the telescope's cameras to check to see if an image it produces of two stars matches what technicians earlier determined they should receive.

''I can tell you we will be dancing in the aisles if that's the case,'' said Peter Jakobsen, a project scientist from the European Space Agency.

#90115u2189 04/25/1990 ~United Press International
JERUSALEM (APRIL 25) UPI - Czechoslovak President Vaclav Havel, the highest-ranking Eastern European leader to visit Israel, arrived Wednesday and expressed hope for friendly ties between the two nations in the wake of renewed diplomatic relations.

After a welcoming ceremony, Havel immediately began talks with Israeli

leaders that focused on the Arab-Israeli conflict and Soviet immigration. Havel has offered in recent interviews to play a role in the Middle East peace process.

''He said he had a great interest in this conflict,'' Prime Minister Yitzhak Shamir said after his meeting with Havel. ''He would like to help, but he knows it is complicated and (we) did not discuss any specific steps that could be taken by Czechoslovakia.''

During the welcoming ceremony at the Rose Garden outside the Parliament, the dissident playwright turned Czechoslovak leader said Jews had been an important part of his country's culture for many centuries.

Referring to the Holy Land visit of a Czechoslovak president in 1927, Havel said, ''The relations of President (Tomas) Mazerik to the Jewish people were warm and good and we want to continue this tradition.''

President Chaim Herzog said Havel's three-day visit marked ''a new page in the relations between our two countries and our peoples.''

During a luncheon with his Israeli counterpart, Havel offered his help in mediating in the Arab-Israeli conflict, Army Radio reported.

Later, Havel met separately with Shamir and Labor leader Shimon Peres. Shamir told Israel Radio they had discussed ways to help with the immigration of Soviet Jews to Israel as well as the Arab-Israeli conflict.

Shamir said the Czechoslovak leader told him about his meetings earlier this month with PLO leader Yasser Arafat.

''He gave his own impressions'' of the Middle East conflict, Peres told Israel Radio. ''He was very much interested to hear my impression, what is the solution, what is the situation, what are the problems.''

Relations between Israel and Czechoslovakia were re-established Feb. 9, during a visit to Prague by Foreign Minister Moshe Arens. The Soviet Union and East bloc nations broke ties with Israel after the 1967 Israeli-Arab war.

Havel's state visit, the highest by a Eastern European leader, has been greeted enthusiastically by Israeli officials as a major diplomatic achievement amid continuing international criticism about Israeli policies in Jerusalem and the occupied territories.

A military honor guard and band as well as government officials and religious leaders were on hand to greet the Czechoslovak president. Havel appeared relaxed during the ceremony although somewhat unfamiliar with the protocol of reviewing the honor guard.

In interviews published Wednesday in Israeli newspapers, Havel said the new Czechoslovak leadership is based on the struggle for human rights and freedom.

''I'm not an expert on the Israeli-Palestinian conflict, but in the framework of my very limited abilities I would like to do anything possible in order to help forward the peace,'' he told the daily Yediot Aharonot.

While Czechoslovakia supported the establishment of the state of Israel in 1948, the Czechoslovak communist leadership also was a major supporter of the Palestinian cause in later years.

In a meeting with Palestine Liberation Organization chairman Yasser Arafat in Prague earlier this month, Havel told him Czechoslovakia wanted to continue humanitarian assistance to Palestinians and emphasized the significance of its relations with Arab countries.

''We do not want therefore to be either an uncritical ally of any of the parties involved in the conflict or an impartial observer of the continuing wrongdoings in this part of the world,'' Havel was quoted by Czechoslovak news agency CTK. ''We want to pursue a balanced policy in the relation to all sides involved in the conflict.''

In addition to improving Israel's diplomatic situation, Israeli officials hope Havel's visit will lead to increased commercial and scientific ventures. Trade between the two countries was $13 million in 1989.

Israel also hopes Prague will eventually serve as a transit point for Soviet Jews immigrating to Israel. Czechoslovak officials have said present security is not sufficient to ensure the safety of the emigrants.

WASHINGTON (APRIL 25) UPI - The United States has donated 155,000 metric tons of corn and 155,000 tons of sorghum to Jordan for use in programs to encourage development in the nation, it was announced Tuesday.

The grain will be sold by the Jordanian government to local feed millers and farmers for use as livestock feed. Proceeds from the sale will be used to assist humanitarian and developmental activities, primarily in the agricultural sector, the Agriculture Department said.

An official said it was the second time sorghum has been donated. He said the donation could help develop a market for U.S. sorghum.

The donation was made under a provision of a 1949 law that allows donation of surplus commodities to needy people overseas.

There are 39.4 bushels of corn and sorghum in a metric ton of 2,204.6 pounds, so the donations amount to 6.1 million bushels of corn and sorghum apiece.

ATLANTA (APRIL 25) UPI - A recently released mental hospital patient who opened fire in a crowded suburban mall was back in a state institution Wednesday after jailers determined they could not care for him properly.

DeKalb County jail officials transported the 31-year-old gunman to Central State Hospital, a mental institution in Milledgeville, Ga. He was charged with killing one person and wounding five others in a food court at the Perimeter Mall Tuesday.

Police identified the man as Reginald Moreman of Anniston, Ala., but he also carried papers identifying him as James Calvin Brady, 31, of Atlanta.

''The very nature of what he did would indicate there's a problem with his mental capacity,'' said jail Capt. William Bishop. ''He needed the kind of help he can't get here.''

Bishop said he eventually expects to see the man back at the jail.

''At some time he is going to have to answer for the crime,'' Bishop said.

DeKalb County Police spokesman Tom Brown said documents found on the gunman, who calmly surrendered outside the mall, indicated he had been released Monday from Georgia Regional Hospital, a mental institution where he had been diagnosed as homicidal and suicidal.

The hospital, citing patient confidentiality, declined comment.

Barbara Morgan, press secretary for the Department of Human Resources, said departmentinvestigators were cooperating fully with police investigating the shooting. However, she said investigators had not decided to investigate whether Georgia Regional Hospital was proper in releasing the suspect from their custody Monday.

''It's a little too soon for that to occur. We're doing fact finding now '' Morgan said.

Police spokeswoman Susan Medlock said the suspect bought his gun at Avondale Pawn Shop in Decatur, Ga., after he was released from jail. There is no waiting period to buy a handgun in Georgia.

Relatives said the man who now goes by the name Brady grew up in Anniston, Ala., as Reginald Spencer, the name of his father by a common-law marriage.

Spencer was one of 10 children in a poor family. His mother died of kidney disease when he was six, and he and five brothers were taken in by other family members.

He left Anniston at the age of 15 or 16. Relatives said he lived in California for several years, and last visited Anniston for four or five days around Thanksgiving last fall. Anniston police said they have no record of any criminal activity by Spencer growing up or during his visits to the east Alabama city.

Authorities said the gunman, dressed in a gray suit and carrying a briefcase, entered the food court in Perimeter Mall in Atlanta's affluent northern suburbs shortly after noon Tuesday, drew a .38-caliber revolver and began firing at random.

One of the victims of the shooting rampage, 24-year-old Michael Gregory Musick of Norcross, Ga., died at Northside Hospital of a chest wound.

Three other people wounded in the attack were hospitalized in serious to critical condition, but were all expected to survive. A fourth victim, a Federal Express employee, was treated and released for a leg wound.

#90115u2312 04/25/1990 ~United Press International

LOS ANGELES (APRIL 25) UPI - Playboy magazine's first black playmate of the year, whose ''coming out'' party will be a luncheon Thursday at Hugh Hefner's mansion, couldn't get a date until her senior year in high school.

''If I ever felt any discrimination (growing up), that was it: No one would ask me out,'' Renee Tenison, 21, said in an interview.

Tenison and her twin sister, Rosie, grew up in Melba, Idaho, population 300, to racially mixed parents and were the only black kids in town.

''Actually, we really didn't know we were black, or we didn't notice. It wasn't like we were treated any differently except we were never asked out on any dates, and I'm sure being black had a lot to do with that,'' she said.

While she was in high school, her family moved to the nearby town of Nampa where ''people were a lot more open'' and she had her first date.

''It was in my senior year,'' she said. ''When we went to Nampa people thought we were neat because they had never seen us before. We were twins. We were different. We were exotic.''

Tenison is the latest in a series of women named playmate of the year as much for the social or political statement they make as for their looks, although Playboy denies the link.

The naming of Kathy Shower in 1986 was apparently aimed at the maturing baby boom generation. Shower was 33 at the time and had two children.

In 1987, a year of anti-pornography activism among Southern Christians that prompted the Southland Corp. to pull Playboy from the shelves of its 7-Eleven stores, the magazine named a North Carolina woman, Donna Edmundson, as playmate of the year.

And in 1988 the magazine named India Allen, who claimed American Indian heritage.

The cycle was broken in 1989 with the selection of Kimberley Conrad as playmate of the year. Conrad weeks later married Playboy patriarch Hugh Hefner and this year gave birth to a son.

Playboy spokesman Bill Farley said Tenison's race was ''a factor'' in her selection, ''but ultimately it is a business decision. We're not out to make a political statement,'' he said.

Tenison, who lives with her fiance in Boise, dropped out of Boise State University when she was selected as the November 1989 playmate of the month. But she said she plans to return to school to study fashion design or, with her newly gained notoriety, acting.

''I would like to be a role model for black women,'' she said. ''Coming from a small town and everything, if I can do it anyone can do it. I took the initiative and sent the (audition) pictures in to Playboy.''

Her message to black women, she said, is ''you can do anything you want to do in life - If I can make it out of Melba, Idaho.''

Tenison, whose father is black and mother is white, identifies ''with the black side because people see me as black.

''I grew up 'as white' and my best friends are all white,'' Tenison said, ''but I can talk with someone who is black and relate to what they are talking about.''

Tenison said her decision to pose nude in a men's magazine prompted supportive letters from around the world - ''a lot of them from black guys who appreciate seeing a black woman in Playboy'' - but created some tension with her twin sister.

Rosie, she said, did not want to send in an audition photo and later felt left out when she saw the attention her sister was getting.

''I've always been more outgoing, and she's always been kind of shy,'' Renee Tenison said, ''although pysically it's really hard to tell us apart.

''Now she wishes she would have sent her picture in ..., but i'm sure something will come her way with the twin aspect.'' She noted that Playboy is considering featuring them both in a future edition.

''We're a lot closer now than when it came out. There was a lot of tension the, but we talked it through.''

Tenison is engaged and plans to marry ''in two years.'' She and her fiance she said, plan to continue living in Idaho.

''I really don't like L.A. enough to move out here,'' she said. ''It's a lot faster than where I'm from. I'm not used to it, so I think I'd much rather live in Idaho and maybe come up and work and go back and come up and work and go back.''

''I would like to do some acting, but I would want to wait until I felt I had something to offer because I haven't had much schooling in it,'' she said. ''I don't want to go knocking on the acting door and expect someone to give me a shot until I feel comfortable as an actress. That means going to school.''

#90115u2327 04/25/1990 ~United Press International

NEW YORK (APRIL 25) UPI - The stock market broke a string of five straight declines Wednesday in light trading as stability in Treasury bonds bolstered prices.

The Dow Jones industrial average, which fell 12.17 Tuesday, rose 11.94 to close at 2666.44. The Dow last posted a gain April 17.

Among broader market gauges, the New York Stock Exchange composite index rose 0.84 to 182.35 and Standard & Poor's 500-stock index rose 1.67 to 332.03. The price of an average share rose 16 cents.

Advances led declines 772-659 among the 1,958 issues crossing the NYSE tape. Big Board volume totaled 133,480,000 shares, versus 137,360,000 shares traded Tuesday.

Gains in the bond market bolstered stocks most of the day. Even in late trading, when Treasury notes and bonds showed declines of 1/8 to 1/4 point stocks held their ground. A similar fade in the bond market Tuesday afternoon had dragged stocks down.

But analysts said they did not expect equities to stage a sustained rally because of continuing concerns about interest rates. Even amid the gains, analysts were troubled by some features of Wednesday's trading.

"Breadth (the ratio of advances to declines) is still not good and volume is not heavy," said Edward Nicoski, chief technical analyst at Piper, Jaffray & Hopwood in Minneapolis.

Other analysts said the bounce back in stocks was merely a reflex action after five sessions of declines. "I don't think it was bonds so much as that we've just gone down too many days in a row and were due for a bounce " said Sidney Dorr, vice president oes Schwab & Co. in San Francisco. "It was certainly a lackluster day. I think there's nothing more to it than that it's tired of going down."

On the trading floor, Norton was the most active issue, catapulting 13 1/2 to 88 3/4 after agreeing to be acquired by Saint-Gobain for $90 a share. Chase Manhattan followed, off 1/8 to 26 5/8. Harcourt Brace was third, unchanged at four.

Among the other blue chips, AT&T was up 1/4 to 40, IBM rose 1/2 to 109 3/8, and Sears was up 1/2 to 35 7/8 after falling Tuesday on news that first-quarter earnings dropped more than 50 percent. Merck rose 3/8 to 72 5/8.

USX surged 1 1/4 to 34 after investor Carl Icahn said his affiliates intend to purchase $800 million more in USX securities if the proposed separation of the company's energy and steel businesses is approved by stockholders. Icahn was quoted as saying he was "definitely a buyer of USX stock up to $48 a share" if the spinoff is approved.

Elsewhere, Network Equipment Technologies collapsed, losing 6 7/8 to 9 1/4 after reporting fourth-quarter earnings plummeted and saying it would have to restate its results, which would have the effect of cutting second- and third-quarter revenues and net income.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 165,993,530 shares, compared with 169,114,540 shares traded in the previous session.

Prices closed higher in active trading on the American Stock Exchange. The Amex Market Value index rose 0.63 to close at 344.53. The price of an average share added two cents. Advances led declines 277-244 among the 792 issues traded. Composite volume totaled 19,156,400 shares, compared with 14,471,230 traded Tuesday. Hillhaven led the Amex issues, down 3/16 to 15/16.

The National Association of Securities Dealers composite index closed up 1.37 to 420.56.

(APRIL 25) UPI - Solar wings on the Hubble Space Telescope are in place and ready to power the observatory's quest to probe the secrets of the universe. The telescope's release into space initially was scheduled to occur during the space shuttle Discovery's 19th orbit... but it is NOT immediately clear if the astronauts will be able to meet that target. Preparations are behind schedule due to problems confirming that the booms carrying the solar arrays were locked firmly into position.

President Bush says he feels NO need to defend himself against criticism

today by Lithuanian officials angry that he is NOT moving in defense of the Baltic republic. Bush says his policies have the support of- quote- ''the American people and that's who I work for.'' Earlier, Lithuania's president compared Bush's cautious policy to the West's efforts to appease Hilter.

Officials in Colombia say at least nine people were killed when a remote-control car bomb exploded today on a busy street in Medellin . One policeman and eight passers-by were killed in the blast in a commercial area of the city northwest of Bogota that serves as headquarters of the Medellin cocaine cartel. The mayor of the city says at least 20 people were wounded in the blast, which wrecked cars and damaged buildings.

#90115u2349 04/25/1990 ~United Press International

ANCHORAGE, AK (APRIL 25) UPI - The National Park Service said Wednesday that it opposes Exxon's favored method of cleaning up its spilled oil and will not permit the oil giant to spray a chemical fertilizer on polluted park shores.

Environmentalists, fishermen, local communities, and the state of Alaska also have reservations about Exxon's proposed use of the chemical agent touted as speeding up natural biodegradation of oil, but the park service has vetoed the disputed Exxon cleanup method on its lands.

"We were unconvinced that the benefits outweighed the costs, the toxicity " said park service spokesman John Quinley. He said Exxon proposes to use a chemical that could be deadly to renewal of tiny life-forms on oiled shores.

Exxon wants to spray Inipol, a chemical fertilizer, on oiled beaches to stimulate growth of micro-organisms that eat hydrocarbons, thus speeding up an otherwise slow process of natural biodegradation of oil - a process called bioremediation.

"Exxon puts a lot of faith in bioremediation," Quinley said. "We're not convinced. We want to see test results. We're not willing to use park beaches to experiment. We're obligated to look at the best interests of the parks." Oil lingers on shores of Kenai Fjords National Park, Katmai National Park and Aniakchak National Preserve.

The National Park Service supports the concept of bioremediation but doubts Inipol can enhance biodegradation of oily mousse patches, subsurface oil and crude that has hardened into asphalt, Dan Hamson, park service spill coordinator, said in a memo.

The Exxon Valdez ran aground March 24, 1989, spilling nearly 11 million gallons of oil into Prince William Sound and the Gulf of Alaska. The spill coated state and federal shorelands with crude oil.

After scouring beaches last year with pressurized hot water, Exxon cleanup crews sprayed Inipol on some beaches in an attempt to speed degradation of oil not removed by cleaning.

Exxon resumes cleanup next month and proposed widespread use of bioremediation except in fish spawning streams, tidal pools and other sensitive habitats. Exxon said that despite mild toxic qualities, Inipol can be used in recreational areas and on shores used by birds and mammals.

Of 251 shoreline segments surveyed so far this spring that require more cleanup, 160 have been recommended for bioremediation. Other cleanup methods recommended include tilling, excavation and manual pickup of tar, asphalt and oily debris.

Two Environmental Protection Agency scientists told a state-sponsored workshop Tuesday in Anchorage that lab tests show bioremediation appears to help biodegrade oil without poisoning the environment.

One of the EPA scientists, John Baker, said Inipol's mild toxicity dissipates quickly and should pose no additional environmental threat. But John Glaser, the other EPA scientist, noted only 20 percent of the field data is in.

While Exxon scientists sang the praises of bioremediation, a roomful of environmentalists, fishermen, and state and local government officials challenged Exxon and the EPA to prove that Inipol was safe, that benefits outweighed risks and that applying it improved the oiled environment.

"I'm still waiting to see unequivocal evidence that bioremediation is useful in removing the oil," said Marshal Kendziorek, a scientist with the state Department of Environmental Conservation. State officials are most skeptical about bioremediation working on subsurface oil, the toughest problem in the cleanup.

Riki Ott, a marine toxicologist and president of an organization of fishermen and environmentalists, the Oil Reform Alliance, was more blunt, telling Exxon scientists, "You have zero credibility."

Ott accused Exxon and EPA of pressuring Alaska into permitting the use of Inipol on state shores before scientific studies prove it is effective in eating away at oil and that it is harmless to animals.

"We are against widespread use of Inipol and support the state's cautious approach," she said. "We feel this technique is being shoved down our throats."

WASHINGTON (APRIL 25) UPI - The House unanimously passed a bill Wednesday that would permit the closing of banks or other financial institutions that allow illicit drug money to be laundered through their accounts.

The bill, passed on a 406-0 vote and sent to the Senate, ''contains a death penalty provision for financial institutions that launder money,'' said Rep. Frank Annunzio, D-Ill.

The bill would require federal regulators to consider revoking a bank's federal charter, terminating its federal deposit insurance, or appointing a conservator if the bank and two or more of its top managers are convicted of money laundering.

Annunzio, chairman of the House Banking subcommittee on financial instutions, said fines now imposed on banks are not sufficient to discourage them from laundering drug money. ''The big profits turn the fines into, simply, a very small cost of doing business,'' he told the House.

''We must stop money-laundering. The profits of the drug business are used to buy more drugs, to pay for hired killers and to corrupt public officials,'' Annunzio said. He said estimates of the U.S. drug trade range up to $150 billion annually.

The bill would further tighten the screws on money laundering activities that pass millions of dollars of profits from illegal drug sales through legitimate banks and businesses to hide the money from law enforcement agencies.

Last week, federal prosecutors ordered 173 banks in 22 states to turn over financial records on accounts suspected of receiving nearly $400 million in Colombian drug profits.

In a separate move the United States announced Thursday an agreement with several other major industrialized nations to permit greater access to secret bank accounts for law enforcement agencies.

In addition to allowing for the takeover or closure of a bank, the bill would authorize the Treasury Department to assist state investigations of money laundering by releasing federal reports on cash transactions.

The bill urges states to develop uniform regulation of cash transmittal businesses that often are used in money laundering schemes, and requires the Treasury Department to issue regulations concerning recordkeeping of international wire transfers of funds.

#90115u2369 04/25/1990 ~United Press International
BOSTON (APRIL 25) UPI - An equal proportion of black and white women appear to use illegal drugs during pregnancy, but doctors are far more likely to report drug use among black patients to health and law enforcement authorities, researchers said Wednesday.

A study of pregnant women in Florida found that drug use among the women was common, with no significant differences in prevalence based on race or socioeconomic standing, said Harvey Landress, deputy director of a drug abuse program in St. Petersburg.

But while the black women were no more likely to use drugs than whites, doctors reported evidence of drug use in black mothers to authorities at a rate 10 times that for white mothers.

Landress said the results of the study, which appeared in The New England Journal of Medicine, have broad implications for states that are considering enacting laws similar to one in Florida, which requires doctors to report positive drug test results in pregnant women and those who have just given birth.

The Florida law leaves drug-addicted mothers open to criminal prosecution and can trigger a process that results in the state taking an infant away from its mother, said Landress, co-author of the research.

Landress said he was surprised by the degree to which the mandatory reporting process led to apparent racial inequities, but not surprised by the fact that drug use was substantial among both poor women who were treated at public clinics and middle-class women seen by private practitioners.

''Those of us who work in the field know that substance abuse is very democratic. It shows no preferences according to race or economic status '' he said.

Landress said the study was conducted in two parts. During the first half of 1989, he and colleagues collected urine samples from 380 women who received prenatal care at one of five public clinics in Pinellas County and from 312 women who visited private practitioners in the county.

Pinellas County, where St. Petersburg and Clearwater are located, is Florida's most densely populated and developed county, with a minority population of 9 percent.

Fifty-three percent of the women who went to the public clinics had annual incomes below $12,000 and 44 percent were black. In contrast, nearly 80 percent of those who went to private obstetricians had incomes above

$12,000 and 90 percent were white.

Landress said urine analyses showed that 13 percent of the women had used illegal drugs, with a comparable proportion of drug use between public and private patients and between blacks and whites.

He said the only thing notably different was that black women were more likely to use cocaine and white women tended to prefer marijuana.

Nevertheless, when the researchers completed the second part of their study, they found that doctors in Pinellas County reported drug use in new black mothers at a rate far higher than in whites.

The study found that only 48 of 4,290 white women - 1 percent - who delivered babies at hospitals in the county from January through June, 1989, were reported to health officials for evidence of drug abuse. But among black women, the figure was 85 of 793, or 10.7 percent.

Landress and his colleagues said they could only speculate about the reasons for the disparity. Because testing for drugs is left to the discretion of doctors, they said it could be that black infants showed more evidence of pre-natal drug exposure or that their mothers had more signs of drug-related behavior.

But they said it also is possible that private practitioners who treat middle-class women are much more reluctant to test them for drugs, either for fear of losing them as patients or because they are part of the same social network.

If that is true, ''it would seem this is more of an economic than a racial issue,'' Landress said.

Karen Howze, a spokeswoman for the Pinellas County Juvenile Welfare Board, which funded the study, said the results point up the problems state and local agencies face in ''trying to protect a child, but at the same time, protecting a mother's rights.''

She said the research makes it obvious that ''there are no clear delineations that can be drawn about drug abuse along stereotypical lines like socioeconomics and race.''

#90115u2391 04/25/1990 ~United Press International

SANTA MONICA, CA (APRIL 25) UPI - Elizabeth Taylor, battling a case of pneumonia that has kept her hospitalized for more than two weeks, has improved but is not ''out of the woods yet,'' her doctors said Wednesday.

Taylor, 58, was taken off a ventilator Wednesday shortly before an update on her condition was provided by doctors at St. John's Hospital and Health Center, where the actress has been hospitalized since April 16.

''She's seriously ill and she's still in the intensive care unit. She's not out of the woods yet, but she is improving,'' said Dr. Bernard Weintraub, a pulmonary specialist.

Taylor is still receiving oxygen, but the ventilator tube that had been inserted in her throat was withdrawn, Weintraub said.

But he added that he did not know when Taylor would be moved out of the hospital's intensive care unit or sent home.

A biopsy taken Sunday revealed she is suffering from viral pneumonia.

Doctors also said they found no link between the actress's pneumonia and prescription drugs she had taken in the past.

''There is no evidence that any of her previous medication, whatever it was, has had any effect on her present illness,'' Dr. Patricia Murray said.

The Academy Award-winning actress's four children - Maria Burton-Carson, Liza Todd-Tivey and Christopher and Michael Wilding - have been with her at the hospital through the week.

Pulmonary disease specialists said Taylor's doctors took a prudent course by placing her on a ventilator. In addition, a biopsy is typically taken to dictate therapy, especially when a patient fails to respond to antibiotics, as may have been the case with Taylor.

Taylor was moved to the hospital's intensive care unit Friday, three days after being transferred to St. John's from another hospital where she had checked in April 9 with what was described as a sinus condition and fever.

At the time she was transferred, Taylor issued a statement denying rumors that she was suffering from AIDS. Taylor has been active in AIDS public education efforts and has raised millions of dollars for AIDS research.

Taylor, who has admitted a long dependence on such drugs as Demerol and Valium, as well as alcohol, has experienced other serious health problems. She has suffered from back problems that began with a fall from a horse during filming of the 1945 film ''National Velvet,'' and nearly died of pneumonia while filming in London in the early 1960s.

Moreover, Taylor's weight ballooned in the 1980s and she underwent several crash diets. She admitted herself into a drug rehabilitation program at the Betty Ford Center near Palm Springs in 1983 and in November 1988.

Local prosecutors last week declined to file charges against three of Taylor's doctors despite finding evidence that they had prescribed near-fatal doses of painkillers to the actress. The prosecutors said they found no criminal intent on the part of the doctors, and noted that they had tried to detoxify Taylor.

The violet-eyed actress, married seven times, including twice to the late actor Richard Burton, won best actress Oscars for her performances in ''Butterfield 8'' and ''Who's Afraid of Virginia Woolf?''

The last of Hollywood's golden era movie queens, Taylor surpassed such fellow child stars as Shirley Temple and Natalie Wood, becoming an international celebrity who met with crowned heads and presidents, yet had screaming fights with her husbands in public.

She has made headlines much of her life with scandals, illnesses, marriages, divorces and a luxurious lifestyle. A retinue of servants, nannies, pets and acquaintances followed Taylor from picture to picture in her heyday.

#90115u2404 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - The House opened debate Wednesday on a $1.2 trillion budget plan with its Democratic authors expressing confidence that intra-party squabbles over Pentagon spending cuts will not doom the measure.

''We're confident we can get the votes of liberals and conservatives to support this budget,'' Leon Panetta, D-Calif., House Budget Committee chairman, told reporters at a news conference before the floor debate. ''I feel confident that we can pass this budget resolution in the next few days.''

Panetta said in opening floor debate that the Democratic plan was ''a five-year transiton budget that reorders spending to reflect changes in the world'' and a reduced military threat.

''The greatest test of our nation's leadership in the 1990s will not be military but rather competing economically,'' Panetta said.

But Rep. Bill Frenzel, R-Minn., ranking Republican on the House budget panel, said the Democratic plan contained ''a meltdown, not a build-down'' of the military.

''The Democratic budget presents unachievable defense cuts,'' Frenzel said. ''We strongly disagree on the nature and depth of those reductions.''

He said the Democratic budget represented ''bargaining positions'' and that only a budget summit between the president and Congress would produce attainable budget goals.

The budget resolution is a non-binding spending, savings, revenue and deficit-reduction plan that guides the actions of other committees. It does not go to President Bush for his signature, but Bush can sign or veto the bills that implement the plan.

The House Budget Committee approved the Democrat-sponsored budget plan last week on a party-line vote after Panetta agreed to a last-minute $3 billion cut in defense spending to appease liberals. They told Panetta last week they would oppose his plan unless the defense number was decreased.

The move angered some conservative House Democrats who suggested they might have to oppose the budget for the fiscal year starting Oct. 1 unless Pentagon spending was increased on the House floor.

The House Democratic budget calls for spending $8 billion less in defense outlays and $24 billion less in Pentagon budget authority than Bush proposed for fiscal 1991. Outlays are funds actually spent in a given year; budget authority can be obligated in that year but spent over several years.

On Wednesday, Panetta said the Democratic budget has the support of Rep. Charles Stenholm, D-Texas, head of the House's Conservative Democratic Forum.

Stenholm's backing indicates that the roughly 40 conservative Democrats are split in their opposition to the budget plan offered by party leaders. If most of the 40 conservative Democrats joined all 176 House Republicans in opposing the Democratic budget, it could fail.

Rep. Jerry Huckaby, D-La., a conservative Democrat on the House budget panel who complained about the lower defense level approved last week, said Wednesday he would support the Democratic budget on the floor.

But Huckaby said ''most of the (conservative Democratic) members are still not with the bill.'' He predicted ''there are only three or four (conservative Democrats) who are solidly going to support the bill'' out of 40.

Rep. Barbara Boxer, D-Calif., a liberal who wanted bigger Pentagon cuts, said most liberals would support the Democratic budget because ''it's headed in the right direction'' of lower defense spending in later years.

The House put off until Thursday votes on two of the four amendments House leaders are allowing.

Votes are scheduled Tuesday on two alternative budgets - the $1.23 trillion budget Bush submitted in January that will be offered by the GOP and a budget calling for lower defense spending, new taxes and higher domestic spending proposed by the all-Democratic Congressional Black Caucus.

A final vote was set for Tuesday.

The Democratic budget reduces the deficit to $63.8 billion, just below the Gramm-Rudman balanced budget law's $64 billion fiscal 1991 deficit reduction target. And it proposes $6 billion more in domestic programs than Bush wanted.

It also calls for raising $13.9 billion in revenues - the same amount Bush proposed.

The Senate Budget Committee continued work Wednesday on its budget plan but postponed votes until Thursday.

#90115u2445 04/25/1990 ~United Press International

NEW YORK (APRIL 25) UPI - The dollar was broadly lower against the main international currencies in thin New York trading Wednesday after being jostled in cross-trading as investors moved from West German marks into Swiss francs.

Currency dealers said investors heavily sold the German mark and bought the Swiss franc after Switzerland's central bank hiked its key Lombard interest rate, an overnight interbank rate, by 1/8 percentage point.

Analyst Lisa Finstrom of Shearson Lehman Hutton said the rate hike was small but signaled Swiss readiness to see the franc move up on the mark. The Swiss National Bank previously had restrained its franc to protect export trade with West Germany and other European Community nations.

"It's less the magnitude than the timing," she said. Finstrom added that the deutsche mark also was weakened by reports that West German opposition leader Oskar Lafontaine had been stabbed at a Cologne political rally.

In late New York trading, the dollar was quoted at 1.6780 West German marks, down from 1.6980 Tuesday. Against the Japanese unit, the dollar was changing hands at 158.65 yen, off from 158.95. The U.S. currency slid to 1.4580 Swiss francs from Tuesday's 1.4870 francs.

The U.S. currency was less directly involved in the so-called cross-trading between non-dollar currencies, in which the Japanese yen also was sold off for Swiss francs. But it declined on technical side-effects. "Basically, everything was out of the cross today," said one New York trader. "Everything's being washed through the cross."

Foreign exchange manager Earl Johnson of the Harris Trust & Savings Bank in Chicago said the market also responded to reports that Japanese investors were moving from German to Swiss bonds on inflation fears.

Many economists say the July 2 monetary unification of the two Germanys could unleash inflation, eroding returns on mark-priced investments.

Other dollar rates: 5.6340 French francs, down from 5.7000; and 1,231.25 Italian lire, off from 1,244.75. The British pound moved up to $1.6415 from $1.6352.

In European trading the dollar lost after being heavily sold by an Asian bank and an East European institution, traders said. The dollar also lost ground to the Swiss franc in the European session.

"The dollar traded down a little bit on the back of very, very large orders from the banks which triggered even more selling," said George McMahon, foreign exchange manager of Kleinwort Benson in London.

The dollar ended in Frankfurt at 1.6820 deutsche marks against 1.6960 the day before. It fell in Zurich to 1.4735 Swiss francs against 1.4915.

In London, the pound strengthened to $1.6365 from $1.6345 despite its earlier weakening on disappointment with British trade figures. Dealers said the Bank of England intervened to support sterling.

The dollar fell in Paris to 5.6820 French francs against 5.6965, and also was lower in Brussels at 34.80 Belgian francs against 35.0850. Italian banks and markets closed for the Liberation Day holiday.

In Tokyo, the dollar moved up sharply on the yen as a side-effect of sales of the yen for the mark in cross-trading. The dollar closed at 159.25 yen, a 1.10-yen gain on the previous 158.10 yen.

Republic National Bank in New York closed cash gold at $370.75 an ounce, off from $376 Tuesday. The New York Commodity Exchange settled gold at $370.70 an ounce, down from $375.90. In Zurich, gold plunged to $370.50 an ounce from $376.50 Tuesday. London gold slid to $371.25 an ounce from $378.

Republic closed cash silver at $4.945 an ounce, off from $5.005. Comex spot silver slipped to $4.919 an ounce from $4.994. Zurich silver declined to $5 an ounce from $5.10. London silver fell to $4.97 an ounce from $5.10.

#90115u2450 04/25/1990 ~United Press International
(APRIL 25) UPI - Following a report that failed to show an expected decline in U.S. inventories, oil prices fell Wednesday with gasoline dropping 2 cents a gallon.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate for June delivery plunged 34 cents to $18.66 a barrel, after opening at $18.78 and trading as high as $18.85 and as low as $18.54 a barrel.

Trading volume was a light-to-moderate 70,467 contracts.

On the U.S. Gulf Coast cash market, prompt-delivery WTI was quoted at $18.65 a barrel, a loss of 5 cents.

Unleaded gasoline for May delivery plummeted 1.79 cents to 62.39 cents a gallon on the Merc, wiping out a large part of the 2.46 cent-gain scored Monday and Tuesday.

On the New York Harbor spot market, unleaded gasoline for prompt delivery skidded 2 cents to 62.50 cents a gallon.

Late Tuesday after the Merc closed, the American Petroleum Institute reported that gasoline stocks declined a scant 900,000 barrels and crude supplies rose a slight 1.2 million barrels last week.

The market had been expecting a gasoline-inventory decline of 2-3 million barrels with the advent of warm weather and increased driving.

After failing Tuesday for the second day in a row to move up through the Merc's $19.50 technical resistance level, WTI was set for a decline, said Nauman Barakat, first vice president of Shearson Lehman Hutton's International Energy Desk in New York.

''When it failed twice at that level, it was a sell signal,'' he said.

But the trader said, ''It was basically an API related market. The kind of inventory draw-downs the market was looking for were not there. As a result of that disappointment, the market sold off.''

Barakat thought Wednesday was basically a crude-driven market rather than gasoline-driven. ''It's debatable, but I would say it's crude.''

He looked for the market to remain under selling pressure until Friday when traders are expected to take profits on short positions staked out in anticipation of a decline due to next week's meeting of OPEC oil ministers.

''I think by Friday we should start seeing some short-covering. I don't think anybody wants to be short going into the meeting,'' Barakat said.

The oil ministers of the 13-nation Organization of Petroleum Exporting Countries are scheduled to meet May 2 in Geneva to adopt measures to stop the recent decline in world prices.

Crude lost 14 percent of its traded value earlier this month and ''OPEC has a tremendous incentive to come up with something of substance rather than 'smoke and mirrors,''' Barakat said.

When under such pressure in the past, ''OPEC has shown considerable dexterity,'' he said.

On the European cash market, Britain's widely traded North Sea Brent crude dropped 40 cents to $16.65 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - remained unchanged at $14.50 a barrel.

On the Merc, heating oil finished the day at 52.40 cents a gallon, down 0.25 cent, while prompt delivery heating oil in the New York spot market fell 0.35 cent to 56.15 cents a gallon.

Sun Co., Radnor, Pa.; Marathon Oil Co., the Findlay, Ohio, unit of USX Corp. and the Conoco Inc. subsidiary of Du Pont in Houston reduced the posted price they will pay for crude at the wellhead by 50 cents a barrel to $17.50 a barrel for WTI. They had raised the price $1 Monday.

WASHINGTON (APRIL 25) UPI - Frozfruit Inc. has recalled its Creamy Banana ice milk bars distributed in Pennsylvania, Illinois, Alabama and Texas because of bacterial contamination, the Food and Drug Administration said Wednesday.

There have been no reports of illness associated with the product.

FDA inspectors found Listeria monocytogenes in two production runs during a routine inspection, prompting the recall. The bacteria can cause serious illness or death. If ingested by a pregnant woman, it can cause a miscarriage, an FDA spokeswoman said.

Charles O'Brien, Frozfruit's vice president for marketing, said the banana bars were distributed to stores in the Chicago and Philadelphia areas and in Ozark, Ala., but by last Friday, stores had pulled the frozen bars from shelves and posted signs about the recall.

The bars also were sent to Texas but were never delivered to stores because of the recall, O'Brien said.

Consumers should return any of the bars to the stores where they were purchased.

The affected bars have the following codes on boxes:

-In Texas and Alabama: C934621

-In Texas, Illinois and Pennsylvania: C0040XX - XX meaning 01, 02, 03, etc.

Listeria is an airborne environmental bacteria that can come from a variety of sources, including production equipment and human handling.

The bars are made at Frozfruit's Clovis, N.M., plant. Company headquarters are in Gardena, Calif.

#90115u2504 04/25/1990 ~United Press International
MEMPHIS, TN (APRIL 25) UPI - A federal court jury reported itself ''hopelessly deadlocked'' Wednesday in the fraud trial of Rep. Harold Ford Tennessee's first black congressman, but the judge refused to declare a mistrial.

U.S. District Judge Odell Horton dismissed the jurors for the day, but ordered them to return Thursday for a third day of deliberations in the 10-week trial of Ford and three co-defendants.

''In the court's judgment, after many, many trials, it is far too early for you to report that you are hopelessly deadlocked,'' Horton told the jury. ''I wish to ask you to continue with your deliberations because there were many witnesses and many documents. It takes time.''

Ford called the jury's announcement a ''false alarm'' and predicted his acquittal on charges that he traded political influence for $1.5 million in fraudulent bank loans.

''We'll just have to wait until the jury comes back,'' Ford said. ''We are still anticipating a unanimous vote for acquittal.

Ford, 44, is charged with 19 counts of bank fraud, mail fraud and conspiracy to defraud the government. Prosecutors contend that, between 1976 and 1983, he took $1.5 million in bribes disguised as loans from banks controlled by brothers Jake and C.H. Butcher Jr.

In return, Ford, an eight-term Democrat who runs a powerful political machine in Memphis, allegedly delivered the votes of Tennessee's biggest city to Jake Butcher in the banker's unsuccessful race for governor in 1978.

Three Butcher associates - Karl Schledwitz, David Crabtree and Douglas Beaty - stood trial with Ford on charges of funneling loans to him through bogus channels.

The jurors met for seven hours over two days before sending Horton a note Wednesday saying they had reached a verdict. But in the courtroom, the jury foreman reported the panel deadlocked.

He read the five counts against Crabtree and reported the jury split 8-4 for his acquittal. Before the foreman could go on, Horton stopped him and conferred with lawyers before ordering the jury to continue deliberations.

Ford, who accuses prosecutors of going after him on racial and political

grounds, contends the loans were for his legitimate business interests.

Prosecutors said the loans to Ford actually were bribes and the congressman did not repay them until 1983 under pressure from federal regulators who were closing the Butcher banks.

The Butchers controlled a billion-dollar network of 20 banks in Tennessee and Kentucky until it collapsed because of bad loans in 1983. The Butchers are serving 20-year federal prison sentences for funneling millions of dollars in fraudulent loans to themselves. C.H. Butcher also pleaded guilty to two counts in the Ford indictment.

#90115u2520 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - Amid bickering over constitutional prerogatives, House and Senate members met Wednesday to begin working out their differences over comprehensive legislation on oil spill prevention and compensation.

In the first House-Senate deliberations in 15 years on oil spill legislation, lawmakers said there were relatively few obstacles to reaching a compromise package that could be submitted for final legislative action.

Oil spill bills from both chambers would expand safety requirements for shippers, give the president power to order cleanups and limit the liability of spillers for cleanup and compensation payments to spill victims.

The two measures also are similar in imposing a 5-cent per barrel tax on oil to finance a $1 billion trust fund to be used for emergency cleanup and compensation and costs exceeding the liability limits.

Proponents say the measures would prevent any repeat of last year's Exxon Valdez disaster in Alaska, which was worsened by a slow, confused federal

response. At the time, federal officials said they had neither the authority nor the money to act effectively.

Lawmakers appear to have resolved the major stumbling block to oil spill legislation over the past decade - the issue of whether federal law should override state laws that may be tougher on spillers.

After years of deadlock, the House bill endorses the Senate position that more stringent state laws should prevail.

However, a similar pre-emption controversy was raised by senators in their opening statements. They raised strong objections to House provisions that would carry out an international treaty setting up worldwide rules limiting the liability of spillers.

Led by Senate Democratic leader George Mitchell of Maine, senators charged the treaty is too easy on polluters and, in some limited circumstances, would override the much tougher bills passed by the House and Senate.

Mitchell said if the treaty had been in effect last year, Exxon would have been liable for only $60 million of the estimated $2 billion cleanup costs stemming from the Alaska oil spill.

The treaty, said Mitchell, ''tolerates any behavior short of criminal negligence in handling and transporting oil, pre-empts federal and state law from imposing a higher standard of care and, to a significant and unacceptable degree, transfers the costs of spills from those who are responsible to the American taxpayer.''

The senators also charged it was inappropriate for the House to act on the treaty because the Constitution gives the Senate sole authority over treaties and for years have refused to accept the oil spill treaty.

''(The treaty) is a matter for the Senate to decide,'' Sen. Ted Stevens, R-Alaska, told the House conferees. ''I hope the members of the House understand the sensitivity of the Senate to this issue.''

However, some House members were not sympathetic.

''I'm not about to be dictated to by the Senate,'' grumbled Rep. Don Young R-Alaska, who said the international treaty is needed to ensure foreign oil tankers would be held accountable for any spill in U.S. waters.

Some House members, however, agreed with the senators that the treaty was not beneficial. Rep. George Miller, D-Calif., charged Republicans and the Bush administration were pushing the treaty as a way to override state oil spill laws.

The oil industry has strongly urged Congress to override state laws, saying the patchwork of state laws leads to lengthy litigation that ill-serves both oil companies and spill victims.

#90115u2534 04/25/1990 ~United Press International

ST. LOUIS (APRIL 25) UPI - The St. Louis Sun, a tabloid, ceased publication Wednesday after 213 editions, publisher Ralph Ingersoll II said.

Ingersoll, 43, who runs the privately held Ingersoll Publications Co., launched the daily newspaper last Sept. 25.

The Sun employed about 230 people, including 80 on the editorial staff. The Sun was published from downtown St. Louis and was printed at a south St. Louis offset printing plant.

The newspaper's name plate had St. Louis Sun written in roman letters on a red background with a sun behind part of the Gateway Arch.

Tom Tallarico, 44, was the publisher. He came over from the St. Louis Post-Dispatch, where he had been senior vice president and general manager since 1986. Robert Jelenic, 38, was president

The St. Louis Sun was Ingersoll's attempt to make a mark on American journalism by being the first publisher since World War II to start up a daily newspaper and make a profit on it.

The Sun was the first attempt to start a metropolitan daily since the Wasington Times was begun with funding from the Unification Church in 1982.

Starting a metropolitan newspaper goes against a trend in recent years that has seen the closing of many dailies in cities with strong competing papers.

The St. Louis Post-Dispatch, the city's sole newspaper after the 1986 demise of the St. Louis Globe-Democrat, sells about 377,000 daily and 547,000 Sunday newspapers. Only 43 U.S. cities have competing newspapers.

Ingersoll Publications, which publishes 40 U.S. dailies and more than 150 non-dailies, is based in Princeton, N.J. It said it had revenue of more than $700 million in 1988. Circulation of its daily papers, most in medium-size and smaller cities, exceeds 1.25 million, putting it among the top 15 daily newspaper groups. It employs about 11,000 people.

The company was founded in 1957 by the late Ralph M. Ingersoll, a veteran journalist who was the former managing editor of the New Yorker. His son

took charge of the company in 1973.

#90115u2545 04/25/1990 ~United Press International

MEMPHIS, TN (APRIL 25) UPI - Reorganization of Holiday Inns Inc. following the acquisition by Bass PLC of London will result in the layoffs of 610 employees, the company said Wednesday.

Chief Executive Officer Bryan Langton announced the job reductions and reorganization, saying the company plans to strengthen and expand its position as a global hotelier.

''We have the most recognizable hotel brand in the world, and we are going to focus all our efforts on building it. This means we will discontinue all secondary or satellite businesses.''

The layoffs to be completed by May 25 will include about 330 people from Holiday's workforce of 2,000 in Memphis.

The Hotel Services Division will lay off 260 in its woodcraft, drapery, purchasing and sales and design staffs. The Holiday Clubs will lay off 20 people in Memphis and 190 sales associates across the nation, Langton said.

Another 50 administrative jobs in Memphis will be eliminated, and 80 others will be cut from Holiday Inns international business, Langton said.

The moves were prompted by findings from an organizational review under way since February, when Bass completed the $2.2 billion buyout of Holiday Inns from Holiday Corp. Other hotel brands formerly part of the Holiday Corp. were spun off into the Promus Cos. Inc., run by former Holiday Corp. executives.

Bass, a British brewery and pub owner, now owns almost 1,600 Holiday Inns with 310,000 rooms in 53 countries.

Langton said the internal review revealed opportunities to streamline operations.

''We will compete more aggressively in the United States than we have in the past while, at the same time, we will maintain our international momentum. We shall accomplish that by focusing all our efforts on building the Holiday Inn brand into an unassailable position in the global hotel industry,'' Langton said.

The hotel business in the United States, previously run as one operation, will be split between company-managed hotels and the franchise system, Langton said.

Langton said Holiday Inns' U.S. operations will continue to be run from Memphis, with other regional operations based in Brussels, Hong Kong and Toronto.

It also was announced Wednesday that Kenneth B. Hamlet, president and chief executive officer of the Holiday Inn Hotel Division, has resigned effective immediately. Hamlet will remain as a consultant for an indefinite period, Langton said.

#90115u2574 04/25/1990 ~United Press International

HOUSTON (APRIL 26) UPI - Exxon Corp. Wednesday said it planned to introduce reformulated, unleaded gasoline in more than 40 markets in 20 Gulf and East Coast states starting in June.

Exxon is the second company to offer reformulated gasoline to help reduce air pollution. Shell Oil Co. introduced a reformulated premium gasoline in 10 markets on April 11.

Exxon Corp. used its annual shareholders meeting to unveil its plans for reformulated gasoline. The company scheduled a Thursday news conference to provide more details on the reformulated gasolines.

Reformulated Exxon Supreme and Exxon Plus already are in production, a spokesman said.

Sales are expected to be about 8 million gallons per day, which is more than 50 percent of Exxon's branded gasoline sales in these markets.

The new unleaded premium and mid-grade products will be lower in volatility and specifically targeted to reduce hydrocarbon emissions in the summer when ozone problems are most severe, Exxon Corp. President Lee Raymond said.

In addition, Exxon Supreme and Exxon Plus will be formulated with oxygenates in the New York metropolitan area where carbon monoxide is an air quality problem year round, he said.

Exxon Company U.S.A. spokesmen said the new gasoline will cost about 1 cent a gallon more to produce than the existing gasoline but the new fuel will be competitively priced.

Exxon is participating in the Air Quality Improvement Program, a joint research effort sponsored by 14 oil companies and three major domestic automobile manufacturers, spokesmen said.

#90115u2578 04/25/1990 ~United Press International

WASHINGTON (APRIL 25) UPI - The Bush administration, despite its desire to abolish federally subsidized crop insurance, said Wednesday it will continue to offer coverage to farmers unless Congress decides to change the program.

The announcement was intended to allay concerns over whether insurance would be available for 1991 crops. House Agriculture Committee Chairman Kika de la Garza welcomed the statement but said the Federal Crop Insurance Corp. had only itself to blame for the confusion.

Meanwhile, Rep. Larry Combest, R-Texas, proposed a plan to salvage crop insurance. It would give farmers an additional inducement to select a high level of coverage and have standby federal payments for losses that exceed 75 percent of a crop.

President Bush has proposed termination of the crop insurance program at the end of this crop year because of high costs and low participation. The program has swallowed $5 billion in subsidies in the past decade but has not dissauded Congress from enacting special disaster programs in three of the past four years.

In a notice to insurance agents and companies, acting FCIC manager David Gabriel said crop insurance would be offered ''until such time as Congress changes the program or fails to fund it.''

''We are continuing to write direct policies for 1991 crops,'' Gabriel wrote. ''Let me reiterate it is our intention to run the congressionally mandated program until directed differently.''

Congressmen have balked at the administration proposal, which would replace crop insurance with a permanent disaster-relief program in the Agriculture Department. However, there has been no consensus on a substitute for the current program.

Without action, the current program would remain in effect, providing money is appropriated for it.

De la Garza, D-Texas, said it was his ''very strong opinion'' that FCIC had mishandled its earlier statements about its intentions for the program. He said agencies should follow the laws in force ''rather than basing program announcements on administration budget proposals.''

Combest, a member of the House Agriculture subcommittee with jurisdiction over crop insurance, said his plan would reduce the government's cost of providing crop insurance. It would increase the subsidy for farmers who

select coverage at the 75 percent level but would include a fee to farmers to help cover the cost of disaster payments.

Other proposals range from privatizing crop insurance to having the government guarantee a basic level of coverage with farmers having the option of buying additional insurance.

-30- 2838

#90115u2588 04/25/1990 ~United Press International

(APRIL 25) UPI - Nicaraguan President-elect Violeta Chamorro is preparing to take office today, two months after her stunning defeat of Sandinista President Daniel Ortega is urging the United States to- quote- ''leave Nicaraguans to solve their own problems.''

Vice President Quayle is in Managua for Chamorro's inauguration. The vice president, his wife, Marilyn, and other members of a U-S delegation arrived in the Central American country bearing cases of cooking oil and flour. Quayle said the gifts were to help ease Nicaragua's ''Herculean economic problems.''

President Bush is urging Congress to pass constitutional amendments requiring a balanced budget and give the president so-called ''line-item'' veto power. This would permit the president to veto individual spending items rather than the entire measure. Bush says he needs the power to ''make tough decisions'' regarding federal spending.

Lithuanian leaders are reacting bitterly to President Bush's decision NOT to impose immediate sanctions against Moscow. Lithuanian President Vytautas Landsbergis said the republic was afraid the United States would- quote- ''sell us out.'' In his words- ''Let the people themselves decide whether this already has happened.''

-30- 1409

#90115u2603 04/25/1990 ~United Press International

NEW YORK (APRIL 25) UPI - A second jailhouse informant testified Wednesday that the accused triggerman in the Bensonhurst racial slaying boasted he ''popped'' a black teenager who came into the predominantly white neighborhood.

Robert Russo, a convicted con artist, also testified that accused triggerman Joseph Fama expected he would get out on bail and bragged he would ''go home to my window and pop them all.''

Fama is charged with second-degree murder in the slaying of Yusuf Hawkins, a black teen who ventured into the neighborhood to look at a used car. The fatal shooting inflamed racial tensions citywide and sparked a series of

protests, some violent.

Russo, a white Bensonhurst resident, told the jury in state Supreme Court in Brooklyn that he met Fama the first day he was in jail.

During a card game later, Russo broached the subject of Hawkins' killing.

''He said he popped him 'cause he was a nigger,'' Russo testified. ''Fama said he popped him ... Hawkins.''

Assistant District Attorney Edward Boyar asked Russo, ''What did you understand that to mean.''

''Shot,'' Russo replied.

Later, when the two were watching protests against the slaying on television, Russo said he asked Fama, ''You expect to get out on bail?''

Russo said Fama replied, ''No problem. I'll just go home to my window and pop them all.''

''He has that kind of attitude,'' Russo said of Fama.

In later testimony, one of the four blacks who was with Hawkins the night he was killed placed Fama's co-defendant, Keith Mondello, at the scene of the attack.

But Claude Stanford, 18, could not identify Fama. Stanford testified he saw the gunman, who had hair ''combed over to the side'' that was ''dark'' and that he was wearing a white t-shirt and light colored pants.

Although the description seemed to match Fama, Stanford later revealed under cross-examination that he thought the gunman stood 6 feet - much taller than Fama - and that he failed to identify Fama in a police lineup.

Mondello's lawyer, Stephen Murphy, called Stanford's testimony ''very, very favorable'' to the defense because of the inconsistencies.

The earlier testimony by Russo of Fama's jailhouse comments, which was cited by prosecutors in their opening statements, was similar to last Thursday's testimony by convicted robber Charles Brown, who said Fama bragged in jail that he had killed Hawkins.

Fama's lawyer, David DePetris, derided Russo's testimony as ''incredible.''

''I told my client not to speak to anyone in jail,'' DePetris said. ''He's obviously looking for a benefit. He's a con man and he was trying to con this jury.''

DePertis tried to suggest Russo gave his testimony to get a lighter sentence following his conviction on a scam to bilk gullible cab and limousine drivers.

But prosectuors revealed only one of a number of the alleged victims came forward to testify against him, and he was subsequently sentenced to four and a half to nine years for the scam.

Fama and Mondello, both 19, were ordered to be tried together - but before separate juries - because Mondello has allegedly implicated Fama as the gunman.

They are the first of eight young men to be tried in the case.

The prosecution in the Mondello case was expected to rest Thursday.

-30- 3532

#90115u2616 04/25/1990 ~United Press International

NEW YORK (APRIL 25) UPI - A group led by takeover specialist Carl Icahn said Wednesday it would buy $800 million in additional stock in USX Corp., offering up to $48 a share if stockholders approve a plan to split up the company's energy and steel businesses.

Icahn and his affiliates, who own about 34 million shares - or more than 13 percent of USX - contend the separation of its steel and energy businesses would raise the value of USX stock to $48 a share.

Word of Icahn's offer boosted USX stock by $1.25 to $34 a share at 3:55 p.m., when trading in USX was halted on the New York Stock Exchange.

USX is the nation's No. 1 steelmaker and Icahn is its largest single shareholder.

Icahn and the group have made the spin-off proposal to USX shareholders, who are slated to hold their annual meeting May 7 in Findlay, Ohio.

USX, which has recommended shareholders vote against the spin-off proposal said in a statement that Icahn's offer ''sounded like a ploy.''

''It seems to me that Icahn is simply trying to buy votes and distract stockholders from the serious questions that we and a number of prominent analysts have raised about his proposal to break up USX,'' said Charles A. Corry, USX chairman and chief executive officer.

Icahn said in an interview on Financial News Network that ''a positive vote would so enhance the value of the company that we would be willing to

buy $800 million worth of the stock.''

He added, ''I do believe USX today is one of the bargains in the marketplace.''

The offer is not intended as a takeover attempt, said Icahn, who owns Trans World Airlines Inc. and made an unsuccessful bid for Texaco Inc.

''We're not looking to take control of USX,'' Icahn said. ''We've simply said we think the company is very undervalued and we're not looking to sell the stock.''

Icahn said if the spin-off proposal is approved, he would be willing to enter into a standstill agreement under which he would agree not to seek control of USX or of either of its two main businesses.

He told United Press International he would be willing to make a $48-a-share bid for all of USX ''if we could do a friendly one.''

''It's our understanding the company doesn't want one,'' he said.

To fund the $800 million stock purchase, Icahn said he and his affiliates, other than TWA, would put up $400 million.

Shearson Lehman Hutton Inc., which would handle the purchase, has agreed to put up the other $400 million as a margin loan, Icahn said.

Acquisition of the additional USX stock would bring the Icahn group's holdings to almost $2 billion, he said.

If USX's businesses were split, Icahn's group estimates the energy business, which would be called Marathon Oil Co., would be worth $39 a share.

The other business, US Steel, would be valued at $9 a share, Icahn said.

''On a long-term basis, both companies will need great amounts of capital '' he said. ''It's absurd for the steel company to depend on Marathon, which needs capital itself, for capital.

''You have two great companies here,'' he said. ''They would both be better off on their own. The steel company could attract a strong partner and that's what should be done.''

If the spin-off proposal is not approved, ''I'll cross that bridge when I come to it,'' Icahn said.

USX has described the Icahn proposal as ''a simplistic approach to a

complicated issue.''

Its directors also have called the proposal ''unnecessary and unwise'' in light of the company's restructuring in the past decade.

In the 1980s, USX engaged in one of the largest corporate restructurings in history. The steelmaker acquired $10 billion in assets, primarily energy-related with its Marathon Oil Co. and Texas Oil and Gas Co. purchases, and disposed of $7 billion in assets and businesses.

At the same time, the company wrote off approximately $3.5 billion, primarily in steel.

#90115u2641 04/25/1990 ~United Press International

WASHINGTON (APRIL 26) UPI - Unit Investment Trusts, investment companies that purchase portfolios of bonds or stocks, increased their deposits through offerings in March of $561.6 million, the Investment Company Institute said Wednesday.

The year-to-date total of offerings came to $1.61 billion, compared with $3.13 billion in the first three months of 1989.

ICI, the trade association of the mutual funds industry, said that tax-free bond trusts issued shares in March with deposits of $430.2 million for a year-to-date total of $1.10 billion, compared to $2.37 billion year-to-date in 1989.

Taxable bond trusts totaled $104.7 million in March for a 1990 total of $333 million, compared with $500.3 million for the prior year to date.

Offerings in equity trusts totaled $26.8 million for $174.3 million for the year to date, compared with $261.9 million for the previous year.

There were 74 new tax-free bond trusts issuing shares in March, two new taxable bond trusts and three new equity trusts, ICI said.

In terms of maturity, long-term bond trusts with an average weighted maturity of more than 15 years were the most commonly offered in March, with $445 million in shareholder deposits.

#90115u2645 04/25/1990 ~United Press International

(APRIL 25) UPI - Authorities in Lawrenceville, Georgia, now say it was NOT a bullet that shattered the car window of a federal appeals court judge. A spokesman for the U-S Marshal's Service said initial reports of a

bullet shattering the rear window of a car driven by Judge J-L Edmondson were inaccurate.

Nine people, including one police officer, were killed today in Medellin, Colombia, when a remote-control car-bomb exploded. The bomb went off on a busy street as members of an elite anti-cocaine police force passed by in a panel truck. Police say at least 20 people were injured in the fiery explosion.

-30- 761

#90115u2653 04/25/1990 ~United Press International

(APRIL 25) UPI - It's another summer-like day in the Midwest today as southerly air continues to push tempertures well into the 80's. But the weather isn't so pleasant in other parts of the country. Tornadoes touched down in the Oklahoma and Texas panhandles early today, and it rained in the Southwest.

Major league baseball umpire Bob Engel has been given an indefinite leave of absence after being arrested last weekend and charged with shoplifting seven boxes of baseball cards. A statement from the National League said Engel was given the leave of absence ''so that he can direct his energies toward the charges that have been leveled against him.''

If you can think of a good alternative for the word ''manhole,'' you might want to contact public works officials in Sacramento, California. They are sponsoring a contest to find another word to describe the holes that lead to sewers and utilities. So far, the suggestions have NOT been very inspiring. For example- how does ''person-access chamber'' sound?

SEDALIA, Mo. (APRIL 26) UPI - Doskocil Cos. Inc. will close its meat-processing plant in Sedalia on May 4 as part of the company's reorganization, a spokesman said Wednesday.

The closing would affect 26 to 30 workers, nine of whom are salaried employees, the spokesman said.

Doskocil and subsidiaries, including Wilson Foods Corp., filed for protection from creditors March 5 in U.S. Bankruptcy Court in Topeka, Kan. The Chapter 11 filing followed news Doskocil had defaulted on a $133 million loan agreement.

Closing the Sedalia plant, formerly part of Wilson's deli and food service operation, was necessary as Doskocil tries to use its facilities in a more cost-effective manner, the company said in a statement.

Doskocil, based in Hutchinson, Kan., said it would offer the modern Sedalia facility for immediate sale.

The company also operates former Wilson plants in Kansas City and Marshall Mo. Doskocil announced its intention to sell the Marshall plant in June.

Doskocil's financial difficulties resulted from interest expense associated with its $238 million acquisition of Wilson Foods in 1988 and delays in selling Wilson's fresh and retail meats division. The division has been up for sale for more than a year.

Doskocil is a processor and marketer of specialty meats. It is a leadingsupplier of pork and beef toppings to the pizza industry.

DECATUR, Ill. (APRIL 26) UPI - Illinois Power Wednesday reported a first-quarter loss of $13.1 million, compared with a loss of $384.4 million in the first quarter of 1989.

Revenues declined to $315.8 million compared with $327.5 million a year

ago due to warm winter weather and the resulting reduction in electricity and gas use.

Illinois Power's 1989 loss included a $346 million after-tax writeoff due to Illinois Commerce Commision rate disallowances related to construction costs of the company's Clinton nuclear power plant.

Illinois Power has appealed the ICC action. It said failure of the appeal could result in additional losses estimated at up to $654 million as of Dec. 31, 1989.

It said disputed amounts still are being collected subject to refund including about $19 million collected in the first quarter.

The company suspended payment of common stock dividends effective in the third quarter of last year, citing uncertainty surrounding its ability to include remaining costs of the Clinton power station in its rate structure.

Illinois Power is requesting a $216 million rate increase to add the remaining cost of the Clinton project to its rates. The ICC is slated to rule on that request in June.

(APRIL 26) UPI - SPORTS TRANSACTIONS

BASEBALL

Cleveland - Waived shortstop Rafael Santana.

Minnesota - Optioned pitcher Mark Guthrie to Portland of the Pacific Coast League (AAA).

Montreal - Waived pitcher Joe Hesketh.

National League - Placed umpire Bob Engel on indefinite leave of absence.

NY Mets - Purchased contract of outfielder Chuck Carr from Jackson of the Texas League (AA); optioned pitcher Jeff Innis to Tidewater of the International League (AAA).

Seattle - Placed pitcher Scott Bankhead on 15-day disabled list, retroactive to April 16; recalled pitcher Gene Harris from Calgary of Pacific Coast League (AAA); released pitcher Jerry Reed; removed outfielder Mickey Brantley from 15-day disabled list and optioned him to Calgary.

BASKETBALL

Sioux Falls (CBA) - Coach Ron Ekker resigned.

COLLEGE

Florida - Swim coach Randy Reese resigned.

FOOTBALL

NFL - Named Dr. John Lombardo adviser for anabolic steroids and other performance-enhancing drugs.

NY Jets - Signed wide receiver James Moore.

TRACK AND FIELD

The Athletics Congress - Suspended long jumper Larry Myricks for three months for failing a drug test.

#90115u2911 04/25/1990 ~United Press International

PHILADELPHIA (APRIL 25) UPI - Jazz great Dexter Gordon, whose portrayal of an expatriate saxophone player in the movie ''Round Midnight'' won him an Academy Award nomination, died Wednesday in Thomas Jefferson University Hospital. He was 67.

Susan Mingus, widow of jazz great Charles Mingus, said in New York that Gordon died of kidney failure after a long bout with throat cancer.

''He died at ten of one this morning - literally round midnight,'' said Mingus, who lives in the same apartment house in New York City as did Gordon and his wife, Maxine Gregg, who was also his manager.

''His wife was with him and a couple of friends and a bevy of nurses,'' she said. ''His wife said he was surrounded by women - he was happy.''

Hospital officials would only confirm that Gordon had died.

A public memorial service was scheduled for May 6, but the location had not been set, said Don Lucoff, a spokesman for Blue Note records, adding, ''It's going to be very musical, very festive.'' He also said the time and location of the private funeral also had not been set.

Gordon, born Feb 27, 1923, in Los Angeles, was one of the foremost tenor players on the 1940s bebop jazz scene. His playing influenced Sonny Rollins And John Coltrane, who built on his probing, rhythmic style.

In late 1940, shortly after he quit high school to play in a local band, he joined Lionel Hampton's big band, playing alongside saxophonists Marshall Royal and Illinois Jacquet.

Following three years with Hampton, Gordon returned to Los Angeles, spending brief periods with Fletcher Henderson, Nat King Cole and Louis Armstrong. In 1944, he left Armstrong's traditional band to join the bebop big band of Billy Eckstine.

In 1946, he began working in a combo on New York's 52nd Street with Charlie Parker, Miles Davis, Bud Powell and Max Roach, and recorded with Dizzy Gillespie. At the same time, he also began fronting his own group in recordings for the Savoy label.

Gordon's career ebbed in the 1950s because of the rise of cool jazz and his two-year imprisonment in California on drug charges. He came back in the 1960s through his collaboration on the Jack Gelber play, ''The Connection,'' and a series of five recordings for the Blue Note label.

In 1964, dissatisfied with the social climate and music scene in the United States, he moved to Paris, then Copenhagen, remaining an expatriate for 12 years.

Beginning in 1976, he split his residency between New York and Paris, recording and performing well into the 1980s.

In 1986, the tall, gangly Gordon won an Oscar nomination in the Best Actor category for his portrayal in ''Round Midnight'' of an American jazz musician living in Paris in the 1950s.

The Bertrand Tavernier film, loosely based on the lives of Lester Young and Bud Powell, was in fact also the story of Gordon himself.

Gordon's recordings included ''Long Tall Dexter'' (Savoy), ''Dexter Gordon'' (Blue Note), and ''Dexter Gordon at Montreux with Junior Mance'' (Prestige).

#90115u2922 04/25/1990 ~United Press International

MOSCOW (APRIL 25) UPI - The younger half of the oldest couple in the Soviet Union has died at the age of 121, leaving behind her bereaved husband of the past 103 years, the official Tass news agency said Wednesday.

Khatyn Djafarova had more than 200 descendants, Tass said. The report did not specify the date of the woman's death.

Djafarova, who was known as ''Grandma Khatyn'' in the Azerbaijani village of Yanshake where she lived, is survived by her 124-year-old husband.

''Her husband, Ilias, is alive and well, although he is three years older than his wife,'' Tass said.

''Khatyn's death was a terrible blow to the man, who was the area's best hunter for years but grew much weaker during his wife's terminal illness.''

The couple, who earned Djafarova the state honorary title of ''Heroine Mother'' by having 10 children, had been married for 103 years, Tass said.

#90115u2925 04/25/1990 ~United Press International

(APRIL 25) UPI - Tornadoes blasted through parts of Oklahoma and Texas Wednesday, causing moderate damage, while parts of northern Michigan sweltered through their hottest April day ever and record warmth prevailed from the upper Mississippi River Valley to the central Atlantic coast.

Much of the rest of the nation was awash in rain.

Late afternoon thunderstorms triggered three tornadoes in Texas, two of which caused moderate damage, authorities said. No injuries were reported.

Two tornadoes hit Parker County in North central Texas at about 4:30 p.m., damaging several mobile homes and barns, police said.

Sheriff's Lieutenant Wayne Hayes says one twister touched down near the unincorporated Greenwood Community, about 30 miles west of Fort Worth. Another tornado struck 3 to 6 miles northwest of Weatherford.

The city of Weatherford lost power for several minutes during the height of the storm, which downed power lines and caused some flash flooding in the northern part of the county.

A third tornado touched down briefly in Collin County about 6 miles north of the Dallas city limits, but caused no damage.

A twister touched down near Tyrone, Okla., close to the Kansas border, about 2 a.m., authorities said. Farther south, several tornadoes touched down along the Texas-Oklahoma border. At least one struck near the eastern Texas Panhandle town of Shamrock shortly after midnight, slightly damaging T&M Truck Stop, at least two trailer homes and about three vehicles, said Betty Davis, a co-owner of the truck stop about 10 miles west of Shamrock.

''It was really scary,'' she said. ''But nobody was injured and we were

really lucky for that. But I'll tell you, if you ever see one coming, don't stay out too long.''

Wheeler County Sheriff Jimmy Adams was on ''storm watch'' and suffered minor cuts when two of the windows in his patrol car were blown out, a dispatcher said.

A two-block wide twister roared down the main street of Shattuck, Okla., before midnight Tuesday, causing four injuries, but no fatalities, the National Weather Service said.

''We had a pretty bad tornado,'' said Bill Bale, the mayor of Shattuck, a city of about 3,000 just east of the Texas border.

''It went up and down Main Street and through the west side of town. It damaged about all the businesses on Main Street and a few homes in the surrounding neighborhood. A lot of power lines are down.''

Severe thunderstorms with heavy rain and 2-inch hail were sighted Wednesday morning across western counties of the Texas south plains.

Summerlike heat prevailed from the East Coast to the northern Mississippi Valley, driving the thermometer to record levels in at least 15 cities from Pennsylvania west to Minnesota. International Falls, Minn., usually better known for its winter chill than its spring heat, hit a record 82 degrees.

The mercury hit 84 at Sault Ste. Marie, Mich., the warmest April temperature ever recorded in that far northern Michigan city.

A record reading of 87 in Chicago - more than 20 degrees above the seasonal average - capped eight straight days of steadily rising temperatures. Freezing temperatures prevailed barely more than a week ago.

''That's what happens in the spring, big swings (in temperature),'' National Weather Service forecaster Bob Somrek said. ''The temperatures are unusual, but it's not unusual to have big swings.''

The unseasonal temperatures sent many scurrying to Chicago's beaches but Park District officials warned swimmers to stay out of the 41-degree water.

''The reason for this announcement is that unusually warm weather has brought a lot of children to the beach,'' said Joseph Pecoraro, general supervisor of beaches and pools. ''Someone can have a mild heart attack swimming.''

But winter was not yet completely out of the domestic weather picture. Snow was falling in the Washington Cascades and the northern and west

central mountains of Wyoming, where as much as 4 inches of new snow fell.

The Seattle State Department of Transportation issued a traveler's advisory urging motorists to use snow tires if they planned to cross the Cascade passes anytime before the weekend.

Rainshowers and thunderstorms dampened an area encompassing eastern Wyoming, central and eastern Colorado, western North Dakota, South Dakota, western and southern Nebraska, western and central Kansas, and large swaths of Oklahoma and Texas.

Parts of Texas reported almost an inch of rain in just six hours.

A thunderstorm with wind gusts estimated by police at up to 80 mph swept through east central Virginia Wednesday afternoon and scattered rainshowers hit central and southern New England, New Jersey, and parts of Pennsylvania. Rain also pelted Washington state and northern and western Oregon.

#90115u2966 04/25/1990 ~United Press International

(APRIL 25) UPI - A tense day in space for the shuttle Discovery and the Hubble Space Telescope... and a new president in Nicaragua... these stories, and more up next, from U-P-I...

A troublesome solar panel on the Hubble Space Telescope has been freed by a last-ditch set of commands from earth, clearing the way for the obervatory's deployment into orbit.

Two members of the shuttle crew were standing by in space suits, ready to make a spacewalk to repair the problem.

But the crew has confirmed that the solar panel is now fully open.

The astronauts then began gearing up to release the telescope from Discovery's 50-foot robot arm and into orbit 381 miles up.

The problem followed a series of apparently minor snags that threw the space telescope's long-awaited deployment behind schedule.

The intricate deployment procedure first fell behind schedule when engineers were unable to immediately confirm whether the first of the satellite's two solar panels had unfolded properly.

Later they confirmed that it had, and the telescope's two communications antennas were unfolded ahead of schedule to make up lost time.

Finally, all that remained was to unfold the second of the two solar panels. But that did NOT work and the deployment was put on hold until the last-ditch instructions from Earth succeeded.

-30- 1499

#90115u3121 04/25/1990 ~United Press International

(APRIL 25) UPI - President Bush said today that he does NOT have to defend himself against criticism by Lithuanian officials for NOT imposing sanctions against the Soviet Union.

Bush said ''The policies and decisions I've taken have strong support of the American people and that's who I work for.''

The Soviet Union continues its partial blockade of Lithuania as a way to force the Baltic republic to drop its moves toward independence.

Lithuanian President Vytautas Landsbergis responded to the news of Bush's decision to delay taking action by saying ''This is Munich.'' He was referring to the 1938 agreement signed by Germany, Great Britain, France and Italy that surrendered part of Czechoslovakia to Adolf Hitler.

In Washington, White House news secretary Marlin Fitzwater told reporters that the administration sympathizes with the frustration of the Lithuanian president.

Fitzwater said Bush continues to support freedom in Lithuania, but he also wants the current situation resolved with ''peaceful dialogue.''

Fitzwater also said Bush is trying to be ''very careful NOT to upset the balance by an inappropriate response.''

-30- 1311

#90115u3150 04/25/1990 ~United Press International

(APRIL 25) UPI - A delegate of the International Committee of the Red Cross arrived in Beirut from Switzerland today after reports of the possible release of two Swiss workers of the Red Cross kidnapped last year in Lebanon.

Moslem sources said yesterday that the Swiss workers could be freed by Friday.

The Red Cross official arrived at Beirut International Airport to try and mediate the release.

However, a pro-Iranian fundamentalist leader in Beirut today urged all groups holding Western hostages in Lebanon NOT to release them.

He told the Voice of People radio that Washington responded to the release of Robert Polhill with ''proof of bad intention'' becase the U-S House of Representatives adopted a resolution recognizing Jerusalem as Israel's capital.''

Just yesterday, the fundamentalist leader indicated that another American hostage would be freed soon.

After 25 days, the five remaining inmates at England's Strangeways Prison have surrendered to authorities. Britain's longest prison siege ended today after guards stormed the jail and cornered the inmates, leaving the prisoners without food or water.

The Home Office, which supervises the nation's 125 penal institutions, decided to use force when lengthy negotiations failed. Guards reoccupied all the buildings and caught one 17-year-old inmate. The remaining five prisoners fled to the roof and resisted appeals that they surrender, despite the fact that they had NO where to flee.

They finally gave up, nine hours after riot police stormed the facility. Officials say preliminary searches have NOT turned up any bodies. The Victorian-era prison 200 miles northwest of London is all but gutted, and officials estimate the uprising caused more than 164-Million dollars in damage.

-30- 1950

#90115u3178 04/25/1990 ~United Press International

(APRIL 25) UPI - The seemingly unending wave of violence continued in Colombia today.

A remote-control car bomb apparently intended for a truck full of anti-cocaine police officers exploded on a busy street in Medellin and killed at least nine people. One of the dead was a police officer... the other eight were people who happened to be in the area. Officials say at least 20 other people were injured.

Reports said rescuers pulled the wounded from the wreckage of a number of cars. Buildings in the area reportedly sustained heavy damage.

Officials say the bomb went off as a panel truck carrying the police squad passed a car parked by two men.

The bombing came after the government declared an emergency in two areas where 26 people... including seven police officers... have been killed by cocaine-financed gangs in recent weeks.

A study released in Washington finds that American women overall have made gains in wages, business, and politics. But the report adds minority women and female heads of families still fall behind in terms of economic progress.

The on-going study, titled ''The American Woman 1990-91: A Status Report '' is being conducted by the Women's Research and Education Institute. It says sex and racial segregation continue to prohibit many women from attaining solid economic security.

One of the report's 19 authors, Deborah Rhode, says- ''At current rates of change, it take between 75 and 100 years to achieve complete occupational integration.''

The report also finds women are more seriously affected by the lack of affordable housing in the United States. In 1985, nearly seven-Million families led by females who rented had a median income less than half that of married-couple renters and a poverty rate nearly three times as high.

-30- 1970

#90115u3268 04/25/1990 ~United Press International

(APRIL 25) UPI - BILLIONAIRE Donald Trump and his glamorous wife, Ivana , each are free to do as they please under the terms of a 60-day agreement.

Trump's attorney, Sanford Lotwin, says the couple signed the agreement on Monday and will renew it at the end of 60 days unless one or the other cancels it.

Lotwin says the agreement provides that any action taken or NOT taken during the 60 days will NOT be considered as grounds for divorce or separation.

Quoting Lotwin- ''In laymen's words, it means that either one can live like a single person, doing whatever single people do.'' When asked if that included adultery, Donald Trump's attorney responded- ''Yes, it would include that.''

Ivana Trump has filed papers seeking an accounting of her husband's net worth and has charged Trump of having an affair with actress-model Marla Maples.

During a television interview last week, Maples admitted that she loves Trump but said she is NOT kept by him.

-30- 1132

#90115u3326 04/25/1990 ~United Press International

(APRIL 25) UPI - After wrestling with a number of problems, ground technicians and the crew of the space shuttle Discovery joined forces today for a successful deployment of the Hubble Space Telescope. The operation was in doubt when a solar panel got stuck, but commands from Earth freed it.

After the shuttle's 50-foot robot arm released the telescope into its own orbit, a space agency spokesman said ''The first of NASA's great observatories is now on station ... above the Earth.'' The deployment came about one hour and 40 minutes later than planned.

President Bush says his decision NOT to impose immediate sanctions against the Soviet Union has ''strong support.'' But Secretary of State Baker says possible U-S responses to Moscow's economic blockade still are being reviewed.

Chinese Premier Li Peng wrapped up an official visit to the Soviet Union today and called the trip ''very successful.'' China and the Soviet Union signed trade and credit agreements during the four-day visit.

U-S Trade Representative Carla Hills says the United States and Japan have reached a tentative agreement to provide greater access for some U-S wood products to Japanese markets. Hills said the agreement offers major benefits to U-S wood exporters.

Lebanese police say rival Christian forces battled each other for a second consecutive day today, leaving eight people dead and 15 others wounded. The heavy fighting occurred in a mountainous district northeast of Beirut.

Jazz great Dexter Gordon is dead at the age of 67. Hospital officials in Philadelphia would NOT release a cause of death, but Susan Mingus, widow of jazz great Charles Mingus, said that Gordon died of kidney failure after a long bout with throat cancer.

Outside medical experts examined President Bush today to confirm an April 12th diagnosis of early glaucoma in his left eye. Bush was at Bethesda Naval Hospital for an hour, and White House physician Burton Lee says the president's vision remains ''excellent.''

-30- 2176

#90115u3568 04/25/1990 ~United Press International

(APRIL 25) UPI - Hundreds of scientists and engineers rejoiced today when last-minute problems were overcome and the Hubble Space Telescope was placed into a 381-mile-high orbit. The crew of the space shuttle Discovery used a 50-foot robot arm to release the telescope. The Hubble project is seven years behind schedule and one-BILLION dollars over budget. The telescope is expected to bring revolutionary discoveries.

Approval of a 720-Million-dollar emergency aid package for Panama and Nicaragua was held up in the Senate today by disagreements over unrelated items in a spending bill. Because of the delays, President Bush approved two and one-half-Million dollars for emergency medical supplies. Some of that aid was carried to Nicaragua today by the U-S delegation to President Violeta Chamorro's inauguration.

State Department officials says freed U-S hostage Robert Polhill is scheduled to return to the United States at Andrews Air Force Base tomorrow afternoon. A spokesman says Polhill then will go to Walter Reed Army Hospital for additional medical tests. Polhill appeared before a cheering crowd of patients and military personnel at a West German hospital today and gave the V-for-victory sign. He did NOT address the crowd but smiled and seemed to be in good spirits.

Police in West Germany, where it's now night, say a woman stabbed and seriously wounded Social Democratic chancellor candidate Oskar Lafontaine at a party rally. An Interior Ministery spokesman says the attack occurred in Cologne and the woman was arrested. She apparently approached Lafontaine carrying a bouquet of flowers and stabbed the 46-year-old politician in the neck.

In New York, a second jailhouse informant testified today that the accused triggerman in the Bensonhurst racial slaying boasted in jail that he ''popped'' a black teen-ager who had come into the mostly white neighborhood. The informant also said Joseph Fama expected to get out on bail and bragged he would- quote- ''go home to my window and pop them all.''

-30- 2214

#90115u3835 04/25/1990 ~United Press International

(APRIL 25) UPI - The Discovery astronauts successfully launched the Hubble Space Telescope this afternoon kicking off a 15-year quest to UNlock secrets about the creation of the universe. The Hubble was deployed after last-ditch commands from Earth freed a stuck solar panel. The telescope finally was released as astronauts Kathryn Sullivan and Bruce McCandless were preparing for a daring emergency spacewalk to free the stubborn panel.

With the Hubble Space Telescope safely in orbit 381 miles above Earth, NASA engineers have started an eight-month pain-staking task to focus, aim and align the telescope. NASA scientist Albert Boggess says- ''We have to crawl before we can walk... It's a very complicated process.'' Scientists at NASA's Marshall Space Flight Center in Huntsville, Alabama, will relay computer command through the agency's Goddard Space Flight Center in Greenbelt, Maryland.

Nicaragua's newly sworn-in president, Violeta Chamorro , today vowed during her inaugural speech to oversee the disbanding of the Contra rebels and reduce the size of the armed forces. Chamorro also ordered an immediate suspension of mandatory military service. In assuming the presidency, the 60-year-old widow officially ended 10 years of Sandanista rule under President Daniel Ortega.

President Bush underwent an extensive one-hour examination today to confirm an April 12th diagnosis of early glaucoma in his left eye. Two out-of-town experts from Johns Hopkins and the Mayo Clinic conducted the check-up at Bethesda Naval Hospital. As Bush left the hospital, he gave the thumbs-up sign and insisted- ''It's O-K.'' White House physician Burton Lee says the president's vision remains ''excellent.''

-30- 1884

#90115u4112 04/25/1990 ~United Press International

(APRIL 25) UPI - Now that the Hubble Space Telescope has been successfully launched into orbit from the shuttle Discovery, NASA engineers have begun to fine-tune the telescope's mirrors, computers, and guidance systems. After those critical steps are completed, engineers will spend about eight months systematically calibrating the telescope's two cameras, two light-splitting spectrographs and a high-tech light meter. Says NASA scientist Albert Boggess- ''We have to crawl before we walk, walk before we run.''

Senate action on a 720-Million-dollar aid package for Nicaragua and Panama is being stalled. The aid is part of a supplemental spending bill which also contains a controversial measure that would allow the District of Columbia to pay for abortions with city money. Republican Senator Gordon Humphrey of New Hampshire says White House officials have told him President Bush intends to veto the bill if it includes that measure.

Violeta Chamorro was sworn in today as Nicaragua's new president... officially ending 10 years of Sandanista rule. During her inaugural address, Chamorro promised to oversee the disbanding of the Contra rebels and ordered an immediate suspension of the military draft. In a controversial move, the new Nicaraguan president confirmed Humberto Ortega... brother of the previous president, Daniel Ortega... would stay on as army chief.

West German doctors in Cologne say Social Democratic leader Oskar Lafontaine is out of danger after being stabbed earlier today by a woman at a political rally. The woman was arrested, but officials say the attack does NOT appear to be an act of organized terrorism. The 46-year-old Lafontaine is a rising star in West German politics and will challenge West German Chancellor Helmut Kohl in December's national election.

-30- 1978
#90115u4149 04/25/1990 ~United Press International
(APRIL 25) UPI - Rival Christian factions clashed for the second straight day in Lebanon, leaving 18 people dead and 30 others wounded. The rocket bombardment and gunfire engulfed at least seven east Beirut neighborhoods and 10 surrounding villages. Church leaders reportedly negotiated a cease-fire between the forces of General Michel Aoun and militia leader Samir Geagea toward the end of the day.

Exxon's renewed cleanup of the Alaskan coastline is already under attack because of the oil company's proposed use of a chemical fertilizer designed to speed up the natural biodegradation of oil. The National Park Service has joined environmentalists, the fishing industry, local communities and the state of Alaska in opposing the spraying of the chemical.

African-American women got equal representation today- in a field where most women would just as soon be left alone. Playboy magazine named Renee Tenison its first African-American playmate of the year. A magazine official says the honor was aimed more at African-American men than at their female counterparts. In his words- ''Ultimately it is a business decision. We're NOT out to make a political statement.''

Doctors treating Hollywood star Elizabeth Taylor say she's improving but- in their words- she's ''NOT out of the woods yet.'' The doctors admit Taylor was near death last weekend, suffering from viral pneumonia. The 58-year-old Oscar-winning actress remains in the intensive-care unit in Santa Monica, California's St. John's Hospital. But the oxygen ventilator tube inserted in her throat to ease her breathing has been removed.

-30- 1782
#90115u4322 04/25/1990 ~United Press International
(APRIL 25) UPI - NASA begins fine-tuning the Hubble Space Telescope... President Bush taken off eye medication... West German politician stabbed at rally... and record Spring temperatures. U-P-I has the top stories and more, next:

NASA engineers have their work cut out for them now that the Hubble Space Telescope is in orbit. Scientists already have started to focus the telescope's mirrors and activate on-board computers.

After the initial, critical steps are completed, engineers will work for eight months to perfectly calibrate the telescope's two cameras, two light-splitting spectrographs, and a high-tech light meter.

Scientist Albert Boggess says- ''This is a process that's very much like adjusting the sight on a rifle... in this case, it's much more complicated.'' Scientists at NASA's Marshall Space Flight Center in Huntsville, Alabama, will relay computer commands to the telescope through the agency's Goddard Space Flight Center in Greenbelt, Maryland.

Friday afternoon, engineers will open the telescope's ''aperture door,'' which opens and closes like a camera shutter to allow light to hit the telescope's mirrors. The first image from the telescope should be available sometime early next week.

Earlier, the telescope gave controllers a scare when it took three sets of commands to successfully unfurl two European-built solar panels. Two astronauts were ready for a trouble-shooting spacewalk during an hour and 40 minute delay, but that proved NOT to be necessary.

Medical specialists today confirmed President Bush does have early glaucoma in his left eye. But the doctors decided to take the president off a two-week-old regiment of twice-daily eye drops.

Doctors Harry Quigley of Johns Hopkins and Richard Brubaker of the Mayo Clinic, both experts on glaucoma, examined Bush at Bethesda Naval Hospital. White House physician Burton Lee called in the two doctors and later said they decided to end the medication for President Bush and instead would- ''follow him closley for now.''

Quoting Lee- ''Extensive testing of the eye... once again revealed NO abnormalities and NO visual loss.'' White House spokesman Marlin Fitzwater said it was Lee's intention all along to have the original diagnosis and prescribed treatment confirmed by specialists.

Glaucoma results in abnormally high fluid pressure within the eye. If left UNtreated it can impair vision.

#90115u4354 04/25/1990 ~United Press International

(APRIL 25) UPI - Rising West German politician Oskar Lafontaine was attacked today by a would-be assassin armed with a knife.

The 46-year-old Social Democratic leader and premier of West Germany's Saar state was stabbed by a woman dressed in white wearing bright red lipstick.

The woman has NOT been identified. She approached Lafontaine at a Social Democratic Party rally in Cologne. Carrying a bouquet, she asked Lafontaine for his autograph, then pulled a knife from the bouquet and stabbed him in the neck. She was soon overpowered by guards.

Lafontaine was taken to nearby Cologne University hospital, where he was reported in serious condition. Hospital officials report only that Lafontaine's life is NOT in danger- quoting- ''for the time being.''

Lafontaine is a rising star on the West German political scene, with growing national ambitions. He had already been tabbed by party leaders to challenge Chancellor Kohl in upcoming elections in December.

The nation was hit with all different kinds of weather today- everything from twisters to snowstorms and record-breaking heat.

The tornadoes blew through Oklahoma and Texas early this morning. The National Weather Service reports four injuries from a twister that hit Shattuck, Oklahoma, but adds there were NO fatalities.

Snow fell on the Washington Cascades, and Wyoming's west central mountains are expected to get as much as four inches of new snow.

In Chicago, it was a record-breaking 87 degrees today, 20 degrees above normal Spring-time highs. International Falls, Minnesota, famous for its bone-chilling weather enjoyed a record 82 degrees.

Hawaii's Kilauea Volcano continued to spew molten lava today that claimed two more houses in the rural housing area of Kalapana Gardens. The volcano has incinerated 98 houses since it current eruption began in January 1983.

#90115u4369 04/25/1990 ~United Press International

(APRIL 25) UPI - Violeta Chamorro took the oath of office today as Nicaragua's president, ending more than 10 years of Sandinista rule.

The 60-year-old Chamorro promised something for everyone in her inaugural address at Managua's soccer stadium. She ordered an immediate suspension of the Sandinistas' UNpopular program of mandatory military service, pledging to reduce the size of the Nicaraguan armed forces.

But Chamorro also moved to appease the outgoing Sandinista forces by vowing to oversee the complete disarmament of the Contra rebels and allowing Humberto Ortega to remain as head of the army.

Those two promises may be difficult to deliver. Contra leaders have said they would NOT give up their arms if the military remained in Sandinista hands.

Vice President Quayle led the U-S delegation. He brought promises of imminent U-S aid as part of a 720-Million-dollar emergency package to

Central America.

But politics is weighing down the aid in the Senate. A provision allowing the District of Columbia to pay for abortions with city money was tacked on to the bill as it passed the Senate Appropriations Committee. President Bush- who has fought hard for the Central American aid- has said he will veto the bill if the abortion provision is NOT dropped.

#90115u4390 04/25/1990 ~United Press International

(APRIL 25) UPI - Moscow's economic blockade of Lithuania is causing major headaches in the breakaway Baltic republic. Radio and television broadcasts were were cut back today because of electricity shortages and about six-thousand buses sat idle for lack of fuel.

Members of a Lithuanian delegation, sent to Moscow Monday in an effort to start negotiations, have NOT been received by Soviet officials. Today, they cornered Soviet Prime Minister Nikolai Ryzhkov outside Parliament, but there was NO progress.

Lithuania's prime minister is suggesting the republic turn directly to its more liberal neighbors within the Soviet Union for help, instead of taking the normal route through Moscow. Quoting the prime minister- ''We should NOT fulfill contracts, but deal direct, almost under conditions of the black market.''

A Lithuanian spokeswoman says NO such deals have been arranged.

The United States has angered Lithuania by NOT imposing sanctions against the Soviet Union, but President Bush says his decision has ''strong support from the American people.''

#90115u4415 04/25/1990 ~United Press International

(APRIL 25) UPI - Exxon's renewed effort to clean the Alaskan coastline is already under attack before the cleanup has really resumed.

Exxon's proposed use of the chemical Inipol has aroused controversy. The chemical is said to speed the bio-degradation of oil, but critics say the toxic chemical could kill wildlife, and at very least it carries risks.

The National Park Service today joined environmentalists, the fishing industry, local communities and the state of Alaska in going on the record against the use of Inipol to clean up after the worst oil spill in U-S history- last year's Exxon Valdez accident.

The park service said it will NOT permit Exxon to use the chemical on polluted park shores.

Defense-industry lobbyists used a new weapon on Capitol Hill today in an attempt to win congressional funding. They brought in the weapon itself.

A V-22 Osprey plane flew straight into the heart of Washington. Built by Bell Helicopter and Boeing's helicopter division, it's a plane that can NOT only fly up, down and forwards, but can also hover like a helicopter, fly backwards and sidewise- all of which it did today on and above the Capitol Plaza.

The Osprey program has been underlined for cancellation by Defense Secretary Cheney. But defense lobbyists and their congressional supporters argue that it has extensive uses in civilian aviation and that it is vital to the military.

(APRIL 25) UPI - Officials in New Delhi, India, say NO one was killed in fires that swept three shantytowns today... destroying the huts of more than 15-hundred poor families. It's the third day that fires have erupted in the illegal squatter communities in the Indian capital.

A New York state Supreme Court judge has refused to dismiss the charges in the Happy Land Social Club arson fire exactly one month ago today. The lawyer for the Cuban immigrant charged with torching the nightspot and killing 87 people argued he hasN'T had time to read his client's alleged confession.

A recently released mental hospital patient who opened fire in a suburban Atlanta shopping mall yesterday was taken to a state institution after his jailers determined they couldN'T care for him properly. The man is charged with killing one person and wounding five others during the shooting spree.

In Los Angeles, actor Corey Feldman pleaded NOT guilty today to felony drug charges. The 18-year-old star of the film ''Stand By Me'' says he'll enter a drug rehabilitation program to ''take care'' of his heroin and cocaine problem.

The Soviet news agency Tass says the younger half of the oldest couple in the Soviet Union has died at the age of 121. She is survived by her 124-year-old husband of the past 103 years. The couple lived in a village in the republic of Azerbaijan.

-30- 1532

#90115u4690 04/25/1990 ~United Press International
(APRIL 25) UPI - Two medical specialists... one from Johns Hopkins and the other from the Mayo Clinic... examined President Bush today and confirmed he has early glaucoma in his left eye. But the doctors, called in by White House physician Burton Lee, decided to discontinue the president's current treatment of twice-daily eye drops. Lee says the doctors will monitor the situation without treatment for now and he emphasizes there's NOTHING wrong with the president's vision.

The Discovery astronauts successfully deployed the Hubble Space Telescope today after mission control made three attempts from Earth to free a balky solar panel. Astronauts Kathryn Sullivan and Bruce McCandless were suiting up for a daring spacewalk when the ground commands rectified the situation. On Friday, engineers will radio commands to open the telescope's window to let the first images bounce off its mirrors.

Philippine authorities say six people were killed when a D-C-3 transport plane burst into flames and crashed in an army camp in suburban Manila. At least 17 other people were injured in the crash. Aviation officials say the privately owned aircraft had ferried seafood to Manila from the central Philippines and was on its way back when the accident took place, Thursday Philippine time.

Late-afternoon thunderstorms spawned tornadoes that blasted parts of Texas and Kansas. NO injuries are reported. Police say two twisters hit Parker County in north central Texas... damaging several mobile homes and barns. A third tornado touched down briefly in Collin County, about six miles north of the Dallas city limits, but caused NO damage. In Kansas, authorities say a tornado skipped across five counties in the central portion of the state. An irrigation system and several vacant buildings were damaged.

#90116b0019 04/26/1990 ~Business Wire

SAN DIEGO (APRIL 26) BUSINESS WIRE - Robot Research Inc. has acquired San Diego-based VCS (Visual Communication Specialists), a manufacturer of intelligent switching and control communications systems, according to John P. Stahler, president of Robot Research.

Stahler said VCS, with its compatible product line, is a good match with Robot. Robot Research is a designer and manufacturer of phoneline video equipment and digital video multiplexers for a variety of video surveillance applications.

''We are very pleased with this acquisition,'' Stahler said. ''VCS's technological leadership in the area of control communications is a perfect fit with our RVS3000 video phone surveillance system and RS232 controllable quads.

''The addition of VCS products to the Robot product line broadens the scope of the company. The combination of the product offerings will confirm our position as the industry leader in the areas of digital video and control systems.''

Founded in 1975, VCS is best known for the development of bidirectional transcoaxial communication systems and intelligent switchers. The transcoax type of communications permits users to control video equipment located in remote sites by means of coax cable, RS232, or both.

VCS reported 1989 sales of $1.1 million.

Stahler said that as part of the acquisition process, VCS personnel will be transferred to Robot to support in the areas of production, marketing and customer service.

Robot Research Inc. is the recognized world leader in the field of digital video products and communication systems for the security industry. Robot Research, a 20-year-old, San Diego-based company, manufactures a complete line of digital video equipment including quads, time lapse sequencer, phoneline video surveillance products and communication control systems.

ROCHESTER, NY (APRIL 26) BUSINESS WIRE - Gleason Corp. (NYSE: GLE) Thursday reported income from continuing operations for the first quarter ended March 31, 1990, of $589,000, or 10 cents per share, on sales of $34,788,000, compared with a loss of $657,000, or 11 cents per share, on sales of $31,780,000 for the 1989 first quarter.

Net income for the first quarter was $1,016,000, or 18 cents per share, vs. a net loss of $1,524,000, or 27 cents per share, for the 1989 first quarter.

The company's continuing operations ended the first quarter with a backlog of $143 million compared with $122 million at the end of the 1989 first quarter and $137 million at year-end.

James S. Gleason, chairman and president, said first-quarter results from continuing operations were improved compared to a year ago due to higher sales of gear production machines and increased margins on those sales, but were negatively affected by normal start-up costs associated with production of the company's new Phoenix (tm) gear production equipment.

Gleason Corp. is a world leader in gear production equipment.

IRVINE, CA (APRIL 26) BUSINESS WIRE - Signal Landmark, a leading developer specializing in all aspects of commercial, residential, and industrial developments, has announced the addition of Sandra Sciutto and Mark Horvath to their corporate finance department. The announcement was made by Chief Financial Officer John Pederson.

Sciutto has been named to the newly created position of controller-operations. She will oversee the staff responsible for contracts and accounts payable and will handle financial analysis and cost variance analysis for Signal's projects.

Acting as the primary contact with project managers and construction personnel to report and analyze project cost, status and profitability, she will also participate in the strategic planning of each project and be involved in the related budget preparation.

Horvath has been named to the position of staff accountant, where he will be responsible for the preparation of financial statements, bank exhibits and forecasting, along with other general accounting duties.

"We are pleased to have these two talented people join our team," Pederson said. "Sandra has been involved with real estate for several years and brings with her a strong knowledge and background of the intricacies in the development industry. Mark is a hard-working individual with a great sense of team spirit. I know he will be an asset to Signal Landmark. I'm happy to welcome them both to the team."

Prior to Signal Landmark, Sciutto was controller of the Los Angeles Division of the Linpro Co., a national real estate developer concentrating

in the areas of commercial, industrial and residential real estate. As controller, she was responsible for all areas of accounting, including budgets, cash and tax projections and financial reporting, accounts payable and construction loan draws.

From 1982-1987 Sciutto was with KPMG Peat Marwick, Certified Public Accountants, in Orange County, Calif., where she managed audit engagements of clients in the real estate, banking and savings and loan industries.

Prior to Signal Landmark, Horvath was an in-charge staff accountant with the certified public accounting firm of Lesley, Thomas, Schwarz and Postma where he was involved with audits, compilations, special projects and tax preparation for clients.

#90116b0051 04/26/1990 ~Business Wire

AKRON, OH (APRIL 26) BUSINESS WIRE - Ohio Edison Co. President Justin T. Rogers, Jr., said Thursday at the annual meeting of stockholders that in 1989 the company held its own in some key comparisons with year-earlier results.

Rogers, who is also chairman of the board of Edison's subsidiary, Pennsylvania Power Co., told stockholders that 1989 earnings of $2.18 per share of common stock compared favorably with the $2.06 per share first reported for 1988 and then revised to $1.22 to reflect a noncash write-off of certain nuclear construction disallowances.

The company's 1989 earnings were helped by a nearly three percent increase in sales to commercial customers. Residential sales held steady, and industrial sales were down less than one percent.

Despite generally milder temperatures that reduced air-conditioning and space-heating use, Rogers said the company set new summer and winter peak load records in 1989. The summer peak occurred on July 24, when customer demand reached 5,152 megawatts. Edison's winter system peak came on Dec. 21, when customer use hit 4,962 megawatts.

Turning to 1990 first quarter results, Rogers said kilowatt-hour sales were moderated by a mild winter that reduced heating demand. Although retail electric sales were down less than one percent for the quarter, an increase in off-system sales of about six percent helped push total kilowatt-hour sales up by nearly one percent. Earnings for the quarter were 59 cents per share, compared with 60 cents per share earned in the first quarter of 1989.

Rogers updated stockholders on Congress's efforts to revise the Clean Air Act. He said the company expects to be able to meet the mid-1990s deadline for the proposed first-phase reductions without too much difficulty. That's partly because Edison has spent more than $2 billion since 1975 on environmental protection. Also, 42 percent of Edison's capacity won't need major new control equipment because it's oil- or nuclear-fueled, or coal-fired generation that is equipped with state-of-the-art environmental control equipment.

To meet the deadline for the second-phase reductions in the year 2000, Edison is looking at an entire range of control strategies. Although the second-phase compliance will be more expensive, Rogers believes it shouldn't threaten the company's financial integrity.

Rogers also covered the company's pending $218 million rate request that includes costs asociated with the Beaver Valley 2, the last new operating unit to be placed in rates. He said the company has worked hard to minimize the impact of the unit on rates, including: raising capital through the sale and leaseback of a large portion of its ownership in Beaver Valley 2; securing major off-system power sales; reaching settlements with the Public Utilities Commission of Ohio and Office of Consumers' Counsel that both delayed and reduced the amount requested; and carrying out a variety of multi-million dollar cost-cutting moves involving reductions in payroll, security refinancings and renegotiations of its largest fuel supply contract.

Formal hearings on the rate request began in Columbus on April 3 and should last into May. The Commission probably won't issue its decision until mid-summer.

At the meeting, stockholders elected 14 directors to the board and ratified the appointment of Arthur Andersen & Co. as auditors for 1990.

#90116b0054 04/26/1990 ~Business Wire

CHICAGO (APRIL 26) BUSINESS WIRE - R.R. Donnelley and Sons Co., North America's largest printer, reported its first quarter net income increased 6.8 percent to $43.5 million or 56 cents per share.

Sales for the first quarter were $724.6 million, an increase of 2.4 percent over the same period in 1989.

''Our first-quarter sales gain resulted primarily from a higher volume of services provided to customers, and was achieved despite several adverse

factors,'' said John R. Walter, Donnelley chairman, president and chief executive officer. ''Generally weak advertising conditions have adversely affected magazine page counts.

''Delayed product introductions from computer documentation customers continued, as did slower book activity levels. Economic and financial uncertainty in retail markets, coupled with a later Easter holiday season, affected catalog and newspaper insert printing. Directory and financial printing operated at good levels during the quarter.''

The company reported that the first quarter's sales were also affected by lower paper pricing and unfavorable exchange rate variations.
First-quarter, 1989 results included the net sales of the company's Dunstable, U.K., operations and Metromail's proprietary coupon business, both since shut down.

Earnings from operations, pre-tax earnings and net income all grew at rates faster than sales, despite increases in start-up expenses, depreciation expense, and a higher effective tax rate. Improved productivity and cost control and lower interest expense contributed to these faster-growing earnings results.

First quarter, 1990 capital spending was $58.6 million. The company continued to project full-year capital spending at $250 million.

The Donnelley Board of Directors Thursday declared a quarterly dividend of 24 cents per share, payable on June 1, 1990, to shareholders of record on May 11, 1990.

BEAVERTON, OR (APRIL 26) BUSINESS WIRE - Tektronix Inc. announced Thursday that its board of directors has named Richard S. Hill, Stephen D. Kerman and Pat A. Kunkle as vice presidents.

Hill becomes vice president and general manager of the company's Oscilloscope Group, which is being formed from part of the existing Test and Measurement Group. Vice President Richard Knight, formerly head of the Test and Measurement Group, will lead the Systems Group, which consists of all Test and Measurement divisions except oscilloscopes.

Kerman will be vice president and director of worldwide marketing and sales for the company. This new position will include the U.S. Test and Measurement and all international sales and service organiztions, and will

be the corporate focal point for worldwide marketing, sales and service functions.

Ms. Kunkle will be vice president for Human Resources, a newly formed post which includes all corporate-level human resource organizations.

The company's Communications Group will be combined with the Visual Systems Group under Vice President Lawrence R. Kaplan. Daniel G. Wright, formerly vice president of the Communications Group, has resigned from the company.

Tektronix is a leading supplier of instruments and systems in the areas of test and measurement, communications and computer graphics. Sales in fiscal 1989 totaled $1.4 billion.

RESTON, VA (APRIL 26) BUSINESS WIRE - US Sprint Thursday announced a commercial electronic messaging interconnection with Internet, one of the world's largest data networks serving more than a million users in U.S. government agencies, the military, universities and corporate research and development centers.

The interconnection will improve communication between Internet users, enable them to communicate by electronic mail with vendors and suppliers, and provide access to delivery options that include facsimile, telex and postal service hard copy.

US Sprint will use its SprintMail(sm) 400 service, the commercial application of the international X.400 standard, for the interconnection.

This standard permits communications between dissimilar public and private messaging systems.

The interconnection will allow approximately 2-million Internet users in 35 countries access to the full capabilities of SprintMail. Prominent members of Internet include the National Science Foundation Network (NSFNET) and the Advanced Research Project Agency Network (ARPANET).

''The interconnection will provide Internet users with the many benefits of a commercial electronic mail service,'' said Howard Brooks, vice president and general manager of International Messaging at Sprint International, the private networks and global communications subsidiary of US Sprint. ''Members of Internet will be able to communicate easily and cost-effectively with the 340,000 users of SprintMail(sm).

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City, Mo.

SAN FRANCISCO (APRIL 26) BUSINESS WIRE - GE Capital Commercial Real Estate Financing has provided $71 million mortgage financing for Watergate Office Towers, an existing 807,976-square-foot, three-building office complex located on San Francisco Bay in Emeryville, Calif.

The borrower is a partnership composed of the F.P. Lathrop family. F.P. Lathrop, founder of Lathrop Construction, was the developer of the Watergate complex, a 60-acre development which includes the subject property, 1,250 apartment units, a small shopping center and two upscale restaurants, including the well-known Trader Vic's.

Located at the confluence of three major Bay Area freeways, Watergate Office Towers is a local landmark, noted for its unobstructed views of San Francisco, the Berkeley Hills and the San Francisco Bay from virtually every office.

Historically the three class A office highrises comprising Watergate Office Towers have enjoyed exceptionally high occupancy. Current tenants include National Can, New York Life, California Federal Savings, Bankers Life, The State of California and GE Capital. The project is also popular with legal and accounting firms which serve the Bay Area from a single office.

Among the project's amenities are a jogging path which loops around the small peninsula containing the project, restaurants, convenience stores, a common plaza area and a racquetball and gymnasium facility that are available to all office tenants.

The 17.35-acre site on which the buildings are located also features a three-level parking structure, which together with a surrounding parking lot provide a total of 2,500 spaces.

The site's master plan allows for an additional 185,000-square-foot office building and 500 additional parking spaces.

The mortgage was arranged by the San Francisco office of Commercial Real Estate Financing. George Eckard of Wells Fargo Realty Finance was the broker in the transaction.

GE Capital Commercial Real Estate Financing provides builders, developers and financial institutions with immediate and standby financing for all types of commercial properties. It is a unit of GE Capital, one of the nation's largest diversified financial services companies, with earning assets exceeding $55.5 billion.

#90116b0134 04/26/1990 ~Business Wire

PHOENIX (APRIL 26) BUSINESS WIRE - Motorola has announced that it will shortly begin construction of a new IC assembly plant in the Izumi Park Town Industrial park on the outskirts of Sendai City, in Miyagi Prefecture Japan, with intended completion in the spring of 1991.

Responding to increasing demands from customers in Japan and the Far East, this new Sendai plant will focus on the assembly of both high-capacity memory devices, and mid-range and high-end microcontroller ICs that meet expanding market needs for surface mount packages. Motorola's planned investment in the new plant is estimated at approximately $50 million.

The plant will be owned and operated by NIPPON MOTOROLA LTD., a Tokyo-based subsidiary of Motorola Inc.

Initially, the new Sendai assembly plant will process semi-finished 1 Megabit Dynamic Random Access Memories, next generation 4 Megabit DRAMs, and microprocessor die which will be produced by TOHOKU SEMICONDUCTOR, the

joint venture established in 1986 by Toshiba and Motorola Inc. The TOHOKU joint venture plant is located on a site adjacent to this new planned assembly plant.

When the new IC assembly plant is completed, Motorola will then have two semiconductor production sites in Japan. The other site is its Aizu plant located in Fukushima Prefecture, which Motorola acquired from TOKO Inc., in 1982. The planned Sendai assembly plant will be the first in Japan to be designed and constructed by Motorola from the initial stage.

This new Japanese investment by Motorola parallels new construction of semiconductor facilities presently under way in both Austin, Texas, and Chandler, Ariz. (a suburb of Phoenix). Last August, construction began in the Austin suburb of Oak Hill on the $500 million MOS 11 wafer fabrication facility, which is designed to produce state-of-the-art CMOS and BiCMOS devices with sub-micron geometries, including various advanced memory and microprocessor products. And in November of 1989, construction began on a new $325 million advanced research and production facility in Chandler, Ariz., which will be dedicated principally to fabrication of advanced bipolar and BiCMOS devices for Motorola's Application Specific Integrated Circuits Division.

Motorola's Semiconductor Products Sector based in Phoenix, is the largest U.S.-based producer of integrated circuits and discrete semiconductor devices for the merchant markets. Its worldwide sales of semiconductors exceeded $3 billion in 1989. The semiconductor business is a unit of Motorola Inc., a diversified electronics manufacturer with annual sales of over $9.6 billion.

JOPLIN, MO (APRIL 24) BUSINESS WIRE - Stockholders of The Empire District Electric Co. Thursday elected W.D. Atteberry, R.L. Lamb, and B.A. Parnell Jr. to three-year terms as directors of the company.

At the meeting Thursday, the board of directors declared a quarterly dividend of 58 cents per share on common stock payable June 15, 1990 to holders of record as of June 1, 1990. The board also declared regular quarterly dividends payable June 1, 1990 on each of the three issues of preferred stock to holders of record as of May 15, 1990.

The company reported earnings for the first quarter of 1990 of 66 cents per common share, as compared with earnings of 76 cents per share during the same period last year.

Revenues for the first quarter were $33,766,000 and net income was $3,976,000. This compares with revenues of $33,393,000 and net income of $4,454,000 last year.

All officers of the corporation were reelected to their positions.

LAKEWOOD, CO (APRIL 26) BUSINESS WIRE - K N Energy Inc. (NYSE:KNE) Thursday completed the public sale of $20 million of 30-year sinking fund debentures at a coupon rate of 9.95 percent.

The effective rate of the debentures, which were sold at a discount, is 10.25 percent.

Proceeds from the long-term debt financing will be used to reduce short-term debt.

K N Energy, with operations in seven states, supplies natural gas to residential, commercial, industrial and agricultural customers through three pipeline systems. Principal operations serve over 300 communities and 221,000 direct customers in Colorado, Kansas, Nebraska and Wyoming.

Operating one of the 10 longest natural gas pipeline systems in the United States, K N Energy has annual sales exceeding $350 million and assets in excess of $540 million.

DENVER (APRIL 26) BUSINESS WIRE - Never in our history has education been so important, U S WEST Chairman Jack MacAllister told members of the Colorado Parent-Teacher Association at their annual convention in Denver Thursday.

''The world is being made over,'' he said. ''Our economy, our democracy and the quality of our lives depend on ensuring that all of America's children are educated to their fullest potential. In nations everywhere, social upheavals, a globalization of economies and a revolution in technology are making education essential to everyone's future.''

MacAllister called on PTA members to take personal responsibility for the quality of education. '' The involvement of parents is neither a panacea, nor a luxury; it is basic, and it must go beyond supporting bake sales and class plays,'' he said.

''Teachers, too, face increased pressures brought on by a society with changing values and pressing family and social problems. All of which makes the work of the PTA more difficult, and urgent,'' MacAllister said.

Businesses must also help. As an example, he pointed to United Bank's PTA-At-Work programs, where school issues are brought to the workplace for discussion.

MacAllister said supporting education -- particularly early childhood education -- is a key business strategy of his company. ''We've committed $26 million to help strengthen schools and get the community more involved in educational issues.''

The U S WEST chief executive said too much energy has been spent on assigning fault for the shortcomings of our schools. ''The PTA taught us that our children's education depends mainly on our taking personal responsibility for it,'' said MacAllister. ''A partnership of parents and teachers with strong support from the community is fundamental to good schools.''

Later in the day, a workshop was presented at the convention by U S WEST's Edmundo Gonzales, promoting the role businesses can play in the PTA and in public education.

In other PTA convention activity, resolutions were discussed to inform

constituent organizations about the potential effects of prolonged exposure to electromagnetic fields (EMF) and to work with the community and businesses in providing alternatives to gang activity.

U S WEST owns U S WEST Communications and other companies involved in communications, data solutions, marketing services and financial services.

MILPITAS, CA (APRIL 26) BUSINESS WIRE - Logic Modeling Systems Inc. announced Thursday the appointment of Russell Hall as vice president of marketing.

Hall will report to Dr. L. Curtis Widdoes Jr., president of Logic Modeling inventor of hardware modeling and widely acknowledged as one of the founders of the CAE industry.

Prior to joining Logic Modeling, Hall was director of marketing for Valid's CAE division and its design entry and simulation tools for both analog and digital design. Previously Hall was with the venture capital firm of Merrill, Pickard, Anderson & Eyre, where he actively invested in the design automation industry, including investments in Synopsys, Cross Check Technology and Logic Modeling.

Hall was also director of sales for Silicon Solutions Corp. of Menlo Park, Calif., where he had also served as the original product marketing manager for Silicon Solutions' MACH 1000 logic and fault simulation accelerator. Silicon Solutions is now part of Zycad Corp.

Hall holds and MBA degree from Stanford University, an MS degree from the University of California at Berkeley, and a BS degree from the United States Military Academy at West Point. Hall served in Korea as a company commander and at the Pentagon on the staff of the secretary of defense.

Hardware modeling solves the simulation model availability problem for system and ASIC designers by allowing the physical VLSI device to be used to model its own behavior during design verification. Hardware models are full-function, full-fidelity and execute at hardware speed. The LM-1000 provides designers with easy access to over 600 hardware models of important VLSI devices on the market today, and ASIC models can be developed in less than one day. The LM-1000 hardware modeling system is platform- and simulator-independent.

Logic Modeling sells through OEM relationships with EDA vendors including Cadence, GenRad, Harris Scientific Calculations, Siemens, Valid, Vantage Analysis Systems, Viewlogic Systems, and to companies with proprietary simulators.

Logic Modeling Inc. is a privately held company, with corporate headquarters located in Milpitas.

GREENVILLE, SC (APRIL 26) BUSINESS WIRE - Delta Woodside Industries Inc. (NYSE: DLW) announced Thursday financial results for the third quarter ended March 31, 1990.

Net sales for the quarter ended March 31, 1990 were $117,263,000 as compared to $147,285,000 in the quarter ended April 1, 1989. This represents a decrease of 20 percent. For the quarter ended March 31, 1990 the company sustained a net loss of $934,000 (equal to 5 cents per share)

as compared to a net profit of $8,623,000 (equal to 46 cents per share) in the quarter ended April 1, 1989.

Through the three quarters ended March 31, 1990, the company's sales were $347,606,000 as compared to $404,967,000 in the nine months ended April 1, 1989. Net profits for the nine months ended March 31, 1990 were $1,589,000 (equal to 8 cents per share) as compared to $20,369,000 (equal to $1.11 per share) in the nine months ended April 1, 1989.

In commenting on the results, the company noted that the net loss in the third fiscal quarter and the lower fiscal year to date 1990 profits were caused by the substantially lower sales volume which resulted from the slow retail climate in late 1989.

The company further noted that business began to improve in March and that the March ending backlog was $156 million as compared to $142 million at the beginning of the March quarter and $175 million at the end of the March quarter of 1989.

The company believes that the recent slow textile markets are beginning to improve and the company will return to profitability in the fourth quarter ending June 30, 1990.

Delta Woodside Industries Inc., headquartered in Greenville, manufactures and sells a wide variety of textile fabrics and apparel and also is engaged in the retail distribution of office supplies and equipment.

The company, which has approximately 7,800 employees, operates 30 plants and seven retail distribution centers in four states and Costa Rica.

HOUSTON (APRIL 26) BUSINESS WIRE - Continental Airlines and Houston civic officials Thursday announced they have received final U.S. Department of Transportation approval to begin daily 747 service between Houston and Tokyo, via Honolulu.

The service will begin July 2, which means the flight will play a significant role in meeting transportation needs for the Economic Summit of Industrialized Nations in Houston.

In addition to providing a vital link to Tokyo, the new flight gives Houston travelers their first nonstop flight to the vacation paradise of Hawaii, plus unprecedented access to other Pacific destinations via

Continental's Honolulu hub. For the first time, Houstonians will be able to travel to Australia, New Zealand, Manila and Guam by making a single ''on-line'' connection.

Earlier this year Continental said it intends to expand its Seattle/Tacoma gateway, which currently offers a daily flight to Tokyo, by inaugurating service to Seoul, South Korea, and is pursuing authority to fly from Seattle/Tacoma to Nagoya, Japan.

The importance of the new route is underscored by the fact that the Honolulu-Tokyo route segment accounts for 40 percent of all U.S.-Japan passenger traffic.

Continental plans to originate the 747 in Houston, with a stop in Honolulu en route to Tokyo. Flight No.7 will depart Houston at 8 a.m., arriving at Honolulu at 11 a.m. The flight will then depart Honolulu at 12:30 p.m. for a 3:30 p.m. arrival in Tokyo the next day.

Flight No.8 will depart Tokyo at 5:30 p.m., arriving in Honolulu at 5:35 a.m., departing Honolulu at 8 a.m., and arriving in Houston at 8 p.m. the same day.

Continental also has pending at the DOT an application to begin nonstop Houston-Tokyo service. Houston is the largest city in the United States without nonstop service to Japan.

AKRON, OH (APRIL 26) BUSINESS WIRE - Myers Industries Inc. President and Chief Executive Officer Stephen E. Myers today announced the company's planned capital expenditures during 1990 will increase 40-50 percent over 1989 levels.

The plan was announced at the annual shareholders' meeting.

Shareholders re-elected the company's nine-member board of directors and in other business, approved a proposal to amend provisions of the company's incentive stock option plan.

The approved change broadens the language of the stock option plan, which was originally approved in 1982.

The firm of Arthur Anderson & Co. independent certified public accountants was approved as the company's independent auditors. The firm has served

Myers Industries since 1966.

A regular quarterly dividend of 5 cents per share was declared by Myers Industries Inc. board of directors at a meeting held Wednesday, Apr. 26, 1990. The dividend will be paid July 2, 1990 to shareholders of record as of June 8, 1990.

Myers Industries Inc. is a nationwide wholesale distributor of tire repair and service products as well as a manufacturer of polymer and metal products used in material handling and storage, tire repair and retreading automotive and construction applications.

NEW YORK (APRIL 26) BUSINESS WIRE - Bombardier Inc. of Montreal Thursday announced that the U.S. Bankruptcy Court overseeing Integrated Resources' Chapter 11 proceedings had authorized Integrated to consent to the proposed sale of assets by its wholly owned subsidiary, Learjet Corp. of Wichita, Kan.

As previously announced April 9, Learjet agreed to sell all its assets and operations to a newly formed subsidiary of Bombardier Inc. for $75 million in cash. Bombardier agreed to assume the liabilities associated with Learjet's ongoing operations, including loans outstanding under its $38 million line of credit. The transaction is expected to close on or about May 31.

Bombardier is a Canadian corporation engaged in design, development, manufacturing and marketing activities in the fields of transportation equipment, motorized consumer products and civil and military aerospace.

Learjet is a major manufacturer of business jets and also is engaged in aircraft service operations, subcontract work for major aerospace manufacturers, and supports a fleet of 83 Learjets operated by the U.S. Air Force and Air National Guard.

Bombardier chairman and chief executive officer, Laurent Beaudoin, said that he was now looking forward to a favorable conclusion of the transaction and to meeting all the Learjet people in the near future.

Brian E. Barents, Learjet chairman, president and chief executive officer, said he was pleased with the court's ruling which represents a major step toward the closing of the sale. ''We are tremendously excited about our potential ownership by Bombardier and believe it is an ideal partnership for both companies.

''With Bombardier's backing, I am confident great progress will take place in Learjet's future from the standpoint of both products and people,'' he added.

#90116b0212 04/26/1990 ~Business Wire

HOUSTON (APRIL 26) BUSINESS WIRE - Transco Energy Co. Thursday reported net income for the quarter ended March 31 of $21.1 million, or 73 cents per common share.

These earnings compare with net income of $17.6 million, or 62 cents per common share, for the first quarter of 1989.

First-quarter results reflect higher earnings from the natural gas pipeline systems, hydrocarbon marketing and coal segments offset, in part, by slight losses from the exploration and energy ventures segments. Natural gas pipeline systems reported earnings for the quarter of $30.3 million, compared with earnings of $23.3 million for the like period last year.

Transcontinental Gas Pipe Line Corp. (TGPL) reported net income of $17.9 million, down from $22.3 million for the first quarter of 1989, partially as a result of higher operating expenses. Texas Gas Transmission Corp., which was acquired by Transco on April 3, 1989, contributed $11.7 million in earnings for the first quarter of 1990.

TGPL's system deliveries for the quarter were 464 billion cubic feet (Bcf) compared with 410 Bcf in 1989. Texas Gas' system deliveries for the first quarter of 1990 were 194 Bcf.

Transco's hydrocarbon marketing segment reported earnings of $5.1 million for the first quarter of 1990 compared with $5 million a year ago. Transco Energy Marketing Co.'s earnings declined to $3.4 million from $5.5 million a year ago primarily due to lower sales and margins resulting from unseasonably mild weather.

Transco Gas Gathering Co. recorded earnings of $1.5 million for the quarter, compared with a loss of $0.7 million for the first quarter of 1989, as initial volumes of gas began flowing in new gathering projects.

Transco President and Chief Executive Officer George S. Slocum said: ''We

are pleased to see the benefits that are now being realized in the company's natural gas businesses as a result of the restructuring steps that were substantially completed in 1989. Pipeline segment earnings, reflecting the acquisition of Texas Gas, were relatively strong despite unseasonably mild weather in the market areas served by TGPL and Texas Gas.

''Further, the implementation of new rates at both TGPL and Texas Gas, when approved by the Federal Energy Regulatory Commission, should better assure recovery of current cost of service and result in improved earnings for these core businesses in 1990. Transco Gas Gathering Co.'s first contribution to the hydrocarbon marketing segment earnings reflects the growing volumes of gas being transported offshore Texas and along the Gulf Coast.''

Slocum said that the performances of Transco's other businesses were also promising, noting that the development of gas reserves on Gulf of Mexico leases and Alabama coalbed methane properties should lead to future contributions to the company's performance.

Slocum said: ''While we continue to work toward resolving our remaining regulatory issues, the business fundamentals of the company are solid. As industry conditions improve in general, we expect that our decision to place greater emphasis on natural gas pipeline and gas-related businesses will generate better returns for Transco and its stockholders.''

SAN DIEGO (APRIL 26) BUSINESS WIRE - PS Group Inc. (NYSE:PSG) reported net income (unaudited) of $2,026,000 (35 cents per share) for the first quarter of 1990 vs. net income of $358,000 (5 cents per share) for 1989's first quarter.

Results for the first quarter of 1990 included a one-time net gain of $1.1 million (19 cents per share) from the sale of the wholesale tour business of USTravel Systems Inc., the travel distribution subsidiary of PS Group.

1990 results also benefitted from the results of oil and gas production, which in 1989 was treated as a discontinued operation and therefore had no impact on first-quarter 1989 results. Effective Dec. 31, 1989, PS Group reversed its earlier decision to sell all of its oil- and gas-producing properties and elected to retain and operate certain older oil- and gas-producing properties.

Results for 1990 and 1989 were reduced by an extraordinary charge of

$101,000 (2 cents per share) and $42,000 (1 cent per share), respectively, related to the premium paid on the company's 14 percent senior notes purchased and retired.

SANTA MONICA, CA (APRIL 26) BUSINESS WIRE - United Security Industries (USI) has been awarded the security contracts for American Honda Motors and USAir, announced Mark Apicella, chairman and chief executive officer of the Santa Monica-based firm.

''We will be providing 3,400 man-hours a week for security services at Honda's Torrance and Gardena facilities,'' said Apicella. He reports that the contract is valued at $3.4 million.

The USAir contract is for services at three facilities in San Diego County and is valued at $1.44 million, providing 1,344 man-hours per week, said Apicella.

The largest privately held, full-service security provider in California,

USI has headquarters in Santa Monica and has offices in downtown Los Angeles, near Los Angeles International Airport in West Los Angeles, in the San Fernando Valley and Orange County.

The firm currently employs more than 1,700 personnel and is responsible for 70 million square feet of premier commercial and industrial space throughout Southern California.

It is one of the fastest growing security firms in the nation, having gone from start up in 1983 to a projected $31 million in revenues for 1990.

In addition to fully staffed operations centers in its clients' facilities USI operates a 24-hour Communications Center and 24-hour Client Manager Call System. The firm designs and provides site-specific security planning, trained guards and other security personnel, electronic security system design, planning, installation and maintenance, consulting, concierge and executive protection service.

#90116b0245 04/26/1990 ~Business Wire

SACRAMENTO, CA (APRIL 26) BUSINESS WIRE - S. David Freeman was named the general manager of the Sacramento Municipal Utility District in an announcement Thursday by Board President Ed Smeloff.

Freeman will assume the GM post June 4.

''This is an historical event for our customers,'' said Smeloff. ''I'm confident we've selected the very best candidate available -- someone who will provide stability, security and savings.''

Freeman, 64, has 40 years of electric utility experience, including the past four years as head of the Lower Colorado River Authority, a power and water utility based in Austin, Texas. Previously, he served for seven years -- three as chairman -- on the board of directors of the Tennessee Valley Authority, the nation's largest publicly owned utility. Before that he held energy positions for the White House, Congress and the Ford Foundation.

''I'm a public power man and am eager to go to work for the people of Sacramento County who own SMUD,'' Freeman said. ''I want to see SMUD more than survive. It want to see it thrive. Working with all constituents, we can restore SMUD to the bright star of public power that it was a few decades ago.''

Smeloff said Freeman agreed to a five-year contract that calls for an annual salary of $165,000. In addition, Freeman would receive performance incentives of 4 percent of any savings achieved in the 1990 budgeted operating expenses. The performance incentive is limited to $100,000.

SMUD is one of the nation's largest publicly owned electric utilities, serving over 440,000 customers in a 900 square mile service area within surrounding California's capital city -- one of the nation's fastest growing regions. The district is governed by a five-member board of directors elected for staggered four-year terms. The board makes policy decisions and appoints the general manager, who is responsible for district operations.

#90116b0259 04/26/1990 ~Business Wire

SHREWSBURY, NJ (APRIL 26) BUSINESS WIRE - Wellman Inc. (NYSE:WLM) Thursday announced that it has signed a letter of intent to acquire the outstanding stock of New England CRInc. (CRInc.) and its subsidiary Materials Recovery Inc. (MRI).

The company anticipates that in connection with the merger it will issue up to 325,000 shares of common stock to CRInc. shareholders.

New England CRInc. is a privately owned recycling company incorporated in 1982. CRInc.'s subsidiary MRI, formed in 1987, is a leader in the United States in the design, construction and operation of material recycling facilities (MRFs) and holds exclusive North American rights to the Bezner automated material sorting process, a West German MRF sortation technology considered one of the best in the world.

MRFs are facilities which separate and process co-mingled recyclables, such as plastic, glass, aluminum, steel and paper reclaimed from households and commericial establishments through curbside recycling programs. The recyclables are then sold as feedstock for new products.

MRI operates the largest and most advanced commercial MRF currently in operation in the United States, in Johnston, Rhode Island, and has been selected as prime vendor to design, build, equip and/or operate MRFs in DuPage County, Ill., Montgomery County, Md., Cumberland County, N.J., Brookhaven, N.Y., Dutchess County, N.Y., and a second MRF in Rhode Island at Quonset Point.

CRInc. is also a sales representative for recycling equipment manufacturers, in addition to Bezner, and operates two glass beneficiation

facilities in California in partnership with Anchor Glass.

CRInc. was formed by a consortium of beverage distributors and wholesalers in response to deposit legislation enacted by Massachusetts requiring beverage companies to collect used containers returned to retailers by consumers. The shareholders of CRInc. intend to form a new limited partnership to continue CRInc.'s deposit container pick-ups in Connecticut Massachusetts and Vermont and curbside pick-ups in Massachusetts, New Hampshire and Vermont.

The plastics generated by these programs will be sold to Wellman under a five-year purchase agreement. The parties are also entering into a non-competition agreement which will call for payments to the limited partnership totaling approximately $5.5 million over a four-year period.

Wellman, the nation's largest recycler of plastic, fibre and film wastes, manufactures and distributes high-quality polyester textile fibres under the Fortrel (R) brand name and produces polyester and nylon fibres and plastic resins from its recycling operations.

SAN DIEGO (APRIL 26) BUSINESS WIRE - Furnishings 2000 Inc., which operates 42 retail furniture and home furnishings stores throughout California, has settled a class-action lawsuit brought in 1988 that alleged discrimination on the basis of gender.

On Monday, Apr. 23, the Superior Court in Hayward gave its final approval to the settlement as a result of a joint petition by counsel for Furnishings 2000 and class counsel. As previously announced, among other things, the settlement provides for the creation of a fund of $425,000 to provide damages for class members as well as $50,000 for the named plaintiffs.

Additionally, Furnishings 2000 will spend $250,000 over the next seven years to improve the retention and recruitment of women blue-collar employees.

#90116b0614 04/26/1990 ~Business Wire
MENLO PARK, CA (APRIL 26) BUSINESS WIRE - Raychem Corp. Thursday reported a third quarter fiscal 1990 loss of $108 million, or $3.01 per share,

compared to income of $2.4 million, or 7 cents per share in the corresponding period last year.

The quarter's loss reflects a previously announced $90 million restructuring charge, an $11 million tax provision and a pre-tax loss from operations of $7 million. Third quarter sales increased 8.0 percent to $292 million from $270 million in the comparable period of the prior year.

In fiscal 1989, other income for the third quarter included a gain of $8 million from fees associated with the formation of joint ventures and the sale of the company's Ferex embedded anode technology.

Gross profit margin was 46 percent compared with 51.4 percent in the third quarter of last year. The decline in gross profit margin is primarily attributable to the electronics sector. That sector experienced price erosion, product shifts from defense to commercial markets, high unit costs in United States factories and continued high cost of producing newer commercial products.

As a consequence of the company's changing business and product mix, a provision for inventory obsolescence in the amount of $8 million was included in cost of products sold in the quarter compared to $4 million in the third quarter of the prior year.

Raynet recently announced its LOC-2 system which is designed for volume production.

Raychem also announced its regular quarterly dividend of 8 cents per share payable June 6 to stockholders of record as of May 9.

Raychem is a broadly based materials science company serving international markets. The company develops and supplies high-performance products for the aerospace, automotive, construction, electronics, electrical power, process and telecommunications industries.

SAN JOSE, CA (APRIL 26) BUSINESS WIRE - Businessland Inc. (NYSE:BLI) announced sales of $323,405,000 for the third fiscal quarter ended March 31, 1990.

Revenues were up 10 percent compared with $293,295,000 for the comparable period last year. The company's consolidated operating earnings of $186,000 were in line with the estimate released on April 5, 1990.

Earnings of the company's primary U.S. business operations were substantially offset by losses at ComputerCraft and in the United Kingdom.

After interest expense, net of interest income, the company will report a loss of $1,679,000, or 6 cents primary loss per share, for the quarter. For the comparable period last year, the company reported net income of $8,479,000, or 27 cents per share, on a primary basis.

For the nine months ended March 31, 1990, sales of $1,014,290,000 were up 17 percent from sales of $866,188,000 for the nine months ended March 31, 1989. Net income for the nine months was $1,375,000, or 4 cents primary earnings per share, compared with net income of $25,469,000, or 85 cents primary earnings per share, in the prior period.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, two in West Germany and five in Canada.

LOS ANGELES (APRIL 26) BUSINESS WIRE - Investor's Daily, the six-year-old national business newspaper, announced that paid advertising in the first quarter jumped 39 percent from the same period a year earlier.

Advertising in the last six months was up 33 percent from a year earlier. Major increases in corporate advertising were mainly responsible, it added.

William J. O'Neil, founder and publisher, said the gains were especially gratifying in view of the fact that most other publications are suffering declines in ad revenue -- some of them very large declines.

He attributed Investor's Daily's gains to the results advertisers are getting from the paper's sophisticated and discriminating readers.

#90116b0620 04/26/1990 ~Business Wire

SAN JOSE, CA (APRIL 26) BUSINESS WIRE - Rasna Corp. announced Thursday that it has shipped its flagship product, Applied Structure, to Rasna Systems Integrators, the company's VAR channel, and to customers.

In addition, Rasna Japan, the company's Tokyo-based joint venture company, has concurrently shipped product in Japan. The Kubota Corp./Rasna joint venture has produced a Japanese version of the product and developed a distribution channel made up of Japan's largest MCAE distributors.

These companies include: Sumisho Electronics Co., a subsidiary of Sumitomo Trading Co.; C. Itoh Techno-Science Inc.; Nihon Unisys Ltd.; and Kozo Keikaku Kenkyujo Inc., a large computer and software consulting service specializing in structural analysis.

Since Applied Structure was introduced at Autofact '89, Rasna has established its RSI channel, consisting of 30 of the top AutoCAD and Sun computer resellers.

These include $18 million, Germantown, Wis.-based Professional Control Corp., $15 million, Palo Alto, Calif.-based AVCOM Systems Inc., $14 million, Mississauga, Ontario-based Rand Technologies and $11 million, Grand Rapids, Mich.-based Information Decisions Inc. among other highly successful VARs. In addition, Rasna has received a backlog of orders for the design optimization tool.

Applied Structure provides a truly revolutionary breakthrough in mechanical design automation. This mechanical design evaluation and optimization tool makes it easy for a design engineer to apply analysis techniques and design performance studies (design sensitivity and true shape optimization) to quickly find the optimal design of a part or product.

For example, when redesigning a part, the objective may be to improve product performance by reducing weight, increasing strength or altering the natural frequencies of the part. All of these things can be executed quickly and easily using Applied Structure.

The initial release of Applied Structure is seamlessly integrated with AutoCAD; it appears as a selection on the AutoCAD menu.

Key features to the product include: Geometric Element Modeling (GEM), which makes model development simple and intuitive; Geometric Element Analysis (GEA), which makes automatically adaptive analysis possible on a desktop computer; user-specified accuracy, which provides the ability for Applied Structure to converge to a solution level specified by the user; and true geometric design optimization which allows for true shape

optimization in just one step.

Applied Structure is available on DOS-based 386 platforms and Sun Unix workstations and compatible systems.

Headquartered in San Jose, Rasna Corp. was founded in 1987. The company develops and markets user-intuitive, design optimization software tools for mechanical design engineers. Applied Structure is the first tool in the Mechanica family. Rasna has an OEM agreement with Huntsville, Ala.-based Intergraph Corp. and a strategic alliance with Osaka, Japan-based Kubota Ltd.

#90116b0648 04/26/1990 ~Business Wire

SAN FRANCISCO (APRIL 26) BUSINESS WIRE - Transamerica Corp. Thursday announced that its first-quarter 1990 net income, including after-tax gains on investment transactions of $5.2 million, was $70.3 million ($.88 per share), compared to $70.9 million ($.89 per share), including investment gains of $19.4 million, for the first quarter of 1989.

Income from operations, which excludes investment gains, was $65.1 million ($.81 per share) for the first quarter of 1990, up 26 percent from $51.5 million ($.63 per share) a year ago.

Transamerica's finance operations, comprising consumer lending, commercial lending, leasing and real estate services, achieved a 10 percent increase in first-quarter earnings.

The consumer lending operation achieved record first-quarter earnings of $20.3 million, up 17 percent over last year's first quarter, as margins improved and consumer loans secured by real estate grew at a 9 percent annualized rate to a record $2.8 billion.

In commercial lending, earnings of $12.7 million were approximately the same as last year's first quarter, as improved performances in core inventory finance lines such as electronics, appliances and computers were offset by weaknesses in the marine, recreational-vehicle and rental markets.

Transamerica's leasing operation reported first-quarter earnings of $10.4 million, down 13 percent from last year's record first quarter. Demand for the company's standard containers remained at very high levels, but demand for domestic rail and over-the road trailers was down from last year's levels.

In real estate services, earnings increased 48 percent to $9.6 million due primarily to new business at the company's real estate tax service operation. During the quarter, Transamerica completed the previously announced sale of its title insurance operation; proceeds from the sale were approximatly equal to the title company's book value and had no effect on first-quarter earnings.

First-quarter earnings for Transamerica's insurance operations, comprising life insurance and property and casualty insurance operations, were 14 percent higher in 1990 than 1989.

Life insurance operations reported a 14 percent increase in first-quarter earnings, to $33.5 million, as the individual insurance, pension, reinsurance and foreign lines all turned in strong performances. Improved investment margins and reduced expenses contributed to these results. Life insurance earnings included $2.5 million in investment gains in the first quarter of 1990 and $3.5 million in the like period a year ago. Earnings before investment gains were a first-quarter record.

#90116b0649 04/26/1990 ~Business Wire

LOS ANGELES (APRIL 26) BUSINESS WIRE - UnionFed Financial Corp. (NYSE:UFF) Thursday announced a decrease of 18 percent in earnings for the third quarter of the 1990 fiscal year, compared with the third quarter of the prior year which featured a large one-time gain of $3.4 million resulting from the sale of Freddie Mac stock.

Despite the decline in quarterly earnings, earnings in the nine months ending in March increased to $12.8 million, or $1.76 per share, from $12.4 million and $1.85 per share, in the prior year.

Net income for the quarter was $4.2 million, or 56 cents per share fully diluted, compared with $5.1 million, or 74 cents per share in the comparable quarter of the prior year. Book value per share fully diluted was $22.59 at March 31, 1990, compared with $20.29 a year earlier, an increase of 11 percent.

Operating or ''core'' income, defined as net interest margin minus non-interest expense, improved dramatically in the quarter due primarily to a 50 basis point increase in spread from 2.14 percent at March 31, 1989, to 2.64 percent at March 31, 1990.

Net interest margin increased to $15.9 million in the quarter, from $12.8 million, in the comparable period in the prior year. Meanwhile, non-interest expense increased only $600,000, from $9.8 million, to $10.4 million.

UnionFed Financial also announced that its principal subsidiary, Union Federal Savings Bank, completed the restructuring of $25 million in loans located in the state of Maine, which restructuring had previously been reported as in progress in UnionFed's second quarterly report.

As a result of the restructuring, the existing borrowers have joined in partnership with two experienced real property developers who will take over the management of the properties. The bank charged off against its reserves as of the third quarter the amount of $1.9 million in connection with the restruturing. After the charge off, the bank's general reserves at March 31, 1990, were $7.3 million, compared with $4.4 million, as of March 31, 1989.

UnionFed Financial is the holding company for Union Federal Savings Bank, a federally insured savings bank with $2.4 billion in assets and 26 branches in Southern California.

#90116b0656 04/26/1990 ~Business Wire

HARTFORD, CT (APRIL 26) BUSINESS WIRE - Shawmut National Corp. Thursday reported net income of $40.6 million, or 55 cents per common share, for the quarter ended March 31, 1990, compared with $64.7 million, or 85 cents per common share, for the first quarter of 1989.

Compared with the 1989 first quarter, the current quarterly results reflected a substantially larger provision for loan losses, an increase in the level of nonperforming assets and expenses associated with the recently completed regulatory examination of the corporation.

Those factors were partially offset by gains resulting from the settlement of certain pension obligations and an extraordinary credit of $8.5 million arising from the utilization of a net operating loss carryforward.

The corporation's interest-earning assets averaged $24.2 billion in the first quarter of 1990, down 1 percent from $24.4 billion for the comparable 1989 period. Total loans averaged $18.9 billion for the first quarter of 1990, up 2 percent from $18.6 billion for the first quarter of 1989.

First quarter net interest income, on a fully taxable-equivalent basis, was $212.6 million, a 17 percent decrease from the same period in 1989. This decrease resulted from a modest reduction in interest earning assets and reduced interest income of approximately $10 million in connection with the sale of securitized assets, combined with lower net interest margins.

The corporation's net interest margin was 3.56 percent, vs. 3.76 percent for the fourth quarter of 1989 and 4.25 percent for the first quarter of 1989. The net interest margin decline was a result of the higher level of nonperforming assets in the first quarter of 1990 combined with a lower level of noninterest-bearing deposits, compared with both the first and the fourth quarters of 1989.

The reserve for possible losses on loans amounted to $772.3 million, or 4.53 percent of total loans outstanding at March 31, 1990, compared with $285.1 million, or 1.53 percent, at March 31, 1989. The provision for possible losses on loans for the 1990 first quarter was $69.0 million, compared with $16.5 million in the first quarter of 1989.

During the first quarter the corporation realized $7.3 million of gains from investment securities transactions.

Noninterest expenses were $226.5 million in the first quarter, compared with $211.3 million in the first quarter of 1989. Noninterest expenses for the first quarter included approximately $13 million of expenses associated with the recently completed supervisory examination of the corporation.

At March 31, 1990, 73.2 million common shares were outstanding. On March 31, 1990, Shawmut National Corp. had total assets of $24.9 billion, total deposits of $19.3 billion, and total loans of $17.0 billion.

Shawmut National Corp. is a superregional bank holding company with headquarters in Hartford and Boston. The corporation has a branch network of nearly 400 offices in New England. Its principal banking subsidiaries are Connecticut National Bank in Hartford and Shawmut Bank in Boston.

#90116b0662 04/26/1990 ~Business Wire

GREENWICH, CT (APRIL 26) BUSINESS WIRE - Beginning on April 26, the first bottles of Perrier will be arriving in American supermarkets and restaurants.

The national roll-out begins in New York, followed shortly by Miami and Los Angeles. Perrier will be back in 90 percent of all U.S. markets by the end of May, 1990. The product is bottled solely at its single source in Vergeze, France, and from there it is shipped worldwide.

Consumers will be asked to look for the brand's new label featuring the words ''Nouvelle Production'' or ''New Production.'' The Food and Drug Administration (FDA) has inspected the Perrier source and bottling facility in France and found it to be satisfactory.

Perrier has agreed to make certain changes in labelng information at the request of the Food and Drug Administration. These changes include the description of the natural source of Perrier's carbonation in place of the words ''naturally sparkling.'' The new labeling will appear on product bottled after July 30, 1990.

The label will read ''Natural Mineral Water'' and on the side panel, ''Since 1863, bottled only at Source Perrier, Vergeze, France. The carbonation used in Perrier is taken from a naturally occuring source found deep within the earth.''

Perrier points out that the FDA does not have any definition of natural carbonation or natural mineral water and that Perrier has always conformed to European Economic Community (EEC) standards for describing its product, which are the only standards that exist. None of the changes requested by the FDA reflect any alteration in Perrier water or the way it is produced.

Perrier says its current labeling refers to its continuing practice of blending natural carbonation produced in the earth with Perrier's natural mineral water captured at the source.

To facilitate bottling, Perrier traps the gas and the water separately, and the gas is recombined in the water, after filtering to remove any extraneous elements.

Generally, carbon dioxide gas, whether produced commercially or in nature, carries trace elements of minor impurities that must be filtered. This bottling process has been carefully designed to preserve the natural product, not alter it.

''We believe the FDA is trying to act in the interest of clarity and consumer information. While we do not agree with the need for these changes and feel that our label has always adequately and accurately described our product, we have made these changes to comply with FDA request and to act responsibly in quickly returning Perrier to our consumers,'' says Ronald V. Davis, president of The Perrier Group of America.

''Most importantly, we can go back to doing what we've done best for 127 years -- getting Perrier into the hands of millions of people who tell us it's just irreplaceable.''

LOS ANGELES (APRIL 26) BUSINESS WIRE - MGM Grand Air, the luxury coast-to-coast airline which made its debut in Sept. 1987, announced Tuesday it will add three reconfigured DC-8 Super 62s to its transcontinental route in August, MGM Grand Air President and Chief Executive Officer Charles L. Demoney said.

The new aircraft will more than double MGM Grand Air's passenger and cargo capacity between New York and Los Angeles.

Two of the three DC-8 Super 62s will replace the current B727-100s in MGM Grand Air's regularly scheduled coast-to-coast flights. The planes will be reconfigured from their original seating arrangement of 190 to a luxurious and spacious 81.

The $55.5 million investment in acquisition and refurbishment of the three planes equates to an average expenditure of more than $162,500 per seat.

Since its launch three years ago, MGM Grand Air has redefined the concept of luxury travel and its financial results confirm its success. For the year ended Dec. 31, 1989, the airline posted revenues of $30,230,000 compared to $22, 271,000 for 1988, an increase of $7,959,000, or 36 percent.

The airline also posted significant gains in charter revenues and passenger loads.

All three of the DC-8 Super 62 aircraft are being equipped with state-of-the-art noise abatement equipment, making the fleet among the quietest DC-8s operating in the world. Other additions include all-weather color radar and provisions for collision avoidance and wind shear detection equipment.

The aircraft's new interiors will include beautifully designed paneling, oversized seats which recline and swivel, and essential business equipment such as an in-flight fax machine, 35 GTE Airfones and a technologically advanced audio1/4video system.

The front section of the aircraft features a fully functional stand-up bar that serves as an ideal gathering spot. This area includes 33 single, leather and fabric seats, with each seat having a clear view of several large video screens. Additional improvements include oversized dining trays and ample leg room.

The center of the aircraft provides yet another zone of comfort. In this section, guests can enjoy the privacy of seating in one of two staterooms, each containing two video monitors and four large seats which can convert into twin or queen size beds. The staterooms are perfect for conducting meetings or for passengers who need rest in anticipation of their arrival in New York or Los Angeles.

In the aft section, MGM Grand Air features ten rows of two-by-two oversized seats, appropriate for passengers traveling in pairs. With this design, each passenger has an individual television monitor and GTE Airfone.

#90116b0665 04/26/1990 ~Business Wire

AKRON, OH (APRIL 26) BUSINESS WIRE - The Uniroyal Goodrich Tire Co., the second-largest manufacturer of passenger and light-truck tires in North America, Thursday announced operating income for the first quarter ended March 31, 1990, of $24.0 million on sales of $486.6 million, compared with

operating income of $22.3 million on sales of $537.6 million for the first quarter of 1989.

Net loss for the first quarter 1990 was $6.7 million, compared with a net loss of $7.0 million in the first quarter of 1989.

Sheldon R. Salzman, president and chief operating officer, said, ''First quarter sales, which historically are soft, were further affected this year by a softening in both our original equipment and replacement markets. We began to see a return to normal O.E. requirements late in the first quarter and expect the automotive market to continue to improve during the remainder of the year.''

In spite of a sales volume decline of $51.0 million, operating income for 1990 improved due to higher margins from a better mix in the replacement market and a containment of costs. Operating income for 1990 was also adversely affected by $2.1 million of costs related to the pending Michelin acquisition.

#90116b0666 04/26/1990 ~Business Wire

JEFFERSONTOWN, KY (APRIL 26) BUSINESS WIRE - In response to growing business volumes in Jeffersontown, CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., has opened a new 25-door terminal with increased capacity for serving the freight transportation needs of Jeffersontown and surrounding communities.

The new four-acre facility, located at 2050 Waterson Trail, serves businesses in Eminence, Jeffersontown, La Grange, Louisville, Madison and Shelbyville.

The terminal is the area's link to CF Motor Freight's nationwide freight-flow system, a 667-terminal network covering 99 percent of the communities in the United States and Canada.

''This new facility enables us to provide top-quality service to businesses and industries in the Jeffersontown area,'' said Roy Amburn, Jeffersontown terminal manager.

The new Jeffersontown facility is a spin-off of the company's Louisville terminal, which has served businesses in Kentucky for more than 40 years. Current CF Motor Freight customers in the Jeffersontown area include Louisville Bedding, Union Camp and J.H. Sexaur. Among the commodities transported are plumbing fixtures, textiles and plastics.

The new terminal has 15 employees -- eight drivers and seven office workers -- and uses eight tractors and 30 trailers to carry freight for its local customers.

Like all CF Motor Freight terminals, Jeffersontown is tied into the company's freight-flow system through a sophisticated nationwide computer freight tracking and data-management network.

The company's system enables Jeffersontown customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing volume and other freight profile and logistics information that helps customers manage their businesses.

The company also provides related computer programs and services utilizing a customer's own computer resources. These include OMNIRATE, a personal computer-based software program that simplifies the pricing of freight shipments; LOGISTICS MANAGER, a PC-based program that streamlines shipping functions by automatically preparing bills of lading and shipping labels; and CF DIRECT, a telecommunications link that allows customers to directly access CF's computer network for shipment information and specialized reports.

CF Motor Freight provides intermediate and long-haul transportation of less-than-truckload freight, which are commercial and industrial shipments generally weighing less than 10,000 pounds.

It is the largest subsidiary of Consolidated Freightways which in addition to long-haul trucking, has businesses in regional next-day trucking, domestic and international air freight, intermodal truckload, customs brokerage and ocean freight services.

NASHUA, NH (APRIL 26) BUSINESS WIRE - CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., has opened a new 16-door Nashua terminal in order to provide improved freight transportation services to its customers in Nashua and surrounding communities.

The new three-acre facility, located at 91 North Eastern Blvd., serves

businesses in Antrim, Jaffrey, Merrimack, Nashua, Peterborough and Salem, N.H., as well as northern Massachusetts cities, including Pepperell.

The terminal is the area's link to CF Motor Freight's nationwide freight-flow system, a 667-terminal network covering 99 percent of the communities in the United States and Canada.

The new Nashua facility is a spin-off of the company's Lowell, Mass., terminal, which has been serving southern New Hampshire and northern Massachusetts businesses for more than 20 years. Current CF Motor Freight customers in the Nashua area include: Nashua Corp., Anheuser-Busch Inc., Brookstone Corp., W.W. Cross Co. and James River Corp. Textiles, high-technology products and paper goods are among the commodities transported.

The new 3,000-square-foot terminal has 11 employees -- seven drivers and four office workers -- and uses five tractors and 17 trailers to carry freight for its customers.

Like all CF Motor Freight terminals, Nashua is tied into the company's freight-flow system through a sophisticated nationwide computer freight tracking and data-management network.

The company's system enables Nashua customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing, volume and other freight profile and logistics information that helps customers manage their businesses.

CF Motor Freight provides intermediate and long-haul transportation of less-than-truckload freight, which are commercial and industrial shipments generally weighing less than 10,000 pounds.

#90116b0671 04/26/1990 ~Business Wire

EFFINGHAM, IL (APRIL 26) BUSINESS WIRE - In response to growing business volumes in the Effingham area, CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., has opened a new 12-door terminal with increased capacity for serving the freight transportation needs of Effingham and surrounding communities.

The new 2.5-acre facility, located on Rural Route 4 in Teutopolis, serves business in Arcola, Charleston, Effinghamn, Flora, Greenup, Mattoon, Neoga Newton, Olney, St. Elmo, Toledo and Vandalia.

The terminal is the area's link to CF Motor Freight's nationwide freight-flow system, a 667-terminal network covering 99 percent of the communities in the United States and Canada.

Prior to opening a full-service terminal in Effingham, CF Motor Freight provided direct service to the community through the company's Terre Haute Ind., terminal. Steady increases in the amount of freight shipped by local businesses created a need for a full-service operation in Effingham.

Today, CF's Effingham-area customers include John Boss Furniture, Trailmobile, Servistar Corp. and R.R. Donnelly Publishers. Commodities transported range from home furnishings to printed materials.

Measuring 6,500 square feet, the new facility has eight employees -- five dockmen, one driver and two office workers -- and uses four tractors and 20 trailers to carry freight for its customers.

Like all CF Motor Freight terminals, Effingham is tied into the company's freight-flow system through a sophisticated nationwide computer freight tracking and data-management network.

The company's system enables Effingham customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing, volume and other freight profile and logistics information that helps

customers manage their businesses.

The company also provides related computer programs and services utilizing a customer's own computer resources. These include OMNIRATE, a personal computer-based software program that simplifies the pricing of freight shipments; LOGISTICS MANAGER, a PC-based program that streamlines shipping functions by automatically preparing bills of lading and shipping labels; and CF DIRECT, a telecommunications link that allows customers to directly access CF's computer network for shipment information and specialized reports.

#90116b0672 04/26/1990 ~Business Wire

WESTBORO, MA (APRIL 26) BUSINESS WIRE - Data General Corp. Thursday reported continued progress toward profitability in its second fiscal quarter ended March 31, 1990.

For the quarter, the company reported a net loss of $8.6 million, or $.29 per share, on revenues of $314.8 million, compared with a net loss for the first quarter of fiscal year 1990 of $20.5 million, or $.69 per share, on revenues of $290.7 million.

During last year's second quarter, the company reported income of $7.0 million, or $.23 per share, on revenues of $342.7 million, including an $8.5 million pretax gain from the sale of a company facility in Manhattan Beach, Calif.

The operating loss for the second quarter of $7.3 million dropped sharply from the first quarter's loss of $18.4 million, but trailed the operating income of $1.1 million for the second quarter last year.

Net loss for the first six months of fiscal 1990 was $29.1 million, or

$.98 per share. For the same period last year, the company reported a net loss of $12.5 million, or $.43 per share.

Revenues for the first two quarters of 1990 totaled $605.5 million, compared with $651.3 million for the same period last year.

Operating loss for the six-month period was $25.7 million, compared with operating loss of $16.4 million in the prior year.

BOSTON (APRIL 26) BUSINESS WIRE - United Asset Management Corp. (UAM) Thursday announced that its net income in the first quarter of 1990 rose 27 percent to $4,345,000 from $3,410,000 in the same quarter a year ago.

Fully diluted earnings per share for the first quarter were 26 cents, an 18 percent increase over the 22 cents reported in 1989. Revenues in the quarter increased 19 percent to $40,069,000 from $33,571,000 a year earlier. Operating income increased 16 percent to $10,335,000 from $8,881,000 in the 1989 quarter.

Operating Cash Flow (cash flow provided by operations before working capital changes) rose to $12,168,000, a 22 percent increase over the first quarter of 1989. Amortization of cost assigned to contracts acquired, a significant component of Operating Cash Flow, increased to $6,493,000 in the quarter from $5,535,000 in the first quarter of 1989.

Amortization on a per share basis was 31 cents in the first quarter of 1990, up from 27 cents in the like period of 1989.

Norton H. Reamer, president of UAM, stated, ''UAM's results in the first quarter of 1990 were significantly ahead of those in the first quarter of 1989 and at or near the record results achieved in the fourth quarter of 1989, in spite of the unfavorable market performance in the first quarter. We believe that we continue to be well positioned for internal growth as well as further growth by acquisition.''

UAM provides investment management services, primarily to institutional clients, through 22 operating firms which manage nearly $38 billion for 3,400 clients located throughout the United States and abroad.

UAM is listed on the New York Stock Exchange, Ticker Symbol: UAM

#90116b0679 04/26/1990 ~Business Wire

PITTSBURGH (APRIL 26) BUSINESS WIRE - Mylan Laboratories Inc. (NYSE:MYL), the leading independent generic drug manufacturer announced that their fourth quarter which ended March 31 is the highest ever for the company in both sales and earnings.

Earnings for the year are a record high as well. Sales for the fourth quarter were $27,102,000 vs. $21,577,000 for the same quarter last year. This figure does not reflect the sales from Eldepryl.

Net income rose to $9,675,000 from $3,760,000 and earnings per share increased to 26 cents vs. 10 cents for the comparable period last year. The dramatic increase in net earnings and earnings per share include revenues from the Eldepryl joint venture and reflect the continued contribution we can expect from this product.

Fiscal year 1990 sales are $95,415,000 vs. $87,930,000 and the record net earnings are $26,210,000 against $18,270,000 last year. Record earnings per share are 72 cents vs. 50 cents last year.

Roy McKnight, chairman and C.E.O. stated that management is particularly pleased with these results in a very difficult year for the industry. Even with the lack of approvals, Mylans's core business continues to grow and revenues from Elderpryl continue to add to the bottom line. McKnight concluded by reaffirming his confidence in Mylan's leading position in the industry and its long term growth prospects.

#90116b0681 04/26/1990 ~Business Wire

CANTON, MA (APRIL 26) BUSINESS WIRE - Instron Corp. Thursday reported quarterly revenues and earnings for the first quarter of 1990.

Net revenues for the quarter ended March 31, 1990 were $26,419,000, compared with $27,130,000 for the first quarter of 1989. Net income was $528,000, or 9 cents per share, compared with $411,000, or 7 cents per share in 1989.

The company reported that net revenues for the quarter were down nearly 3 percent over last year caused by lower bookings, which were also down 3

percent. The lower bookings were attributed primarily to weaker domestic business activity. The backlog of customer orders at March 31, 1990 was $30,115,000, or slightly higher than a year ago.

Harold Hindman, chairman of Instron, said that the Company had expected bookings to be sluggish during the first quarter and had adjusted the organization's expense level to that forecast.

Meanwhile, international business in Europe and the Pacific Rim remained strong. ''While our booking and shipment amounts for the quarter reflect the slowdown of the U.S. economy, our cost containment programs ensured that our bottom line did not deteriorate,'' said Mr. Hindman.

Hindman commented that he was encouraged by the improvements in profits and the continuing efforts being placed on managing the company's cash flow. ''The reductions in accounts receivable and the controlling of expenditures were key factors in reducing our debt during the quarter. Our three major financial objectives for 1990 are improvements in profits, cash flow and return-on-equity,'' he said.

Hindman expects the company's international business to remain strong throughout the year, but remains cautious about domestic business improving any earlier than the second half of 1990. Instron Corp., listed on the American Stock Exchange (ISN), is a leading producer of instruments and systems for advanced materials testing.

SAN JUAN CAPISTRANO, CA (APRIL 26) BUSINESS WIRE - Nichols Institute (ASE:LAB) announced Thursday that it has reached an agreement in principle

to acquire the clinical laboratory operations of Associated Laboratories Inc. (dba Pathology Laboratory), located in Los Gatos, Calif., in the Silicon Valley south of San Francisco.

Consideration to be paid for the business and related covenants not to compete will consist of $2 million in cash, future payments with a present value of $2.5 million, and a new class of preferred stock convertible into approximately 120,000 shares of Nichols Institute common stock. Consummation of the transaction is subject to the parties entering into a definitive agreement and satisfaction of a number of conditions.

Pathology Laboratory serves physicians, hospitals and clinics in the five-county area immediately south of San Francisco. For the fiscal year ended June 31, 1989, Pathology Laboratory's clinical laboratory revenues were approximately $6.5 million.

Albert L. Nichols, M.D., chairman and president of Nichols Institute, said the acquisition will enhance the service capability of Nichols Institute in the south San Francisco Bay area. Nichols also stated that the Institute is looking forward to its new association with Associated Pathology Medical Group, which provides services to Pathology Laboratory and the surrounding medical community.

Nichols Institute provides esoteric diagnostic testing to clients nationwide in the fields of endocrinology, genetics, immunology, microbiology, molecular biology, oncology, serology, special chemistries, toxicology and virology. It also has regional laboratories in California, the Pacific Northwest and in the Midwest which provide clinical testing to those markets. Substance abuse testing is also provided to clients nationwide. Nichols Institute Diagnostics manufactures kits for the performance of medical diagnostic tests which are distributed worldwide.

#90116b0693 04/26/1990 ~Business Wire

BATAVIA, NY (APRIL 26) BUSINESS WIRE - Graham Corp. (ASE:GHM) Thursday reported results for the first quarter ended March 31.

Sales were $16,152,000 producing net income of $332,000 or 33 cents per share.

Sales for the 1989 first quarter were $14,196,000 producing net income of $58,000 or 6 cents per share.

New orders for the three months ending March 31, were $15,222,000 compared

to $17,220,000 for the similar 1989 period.

Backlog on March 31, was $39,627,000 compared to $40,404,000 on Dec. 31, 1989 and to $30,445 on March 31, 1989.

Commenting on these results Frederick D. Berkeley, Graham's Chairman and CEO, said ''We are pleased with the first quarter results. In February of this year I said that due to the nature of our business Graham often experiences considerable fluctuation in quarterly shipments and profit and that we anticipated the first quarter of 1990 would be the lowest of the year with results improving in the second quarter.

This continues to seem to be the case, with particularly strong shipment levels scheduled for the second quarter. Based on our strong backlog and continuing indications of good business levels and activity in the process industries, and as noted in the company's annual report, we are optimistic about the year 1990 and enthusiastic about meeting the challenges of what should be a busy year for Graham. Our consolidated sales goal for 1990 is $80 million and we expect all four of our subsidiary companies to contribute to our profitability.''

Graham designs and manufactures vacuum and heat transfer equipment for the process industries. The principal market for Graham's equipment are the chemical, petrochemical, petroleum refining and electric power generating industries, including co-generation and geothermal plants.

Other process industry markets served include the food and beverage industry, shipbuilidng, steel mills and paper mills.

#90116b0696 04/26/1990 ~Business Wire

ATLANTA (APRIL 26) BUSINESS WIRE - Days Inns of America Inc. Thursday announced that its first quarter franchise sales figures broke all records and propelled the company closer to its goal of 1,800 properties by year end 1991.

Michael Leven, president, disclosed that 114 franchise agreements were executed during first quarter 1990.

An analysis of these 114 Days franchises indicates that 57 are new

construction and 57 conversions. Located in 32 states, these properties further Days' growth throughout every region of the country. Among the 114 agreements, 15 are for Daystops, while 99 are for Inns.

John Snodgrass, executive vice president of franchising, noted that an unprecedented 68 franchise agreements were executed in one week. This number is more than twice the number of franchises sold in 52 weeks by Howard Johnson or Travelodge during 1989.

''These explosive numbers are evidence of the real value of the Days flag in the marketplace,'' said Snodgrass. ''We close this number of deals because Days has the most effective reservations system in the industry and a marketing arm with proven capability to fill room nights.''

Snodgrass also said he attributes such sales figures to ''a proven track record...we sell because we have what the customer needs.'' Once an agreement has been executed and a franchisee joins the system, he or she enters into a close relationship with a member of the staff of Franchise Services Managers who is empowered to answer all the needs of a franchisee. Last year this department resolved 90 percent of all issues within 24 hours.

Days Inns of America Inc., with its Days brand inns, hotels, suites and Daystops, is the third largest hotel brand in the world and the fastest growing in the moderate price segment of the market. An international lodging operator and franchisor, the chain has hotels open and under development in 50 states, Canada, Mexico, Europe, the Pacific Rim and India.

DALLAS (APRIL 26) BUSINESS WIRE - Whitehall Corp. (NYSE:WHT) announced that management is confident that, based on a preliminary report from the independent Inspectors of Election, all five of its nominees received the required plurality of votes cast needed to be re-elected to the board of directors at the annual meeting held on Monday, April 23.

Lee D. Webster, chairman of the board, stated, ''I am grateful for the support shown by our shareholders which demonstrates that our shareholders back Whitehall's strategic plan to continue the redirection of its two key business segments.

''I believe our shareholders have also shown their conviction that the current board and management are the best people to lead Whitehall both now and in the future.''

Whitehall Corp. adjourned its annual meeting held in Dallas on April 23, 1990 and announced that the Inspectors of Election will report the final outcome of the vote on Monday, April 30, 1990, at 2:00 p.m., Dallas time, in the meeting room on the fourth floor of Thanksgiving Tower, 1601 Elm St., Dallas.

Whitehall Corp. designs and manufactures marine sensor systems, adapts commercial geophysical technology for underwater threat detection systems for the military, rebuilds, modifies and maintains aircraft, and offers land and marine geophysical exploration services.

#90116b0702 04/26/1990 ~Business Wire

ROCKY HILL, CT (APRIL 26) BUSINESS WIRE - Ames Department Stores Inc. and its subsidiaries filed for protection under Chapter 11 of the U.S. Banruptcy Code in the Southern District of New York late last night.

Ames officials also announced that Chemical Bank has agreed to provide $250 million in Debtor in Possession (DIP) financing. The funds, the use of which is subject to bankruptcy court approval, will allow the company

to continue operations and pay for merchandise shipments while it prepares a reorganization plan.

Ames officials said the company sought court protection in order to restructure its business and finances and to restore the confidence of its vendors and suppliers.

Ames previously reported an estimated net loss of $228 million for the year ended Jan. 27, which includes an after-tax restructuring reserve of approximately $150 million.

The loss, before the restructuring reserve, was the result of increased competition and an overall industry downturn in sales. The sales shortfall has prevented the company from meeting its operating plans and has caused cash flow problems and a liquitity crisis.

"Unfortunately, our cash flow problems led to uncertainty in supplier relations and we could not reach agreements with our banks," said Ames Chief Executive Officer Peter B. Hollis. "The Chapter 11 filing will give our suppliers the assurance they need to resume the steady flow of merchandises into our stores."

Hollis said that bankruptcy court protection would allow the company to continue operting while it works with creditors to develop a plan to pay its debts.

Ames officials said the DIP financing of $250 million will place the company in solid financial footing while it formulates a reorganization plan for restructuring its debt. During the reorganization process, Ames stores will maintain normal business hours and will continue to accept credit card charges.

Ames, founded in 1958, currently has approximately 55,000 employees. The company operates more than 600 stores in 20 states and has an annual sales base of well over $4 billion.

COLUMBUS, OH (APRIL 26) BUSINESS WIRE - Marking its sixth consecutive quarter of profitability, Buckeye Financial Corp., parent of Buckeye Federal Savings and Loan Association, Thursday announced earnings of $550,000, or 21 cents per share for the quarter ended March 31, 1990.

This compares to earnings of $568,000 or 22 cents per share for the first

quarter of 1989.

Buckeye Federal Savings and Loan Association has assets of $902 million and offers a full array of lending and deposit products. Buckeye Federal has 18 branch offices in central Ohio and a loan origination office in Cincinnati.

On March 1, 1990, Buckeye signed a definitive agreement to be acquired by National City Corp., parent company of BancOhio National Bank. Completion of the merger, which is subject to approval by regulatory agencies and Buckeye shareholders, is anticipated by the third quarter 1990. National City is a $23.0 billion regional bank holding company headquartered in Cleveland. Its common stock is traded on the New York Stock Exchange under the symbol ''NCC.''

NASHVILLE, TN (APRIL 26) BUSINESS WIRE - Some of Nashville's publicly held companies are reemphasizing an important business lesson to Tennessee State University's School of Business: performance pays, to the tune of stock for the school worth nearly $8,900.00.

The ''Take Stock in TSU'' award recognizes the performance of TSU's Investment Club, which finished first nationally in managing imaginary stock portfolios in the second annual AT&T Collegiate Investment Challenge.

The 70-member Investment Club out-traded more than 150 other collegiate teams to end the competition with an average portfolio value of $483,446.

The award also honors the top-performing student stock trader in the investment club, Helen Trimble, a senior from Nashville. As part of ''Take Stock in TSU'' Trimble will receive 10 shares of common stock from most of the participating companies, a portfolio worth $666.88 on April 20.

Dr. Louis Miller, professor in the School of Business, who was the top trader nationally in the competition's professorial category, will be honored by Wall Street Games and AT&T officials.

Each Nashville company participating in the ''Take Stock in TSU'' program, which was conceived by Shoney's Inc., contributed 100 shares of its stock to the portfolio, which was valued at approximately $8,900 on April 20. The awards will be made at a luncheon on April 26 at Nashville's Union Station hotel hosted by Shoney's Inc.

TSU's Investment Club was founded two years ago with 26 members and the assistance of J.C. Bradford & Co. This year's expanded club of 70 members was made possible by Shoney's Inc.; First American National Bank; Third National Bank; Citizen's Bank; Merrill Lynch and J.C. Bradford & Co.

Its purpose is to give students real-life exposure to the exciting, fast-moving world of Wall Street and to stimulate interest in the investment industry.

Besides Shoney's Inc., other companies contributing shares of stock are First American Corp.; Dollar General Corp.; United Cities Gas Co.; Volunteer Capital Corp.; Surgical Care Affiliates; The Bank of Nashville; Po Folks Restaurants and Southern Hospitality Corp. Inc.

WESTFIELD, MA (APRIL 26) BUSINESS WIRE - Stanhome Inc. (NYSE:STH) announced Thursday that first quarter results were at new all time highs.

Sales increased 27 percent to $150,765,000, operating profit increased 7 percent to $15,641,000 and earnings per share fully diluted increased 19 percent to 50 cents per share compared to 42 cents per share in 1989. This year's results include the operations of the Hamilton Group Limited Inc., which was purchased in may 1989.

Hamilton's sales amounted to 12 percent of 1990 first quarter sales. Other income this year benefited from gains on the sale of assets which amounted to 3 cents per share.

Enesco's worldwide giftware sales and operating profit increased 16 percent. Worldwide direct selling sales increased 7 percent but operating profit decreased 10 percent. European direct selling sales increased in U.S. dollars due to favorable currency translation rates this year compared to 1989 but operating profit declined. United States and Latin American sales increased and both reported lower operating losses.

#90116b0711 04/26/1990 ~Business Wire

HOUSTON (APRIL 26) BUSINESS WIRE - Enron Oil & Gas Co. (NYSE: EOG) Thursday reported net income of $11.2 million or 15 cents per share for the first quarter of 1990. The company reported a loss of $.7 million or one cent per share for the same period a year ago. Comparable net revenues from operations were $96.3 million in the recent quarter compared to $74.6 million for the first quarter of 1989.

The 1990 results primarily reflect substantially increased wellhead natural gas sales and other natural gas marketing volumes, increased crude oil and condensate prices along with lower DD&A expenses and a lower effective federal income tax rate, according to Enron Oil & Gas Chairman and Chief Executive Officer Forrest E. Hoglund.

"Benefits resulting from those improvements were partially offset by lower average wellhead natural gas prices and an increase in exploration-related expenses," Hoglund said. "Our wellhead natural gas production volumes averaged 455 million cubic feet per day (MMcf/d) during the first quarter of 1990 compared to 337 MMcf/d during the same period a year ago."

Hoglund also noted that wellhead natural gas sales were substantially higher in January and February but curtailed during March and early April reflecting both weaker demand and prices. Estimated deliverability currently exceeds 500 MMcf/d reflecting increased capability in each of the company's three core areas.

Crude oil and condensate prices during the first quarter of 1990 averaged $19.77/barrel compared to $15.44/barrel a year ago. Natural gas prices averaged $1.67/Mcf during the current period versus $1.83/Mcf the prior year quarter.

Enron Oil & Gas reported income before interest and taxes of $21.2 million for the first quarter of 1990 compared to $7.6 million for the first quarter of 1989. Net income benefited from a lower effective federal income tax rate reflecting the partial utilization of a net operating loss carryforward available to the company. Discretionary cash flow increased to $61.8 million for the first quarter of 1990 compared to $35.5 million a year ago.

Enron Oil & Gas Co. is one of the largest independent (non-integrated) oil and gas companies in the United States in terms of domestic proved reserves. The company's reserve base is 91 percent domestic and 91 percent natural gas.

BARTLESVILLE, OK (APRIL 26) BUSINESS WIRE - Phillips Petroleum Co. United Kingdom Limited Thursday announced an exchange of U.K. North Sea assets with LASMO North Sea PLC.

Phillips Petroleum is to acquire LASMO's interests in License P.032 comprising a 3.195-percent working interest in Blocks 30/7a, 30/12a and 30/17a. Phillips is operator of License P.032; the acquisition will increase Phillips Petroleum's working interest to 35.875 percent. Block

30/7a contains the Joanne and Judy oil and gas fields which are under evaluation for development.

In return, LASMO is to acquire Phillips Petroleum's 35 percent working interest in that part of Block 16/27a containing the Andrew field. This acquisition will increase LASMO's working interest to 43.52 percent in this portion of the block.

Kirby Hedrick, Phillips Petroleum Co. United Kingdom Limited chairman and managing director said, "The Joanne and Judy fields represent Phillips Petroleum's next potential major development in the U.K. This asset swap allows us to strengthen our position in an important project where we are the operator. We believe that this license area has considerable remaining exploration potential."

These asset assignments are subject to the approval of the Secretary of State for Energy and any other necessary consents.

#90116b0735 04/26/1990 ~Business Wire

GREAT NECK, NY (APRIL 26) BUSINESS WIRE - For the third quarter of fiscal 1990 ended March 30, Avnet Inc. (NYSE:AVT) Thursday reported net income of $16 million or 44 cents per share on sales of $433.8 million compared with last year's third quarter net income of $10.7 million or 30 cents per share on sales of $474.9 million.

For the first nine months of fiscal 1990, Avnet reported net income of $49 million or $1.35 per share on sales of $1,303.4 million compared with last year's nine months net income of $34.2 million or 96 cents per share on sales of $1,461.8 million.

Last year's third quarter and nine months results included a $3.3 million or 9 cents per share one time loss on the sale of the Electronic Marketing Group's Sertech/LSI unit.

Avnet's Chairman and Chief Executive Officer, Leon Machiz, said that Avnet's net income, excluding the one time loss, improved by 14 percent for the quarter and 30 percent for the nine months despite a sales decline of 9 percent for the quarter and 11 percent for the nine month period.

He attributed the company's improved net income for both periods to a significant increase in the Electronic Marketing Group's earnings in each period which resulted from better margins, improved asset management and the elimination of losses by actions taken in the prior fiscal year in

divesting unprofitable units of the group.

The Electronic Marketing Group's third quarter sales, which represented 82 percent of consolidated sales, were about 6 percent lower than last year's third quarter sales. While the group's daily booking rate in the third quarter has trended sharply upward since December, its daily shipment rate has only been slightly higher than in the preceding quarter due principally to shortages of several important semiconductor devices.

Despite the impact of these shortages, the group's third quarter net income was 35 percent higher than last year's net income of the one time loss were excluded.

The Video Communications Group's third quarter sales, which were 6 percent of consolidated sales, declined 41 percent from the prior year's quarter due principally to phasing out certain of its Taiwan operations. As a result, its third quarter earnings were 89 percent lower than in the year earlier quarter.

NASHUA, NH (APRIL 26) BUSINESS WIRE - Nashua Corp. (NYSE:NSH) Thursday reported net income and income from continuing operations of $3.6 million, or 39 cents per share, for the quarter ended March 30, 1990. This compares with net income of $2.6 million, or 27 cents per share, and income from continuing operations of $1.4 million, or 14 cents per share, for the same period in 1989.

The international portion of the office systems and supplies business, which was sold by the company on April 2, 1990 and is reported as a discontinued operation, incurred a $0.2 million operating loss for the quarter. The estimated gain to be realized upon consummation of the sale exceeds the operating loss from discontinued operations.

Therefore, the operating loss has been deferred until this gain is realized during the second quarter.

Net income and income from continuing operations for the first quarter of 1990 include the effect of a $3.4 million pretax reserve taken against the company's receivable from a subsidiary of MiniScribe Corp. as a result of the pending sale of MiniScribe assets to Maxtor Corp. MiniScribe, a manufacturer of disc drives, is currently operating under Chapter 11 of the U.S. Federal Bankruptcy Code.

Net income for the first quarter of 1989 included a $1.3 million pretax charge related to severance of certain U.S. employees of which $.8 million was charged against income from continuing operations.

Sales from continuing operations for the first quarter of 1990 were $138 million compared with $136 million for the first quarter of 1989.

Management reported sharply higher first quarter sales in the Computer Products Group compared with a year ago, reflecting increased unit volume in small rigid discs. The higher volume led to substantial improvement in operating results over last year, despite the one-time charge associated with the MiniScribe receivable.

Sales for the Photofinishing Group were up compared with the same quarter last year. Revenues from the U.K. photofinishing business recently acquired from Hedley Taylor plc contributed to the sales gain. Operating income increased sharply due to higher prices and improved volume in the U.S.

Nashua Corp. provides a diverse mix of products and services which includes coated paper products, computer products, office supplies and photofinishing services.

BASKING RIDGE, NJ (APRIL 26) BUSINESS WIRE - The directors of Hooper Holmes Inc. (AMEX: HH) announced Thursday that it declared a $ .085 per share cash dividend for the second quarter of 1990, to all shareholders of record as of May 11, 1990 payable on May 25, 1990.

This dividend marks Hooper Holmes' forty-sixth (46th) consecutive quarterly cash dividend payment.

This second quarter dividend is an increase of some 13 percent over the same quarter last year and reflects the company's confidence in its strong financial position and operating results. Jim McNamee, president and chief executive officer, expects the company to continue its upward movement in revenue and operating profits throughout 1990.

#90116b0749 04/26/1990 ~Business Wire

HOUSTON (APRIL 26) BUSINESS WIRE - Enron Corp. Thursday reported net income of $101 million for the first quarter of 1990, or $1.88 per share after preferred dividends.

Net income rose 13 percent over 1989 first quarter net income of $89 million, which was $1.69 per share after preferred dividends. Comparable revenues were $3.1 billion in the most recent quarter and $2.5 billion a year ago.

Its earnings reflect lower sales margins from the implementation of its rate case settlement and unseasonably warm weather which resulted in lower sales volumes. The group reported average sales and transportation volumes of 8.83 billion cubic feet per day (Bcf/d) during the first quarter of 1990 compared to 8.67 Bcf/d a year ago.

The gas pipeline results also include a $19.8 million pre-tax ($14.4 million after-tax) reserve reversal for a reduction in estimated contingencies.

Corporate and other income for the first quarter of 1990 includes a $29.1 million pre-tax ($21.2 million after-tax) credit reflecting a one-time reduction in the cost of certain benefit plans. First quarter 1989 results included an $11.8 million pre-tax ($7.5 million after-tax) gain from the settlement of litigation between the ETSI Pipeline Project and the Kansas City Southern Railroad Co.

A pre-tax gain of $36.5 million ($23.2 million after-tax) also was realized in the 1989 period from the sale of 956,500 shares of Mobil Corp. common stock. Enron did not sell any Mobil stock during the first quarter of 1990 and currently has 1.4 million shares available for future sale.

As previously announced, Enron will receive proceeds of approximately $69 million for its 29.5 percent share of the settlement of litigation between the ETSI Pipeline Project and Santa Fe Pacific Corp. Enron expects to report in the second quarter a gain of approximately $50 million after-tax as a result of this settlement. Enron Corp., America's leading natural gas company with approximately $10 billion in revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Co., one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

#90116b0758 04/26/1990 ~Business Wire

TORONTO (APRIL 26) BUSINESS WIRE - April 26, 1990--Rio Algom Limited, 51.5 percent owned by the London-based RTZ Corporation (O-T-C), Thursday announced consolidated net earnings for the first three months of 1990 of C$20.1 million or C$0.44 per common share.

This compares to C$41.9 million or C$0.94 per common share for the same period last year.

A benefit of C$2.5 million (C$0.06 per common share) in 1990 resulting from the utilization of prior years' tax losses has been included in income and mining tax in accordance with recently adopted generally accepted accounting principles. The corresponding item in the comparable period last year amounting to C$1.8 million (C$0.04 common share) in 1989 was disclosed as an extraordinary item.

Consolidated revenue for the first quarter of 1990 was C$355.5 million compared with C$512.2 million recorded in the same period last year.

The company attributed the decline in earnings to a combination of lower commodity prices, reduced margins in metals distribution businesses, and the absence of earnings from the steel manufacturing operations, sold on August 1 1989, which had a very strong first quarter in 1989.

Copper prices averaged US$1.11 during the quarter, down from US$1.48 a year earlier, resulting in reduced earnings by Highland Valley Copper, in which Rio Algom holds a 33.6 percent beneficial interest.

Increased year-over-year potash sales volume was more than offset by significantly decreased sales prices in North American markets and international markets.

Rio Kemptville Tin reported an operating loss principally due to low tin prices averaging C$3.40 during the quarter, down from C$4.68 in first quarter 1989.

The company realized improved uranium earnings, resulting mainly from Rio Algom Mining Corp's sales from its US stockpile which had been written down to market value in prior years.

The RTZ Corporation is one of Britain's largest companies with a market capitalization of almost US$9 billion. Over 50 percent of its assets are located in North America. RTZ is the largest and most diversified mining company in the world.

NEW YORK (APRIL 26) BUSINESS WIRE - The Leslie Fay Companies Inc. announced Thursday that net sales for the thirteen weeks ended March 31, 1990 were $222,878,000 compared to $203,384,000 for the thirteen weeks ended April 1, 1989, an increase of 9.6 percent, and net income was $9,660,000 or $.51 per share, compared to $9,570,000 or $.50 per share for 1989.

John J. Pomerantz, Chairman and Chief Executive Officer of The Leslie Fay Companies Inc. told the stockholders of the company at the Annual Meeting held today, ''I am gratified that we achieved another record first quarter in terms of sales, net income and earnings per share, in spite of the turmoil in the retail climate. I am especially pleased that we were able to do so at the same time that we were able to reduce our inventories at March 31, 1990 by almost $5 million compared to the April 1, 1989 inventories. We have worked very hard in this past year and we believe that we are going into the balance of this year in a very clean and healthy position.''

Pomerantz also advised the meeting that the company intended to file in early May a registration statement under the Securities Act of 1933 to cover shares of stock to be sold pursuant to a Prospectus meeting the requirements of the Act by certain stockholders in an underwritten offering. He stated, ''Neither the company nor Management will be selling any shares in the offering.''

Pomerantz also stated, ''Leslie Fay continues in a strong financial position. At March 31, 1990, working capital increased to $177,564,000 from $138,418,000 at April 1, 1989, while stockholders' equity amounted to $169,408,000 compared to $143,105,000 at April 1, 1989.''

The Leslie Fay Companies Inc. is a leading manufacturer of women's dresses suits, blouses, sportswear and activewear. Its common stock is listed on the New York Stock Exchange under the symbol LES.

#90116b0761 04/26/1990 ~Business Wire

HOUSTON (APRIL 26) BUSINESS WIRE - Shell Oil Co. announced Thursday it is packaging motor oil in one-quart bottles made with recycled plastic. Shell filling plants in Metairie, La.; Sewaren, N.J.; Wilmington, Calif.; and Wood River, Ill., are now using bottles made of 15 percent recycled plastic and 85 percent virgin high density polyethylene. The amount of recycled plastic in Shell bottles will increase as the supply of recycled plastic improves.

''We're committed to using recycled plastics to the extent possible in all of our lubricants bottles,'' said T. N. Sanders, manager, lubricants. ''Using recycled materials is not only good for the environment, it's good for our customers and our business.''

Working with bottle manufacturer Sonoco Graham Company of York, Pa., Shell has started with its black Fire & Ice(R) Motor Oil bottle because its dark color allows the use of many different kinds of recycled plastic bottles that contain various pigments. This recycled plastic is recovered from bottles used in household, automotive, personal care and assorted food products.

The lighter-color quart bottles in the Shell line will be made with recycled plastic from used milk bottles. The recycled plastic comes from cities and counties that segregate their refuse.

''We are actively evaluating the use of recycled plastic for packaging products in white one-gallon plastic bottles,'' Sanders said. ''We will continue to look for opportunities to expand the use of recycled plastic in all of our packaging as supply increases.''

#90116b0762 04/26/1990 ~Business Wire

CHICAGO (APRIL 26) BUSINESS WIRE - UAL Corporation -- the holding company whose primary subsidiary is United Airlines -- Thursday reported a first quarter loss of $36.4 million or $(1.68) per share of common stock, primarily as a result of a one-time, nonoperating charge against earnings of $77.5 million for the settlement of several lawsuits with respect to United's operation of its computer reservation system, dating back to the early 1980's.

Without this charge, earnings would have been $10.2 million or 47 cents

per share. These compare to net earnings for the first quarter 1989 of $65.4 million or $3.03 per share.

UAL Corporation Chairman, President and Chief Executive Officer Stephen M. Wolf said, ''Although we achieved a slight profit for the quarter after excluding the one-time charge for settlement of lawsuits, we are nevertheless disappointed by these results. Expenses were up in most categories.

''The average price per gallon of fuel in the first quarter was 73.3 cents versus 60.7 cents last year, which alone contributed to a 23 percent, $71 million, increase in fuel expense.''

Wolf continued, ''While our domestic traffic was essentially unchanged from last year, United's growth in the Pacific has been dramatic. In the first quarter, United increased its Pacific traffic by 32 percent on capacity growth of just 24 percent.''

UAL Corp.'s first quarter operating revenues were $2.5 billion versus first quarter 1989 revenues of $2.3 billion. Revenue passenger miles were up 6.4 percent while yield (passenger revenue per mile flown) was up slightly to 12.79 cents. First quarter operating expenses were $2.6 billion versus first quarter 1989 expenses of $2.2 billion. A first quarter operating loss of $47.2 million compares to first quarter 1989 operating earnings of $142.7 million.

United flew 11/billion revenue passenger miles in first quarter 1990. Available seat miles were up 4.1 percent to 26.3 billion. Passenger load factor of 64.9 percent was up 1.4 points from 63.5 percent in 1989.

PALO ALTO, CA (APRIL 26) BUSINESS WIRE - Hewlett-Packard Co. (NYSE: HWP) Thursday announced that 782 long-service employees in the United States elected to accept the enhanced early-retirement (EER) program announced by the company in January.

The EER was offered as part of HP's ongoing program to balance its work force and slow expense growth. It was available on a voluntary basis to employees who were at least 55 years old and who had 15 or more years of service with the company.

"Response to the program has been very good," said Dean O. Morton, HP executive vice president and chief operating officer. "We had estimated that about one-third of the 2,400 employees who qualified would participate."

Program participants left the company on or before March 30. HP provided retirement counseling and financial-planning assistance to eligible employees to help them decide whether to retire early.

Employees who participated in the program received an amount equal to one-half month's salary for each year of service up to a maximum of 12 months' salary. In addition, retirees received the funds that had accumulated in their accounts under the company's regular retirement plans. HP offered a similar program in 1986, which resulted in about 780 employees choosing to retire early.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine, and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

#90116b0782 04/26/1990 ~Business Wire

SPARTANBURG, SC (APRIL 26) BUSINESS WIRE - Synalloy Corp. (ASE: SYO), producer of specialty chemicals, dyestuffs, stainless steel pipe, vessels and process equipment, announced Thursday that the first quarter produced record sales but a decline in net income.

Sales of $24,654,000 were up 6 percent over the first quarter of 1989 when the previous quarterly sales record was established. However, net income of $813,000 or 20 cents per share was down 54 percent compared to last year's comparable period.

Sales of products manufactured by the Metals Division were up modestly in dollars in spite of an approximate 20 percent decrease in the price of stainless steel, the division's principal raw material.

Unit sales actually showed a substantial increase. Profit margins were down because of inventory losses suffered from declining stainless steel prices. Also contributing to lower profit margins were the temporary inefficiencies inherent in increased employment for a second shift and opening of an

additional manufacturing building for our piping systems operations.

Sales and profits from products purchased for resale were down materially. The resale activities were substantially discontinued during 1989 but produced significant sales and profits in the first quarter of that year. The Chemical Division continues to perform exceptionally well with record sales producing a 21 percent increase in operating profit.

Demand continues to be strong for all of our products, and backlogs are at exceptionally high levels. The factors that depressed profit margins in the first quarter should have less effect on future periods. Based on these factors, we expect future quarters to show improved earnings and are optimistic that 1990 will be another year of good results.

The board of directors declared its regular quarterly dividend of 10 cents per share payable June 1, 1990 to shareholders of record May 15, 1990.

#90116b0786 04/26/1990 ~Business Wire

EL SEGUNDO, CA (APRIL 26) BUSINESS WIRE - Computer Sciences Corp. (NYSE:CSC) again posted record profit and revenues from operations for its fourth quarter and fiscal year, and also reported significant gains from sales of its interest in a former subsidiary.

''We had a strong ending to a strong year,'' said William R. Hoover, chairman and president of CSC, ''with excellent growth in both revenue and profit.''

Operations for the quarter ended March 30 produced net earnings of $18.7 million compared with $16 million the year before. Per share earnings from operations were up 16 percent to $1.16 from $1 in the year-earlier quarter.

Gains from sales of the company's ownership interest in its former Infonet subsidiary added 33 cents per share to net earnings in the quarter just ended, and 5 cents per share in the year-ago period.

The 33 cent gain was net of costs related to the sales, provisions for the phase-down of discontinued operations, and settlement of claims on a 1984 contract performed by Infonet. With the gains, total earnings per share for the fourth quarter were $1.49 vs. $1.05 a year ago.

Revenues for the quarter climbed 16 percent to $417.8 million from $360.2 million a year ago.

Hoover said the strong revenue performance stemmed primarily from commercial activities in the United States and Europe, where the company has been conducting aggressive programs to increase its market share. In the consulting group, CSC's commercial systems integration arm, revenue of $88.2 million was more than double that of the year-ago quarter.

Acquisitions contributed to the growth. Increased activity in insurance claims processing operations was the principal factor in the improved performance of the industry services group, where fourth quarter revenue surged to $84.2 million, 47 percent higher than in the prior year.

Revenue from the systems group, which principally serves federal government agencies, was up 10 percent for the full year but, as expected, was down 5 percent in the fourth quarter to $245.4 million.

''We won 57 percent of the 92 federal contracts we bid on last year, which is an excellent win rate, but didn't have our customary success in bringing in several large 'mega-contracts' in the hundred-billion-dollar range,'' Hoover said. ''We expect to do better in the cureent year, and the volume of federal programs scheduled for contract award this year affords us numerous opportunities for growth resurgence in the systems group.''

The higher company revenues resulted in quarterly operating income of $35.9 million, compared with $31.4 million the year before. Operating profit margin was 8.6 percent in the quarter just ended and 8.7 percent a year ago.

For the fiscal year, total revenues of $1.5 billion were ahead by 15 percent from $1.3 billion the year before, with revenues from continuing operations ahead 22 percent. The prior year included $74.2 million of revenue from CSC's former Infonet subsidiary which has since been divested and a minor operation which was sold late last year.

The commercial consulting group had fiscal-year revenue of $276 million, an increase of 92 percent, including a growth rate of 30 percent before the effect of acquisitions. Revenue from the industry services group rose by 26 percent to $258.2 million. Systems group revenue totaled $966.2 million for the year.

The company earned $58.3 million, or $3.62 per share, in fiscal 1990, compared with $50.6 million, or $3.16 per share, the year before, prior to gains from sales that reduced its ownership of Infonet in both years, and a gain from Infonet's disposal of an Australian affiliate in fiscal 1989.

CSC's sales of Infonet and Infonet's sale of its affiliate added 45 cents per share to net earnings for the year just ended, and 12 cents to the

prior year. Total earnings per share were $4.07 vs. $3.28 a year ago.

HOPKINTON, MA (APRIL 26) BUSINESS WIRE - Michael J. Cronin, has agreed to stand for election to the board of directors of EMC Corp. according to EMC Chairman and Chief Executive Officer Richard J. Egan.

Cronin, 51, is president, chief executive officer and director of Automatix Inc., a developer of adaptive automation software for use in machine vision and robotics.

In addition, to his responsibilities at Automatix, Cronin is also the director and chief executive officer of Cognition Corp., a supplier of computer-aided engineering (CAE) and computer-aided design and manufacturing (CAD/CAM) software for use in factory automation as well as director of Leeman Labs, a non-public analytical instrument company, located in Lowell, Mass.

He also serves as a trustee of Northeastern University. Prior to co-founding automatix in 1980, Cronin was executive vice president of Computervision Inc.

EMC Corp., a manufacturer of high performance computer storage products, is in the midst of a strong recovery. After posting losses for the past two years, the company is estimating revenues for the first quarter of 1990 (ended March 31) at approximately $40 million with earnings per share estimated between 3 and 4 cents. The company's stock was one of the highest performing issues on the New York Stock Exchange for the first quarter.

According to EMC's Egan; ''Mr. Cronin can bring to EMC the type of long term planning and direction that will help us cement out turnaround and position us for continued growth throughout the nineties.''

EMC Corp. manufacturers high performance, central and expanded storage products and storage subsystems for IBM mainframe and midrange, DEC VAX, Hewlett-Packard and Wang VS computer systems.

#90116b0797 04/26/1990 ~Business Wire
VANCOUVER, BRITISH COLUMBIA (APRIL 26) BUSINESS WIRE - As announced in the March 16, 1990 news release, Naxos Resources previously entered into a letter of intent to complete a joint venture agreement with Naxos holding 80 percent, to put into production four placer leases and thirteen placer claims on Thibert Creek near Dease Lake, British Columbia.

As a result of further negotiations, the company has decided to proceed with a placer license, rather than a joint venture.

The company has received a report from James E. Wallis, P. Eng., on the Thibert Creek property and Wallis recommends that the property be developed as a placer gold-platinum group metals mine. He recommends a three phase program to see the operation through to completion of the first production pit and estimates that the operating capital requirements are approximately $500,000.

Phase 1 is a pre-production phase consisting of a limited drilling program to prove up reserves for at least one mining season and to raise the status of the reserves to the proven category. The first phase also includes diversion of Thibert Creek, installation of a camp and sluice plant modifications. Phase 2 is the stripping stage and Phase 3 is the production stage.

The company has accordingly now completed a Placer Mining License Agreement with Edward Asp for the properties, plus one further claim, which collectively are known as the Blue Bell Property. The company also has a license from Asp on seven further placer leases known as the China Bar Property, however, this property is currently the subject of a lawsuit and the license is accordingly subject to the lawsuit being settled in favour of Asp.

The terms of the Placer Mining License Agreement include that the company complete a $500,000 work commitment by July 1, 1990, as recommended by James E. Wallis, P. Eng. and process of a minimum of 48,000 cubic yards of pay dirt material per year. The $500,000 work commitment is to be provided from working capital and the $460,000 proceeds of the special warrants, which are currently in trust pending regulatory approval.

The company wishes to clarify certain information provided in previous news releases regarding the properties on Thibert Creek. Wallis P. Eng. in his most recent report, calculates probable reserves on the high level channel of the Blue Bell Property to be 15,000 to 40,000 ounces of gold, and possible reserves on the post glacial gravels to be 3,900 to 6,500 ounces of gold.

#90116b0810 04/26/1990 ~Business Wire

STAMFORD, CT. (APRIL 26) BUSINESS WIRE - Olin Corp. Thursday announced reduction goals for both air emissions and solid hazardous waste covering

its manufacturing facilities around the country.

At the company's annual shareholders meeting John W. Johnstone, Olin chairman and chief executive officer, said Olin is dedicated to improving its environmental performance beyond what is mandated by laws and regulations, and the company has therefore established the following goals to be met by 1994, using 1987 performance as the base line:

-- To reduce air emissions by 70 percent

-- To reduce solid hazardous waste by 50 percent

''As technology improves, Olin may be able to achieve even greater reductions, but given present state-of-the-art technology these goals are very ambitious for our organization,'' Johnstone said. He noted that Olin reduced air emissions by 15 percent from 1987 to 1988.

Johnstone added that solid hazardous waste had already been reduced 50 percent in the period from 1981 to 1987.

Olin has established a senior-level steering committee to coordinate the actions needed companywide to pursue these waste and release reduction goals.

''We will be striving to meet these goals consistent with our pledges to the Chemical Manufacturers Association's Responsible Care initiative and our own Total Quality Management Process, both of which emphasize improving performance to respond to the concerns of our plant communities '' Johnstone said.

#90116b0811 04/26/1990 ~Business Wire

NEW YORK (APRIL 26) BUSINESS WIRE - ESPN and Anheuser-Busch Inc., Thursday announced agreement on a contract totaling in excess of $100 million that will make the brewer of Budweiser the dominant beer advertiser on America's largest cable network for another five years.

The contract, which runs through 1994, represents the largest sponsorship commitment in the history of cable television advertising. It is the third consecutive five-year agreement between Anheuser-Busch and ESPN.

The brewer became ESPN's charter advertiser with a one-year, $1.4 million advertising contract that began on Sept. 7, 1979, the day of ESPN's

historic debut. Since then, separate five-year contracts were announced in 1980 and 1985.

"Anheuser-Busch was ESPN's first major advertiser, and has consistently remained our largest," said ESPN President and Chief Executive Officer Roger L. Werner. "We're delighted to extend our relationship, and we trust that ESPN will continue to contribute to Anheuser-Busch's success."

"People who enjoy sports represent one of our most important target audiences," said Patrick T. Stokes, president of Anheuser-Busch Inc. "Beer drinkers are sports fans."

"Our agreement with ESPN, combined with our advertising presence on virtually all national and local sports broadcasts, ensures that our beer brands will be well positioned with this key consumer segment."

ESPN reaches nearly 56 million homes, or 61 percent of all U.S. television households. The cable network televises a variety of professional and amateur sports, including National Football League, Major League Baseball, college football and college basketball games, as well as auto racing, boxing, golf and tennis events. ESPN also features sports news and information programs, such as SportsCenter and the award winning "NFL GameDay" and "NFL PrimeTime" shows.

The new contract extends Budweiser's title sponsorship of several ESPN programs, including "Budweiser Presents Top Rank Boxing," the award winning "Budweiser Racing Across America," and "Budweiser Thoroughbred Digest."

The Anheuser-Busch beer brands which are advertised on ESPN include Budweiser, Bud Light, Bud Dry, Michelob, Michelob Light, Michelob Dry, Busch, Busch Light and Natural Light, as well as King Cobra malt liquor and O'Doul's nonalcoholic brew.

OTTAWA (APRIL 26) BUSINES WIRE - The board of directors of Northern Telecom (NYSE:NT) meeting in Ottawa Thursday declared the corporation's regular quarterly dividend of 7 cents per common share, payable June 29, 1990, to shareholders of record at the close of business on June 8, 1990.

The board also declared a dividend on the Class A preferred shares Series 4, in the amount of $3,279.45 per share in Canadian funds, payable on May 9, 1990, to shareholders of record at the close of business on May 8, 1990.

The board declared a second dividend on the Class A preferred share Series 4, the amount of which is to be determined in accordance with the terms and conditions attached to such shares and will be payable in Canadian funds on June 13, 1990, to shareholders of record at the close of business on June 12, 1990.

Northern Telecom, the leading global supplier of fully digital telecommunications switching systems, had 1989 revenues of $6.1 billion. Its common shares are listed on the New York, Toronto, Montreal, Vancouver London and Tokyo stock exchanges.

#90116b0845 04/26/1990 ~Business Wire

LOUISVILLE, KY (APRIL 26) BUSINESS WIRE - Kentucky Medical Insurance Co. (NASDAQ/NMS:KYMDA) Thursday reported higher operating income, lower net income and lower revenues for the first quarter compared with the same period of 1989.

Kentucky Medical Insurance, which provides professional liability insurance to doctors and medical facilities, released its first-quarter financial results at today's annual shareholders' meeting.

At the meeting, shareholders approved an increase in the company's authorized shares and elected a new director.

For the quarter ending March 31, the company reported operating and net income of $770,838 (72 cents per share) compared to $952,887 (69 cents per

share) for the same quarter last year. First quarter revenues were $5.1 million, compared with $5.8 million in the first-quarter of 1989.

Kentucky Medical Insurance President Carl L. Wedekind Jr., said operating income rose 18 percent over 1989 primarily because claims and loss payments were lower. Net income declined 19 percent from $952,887 ($1.01 per share), primarily because the previous quarter's net income included an extraordinary tax credit of $301,200, or 32 cents per share, he said.

Wedekind said total assets increased to $68.6 million from $66 million, and shareholders' equity rose to $12.2 million ($11.34 per share) compared with $11.5 million ($10.65 per share).

Wedekind told shareholders that as a result of efforts initiated in 1986 to increase capital and surplus significantly, the company was in its strongest position since its 1978 founding. As previously reported, the company's revenues, net income and assets all increased during fiscal 1989.

''By taking these steps, we expect to build the company's strength -- to provide increased value to our shareholders and a higher measure of future protection and security for our policyholders,'' Wedekind said.

The company continues to implement plans which are expected to result in expansion of the hospital insurance division into another state; it also is continuing to develop its reinsurance subsidiary, he said.

Wedekind said the market for medical professional liability insurance is expected to remain highly competitive, and that the company was taking measures ''to make absolutely sure that we offer our policyholders the products and services that fulfill their needs better than any other company can.''

At the annual meeting, shareholders approved an increase in the number of authorized shares to 15 million, from 1.5 million.

In addition, of the six board seats subject to election, five board members were reelected and Russell L. Travis, M.D., was elected as a new member. Dr. Travis, 55, a Lexington neurosurgeon, replaces Carl Cooper Jr., M.D., who is retiring. Director Emeritus James A. Baumgarten, M.D., will retire from his position as Kentucky Medical's claims prevention and awareness director, during the second quarter.

Kentucky Medical Insurance Co. offers medical professional liability insurance to Kentucky physicians, dentists, oral surgeons, other health care professionals, hospitals and other health care facilities. The company also offers investment, leasing and other insurance services to the Kentucky medical community.

OTTAWA (APRIL 26) BUSINESS WIRE - Following the annual meeting of shareholders in Ottawa, the board of directors of Northern Telecom Limited (NYSE:NT) Thursday elected Dr. Paul G. Stern chairman of the board.

He also continues as chief executive officer, a position he has held since March 1, 1989.

Stern succeeds Edmund B. Fitzgerald, who retired after serving as chairman since April 1985. Fitzgerald remains as a member of the board of directors of Northern Telecom Limited and a member of the board's executive committee.

Stern told shareholders that the company's results in the first quarter of 1990 ''demonstrate both strong sales penetration and continued expense control. We achieved double-digit revenue growth and a significant earnings increase despite continued competitive market pressures.''

On Tuesday, April 24, Northern Telecom reported record first quarter revenues of $1.6 billion, up 14 percent above the corresponding quarter of 1989.

Net earnings applicable to common shares in the quarter were $74 million, as compared with $47 million last year. Earnings per common share were 30 cents, an increase of 50 percent over the 20 cents per common share earned in the first quarter of 1989.

The company also reported first quarter record order input and order backlog at March 31 of $1.5 billion and $1.8 billion, respectively, both increasing 13 percent year over year.

Prior to joining Northern Telecom, Stern was president of Unisys Corp. from May 1986 to December 1987. In May 1982, he was elected president and chief operating officer of Burroughs Corp., which later merged with Sperry Corp. to form Unisys. Stern holds a bachelor of science degree in electronics engineering and a master of science and doctorate in physics.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. Its revenues in 1989 were approximately $6.1 billion. Its common shares are listed on the Montreal, Toronto, Vancouver, New York, London and Tokyo stock exchanges.

OAKLAND, NJ (APRIL 26) BUSINESS WIRE - Russ Berrie and Co. Inc. (NYSE:RUS) Thursday announced net sales for the three months ended March 31 totaled $59,367,000 compared to $66,535,000 in 1989.

Net income was $3,158,000 or 21 cents per share, vs. a net loss of $2,181,000 or 14 cents per share in 1989. Last year included a restructuring charge of $9.5 million before taxes ($6.2 million after taxes or 41 cents per share).

Russell Berrie, board chairman and chief executive officer, stated, ''The first quarter results, compared to a year ago, reflect a general softness in the retail market. However, the decrease in operating expenses anticipated when we took the restructuring charge, has in fact occurred and is in line with our expectations.''

Russ Berrie and Co. Inc. designs and markets an extensive variety of everyday and seasonal impulse gifts to retail stores. Products inlcude stuffed animals, ceramic mugs, porcelain gifts, picture frames, greeting cards, candles, figurines, keyrings, magnets, school and stationary merchandise, and collectible dolls. The company has a direct sales force of more than 750 men and women. Distribution centers throughout the United States, Canada, and England provide strategically located regional facilities to serve customers.

BRISTOL, CT (APRIL 26) BUSINESS WIRE - Frank J. Pascale, chairman and chief executive officer of Eagle Financial Corp. (AMEX: EAG) Thursday announced a 4 percent increase in the regular quarterly cash dividend for shareholders of the multiple savings and loan holding company.

The $0.13 per share dividend will be payable June 1, 1990 to shareholders of record as of May 15, 1990.

Pascale said, ''We have seen the results of our long-range business plan

take effect and perform satisfactorily, even in this soft economic environment, and we feel our shareholders deserve a greater return on their investment. It is a pleasure to provide them with this increase.''

Ralph T. Linsley, vice chairman and president, said, ''The Board feels that this increase in the dividend is warranted based on Eagle's strong operating position which, we believe, is a result of our continued focus on 'basic banking' combined with efficient cost controls.''

Eagle Financial Corp. is a $469 million multiple savings and loan holding company for the four-office Bristol Federal Savings Bank of Bristol, Connecticut and the five-office First Federal Savings and Loan Association of Torrington, Connecticut.

CLEVELAND (APRIL 26) BUSINESS WIRE - Sealy Holdings Inc., announced Thursday that it had reached an agreement with The First Boston Corp. and a group of senior lenders led by The First National Bank of Chicago, Caisse Nationale de Credit Agricole and Continental Bank regarding the terms of the permanent financing for Sealy Corp.

The permanent securities, which will replace the outstanding bridge loan owed by Sealy Corp. to First Boston Securities Corp., consist of $250 million of 14 percent senior subordinated notes, approximately $213 million of 15.5 percent subordinated discount notes, which do not not pay cash interest through Nov. 15, 1993, and common stock of Sealy Holdings, representing 40 percent of the company's common stock on a fully diluted basis.

Each of the two series of subordinated notes matures on Nov. 15, 1999 and is entitled to mandatory sinking fund payments on Nov. 15, 1997 and Nov. 15, 1998, calculated to retire 50 percent of the principal amount of each series prior to maturity.

In connection with the permanent financing, Sealy amended its credit agreement with its senior lenders to, among other things, modify the amortization of the term loan to lower the amount of the fixed payments due in 1990 and 1991, and reduce the maximum amount of revolving credit availability to reflect the company's lower than expected need for bank borrowings.

Sealy Mattress Co., a wholly owned subsidiary of Sealy Corp., produces the complete Sealy line of mattresses including the world famous Posturepedic. Other operations include: The Stearns & Foster Bedding Co., one of the oldest and largest premium-brand bedding manufacturers in the country; Advanced Sleep Products, a leading manufacturer and distributor of waterbeds; Woodstuff Manufacturing Inc., a manufacturer of waterbed furniture; and the Sealy Furniture Co. and the Stearns & Foster Upholstery Furniture Co., manufacturers of convertible sofas.

HOUSTON (APRIL 26) BUSINESS WIRE - U.S. Home Corp. (NYSE:UH) Thursday announced that for the quarter ended March 31, 1990, net income was $126,000 compared to net income of $421,000 in the first quarter of 1989.

Total revenues for the quarter of $159.7 million included $152.9 million from housing operations and $6.8 million from financial services compared to total revenues of $162.9 million which included $153.7 million from housing operations and $9.2 million from financial services in the 1989 first quarter.

Homes delivered during the first quarter were 1,233 plus 129 homes delivered by joint ventures, compared to 1,300 plus 23 homes delivered by joint ventures in the first quarter of 1989. New orders in the first quarter, including new orders by joint ventures, were 1,532, compared to 1,717 new orders last year.

The dollar value of the March 31, 1990, backlog of 1,917 units, excluding joint venture activity, was $232.5 million compared to $246.9 million as of March 31, 1989. The average price of homes sold in the first quarter was $121,300 compared to $113,400 in the first quarter of 1989.

The company's housing operations in the first quarter of 1990 were profitable despite an approximately $1 million write-off due to the liquidation and sale of all housing inventory in the recently closed markets of Atlanta and Charlotte. The sale of inventory expedited the company's exit from these two markets thereby reducing future carrying costs of such inventory units.

This liquidation as well as reduced margins from the closing of units in

the economically depressed real estate market in Arizona resulted in lower gross margins in the first quarter compared to the first quarter of 1989. Selling, general and administrative expenses declined to 14 percent of sales down from 15 percent of sales in the first quarter of 1989.

Additionally, interest expense declined 39 percent to $2.2 million in the first quarter of 1990 from $3.6 million in 1989 resulting primarily from the company's program to reduce outstanding public debt.

#90116b0879 04/26/1990 ~Business Wire

EL DORADO, AR (APRIL 26) BUSINESS WIRE - Murphy Oil Corp.'s (NYSE:MUR) net income for the first quarter of 1990 was $22 million, 65 cents a share compared to $6.4 million, 19 cents a share, earned in the first quarter of 1989, George E. Breazeal, controller, announced Thursday.

Earnings for the current quarter included an extraordinary credit of $4.1 million, 12 cents a share, from utilization of a financial net operating loss carryforward, with an offsetting charge equivalent to this benefit included in the provision for income taxes. The quarter also included a $2.9 million gain from sales of a jointly owned jack-up rig and design drawings for another rig.

The significant improvement in earnings compared to a year ago was due mostly to higher profits from exploration and production, a reduction in losses from contract drilling, and the gain from asset sales. Posted prices for West Texas Intermediate crude fluctuated between $20.50 and $22.00 a barrel during most of January and February, but weakened in March to $19.25 at the end of the quarter. Prices continued to decline in April due to high levels of crude inventory and OPEC overproduction.

Natural gas volumes for the quarter were at a record level, and average prices were up from a year ago. Exploration expenses were down from the first quarter of 1989.

Downstream margins in the U.S. fluctuated widely during the quarter. They were strong in January, fell below profitable levels in February, and began to recover in March. Currently, margins on domestic product sales are good. Margins in the U.K. declined from a high January level, but for the quarter they were better than a year ago.

Losses from contract drilling were down 50 percent compared to a year ago. ODECO's fleet utilization increased significantly, and day rates were higher. Depreciation charges were lower due to extending the depreciable

lives of the equipment. The diving business was profitable for the quarter, which is normally a slow period. As previously reported, this business was sold in April.

Sawmill results continued to be adversely affected by weak lumber prices. At the Chenal Valley real estate development in western Little Rock, 21 golf course lots were sold during the quarter.

Earnings from exploration and production were $21.8 million, up from $15.9 million in 1989. Average crude oil and gas liquids prices were up $2.94 a barrel in the U.S., $3.53 in Canada, $1.89 in the U.K., and $3.00 in other areas.

DALLAS (APRIL 26) BUSINESS WIRE - E-Systems (NYSE:ESY) announced Thursday that Charles ''Chuck'' R. Farmer Jr., senior vice president and group executive, has notified the company of his intent to retire, effective June 8.

Farmer was named to his present position in September 1988. From 1983 to 1988 Farmer was vice president and general manager of the Garland Division where he served as vice president of electronic systems from 1975 to 1983. A Dallas native, he has been with E-Systems and its predecessor companies for 33 years.

Dr. Terry W. Heil, also a senior vice president and group executive, will become a senior vice president of the company upon Farmer's retirement. At that time all operating units of the company will report to Heil and Lowell Lawson, president and chief operating officer.

Dr. Heil joined E-Systems in 1988 after twenty-two years with the Singer Co. where he rose through a series of positions to become president of HRB-Singer in 1980, and executive vice president of the Singer Defense Electronics group in 1986.

A Fairfield, Iowa, native, Heil earned a bachelor's degree in mathematics and physics at Parsons College in Iowa and received his master's and doctorate degrees in mathematics from the University of Arizona.

E-Systems is a major worldwide developer and producer of defense electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance,

navigation and control, communications and data systems.

DALLAS (APRIL 26) BUSINESS WIRE - Sterling Software Inc. (NYSE: SSW) said earnings per share from continuing operations before an extraordinary gain increased to 21 cents for the second quarter of fiscal 1990, up from 19 cents last year.

Earnings per share from all operations amounted to 24 cents, before an extraordinary gain, reflecting a net earnout payment from the sale of a discontinued business. Revenue for the quarter ended March 31 rose to $47.8 million from $45.0 million a year ago. Net income for the quarter was $3.6 million versus $2.5 million in the same period last year.

Sterling said it also realized an after-tax extraordinary gain in the second quarter of approximately $567,000 as a result of buying back its eight percent convertible debentures at a discount, reducing the amount outstanding to approximately $60 million. Total earnings per share after extraordinary gains for the respective second quarters were therefore 29 cents in 1990 and 22 cents in 1989.

Cumulative results for the first half of fiscal 1990 were 38 cents per share from continuing operations, before the extraordinary gain, on revenue of $92.6 million, up from 32 cents and $85.7 million respectively in 1989.

During the second quarter Sterling's Federal Systems Group was selected for the award of a $200 million software support contract at the NASA/Ames Research Center. This contract effectively continues the software support services Sterling has been providing under earlier contracts with NASA/Ames for the past 20 years.

Also during the quarter Sterling's Applications Software Group acquired Metro-Mark Systems, a major EDI software company operating in the United States and Canada. Metro-Mark was combined with Sterling's Ordernet Services Division, which is a leader in the rapidly expanding EDI business.

Sterling's Systems Software Group acquired Rogalandsdata, a Norwegian software development business specializing in systems software products for IBM mainframes. Rogalandsdata operations will be part of Sterling Software Scandinavia, a newly formed software development lab and marketing arm for Sterling products in the Nordic countries.

Sterling Software, headquartered in Dallas, specializes in systems and

applications software products in the United States and internationally, and in professional services for the U.S. federal government.

FITCHBURG, MA (APRIL 26) BUSINESS WIRE - Kuno Laren, chairman of Micron Products Inc. (ASE: PMR) announced the election of two new members of the board of directors - retired Admiral Stanley S. Fine, and James J. Caruso.

Fine is a graduate of the U.S. Naval Academy, and of the Harvard University's Graduate School of Business. He has served as budget director of the U.S. Navy, and currently is a director of several public and private companies.

Caruso has served as Micron's chief financial officer since November 1989. Prior to joining the company Caruso served as an audit manager at Touche Ross & Co. The new directors will replace George Gianis and Keld Hansen who resigned for personal reasons. Laren also announced the settlement of legal disputes with two former owners of Numedco. This settlement will reduce the rate of current annual consulting and employment related expenses by approximately $400,000. The terms of the settlement also involve an exchange of $1.2 million redemption value Class D and E Preferred Stock for Common Stock and other considerations.

A special stockholders meeting will be held May 3, 1990, to approve the proposed issue of 3,666,850 new common shares, as described in the Proxy dated April 13, 1990 and distributed to stockholders.

Laren also noted that, although final figures were not yet available, the company expected to report unprofitable results for the quarter ended March 31, 1990. In the fiscal quarter ended March 31, 1989, Micron had, on sales of $8.2 million, reported an operating profit of $135,000 but a pretax loss of $109,000 after $245,000 in interest costs and other expenses. Management plans call for significant cost reductions to regain profitability.

WASHINGTON (APRIL 26) BUSINESS WIRE - The following is a transcript of testimony delivered on April 26, 1990, by Roger Schwantes, vice president -- product/technology planning, Northern Telecom Inc. (NYSE:NT).

The testimony was delivered during a U.S. House of Representatives subcommittee hearing on the removal of existing Regional Bell Operating Co. manufacturing restrictions.

Northern Telecom Inc. supports the removal of the existing MFJ manufacturing restriction. The result will address several important aspects of advanced communication services development:

-- The efficient use of scarce research and development resources;

-- An acceleration in the innovativeness of both products and services;

-- An acceleration in the timeliness of introduction of new services;

-- Recognition and encouragement of the iterative product development process between users, service providers, R&D organizations and manufacturers increasing the attractiveness of domestic product development and manufacture; and

-- Risk sharing between RBOCs and manufacturers.

The proposed legislation must facilitate RBOC R&D investment and participation in joint planning and product development teams with end users, R&D organizations, and manufacturers.

Mr. Chairman and distinguished members of the subcommittee, I am Roger Schwantes, vice president for product/technology planning for Northern Telecom Inc.

Northern Telecom is a leading American manufacturer and supplier of telecommunications and integrated office systems to the telecommunications industry, businesses, institutions and government. The company's products are sold throughout the United States and internationally.

Northern Telecom has more than 22,000 employees in the United States in 14

manufacturing plants, and in marketing, sales and service offices across the nation. BNR Inc., Northern Telecom's research and development affiliate, employs 1,800 scientists, engineers and support staff at research and development centers throughout the United States. Headquartered in Nashville, Tenn., Northern Telecom is the second largest telecommunications manufacturer in the United States.

Thank you for the opportunity to address the ''Telecommunications Policy Act of 1990'' and the vital question of participation in manufacturing by the Regional Bell Operating Companies (RBOCs).

The MFJ resulted in a dramatic increase in the level and scope of competition throughout the United States telecommunications industry. By severing the corporate tie between the divested Regional Bell Operating Companies and their affiliated manufacturer (then known as Western Electric), and prohibiting RBOC reintegration in manufacturing, the MFJ has enhanced competition within the equipment sector of the industry.

Future public policy must continue to assure realization of these major accomplishments.

WELLESLEY, MA (APRIL 26) BUSINESS WIRE - Productivity Solutions Inc. announced Thursday that an agreement has been reached with Digital Equipment Corp. to further enhance its project management software, PLANNER.

The product runs exclusively on Digital computers and offers a number of unique functionalities that allow users to benefit from a simplified approach to planning and management of schedule, cost and project integrity.

''We are committed to the Digital architecture,'' said Productivity Solutions' president, Richard Artus. ''It's capabilities are conducive to sound project management methodologies and good communications among project team members. This agreement will result in DECwindows and ULTRIX versions of PLANNER and will help us maintain our leadership role in providing real time, cost effective solutions to our users.''

''PLANNER is an excellent tool for project management,'' stated Joe Lawrence, applications marketing manager for engineering applications at Digital Equipment Corp.

''The product provides a proper balance of ease of use and functionality to allow it to satisfy the requirements for it to become a major business application. We are, therefore, pleased to work with Productivity Solutions to provide the benefits of project management to our user community in an integrated workstation environment.''

''The majority of project management software products are designed strictly for scientific and engineering users. PLANNER provides a real-time measurement tool that both non-technical and technical managers can use with ease. This makes it an ideal desktop tool,'' Artus stated.

Productivity Solutions is a participant in Digital Equipment Corp.'s cooperative marketing program. PLANNER is currently available on Digital Equipment Corp. VAX/VMS computers and has more licensed VAX installations than any other project management software product in the world. List prices range from $2,500 for a low-end workstation to $70,000 for the VAX 9000 mainframe. Per user pricing is also available.

#90116c0052 04/26/1990 ~Comtex

WASHINGTON (APRIL 26) COMTEX - Granting U.S. banks expanded powers to engage in non-banking financial services will not enhance their global competitiveness and may impose an unneccesary risk on the federal deposit insurance system, real estate and insurance industry officials said today.

Norman D. Flynn, the president of the National Association of Realtors, said that the savings and loan crisis was fueled by the thrift industry's poor performance in real estate activities and that many regional banks are suffering mounting losses from unsound commercial real estate loans.

"We want to emphasize that given banks' dismal performance in real estate lending, a traditional banking activity, and the resulting increased risk of exposure to the federal deposit insurance fund, how in all good conscience can we proceed to authorize banks to engage in non-banking activities such as real estate investment, development and brokerage,?" Flynn asked.

Flynn's remarks were made to the Senate Banking, Housing and Urban Affairs Committee, which is studying ways to modernize the U.S. financial services system.

In order to compete more effectively in an increasingly global market, some banking industry officials are calling for the repeal of the Glass-Steagall Act, which imposes a separation of banking and securities activities. Proponents of deregulation argue this is needed to meet the

challenge of "Europe 1992", when the European Economic Community is scheduled to implement a common banking system issuing licenses permitting banks to engage in a wide range of financial services.

Flynn cautioned that any benefits of U.S. banking deregulation will be more than offset by banks engaging in non-banking activities. "Expanded powers don't necessarily mean expanded profits," he said. "On balance, it would not be in the best interests of banks to be in real estate because it is such a risky business."

Stephen J. Friedman, testifying on behalf of the American Council of Life Insurance, a trade association representing domestic life insurance firms, echoed Flynn's views. Friedman argued that bank regulators are having difficulty handling their current complement of powers and allowing banks to enter the insurance business could jeopardize the safety and soundness of the U.S. banking system.

"Over the past four years, in addition to the collapse of the thrift industry, more than 700 banks have failed," Friedman said. "Did these failures occur because banks were unable to break into the insurance or real estate businesses? Hardly. More often than not they were a result of mismanagement, fraud, or poor regulatory supervision. It is simply unreasonable to suggest that the solution for competitive pressures on banks is to give their managers more businesses to oversee, businesses that import an entirely new and unfamiliar set of risks."

Friedman noted that U.S. banks can already engage in insurance and securities activities abroad. He said U.S. banks would continue to remain on an equal footing with European banks following consolidation in 1992 assuming the Europeans adopt a "national treatment" standard.

"Even if that were not the case, however, we should not discard our system of separating banking from commerce just to appease the Europeans," Friedman said. "Issues of the safety and soundness of American banks are of primary concern to the U.S. economy, and we should not sacrifice the stability of our banking system in trade negotiations with the Europeans."

#90116d0310 04/26/1990 ~French/German News Agency

TAIPEI (APRIL 26) - The Cabinet approved an insurance law revision on Thursday to allow operations of mutual insurance firms from the United States in a move to widen the local service industry to Taiwan's largest trading partner, a high-ranking economic official said.

Taiwan in 1986 relaxed a long-standing ban on foreign insurance firms to allow two life insurance companies and two property insurance firms from the U.S. to open for business here every year.

Currently, seven property insurance companies and eight life insurance firms from the U.S. have branch offices here.

"The amendment, which proved Taiwan's sincerity in removing non-tariff trade barriers between the island and the U.S., should bring a positive response from Washington," said Hsu Ko-shen, director of the Board of Foreign Trade.

Mr. Hsu added that the revision, pending approval of the Legislative Yuan (Parliament), would help reduce the possibility of Taiwan's being placed on the watchlist of the "Super 301" provision of the 1988 U.S. Trade Act for economic retaliation.

At the last round of Taiwan-U.S. trade talks held in Washington in late March, the United States demanded that Taipei allow operations of its mutual insurance firms, remove limits on the number of U.S. insurance companies operating here and restrictions on their business, and permit them to buy real estate on the island.

The United States, Taiwan's largest trading partner, has pressed this export-oriented island to step up efforts to reduce a long-standing trade imbalance which hit 12 billion U.S. dollars last year.

Authorities here had said the trade gap would be lowered to eight billion dollars this year under Taipei's efforts to expand imports from the U.S. and diversify its overseas markets.

The Cabinet also approved in the revision to reduce the share of capital and required reserves that a local insurance firm can invest in real estate from the previous one-third to 25 percent to avoid manipulation of the real estate market.

#90116d0440 04/26/1990 ~French/German News Agency

WELLINGTON (APRIL 26) - General Motors New Zealand announced Thursday that it would lay off 292 staff at its car assembly plant in Trentham, 20 kilometres (12 miles) north of here.

Managing director Don McCarthy said GM would phase out local assembly of cars this year because it is no longer economically viable. Truck production will continue.

He said that in recent months, the company had been moving towards importing fully built-up passenger vehicles because, in spite of heavy investment over the past three years, it could not compete with overseas factories.

"As we rely heavily on Australian sourced products, the absence of a tariff differential between locally assembled and fully built-up vehicles made it unviable to assemble them here," he said.

The Trentham plant has a capacity of 65 cars per day compared to overseas factories producing 500 to 1000 cars a day.

Employment minister Annette King said she was dismayed at the GM plan, although it had been hinted at in a government review of the auto industry here. In recent years, the government have removed most tariff barriers on the imports of fully built up cars.

Ms King said she was confident the laid-off staff would find new jobs.

"The reduced operation has not come as a surprise because it was signalled in a review. But it is devastating for the affected employees, and we will be doing all we can to help them," she said.

KUALA LUMPUR (APRIL 26) - Malaysia and Yugoslavia have signed an agreement on avoidance of double taxation to enhance bilateral economic cooperation, the Malaysian foreign ministry said in a statement Thursday.

The agreement was signed in Belgrade on Tuesday by Malaysia's ambassador to Yugoslavia Zainuddin Abdul Rahman and Branimir Zekan, the Yugoslav federal finance secretary, the statement said.

The agreement was latest move to step up economic links between Malaysia and Yugoslavia. The economic chambers of both countries signed a joint economic cooperation agreement in February.

SEOUL (APRIL 26) - South Korea has reached an agreement with Australia over the local beef market, agreeing to gradually increase its beef import quota, officials here said Thursday.

At talks over the opening of the local beef market that ended here on Wednesday, Canberra accepted a bilateral agreement that Seoul and Washington had reached, officials at the Agriculture and Fisheries Ministry said.

The agreement calls on South Korea to increase its overall beef import quota by 4,000 tons every year until 1992, with 58,000 tons marked for

this year.

Quotas for 1993 and thereafter will be fixed by negotiations in July 1992.

Canberra also agreed to form a join inspection team to look into the situation of local cattle farms and withhold a demand for South Korea to liberalize the beef market.

Canberra had demanded that Seoul present a time-table for lifting restrictions on beef imports, which Seoul rejected, citing the weakness of its cattle industry, the officials said.

Australia supplies some 65 percent of beef South Korea imports. Last year, South Korea imported 33,000 tons of beef from Autralia, 12,000 tons from the United States, 2,900 tons from Canada and 1,550 tons from New Zealand.

#90116d0720 04/26/1990 ~French/German News Agency

PARIS (APRIL 26) - The Bank of France cut its basic interest rates by a quarter-point on Thursday, the central bank said.

The tender rate dropped from 9.75 to 9.50 percent, and the repurchase rate from 10.50 to 10.25 percent. Those two rates are generally viewed as setting the central bank's desired range of French interest rates.

The bank said in a communique that the drop had been decided on "due to the continuation of the improvement in results in connection with prices and foreign trade, and the franc's good performance on the foreign exchange market".

The decision was made following a regular call for tenders that left liquidity virtually unchanged. The bank allocated 76.6 billion francs in tenders, while 75 billion francs expired.

On the Paris Bourse, the central bank's move initially strengthened the market a bit, but that effect was only temporary. Analysts said the measure had been anticipated and had already been "included in stock prices".

QUNU, South Africa (APRIL 26) - The African National Congress's call for increased sanctions against South Africa was justified by the overwhelming poverty he had seen in his six-day tour of Transkei tribal homeland, the movement's deputy president Nelson Mandela said Thursday.

Speaking to family and clan in the village where he grew up, some 30 kilometres (18 miles) from the Transkei capital of Umtata, Mr. Mandela said the poverty was a reflection of the South African government's policies.

He told the 3,000 villagers who had turned out for his homecoming: "We have been starving since time immemorial. It (starvation) is still there staring us in the face."

The ANC claims economic sanctions remain the most effective means of forcing the government to change its race discriminatory policies.

The counter argument -- notably put forward by Britain's Margaret Thatcher -- is that sanctions achieve little and hit the voteless black majority the hardest.

It was Mr. Mandela's first official visit to Qunu since his release from prison on February 11 after 27 years although he and his wife, Winnie, made a fleeting stopover Sunday at the place he still calls home.

He said: "As I travelled through the countryside, my heart was sore to see that the poverty was still there."

Mr. Mandela said he had been so moved by the plight of rural Transkeians that he felt compelled to try to motivate the ANC leadership to give capital assistance to "progressive homeland governments."

The ANC strongly opposes Pretoria's homeland system, which it regards as a dumping ground for surplus labour, and has labelled most homeland leaders "collaborators".

Three of the four nominally independent homelands -- Transkei, Ciskei and Venda -- have recently come out in support of the ANC and indicated that they are considering seeking reincorporation into South Africa.

While it was a time of family reunion, Mr. Mandela's visit was also tinged with sadness. He spent two hours visiting the graves of his mother and other family members.

Two cattle were slaughtered in his honour and though the mood was festive, speakers conveyed the general feeling -- one of resentment that Qunu's most famous son had spent so long in jail.

Tribal chief Dalilanga Balizulu cut short his speech of welcome, saying he was too supset by the treatment "our son" had received.

Speaking in his native Xhosa, Mr. Mandela said it was "beyond words to explain my feelings in returning home" although he explained that he was

not actually born in Qunu, but in Mvezo, some 60 kilometres (37 miles) away.

Mr. Mandela and Winnie later left by helicopter for another remote Transkeian village where other members of his Madiba clan live.

JOHANNESBURG (APRIL 26) - Rising production costs have taken their toll on South Africa's gold mines, and at least two are in danger of closing down, quarterly results have shown.

Eight mines are not showing a profit and are paying more to produce than the gold price of 32,042 rands (12,067 dollars) per kilogram.

Rand Mines' ERPM is suffering the most. It is heavily in debt and its production costs are 42,456 rands (15,988 dollars) per kilogram.

Goldfields South Africa (GFSA)'s Vlakfontein has also reached rock bottom,

with costs standing at 34,989 rands (13,155 dollars) per kilogram.

Those are the two in danger of closing down, according to financial analysts.

And another six gold mines are in the doldrums: Stilfontein, Grootvlei and West Rand Consolidated, owned by Genmin, the mining arm of massive conglomerate Gencor; GFSA's Libanon; Loraine, owned by Anglovaal mining house; and Western Areas, whose holding company is Johannesburg Consolidated Investments (JCI).

Unavoidable costs are also in danger of bursting the budgets of many mines. For one thing, mineworkers are pushing for a 35 per cent wage increase -- a figure the industry simply cannot afford.

#90116d1330 04/26/1990 ~French/German News Agency
STRASBOURG, France (APRIL 26) - A Council of Europe commission has ruled that two cases charging British intelligence with human rights violations both merit further investigation, commission sources said Thursday.

The charges were filed by three Britons, two of them members of the National Council for Civil Liberties (NCCL). Their identities may not be revealed for the moment but one was said to be be a former Labour Party MP.

Though the European Commission for Human Rights deemed the cases "admissible", it chose not to refer them to the European Court of Human Rights but to the Committee of Ministers of the 23 member states.

The Committee, which is empowered to make binding decisions, will hand down its decision in November.

The plaintiffs were identified only as Mrs. H and Mrs. H in one case and Mr. N in the other. Their petitions said they were subjected to "surveillance operations" that violated their private lives.

They also charged that the British legal system had not given them "effective recourse".

One case derived from press disclosures in March 1985 by a former agent for the British domestic secret service MI5, who said it had spied on two members of the NCCL and classified them as "subversive" and "communist sympathizers".

The other case involves a financial analyst, who told the commission he was refused a job with a firm that does defense work for the government after a security check failed to give a "satisfactory result".

#90116d1430 04/26/1990 ~French/German News Agency
BONN (APRIL 26) - Amid protests nationwide, the West German Bundestag (lower house) Thursday passed a new law on foreigners' rights, aimed at giving more security to non-German citizens but also making it easier to deport exile-seekers not deemed politically or racially persecuted.

The law, condemned as ''nationalistic'' by opponents, forbids as before the hiring of workers abroad - one of the main reasons for the large numbers of Turks and southern European foreigners entering West Germany during the boom years of the early 1970s.

For foreigners who have become established residents, the law gives

improved rights to stay in West Germany and claim citizenship, and also makes it easier to have spouses and children join them.

But the law will make it easier for authorities to send home the thousands of foreigners deemed not to be genuine political refugees but merely trying to cash in on West German affluence, as also foreigners found guilty of crimes.

The 4.6 million foreigners living in West Germany form about seven percent of the population - about a third of them from European Community states and thus with a right of residence.

Of the remaining two-thirds, the biggest single nationality is that of the 1.5 million Turks, most of whom have lived more than ten years in West Germany after arriving during the boom years.

The law presented by Interior Minister Wolfgang Schaeuble was formulated after years of controversy in which liberal and left-wing members of the conservative-liberal coalition demanded more rights for immigrants.

GENEVA (APRIL 26) - Between six and eight million people around the world are carriers of the AIDS virus, Dr. Hiroshi Nakajima, director of the World Health Organization (WHO), said on Thursday.

Speaking before a United Nations committee on AIDS, Dr. Nakajima said that of the total infected, about 600,000 are suffering from full-blown Acquired Immune Deficiency Syndrome.

While infection estimates have recently been revised downwards in North America and Western European countries, large increases have occurred in other areas of the world, such as sub-saharan Africa and a few countries in South East Asia, Dr. Nakajima said.

On April 20, WHO reported that in 1991 the number of AIDS sufferers in Europe would double, to between 60,000 and 78,000.

On Thursday, Dr. Nakajima said that WHO's global estimate of six to eight million infections in the early 1990's remains unchanged. He added that WHO continues to regard the AIDS epidemic as one of its priorities.

The UN committee on AIDS is meeting privately on Thursday and Friday.

#90116d1720 04/26/1990 ~French/German News Agency

PARIS (APRIL 26) - French aircraft engine group SNECMA made a net profit of 85.1 million francs (15 million dollars) in 1989, against a loss of 250 million francs the year before, the government-owned group announced here on Thursday.

SNECMA sales jumped by 30 percent last year, to 13.4 billion francs, the announcement added.

The nationalized group, which includes Societe Europeenne de Propulsion (Ariane rocket engines), Messier-Bugatti and Hispano-Suiza, had a positive consolidated result of 294.5 million francs (group share) last year, against less than 27 million the year before.

Group investments totaled 1.15 billion francs, and the total research, development and industrialization effort amounted to more than five billion francs, the announcement said.

Orders received last year by SNECMA alone totaled 12.4 billion francs, and the order book (backlog) totaled 36.3 billion francs at the end of the year, against 35.8 billion at the end of 1988.

#90116d1890 04/26/1990 ~French/German News Agency

MANAGUA (APRIL 26) - Nicaragua should see spectacular economic growth over the nex few months, but stability will depend on the defeated Sandinistas, new central bank president Francisco Mayorga said Thursday.

Mr. Mayorga told Agence France-Presse that President Violeta Chamorro, who was sworn in Wednesday, had been assured of international assistance to restructure Nicaragua's shattered economy.

But he stressed that "social and political stability" was paramount if the Central American country was to pull out of the economic crisis caused by 10 years of rule by the leftwing Sandinista National Liberation Front.

Without the Sandinistas' cooperation, he said, there would be no prosperity and the country "would fall into chaos."

At her swearing-in ceremony, Mrs. Chamorro promised to raise the country's living standards, although she failed to say how she was planning to do it.

A few days before the change of government, Sandinista-controlled unions went on strike demanding 200 per cent wage increases. They have threatened new walk-outs if their demands are not met by the Chamorro administration.

Mr. Mayorga warned the Sandinistas not to hinder the new government's efforts at straightening out the economy. Otherwise, he warned, "the

people will decide what to do with them."

The opposition (now the Sandinistas) might try to sabotage Mrs. Chamorro's economic policy, because, he said, "in the past they ran the Nicaraguans into the ground" burdening them with a "dramatic economic crisis."

Mr. Mayorga said he felt bolstered, however, by former president Daniel Ortega's promise Wednesday at the inauguration ceremony that Sandinista front would be a "constructive opposition." Mrs. Chamorro has quite a challenge before her, economists said. Inflation in 1988 reached a record 36,000 per cent and the country's external debt was put at seven billion dollars.

Mr. Mayorga predicted inflation would rise over the next two months, slowing down by July and "coming completely under control" by September.

"We'll achieve economic recovery with international assistance," he said refusing to go into specifics.

During Mrs. Chamorro's election campaign, Mr. Mayorga said many times that Nicaragua would urgently need 600 million dollars to assure economic growth this year.

He felt sure most of the economic aid would come from the United States, and said he hoped the U.S. Congress would quickly approve a proposal by President George Bush's to grant Nicaragua a 300-million-dollar aid package.

Mr. Bush Wednesday authorized 2.5 million dollars in medical aid to Nicaragua as a symbol of goodwill toward the new government.

U.S. Agriculture Secretary Clayton Yeutter said the United States would donate 10.8 million dollars' worth of agricultural products to Nicaragua.

Mr. Mayorga said that Japan had also promised economic aid to Nicaragua, without mentioning any amount.

DHAKA (APRIL 26) - At least 45 people were killed and 70 others injured in a stampede which started as hundreds of destitute people scrambled to get free saris from a rich man's house in the Bangladesh port city of Chittagong, police said.

State-run television said 33 bodies including 12 of children were identified but many others were disfigured beyond recognition.

Police in the southeastern town said at least 5,000 people gathered at the city centre to receive charity after announcements were made of a free distribution of saris to mark the Islamic Id el-Fitr festivities at the end of the fasting month of Ramadan.

Eyewitnesses said people fought with iron rods and stones after the stock of saris ran out. Police fired teargas shells to disperse mobs which started to attack neighbouring houses.

The authorities said the death toll could rise as at least 25 people were in a critical condition in hospital in the port city 240 kilometres from Dhaka. A similar stampede for free saris led to 25 deaths in the central Bangladesh town of Chandpur last year.

#90116d2340 04/26/1990 ~French/German News Agency

WASHINGTON (APRIL 26) - The United States spoke out against Israel Thursday for going ahead with two Jewish settlements in the occupied territories in defiance of Washington's urgings.

''We are dismayed by reports that Israel is going forward with two new settlements in the occupied territories, one at Dugit in the Gaza Strip, and one at Alon, in the West Bank,'' State Department spokesman Richard Boucher said.

''It is disturbing that the caretaker government is taking steps that the national unity government was unwilling to take on settlements,'' he said.

The statement was the second time this week that the United States has lamented Israeli settlement activity. On Monday, Washington termed ''deeply disturbing'' that the Israeli government had secretly helped fund the settlement of 150 Jews in a Christian hospice in Jerusalem's Old City.

''We have repeatedly urged the government of Israel to refrain from establishing more settlements or expanding existing settlements,'' Boucher asserted.

''As we've indicated before, it's particularly disappointing that an Israeli leadership that was unable to move forward on its own peace plan has begun to move forward on new settlement activity which makes it more difficult to produce the peace process.''

Boucher said U.S. Ambassador William Brown had met with caretaker Prime Minister Itzhak Shamir this week to express those views.

-30- 1615

#90116d2450 04/26/1990 ~French/German News Agency
WASHINGTON (APRIL 26) - The U.S. administration gently reprimanded Congress Thursday for passing a resolution recognising Jerusalem as the capital of Israel.

The State Department, which has declined up to now to get involved in the debate, said: ''We feel that Congress is entitled to express its point of view.''

''The administration doesn't control that, and we have made clear our own view repeatedly,'' Department spokesman Richard Boucher said. ''There's been absolutely no change in our position on that.''

White House spokesman Marlin Fitzwater was slightly more direct, saying: ''Congress needs to consider resolutions like this more than in the past. Sometimes they can have consequences.''

President George Bush has stated openly that it regards East Jerusalem as occupied territory and that the city's status ought to be determined through negotiations. At the same time, he has taken pains to maintain good working ties with Congress.

The non-binding resolution passed Tuesday in the House of Representatives and earlier this month in the Senate has produced a stream of angry criticism from the Arab world.

#90116d2490 04/26/1990 ~French/German News Agency
WASHINGTON (APRIL 26) - Iraq has a large supply of Scud missiles that are capable of hitting Israel, but the country is not on the verge of going nuclear, a senior U.S. official said Thursday.

Assistant Secretary of State John Kelly, the State Department's specialist for the Middle East and South Asia, told a House Foreign Affairs subcommittee: ''We do not believe Iraq is close to possession of a nuclear weapon.''

Speculation about Iraq's nuclear capabilities ran rampant earlier this month when customs officials in London confiscated nuclear weapon triggers bound for Baghdad.

That incident and other weapons confiscations, combined with Iraqi President Saddam Hussein's ''reckless words and actions'' have raised questions about Iraq's military intentions, Kelly said.

The United States might consider placing restrictions against Iraq, but not economic sanctions, he said.

U.S. authorities learned last month that Iraq had placed missile launchers along the Jordanian border at an airbase known as H-2, he said, and could hit Israel with its stockpile of Scud extended-range missiles fired from the site.

But Kelly said: ''We are not prepared to see economic and trade sanctions legislatively imposed at this point.''

Unless they were imposed multilaterally, Iraq would only take its business elsewhere, worsening Washington's already bad trade imbalance, he said. Moreover, the United States depends on Iraq for oil.

In the first two months of this year, Washington imported 675,000 barrels of crude per day from Iraq, whose oil reserves are second only to Saudi Arabia in magnitude.

OFFENBACH, WEST GERMANY (APRIL 26) - A worldwide network of observatories should be set up to check levels of ozone, carbon dioxide and other ''greenhouse'' gases in the air, meteorologists at a United-Nations-sponsored meeting said here Thursday.

The U.N. Commission on Atmospheric Sciences wound up its meeting here, attended by 75 scientists from around the world, with the suggestion that existing scientific checks be extended.

Weather specialists needed to know more about the chemical make-up of rain, air pollution and ozone concentrations near ground level, they said. Experts here came from as far away as Australia, Brazil, China, Iraq, Japan, New Zealand, Pakistan and Zimbabwe.

#90116d2820 04/26/1990 ~French/German News Agency

NEW YORK (APRIL 26) - Imelda Marcos' fraud trial was abruptly recessed Thursday when her blood pressure soared during testimony about the day in 1986 when she and her late husband Ferdinand were forced to flee the Philippines, a judge said.

U.S. District Judge John Keenan recessed the trial until Friday on the condition that Mrs. Marcos' health permits the trial to resume then.

Mrs. Marcos' lawyer, Gerald Spence, said he expected the trial to resume on schedule.

"I think it was the reliving of probably the saddest day of her life," he said. "It brings back vividly her memories of that day."

Mrs. Marcos, charged with looting her country's treasury and defrauding U.S. banks to buy New York real estate, was seen sobbing during Thursday's testimony. She was taken to a nursing station in the federal court house during the lunch recess.

Her husband, who was president of the Philippines for 20 years and died in exile in Hawaii, was originally charged on the same counts as his wife.

The couple was forced to flee to the United States by a popular revolt which ushered in the presidency of Corazon Aquino.

LISBON (APRIL 26) - UNITA rebels on Thursday said they had captured Nharea and Lumerge, respectively in Angola's Bie and Moxico provinces in the centre and east of the country and killed 47 government troops.

The statement issued here by the National Union for the Total Independence of Angola (UNITA) said the fighting took place on Wednesday but gave no details of the locations seized.

It also accused government troops, "despite their denials", of launching an offensive from Kayundo in the southern Cuando Cubango province "with the aim of reaching the border between Angola and Namibia".

Angolan Foreign Minister Pedro de Castro Van Dunem was meanwhile to meet members of the Angolan community in Lisbon for a first three-day conference on peace and political prospects, which began Thursday.

Portuguese President Mario Soares at the conference called on Angolans to try to get talking peace. The UNITA rebels have been fighting the government in Luanda since independence in 1975.

In New York Wednesday, Mr. Van Dunem said "direct talks" between the government and UNITA would take place "in the coming days", probably in Portugal, but there was still no word here late Thursday about any such talks.

TOKYO (APRIL 27) - Japan's seasonally adjusted jobless rate stood at 2.2 percent in fiscal 1989, ended March 31, down 0.2 percentage points from the previous year, the Management and Coordination Agency said Friday.

The agency said the 1989 rate was the lowest since 1981 when it stood at the same 2.2 percent.

It also said the March unemployment rate was down 0.1 percentage point to two percent, also the lowest since September 1980.

The number of unemployed in March totaled 1.41 million, a decline of 220,000 or 13.5 percent from a year ago. They comprised 870,000 men and 540,000 women.

The agency report said the number of people in work in fiscal 1989 averaged 61.63 million a month, up 1.27 million from the previous year's monthly average, the highest since fiscal 1950.

They comprised 36.68 million men, up 1.5 percent from the previous year and 24.95 women, up 3.1 percent.

The Agency also said the ratio of job openings to job seekers in fiscal 1989 stood at a seasonally adjusted 1.30, down 0.22 percentage point from fiscal 1988.

The figure meant that there were 130 job openings for every 100 job seekers in fiscal 1989.

#90116d8320 04/26/1990 ~French/German News Agency

Tokyo (APRIL 26) - Japanese carmaker Mitsubishi denied here Thursday a Japanese newspaper report saying it had agreed with Volvo of Sweden to produce passenger cars in Belgium from 1993.

An official statement issued under the name of president Hirokazu Nakamura said Mitsubishi was considering ''some possible plans'' for production in Europe but ''had not yet decided to do anything.''

The Asahi Shimbun newspaper reported Thursday that under a contract to be signed in Tokyo in June the two carmakers would form an equally-owned joint venture.

Production of 200,000 units a year would start at a Volvo factory in Ghent, northwest of Brussels, said the report.

#90116d8350 04/26/1990 ~French/German News Agency

CANBERRA (APRIL 26) - Australia recorded a net foreign debt of 117.4 billion dollars (89.2 billion U.S.) in the last quarter of 1989, 18

percent up from the same period of 1988, the Bureau of Statistics reported Thursday.

It said the figure for the December quarter, revised from 118.4 billion dollars (90 billion U.S.), was higher than the 113.6 billion dollars (86.34 billion U.S.) registered in the previous three months.

The country's net foreign debt - foreign borrowing by Australian residents minus Australian lending abroad and reserve assets - was 99.3 billion dollars (75.5 billion U.S.) in the last quarter of 1988.

Gross foreign debt for the December quarter of 1989 was 147.7 billion dollars (112.3 billion U.S.), up from 141.9 billion dollars (107.8 billion U.S.) in the September quarter and 126.4 billion dollars (96 billion U.S.) in the last three months of 1988.

As at December 31, Australia's net international investment position - the difference between foreign investments in Australia and Australian investments abroad - stood at a net liability of 160.4 billion dollars (121.9 billion U.S.).

This was 3.4 percent higher than the 155.2 billion dollars (117.9 billion U.S.) recorded in the September quarter and nearly 21 percent up on the 132.9 billion dollars (101 billion) in the December quarter of 1988.

On December 31, foreign investment in Australia totalled nearly 245.9 billion (186.9 billion U.S.) and Australian investment abroad stood at more than 85.4 billion dollars (64.9 billion U.S.).

#90116d8890 04/26/1990 ~French/German News Agency

TOKYO (APRIL 26) - Japan's indices of industrial production and shipments both showed solid gains in March, the Ministry of International Trade and Industry said Thursday.

Japan's industrial output is staying "on an upward course", a ministry official said, but it may slow down in April and rebound in May.

The March index of mining and manufacturing stood at 123.7, against 100 for the year 1985, up 2.6 percent from February and 0.7 percent from a year earlier.

The shipment index was at 126.7, up 4.0 percent from the previous month and 1.8 percent from March last year. The index of inventories went down 2.5 per cent from February to 108.1 but was 6.2 percent higher than the year-before level.

Tokyo (APRIL 26) - Japanese vehicle exports in the 1988-89 year ending March 31 fell six percent to 5,817,044, the Japan Automobile Manufacturers Association (Jama) announced Thursday.

It was the fourth year in a row that exports declined. Jama said that passenger car exports fell 3.7 percent to just over 4.4 million, while truck exports slipped 12.6 percent to just below 1.38 million. Bus exports plunged 19.3 percent to 36,200.

Passenger car exports to the United States totalled 1,954,364, down 10.2 per cent from the fiscal 1988 figure of 2,177,866. It was the third year in a row that exports to the U.S. was below the voluntary export ceiling quota of 2.3 million cars, Jama noted.

Tokyo (APRIL 26) - Teheran has proposed a plan to Tokyo to store in Iran 100 million barrels of crude oil for Japanese oil users, about 20 percent of Japan's total reserves at present, the Nihon Keizai newspaper reported Thursday.

In return for the stockpile service, Japanese oil importing firms, including trading houses, would pay about 1.5 to 2 billion dollars to Iran. The money would go for Iran's post-war reconstruction projects, the paper said.

Teheran made the proposal to a business mission of Japan's powerful Federation of Economic Organisations (Keidanran) which recently visited Iran.

Japanese crude oil reserves were about 524 million barrels at the end of 1989, with the private sector stockpiling about 324 million barrels, equivalent to 90 days' consumption by Japan.

TOKYO (APRIL 26) - Kokusai Denshin Denwa Co. (KDD) on Thursday opened three international high-speed digital leased circuit services with New Zealand, Sweden and Bahrain, KDD officials said.

This brings the number of countries in KDD's HI-BITLINK (High-Speed Digital Leased Circuit) service to 20, they said.

The service makes possible video conferences, high-speed facsimile transmission, and file transfers between computers.

SINGAPORE (APRIL 26) - Japan's leading business daily, Nihon Keizai Shimbun, is to start printing in Singapore from October 1, a spokesman for the daily said Thursday.

The NKS spokesman said that some 5,000 copies of the 36-page daily will be printed here initially for circulation in Singapore, Malaysia, Indonesia and Thailand. He forecast that circulation would reach 7,000 in the next three years.

The subscription rate was not known. "We are still working on it," said the spokesman.

Singapore is the fourth printing site for NKS outside Japan -- others are New York, Los Angeles and Heerlen in the Netherlands, but NKS will be the first Japanese daily printed in Singapore.

A major advantage of Singapore printing is that it will enable regional subscribers of NKS to read its Asian edition at about the same time each morning as their counterparts in Japan, instead of a day later as is the case now.

A contract to print the Japanese economic daily was signed between NKS and the Singapore Press Holdings Ltd (SPH) here Wednesday.

The increasing Japanese presence in the region and the competitive and advanced printing facilities available in the island were believed to have prompted the NKS group to the printing venture.

"The signing of the printing agreement today is the culmination of efforts over the last few years," a brief NKS bulletin said.

Meanwhile, press reports said that another Japanese daily, Asahi Shimbun,

was also taking steps to launch a regional edition from Singapore from October. But neither SPH nor NKS sources were available for comment.

SPH currently prints the regional editions of four international newspapers - the Asian Wall Street Journal, the International Herald Tribune, the Sunday Express and USA Today.

#90116d9770 04/26/1990 ~French/German News Agency

LONDON (APRIL 26) - A former South African policeman told here Thursday how special police hit squads were routinely authorized to carry out political assassinations in a "twighlight war" against opponents of the government.

Speaking clearly and calmly before a South African governmental commission investigating the murders, Captain Dirk Coetzee described the secret "culture" shared by members of the deaths squads and recounted in stark detail how African National Congress (ANC) members, trade unionists and other opponents of the apartheid regime were systematically harassed, abducted and murdered.

"The security family has a special protection which allows us to operate inside and outside the borders of South Africa," Capt. Coetzee said.

"This protection is vested in a culture ... a special secrecy, loyalty to one another, a special relationship between subordinates and superiors. This enabled us to operate above the law," he said.

The atmosphere inside a cinema within the South African embassy here where the commission hearings were taking place bordered on the surreal as commission members dutifully noted Capt. Coetzee's responses to questions like what methods were used in the assassinations and how the victim's bodies were disposed of.

Capt. Coetzee described how a man he identified as Peter, an ANC supporter, went to Bulgaria as a student and shortly thereafter defected to an unnamed embassy.

Peter subsequently contacted the South African authorities and arrangements were made for him to be flown back to South Africa to work as an "Askari", or black informant.

Peter was of "slender build, always late and caused a lot of problems -- he was often assaulted by the others," Capt. Coetzee said, adding: "It was decided we should get rid of him."

"That meant only one thing: murder the guy and dispose of the body," Capt. Coetzee said. Showing no remorse, he admitted that he and a more senior regional commander had carried out the murder and then burned Peter's body on a pyre and disposed of the remains.

The Harms Commission investigation, headed by Judge Louis Harms, has moved temporarily to London because Capt. Coetzee and another former member of the death squads have refused to return to South Africa for fear of being killed.

Throughout his testimony, Capt. Coetzee has cited the names of senior police and government officials who authorized or knew of the murders.

Asked about the denials that a number of them have issued recently from South Africa, Capt. Coetzee replied: "It's all lies, and if I were back in South Africa I would have done the same."

He said he had left his wife and children in Pretoria and had decided to live abroad so that he could speak out about the death squads, which were first uncovered in a South African newspaper report last year.

"Now that I'm safely out of South Africa I can afford to speak the truth. I couldn't carry on for the rest of my life with all these atrocities and fears," Capt. Coetzee said.

The commission investigation is expected to remain in London for about two weeks.

BELFAST (APRIL 26) - A Protestant man was killed in Belfast, while two civilians were slightly injured in a separate mortar attack on a security forces' base in Portadown, south of here, police said Thursday.

The dead man was Brian Kimm, 23, gunned down late Wednesday apparently by a Protestant paramilitary commando out to kill another man in a the Catholic neighborhood of Ligoniele, a Royal Ulster Constabularly (RUC) spokesman said.

Witnesses saw four masked men force their way into a home, but the occupier managed to escape. As they turned to flee, the commando opened fire on Mr. Kimm, a father of three who was passing by on his way home from a soccer match,
police said.

The other attack was made Thursday morning when several mortars were fired from a truck against a police-army station in Portadown, County Armagh, police said.

No one immediately claimed the attack.

PARIS (APRIL 26) - A strike by 4.5 million civil servants hit flights and trains, postal services, power supplies and schools in France on Thursday.

The stoppage, which affected the whole of the state-controlled sector, was called by all seven unions in the civil service in rejection of government pay proposals.

Flights were particularly affected by a strike by air-traffic controllers, and Air France cancelled half of its medium-range flights from Paris. The Air Inter domestic airline cancelled 45 percent of its flights.

In London, airport sources said the strike had disrupted services. British Airways had cancelled three of its nine flights to Paris, and Air France had cancelled seven out of 10. All flights from London City airport to Paris were cancelled, and flights from Gatwick, south of London, were seriously disrupted.

In France, three out of four main-line trains were cancelled excepting high-speed services which operated normally. Many train services in the region around Paris did not function, and the underground railway system was disrupted.

The ministry responsible for postal services said that 20 percent of postal workers were on strike. Many schools were closed, and the production of electricity was reduced.

The unions want their members to benefit from the economic recovery in France at a time when official reports show that the gap between those with capital and those depending on pay has grown during the last 10 years. For much of this period, the country has been governed by the Socialist party.

The government has increased pay in the public sector by 0.76 percent from January 1, while the unions have demanded an increase of 1.7 percent for the period 1988-1989. The government has said that the increase for 1990 will be 1.2 percent from April 1.

TOKYO (APRIL 26) KYODO - JAPAN'S EXPORTS OF CARS, TRUCKS, AND BUSES TUMBLED FOR THE FOURTH CONSECUTIVE YEAR IN FISCAL 1989, MAINLY DUE TO

REDUCED SHIPMENTS TO THE UNITED STATES, INDUSTRY FIGURES SHOWED THURSDAY.

VEHICLE EXPORTS IN FISCAL 1989, WHICH ENDED MARCH 31, TOTALED 5,817,044, DOWN 6.0 PERCENT FROM A YEAR EARLIER. THE PROPORTION OF EXPORTS TO TOTAL PRODUCTION WAS 44.9 PERCENT, DOWN 3.4 PERCENTAGE POINTS FROM 48.3 PERCENT IN THE PREVIOUS YEAR, THE JAPAN AUTOMOBILE MANUFACTURERS ASSOCIATION SAID.

CAR EXPORTS TO THE U.S., JAPAN'S LARGEST CAR EXPORT MARKET, SHOWED A SHARP FALL OF 10.3 PERCENT TO 1,954,364 CARS, REMAINING UNDER THE VOLUNTARY EXPORT RESTRAINT CEILING OF 2,300,000 CARS FOR THE THIRD STRAIGHT YEAR.

INDUSTRY ANALYSTS ATTRIBUTED THE DECLINE TO FURTHER EXPANSION OF PRODUCTION WITHIN THE U.S. BY JAPANESE AUTOMAKERS, COMBINED WITH A CONTINUED ECONOMIC SLOWDOWN IN THE U.S.

JAPANESE AUTOMAKERS' PRODUCTION IN THE U.S. INCREASED SHARPLY TO 1,128,678 CARS IN 1989 FROM 794,371 CARS THE YEAR BEFORE.

CALLS FOR ABOLITION OF VOLUNTARY EXPORT RESTRAINTS MAY REEMERGE AMONG JAPANESE AUTOMAKERS, THEY ADDED.

OF THE TOTAL EXPORTS, CARS ACCOUNTED FOR 4,405,565, DOWN 3.7 PERCENT, TRUCKS 1,375,279, DOWN 12.6 PERCENT, AND BUSES 36,200, DOWN 19.3 PERCENT.

VEHICLE EXPORTS INCLUDING TRUCKS AND BUSES TO THE U.S., WHICH ACCOUNTS FOR OVER 40 PERCENT OF VEHICLE EXPORTS BY JAPAN, MARKED A 14.0 PERCENT YEAR-ON-YEAR DROP TO 2,380,010.

OKLAHOMA CITY, OK (APRIL 26) PR NEWSWIRE - The board of directors of Beard Oil Co. (AMEX: BOC) has authorized the repurchase of up to 300,000 shares, representing approximately 5 percent of the company's currently outstanding common stock. No limitation on the time period for such repurchase was specified by the board.

Herb Mee, Jr., president, stated that the shares may be purchased periodically in open-market or private transactions, and that repurchased shares will be held in the treasury and used for general corporate purposes. "We feel that our shares are currently undervalued in the marketplace and that the shares represent a good investment," Mee stated.

Beard Oil is a diversified natural resource development company headquartered in Oklahoma City. Its principal business is oil and gas exploration and production, with an emphasis on secondary recovery operations. The company is also involved in carbon dioxide (CO2) and iodine production. Beard Oil's common stock is traded on the American Stock Exchange under the symbol BOC.

AYER, MA (APRIL 26) PR NEWSWIRE - The John E. Cain Company, manufacturer of New England's best selling mayonnaise, has introduced Cains Cholesterol Free Reduced Calorie Mayonnaise. It is the only mayonnaise on the market made with canola oil, the vegetable oil naturally lowest in saturated fat.

"Other leading regular, light and cholesterol free mayonnaise products contain soybean oil, which is 15 percent saturated," says Fred Johnson, vice president of sales and marketing at the John E. Cain Company.

"Canola oil used in new Cains Cholesterol Free is only 6 percent saturated."

The company conducted independent tests which reveal that using canola oil in new Cains Cholesterol Free reduces the saturated fat content per serving to half that of other leading cholesterol free brands.

"This makes Cains Cholesterol Free an ideal choice for the growing number of consumers who are trying to reduce their intake of saturated fat," reports Johnson. Excess dietary saturated fat can contribute to a high blood cholesterol level which increases the risk of developing heart disease.

"Cains Cholesterol Free has several other healthy attributes," adds Johnson.

Cains uses egg whites rather than egg yolks so this new product has no cholesterol. It's also free of hydrogenated oils, which have been chemically altered to increase oil saturation.

Compared to regular mayonnaise, Cains Cholesterol Free has half the fat and calories per one tablespoon serving.

"Today's health conscious consumers want lower fat, lower salt, lower calorie, cholesterol free products," says Johnson.

From 1988 to 1889 'light' mayonnaise sales grew from 16 percent of all mayonnaise sales to 18 percent. However, 'cholesterol free' mayonnaise sales are growing at a much more rapid rate, from 1 percent of all mayonnaise sales in 1988 to an astounding 10 percent in 1989. Combined, 'light' and 'cholesterol free' mayonnaise account for nearly one third of all mayonnaise sales.

Cains is offering a free brochure which provides healthy eating tips and creative recipes using new Cains Cholesterol Free Reduced Calorie Mayonnaise. Consumers can receive the brochure by writing to Cains Five Minute Guide to Healthier Eating, Box 347, Ayer, Mass., 01432.

SEATTLE (APRIL 26) PR NEWSWIRE - Univar Corp. (NYSE, PSE: UVX) today announced record earnings for the fiscal year ended Feb. 28, 1990.

Net earnings for the year were $21,545,000, or $1.22 per share, on sales of $1,378,864,000. This compares to net earnings of $19,973,000, or $1.13 per share, on sales of $1,307,865,000 in the prior year.

All per share data reflect the effect of a two-for-one stock split paid Nov. 4, 1989, as a 100 percent stock dividend to shareholders of record Oct. 16, 1989.

James W. Bernard, president and chief executive officer, credited the results to outstanding employee performance. "The fact that we have been able to generate record earnings while absorbing additional loads necessary to retain our leadership position in areas such as safety, environmental responsibility and compliance with a highly complex and rapidly expanding regulatory system, is a tribute to the dedication and capability of Univar employees," Bernard said.

Univar Corp., the largest distributor of industrial chemicals in North America, operates through two subsidiaries, Van Waters & Rogers Inc. in the United States and Van Waters & Rogers Ltd. in Canada.

#90116p7699 04/26/1990 ~PR Newswire

SAN MANUEL, AZ (APRIL 26) PR NEWSWIRE - Magma Copper Co. (AMEX: MCU) today announced net income for first quarter 1990 of $11.7 million, or $.28 per common share, on a fully diluted basis, compared to $22.8 million or $.56 per common share, assuming full dilution, for first quarter 1989, and $5.9 million (after a $3.5 million pretax asset write-down), or $.14 per common share, assuming full dilution, for fourth quarter 1989.

The average revenue per pound of copper sold for first quarter 1990, including rod conversion premiums, was $1.13, compared to $1.40 for the first quarter 1989, and $1.15 per pound in the fourth quarter 1989.

Net cash provided by operating activities in first quarter 1990 was $12.6 million compared to $1.2 million in first quarter 1989, resulting in a cash balance of nearly $60 million at March 31, 1990, compared to $49 million at Dec. 31, 1989.

Electrolytic copper production during the first quarter of 1990 was 154.2 million pounds, including 24.4 million pounds from purchased concentrates and 20.2 million pounds from third party tolling. In comparison, electrolytic copper production was 115.0 million pounds, including 39.3 million pounds from third party tolling, for the first quarter of 1989 and 146.1 million pounds, including 19.2 million from purchased concentrates and 33.8 million from tolling, in the fourth quarter 1989.

Magma sold 150.3 million pounds of electrolytic copper in the quarter compared to 71.1 million pounds for the first quarter 1989 and 146.4

million pounds in the fourth quarter 1989.

Revenue for the quarter was $181.6 million compared to $122.6 million in the first quarter 1989 and $190.0 million in the fourth quarter 1989.

Copper sales were $169.4 million or 93 percent of total revenue in the first quarter 1990, compared to $99.8 million or 81 percent in first quarter 1989 and $168.6 million or 89 percent in the fourth quarter 1989.

Magma Copper Co. operates mines, concentrators and solvent extraction/electrowinning plants at San Manuel, Superior and Miami, Ariz., as well as a smelter, electrolytic refinery and rod plant at San Manuel.

#90116p7704 04/26/1990 ~PR Newswire

STAMFORD, CT (APRIL 26) PR NEWSWIRE - Income from continuing operations of Xerox Corporation (NYSE: XRX) in the first quarter was $121 million, or $1.06 primary earnings per share, against $158 million, or $1.47 a share, a year ago, the company reported today. In the three months ended March 31, revenues totaled $4.3 billion, a 3 percent gain from $4.1 billion a year earlier. After the effects of discontinued operations, the company's latest quarter showed a loss of $254 million, or $2.93 primary earnings per share. The loss stems directly from the previously announced pre-tax provision of $400 million taken in the period in connection with Xerox investments in VMS Realty Partners, a hicago real estate investment firm. The provision involving VMS Realty, which is being treated as a discontinued business, amounted to $375 million after taxes.

Income from the core Xerox document processing businesses in the first quarter was $110 million, up 20 percent from $91 million in the corresponding 1989 period. Revenues from document processing operations were $3.1 billion, an increase of 6 percent from $2.8 billion a year earlier.

Revenues from continuing operations of insurance and other Xerox financial services in the first quarter were $1.2 billion compared with $1.3 billion a year ago. Income from continuing operations in the first quarter was $11 million against $67 million in the corresponding period last year, reflecting extremely soft industry-wide markets for property and casualty insurance and investment products, plus the absence of last year's high level of capital gains, the company said.

Income from Crum and Forster's property and casualty and life insurance operations in the three-month period was $37 million compared with $84 million a year earlier.

The property and casualty insurance industry is at a low point in its current business cycle, the company said. Industry-wide prices remain inadequate for most products while claims costs continue to escalate and, consequently, underwriting results remain under pressure. Despite this, Crum and Forster continues to adhere to pricing and reserving disciplines to protect its future profitability.

CONTACT: Thomas C. Abbott, 203-968-3378, or Dean J. Golembeski, 203-968-3572, both of Xerox.

#90116p7707 04/26/1990 ~PR Newswire

ATLANTA (APRIL 26) PR NEWSWIRE - Delta Air Lines' (NYSE: DAL) net income for the quarter ended March 31, was $31,314,000 despite sharply increased fuel costs, Thomas J. Roeck, senior vice president - finance and chief financial officer, reported today.

Earnings for the same period a year ago were $85,019,000. For the quarter, primary and fully diluted earnings per share were 48 cents. For the nine months ended March 31, net income was $228,690,000, compared to $270,139,000 during the same period last year. Primary earnings per share were $4.15, and fully diluted earnings per share were $3.95, Roeck stated.

During the quarter, Delta repurchased 2,988,200 shares of common stock for $202.3 million, bringing the total number of shares repurchased to 6,255,662, at a total cost of $438.8 million. Average shares used to compute primary earnings for the quarter were 49,505,938, and average shares used to compute fully diluted earnings were 55,551,509.

Operating revenues for the March 1990 quarter were $2.120 billion, up four percent from the $2.038 billion recorded in the 1989 quarter. Passenger revenues grew three percent to $1.982 billion. Revenue passenger miles totaled 13.606 billion, and the passenger mile yield was 14.57 cents compared to 14.12 cents for the last year's quarter, an increase of three percent. Cargo revenues grew seven percent to $103.8 million, and other revenues totaled $34.3 million.

Operating expenses in the March 1990 quarter were $2.072 billion, up eight percent from the $1.912 billion recorded in the 1989 quarter. Available seat mile capacity grew six percent to 23.657 billion. Revenue aircraft miles were up six percent. The average cost per seat mile increased two percent to 8.76 cents. Salaries and related costs increased nine percent, as the average level of employment grew seven percent. Aircraft fuel

expense rose $86.5 million over last year to $346.0 million due to a 27 percent increase in the average price of fuel to 71.81 cents per gallon and a five percent increase in the number of gallons consumed.

All other cash expenses decreased two percent to $750.5 million, due largely to a $24.8 million expense reversal resulting from an interline settlement agreement reached with Eastern Airlines during the quarter. Depreciation and amortization expenses in the March 1990 quarter grew to $114.5 million from $99.0 million in the 1989 quarter, mainly the result of the addition of 32 owned aircraft to the fleet.

#90116p7708 04/26/1990 ~PR Newswire

HARTFORD, CT (APRIL 26) PR NEWSWIRE - Shawmut National Corporation (NYSE: SNC) today reported net income of $40.6 million, or $.55 per common share, for the quarter ended March 31, 1990, compared with $64.7 million, or $.85 per common share, for the first quarter of 1989. Compared with the 1989 first quarter, the current quarterly results reflected a substantially larger provision for loan losses, an increase in the level of nonperforming assets and expenses associated with the recently completed regulatory examination of the corporation. Those factors were partially offset by gains resulting from the settlement of certain pension obligations and an extraordinary credit of $8.5 million arising from the utilization of a net operating loss carryforward.

Shawmut National Corporation Chairman Joel B. Alvord said, "Our results reflect the continuing uncertainty of the New England region and the particular problems in real estate. As a result of our recent actions to reduce the asset size of the corporation, increase reserves and reduce our dividend to conserve capital, we have improved our liquidity and maintained sound capital ratios. Given our belief that the year will continue to be characterized by economic uncertainties, we believe these steps will help ensure that we manage our resources prudently during this transitional period in our region."

The corporation's interest-earning assets averaged $24.2 billion in the first quarter of 1990, down 1 percent from $24.4 billion for the comparable 1989 period. Total loans averaged $18.9 billion for the first quarter of 1990, up 2 percent from $18.6 billion for the first quarter of 1989. During the quarter the corporation reduced the size of its balance sheet through the sale of investments and securitized assets to reduce the corporation's leverage, increase liquidity and position itself to take advantage of market opportunities. At quarter end, total interest-earning assets and total loans stood at $22.4 billion and $17.0 billion, respectively, as compared with $23.9 billion and $19.2 billion

respectively at December 31, 1989.

The return on average assets was .63 percent for the first quarter, versus .97 percent in the year-ago quarter. Return on average common equity was 11.82 percent for the first quarter of 1990, versus 15.23 percent in the year-ago quarter.

Shawmut National Corporation is a superregional bank holding company with headquarters in Hartford, Connecticut, and Boston, Massachusetts. The corporation has a branch network of nearly 400 offices in New England. Its principal banking subsidiaries are Connecticut National Bank in Hartford and Shawmut Bank in Boston.

#90116p7718 04/26/1990 ~PR Newswire

NEW BRUNSWICK, NJ (APRIL 26) PR NEWSWIRE - Johnson & Johnson (NYSE: JNJ) today announced that consolidated sales for the first quarter of 1990 were $2.84 billion, an increase of 16.1 percent over 1989 first quarter sales of $2.45 billion. Earnings per share for the first quarter of 1990 were $.73 compared with $.95 in the 1989 period. Consolidated net earnings for the first quarter of 1990 were $244 million, compared with $317 million for the same period a year ago. Consolidated net earnings and earnings per share were reduced by $125 million, or $.38 per share, due to the previously announced nonrecurring charge as a result of unprecedented economic distress in Latin America, primarily Argentina. Excluding these nonrecurring costs, net earnings for the quarter were $369 million, an increase of 16.4 percent over last year. Earnings per share, excluding the nonrecurring charge, were $1.11, a gain of 16.8 percent.

Johnson & Johnson's Consumer business, which includes sanitary protection, analgesics, health care, dental, and baby products, posted a 14.5 percent sales increase on a worldwide basis for the quarter. International Consumer sales improved 31.1 percent for the quarter, principally due to the substantial increase from Brazil, which continued to experience high inflation during the first three months of the year. For the same period last year, Brazilian sales were at depressed levels due to government imposed wage and price controls. For the quarter, European sales also posted strong gains across all product lines. Domestic Consumer sales were modestly improved for the period, with McNeil Consumer posting higher revenues while the company's other consumer products, principally sanitary protection, were negatively impacted by a difficult market environment. During the quarter, the Johnson & Johnson - Merck Consumer Pharmaceuticals Co., a joint venture, completed the purchase of the U.S. over-the-counter medicines (OTC) business of ICI Americas, Inc., which includes the Mylanta line of antacid products and the Mylicon line of anti-gas products.

Pharmaceutical sales for the quarter were up 20.9 percent worldwide, reflecting strong sales increases for Hismanal, Prepulsid and Eprex, as well as continued market penetration of key pharmaceuticals, including the company's broad line of antifungals. International sales advanced 25.5 percent, with domestic operations posting a 14.5 percent gain.

Johnson & Johnson, with over 83,000 employees, is the world's largest and most comprehensive manufacturer of health care products serving the consumer, pharmaceutical and professional markets. 1989 sales were $9.76 billion and return on equity reached a record 28.3 percent.

BENTON HARBOR, MI (APRIL 26) PR NEWSWIRE - A very strong performance by Whirlpool Corporation (NYSE: WHR) in the first quarter was dampened by economic conditions and reforms in Brazil which adversely affected the operations of the company's Brazilian affiliates.

Excluding Brazil, Whirlpool's first-quarter net earnings rose 11 percent, paced by market share gains, continued effective cost controls and price increases in most product categories. However, the company's equity interest in Brazilian operations was a loss of $.26 per share in the first quarter, compared to a $.02 per share loss in first-quarter 1989.

As a result, Whirlpool's reported first-quarter net earnings were $29.5 million, or $.42 per share, compared to $40.7 million, or $.59 per share, in the first quarter of 1989. Excluding Brazilian performance in the first quarters of both 1989 and 1990, net earnings for the company improved from $.61 per share in the first-quarter 1989 to $.68 per share in first-quarter 1990. First-quarter 1990 consolidated net revenues were $1.64 billion compared to $1.58 billion in 1989, an increase of 3.8 percent.

Whirlpool Corporation is the world's leading manufacturer and marketer of major appliances. Headquartered in Benton Harbor, Mich., the company manufactures products in 10 countries and markets them under nine brand names in more than 45 countries.

DAYTON, OH (APRIL 26) PR NEWSWIRE - Mead Corporation's (NYSE: MEA) board of directors today approved a 14 percent increase increase in its quarterly dividend from 22 cents to 25 cents per common share.

In making the announcement, Burnell R. Roberts, chairman and chief

executive officer, said the company is ahead of schedule in construction of its new $560 million paperboard mill in Alabama, which will come on stream later this year. The company is also continuing to invest in the development and marketing of Cycolor(R) products, which are used in its proprietary color imaging technology.

"Our objective is to assure that Mead share owners earn a competitive total return over the long term," Roberts said. "The dividend increase reflects both this commitment and our confidence in the future."

All dividends are payable June 1, 1990, to shareholders of record May 7, 1990. The transfer books will not be closed.

NATICK, MA (APRIL 26) PR NEWSWIRE - Natural MicroSystems Corp., the leading developer of voice technology, today announced it has jointly developed with NCR Corp. (NYSE: NCR) an Integrated Services Digital Network (ISDN) terminal adapter that allows personal computers to simultaneously handle voice and data. The product is the first ISDN personal computer adapter to take advantage of a multi-tasking operating system.

The product consists of a PC AT-compatible terminal adapter (PCTA) card that links a standard telephone and personal computer to ISDN, and advanced telecommunications software. The package permits personal computer users with access to an ISDN line and an OS/2 multi-tasking environment to manage different aspects of voice and data calls through windows while retaining the ability to continue work in foreground applications.

"The partnership between Natural MicroSystems and NCR has benefited both organizations," said Charles T. Foskett, president of Natural MicroSystems. "The advantages of ISDN, coupled with NCR's vast marketing network and Natural MicroSystems' powerful voice technology base, offer innovative and cost-effective communications capabilities for businesses worldwide."

The ISDN interface is compatible with Natural MicroSystems' powerful ME/2 and VScript voice application development tools, allowing original equipment manufacturer (OEMs) and value-added resellers (VARs) to build their own ISDN user interfaces or provide enhanced ISDN capability for other voice applications.

"In designing an adapter to take advantage of an international

communications standard, OEMs and resellers must have the flexibility to configure applications for their own markets," Foskett added. "With our PCTA, system builders can take full advantage of the standard architecture of our development tools and the multi-tasking capabilities of OS/2 to customize applications according to business needs."

Both companies have retained manufacturing and marketing rights. NCR will ship the package in June as the ISDN Voice Data Manager, while Natural MicroSystems will market the product on an OEM basis, beginning in late 1990.

Under the terms of the agreement, Natural MicroSystems developed the PCTA software and jointly designed the hardware with NCR. PCTA voice capabilities and software draw significantly from Natural MicroSystems telephony and voice technology, while PCTA data capabilities draw significantly from NCR's data communications and ISDN technology.

ISDN is an international communications standard that allows the integration of voice, data and image into a single digital communications network. An ISDN line supports all current communications services including telephone, data transmission, electronic mail, telex, facsimile and local area networks. Digital signal processing provides increased speed, call volume and reliability as well as decreased costs.

NCR Corporation, with headquarters in Dayton, Ohio, develops, manufactures markets and services business information processing systems for worldwide markets.

Based in Natick, Mass., Natural MicroSystems Corporation is a pioneer in developing systems that effectively combine computer technology with telecommunications technology.

#90116p7758 04/26/1990 ~PR Newswire

OAK BROOK, IL (APRIL 26) PR NEWSWIRE - The Interlake Corp. (NYSE: IK) today said operating income from continuing operations rose 11 percent to $17.5 million for the first quarter ended April 1, compared to last year's first quarter.

First quarter sales from continuing operations were $198.6 million, down 6 percent from a year ago.

Frederick C. Langenberg, chairman and CEO, said operating income is a more appropriate measure of company performance than net income because of last year's restructuring program.

As part of the restructuring plan, certain non-core businesses were designated for disposal. ''Results of these businesses in the first quarter are included in continuing operations under the caption unusual items of expense,'' he said. ''Sales from these businesses fell 24 percent to $18.0 million in the first quarter, and operating losses of $1.3 million were $.8 million higher than the year-earlier period. Excluding these losses, operating income from continuing operations rose 16 percent to $18.9 million.''

Income was reduced by higher interest expenses ($16.4 million in the first quarter compared to $1.5 million a year ago) and a related higher effective tax rate stemming from the recapitalization portion of last year's restructuring. After interest and taxes, continuing operations reported a loss of $.9 million, or $.08 per share.

ARWOOD RESULTS EXCLUDED

First quarter results do not include Arwood Corp., Interlake's investment casting subsidiary, which has been classified as a discontinued operation because it is a major business pending sale. On March 13, 1990, Arwood signed a letter of intent with Wyman-Gordon Co. for the sale of Arwood's investment casting business. The transaction should be finalized in the second quarter.

FIRST QUARTER NET RESULTS

Langenberg said that significantly higher interest expenses and results from the discontinued operations created a first quarter net loss of $2.3 million, or $.22 per share, compared to net income of $8.2 million, or $.81 per share, for the year-ago period.

The Interlake Corp. is a diversified multinational company operating in two business areas -- engineered materials, including aerospace components

and handling/packaging systems.

DENVER (APRIL 26) PR NEWSWIRE - Total Petroleum (North America) Ltd. (AMEX: TPN) announced results for the first quarter ended March 31, 1990. The company reported a net loss of $12.3 million or $0.46 per share compared to net income of $1.8 million or $0.01 per share for the first quarter of 1989. Per share results in both years are after payment of preferred dividends.

Commenting on the results Philippe Dunoyer, chairman and chief executive officer, said: "The seasonal weakness of refining margins in the first quarter of 1990 was more pronounced than in 1989. The spring upturn of margins is now in progress and we expect this trend to continue.

"Cash flow from oil and gas production in Canada was over 50 percent of the first quarter of 1989 because of improved oil prices and higher natural gas sales."

Total Petroleum (North America) Ltd. is a petroleum company with refining and marketing operations in the Central United States and exploration and production in Canada. Its shares are listed on the American, Toronto, Montreal and Pacific stock exchanges. Total Compagnie Francaise des Petroles owns approximately 51 percent of the voting shares of Total Petroleum (North America) Ltd.

#90116p7763 04/26/1990 ~PR Newswire

HIGHLAND PARK, MI (APRIL 26) PR NEWSWIRE - There's only one Jeep(R), and according to 4Wheel & Off-Road magazine, there's only one "ultimate out-of-the-box off-road driving machine" among 4X4 vehicles -- 1990 Jeep Cherokee.

The Jeep/Eagle Division of Chrysler Motors has kicked off its new advertising campaign, "Best of the Best," on the heels of 4Wheel & Off-Road naming Jeep Cherokee "The Best of the Best" in their first-ever comparison of previous winners of the magazine's "4X4 of the Year" award. It's a solid example of Advantage: Jeep.

Since 1983, 4Wheel & Off-Road has tested new and substantially changed 4X4 vehicles to determine the winner of each year's award. This year, they corralled 1990 models of all past winners and tested them in the "War of the Winners."

The 1990 vehicles competing against Jeep Cherokee, itself a two-time winner of the "4X4 of the Year" award (1984 and 1988), included this year's winner, the four-door Nissan Pathfinder. Past winners tested in the ultimate shootout were 1990 versions of the two-door GMC S-Jimmy representing the Chevy S-Blazer, the four-door Isuzu Trooper II, the Ford Ranger SuperCab and the Toyota Xtracab SR5.

Incidentally, in winning the 1990 "4X4 of the Year" award, Pathfinder competed and won against the all-new Ford Explorer, the four- door Chevy S-Blazer and the four-door Toyota 4Runner.

In the first "Best of the Best" television commercial, entitled "High Noon " a lone Jeep Cherokee waits on the street of an Old West ghost town as a host of would-be gunslingers -- the "War of the Winners" competitors -- ride into town for the ultimate showdown. As the Cherokee alone faces the five vehicular assailants, an off-camera voice asks, "So who won? Who do you think?"

As the Isuzu, GMC, Nissan, Ford and Toyota vehicles turn their tails and scurry out of town, it's clear that the winner in this shoot-out is the 1990 Jeep Cherokee.

"Some of our testers call it the ultimate performance machine," said Tom Bezzi, 4Wheel & Off-Road's technical editor and one of the "War of the Winners" evaluators.

"The winners represent the cream of the crop," said Bezzi. "But when the winners are pitted against one another in a head-to-head test, the Jeep Cherokee comes out at the top of the hill."

Jeep Cherokee's outstanding win will be the major focus of Jeep vehicle advertising for May and June, in both television and print ad form.

"This is our strongest campaign ever," said Martin R. Levine, Jeep/Eagle general manager. "It's hard-hitting and to the point -- the 1990 Jeep Cherokee is the ultimate 4X4. We've been saying that since we introduced Cherokee in 1983. But, more importantly, now the experts are the ones making the claim."

#90116p7764 04/26/1990 ~PR Newswire

HIGHTSTOWN, NJ (APRIL 26) PR NEWSWIRE - PA Consulting Group, international management and technology consultants, today announced post-tax profits of $13.1 million (pre-tax $21.6 million) for the year ended Dec. 31, 1989, a 68 percent increase over 1988 results.

Revenue in the period rose by 27 percent to $249.1 million including a six-month contribution of $6.7 million from PA's acquisition of Hartmark-IRAS in Norway. Earnings per share increased by 44 percent to $.11.

Commenting on the results, John Foden, PA's chairman and group chief executive, said: "Our record results for 1989 represent a further step towards achieving our strategy -- against the background of a marketplace that had become tighter in the U.K. and Australia, balanced by increasing opportunities in Mainland Europe and South-East Asia. Operations in all our zones around the world were profitable.

"We remain the market leaders in the U.K. and Australia, and through our acquisition in Norway and Denmark we enter the new decade as market leaders in Scandinavia. We are actively searching for further high-quality

acquisitions, particularly in Mainland Europe and North America. Quality and market share will be the key determinants of success in the consulting market of the 1990s" concluded Foden.

Stephen Payne, chief executive officer for PA's North American operations, said: "This is PA's best year. We have the right track record globally for our growth in North America. We're growing our base in Princeton and targeting the acquisition of other companies to join us in our success."

PA Consulting Group is the leading international management and technology consultancy, with offices in 20 countries and a 1,750-member consulting staff. PA is committed to working with clients in industry and commerce to manage complex change and to create business advantage through technology.

#90116p7765 04/26/1990 ~PR Newswire

PORTLAND, OR (APRIL 26) PR NEWSWIRE - NERCO Inc. (NYSE: NER) today announced higher earnings for the first quarter of 1990, compared to the same period in 1989, due to improved results from the company's gas and minerals businesses and consistent results from the coal unit.

Net income for the period was $19.6 million or 50 cents per share, compared to first quarter 1989 net income of $16.3 million or 49 cents per share. Average shares outstanding increased from 33.4 million shares in 1989 to 38.9 million shares in 1990. In addition, consolidated revenues increased 11 percent to $174.1 million, from 1989 first quarter revenues of $156.9 million.

NERCO Chairman Gerard K. Drummond noted, "our net income for the first quarter of 1990 increased by 20 percent over the same period last year due to increases in our gas and minerals businesses and solid performance from our coal unit."

The company's oil and gas subsidiary increased its operating income to $12 million for the first quarter, compared to $8.7 million for the first quarter in 1989. The $3.3 million increase was primarily because of increased gas production and higher effective sales prices.

During the 1990 period, the company sold 15.5 billion cubic feet of gas and purchased another 2.1 billion cubic feet for resale to its long-term gas customer, Louisiana Power & Light. In the first quarter of 1989, NERCO sold 12.8 billion cubic feet of gas and purchased another 2.6

billion cubic feet for resale. In addition to gas sales, the company sold 305,000 barrels of oil during the quarter, compared to 194,000 barrels of oil in 1989's first three months. Natural gas liquid sales in 1990 were 227,000 barrels, a slight increase from the 222,000 barrels sold in 1989.

NERCO President Lawrence E. Heiner reported, "our coal unit had first quarter operating income of $27.8 million, compared to last year's $28.7 million for the same period.

"However," he added, "the first quarter results were affected in part by delayed deliveries of coal to one of our long-term customers, Utility Fuels Inc., which will be made up later in 1990." Coal sales were consistent for the quarter at 7.4 million tons for both the 1990 and 1989 periods, but included a higher proportion of eastern coal sales in the 1990 quarter.

Due to increased gold sales and higher effective gold sales prices, combined with lower exploration and research costs, the company's precious metals unit posted improved results for the quarter. Operating income was $2.9 million for the first three months of 1990, compared to $1.1 million for the same 1989 period.

During the quarter, the company sold 37,000 ounces of gold, compared to 29,000 ounces in 1989. Silver sales were substantially lower at 540,000 ounces, compared to 1.05 million ounces for the same period in 1989. Because of significantly lower prices during the period, NERCO held approximately 1.7 million ounces of silver in inventory at the end of the quarter.

Approximately 82 percent of NERCO's common stock is owned by PacifiCorp (NYSE: PPW), a diversified electric utility. NERCO is a major North American producer of low-sulfur coal, gas and oil, and precious metals.

#90116p7769 04/26/1990 ~PR Newswire

WHITE PLAINS, NY (APRIL 26) PR NEWSWIRE - The board of directors of American Savings Bank (NYSE: ASB) has elected Philip M. Blumenfeld as executive vice president, effective April 25, 1990, announced William G. Lillis, president and chief executive officer of American. Blumenfeld, who had been retained as a consultant by the bank earlier this year, will concentrate on real estate loan workouts and the management of owned real estate.

"We are pleased to have Phil join the bank's senior management team; he will play an important role in real estate loan workouts and in our efforts to reduce the bank's level of non-performing loans," remarked Lillis. "His expertise will also be very helpful in guiding American through the adverse conditions in the real estate market."

From November, 1987 until July, 1989, Blumenfeld was senior executive vice president and chief operating officer of the New York Guardian Mortgagee Corporation, where he was responsible for all servicing aspects of a $8+ billion FNMA, GNMA and conventional mortgage loan portfolio. Prior to that, he was a vice president of Helmsley Enterprises, Inc., and executive vice president of Helmsley-Spear of Florida, Inc., where he was responsible for acquisition, financing, development, and management of various income properties. Blumenfeld was also a vice president at the Metropolitan Life Insurance Company for 20 years in the area of real estate financing, leasing and management.

Commenting on his appointment, Blumenfeld said,"I have enjoyed working with American as a consultant, and I look forward to the challenges we face going forward. I am going to focus all of my efforts on improving asset quality in American's loan portfolio."

American Savings Bank is a New York state-chartered savings bank with executive and administrative offices in White Plains, N.Y.

#90116p7771 04/26/1990 ~PR Newswire

BOSTON (APRIL 26) PR NEWSWIRE - United Asset Management Corporation (NYSE: UAM) today announced that its net income in the first quarter of 1990 rose 27 percent to $4,345,000 from $3,410,000 in the same quarter a year ago. Fully diluted earnings per share for the first quarter were $.26, an 18 percent increase over the $.22 reported in 1989. Revenues in the quarter increased 19 percent to $40,069,000 from $33,571,000 a year earlier. Operating income increased 16 percent to $10,335,000 from $8,881,000 in the 1989 quarter.

Operating cash flow (cash flow provided by operations before working capital changes) rose to $12,168,000, a 22 percent increase over the first quarter of 1989. Amortization of cost assigned to contracts acquired, a significant component of operating cash flow, increased to $6,493,000 in the quarter from $5,535,000 in the first quarter of 1989. Amortization on a per share basis was $.31 in the first quarter of 1990, up from $.27 in the like period of 1989.

Norton H. Reamer, president of UAM, stated, "UAM's results in the first quarter of 1990 were significantly ahead of those in the first quarter of 1989 and at or near the record results achieved in the fourth quarter of 1989, in spite of the unfavorable market performance in the first quarter. We believe that we continue to be well positioned for internal growth as well as further growth by acquisition."

UAM provides investment management services, primarily to institutional clients, through 22 operating firms which manage nearly $38 billion for 3,400 clients located throughout the United States and abroad.

#90116p7773 04/26/1990 ~PR Newswire

WHITE PLAINS, NY (APRIL 26) PR NEWSWIRE - The board of directors of American Savings Bank (NYSE: ASB) has elected Gary V. Bracken as president of the Westchester Community Lending division, effective April 30, 1990, announced William G. Lillis, president and chief executive officer of American. Bracken replaces Victor P. Compe, who is retiring on that date.

"We commend Vic Compe for his leadership in building the Westchester Community Lending division into a well established and active lender in the area during its first year, and we wish him the best in his retirement " stated Lillis. "As Vic's right-hand man and close associate for 12 years, Gary Bracken is a natural to succeed him as president. We know he will do a fine job in leading the division to further success."

The Westchester Community Lending division was established in March 1989 to be a middle-market lender in the Westchester area. Since then, the division has built a portfolio of $81 million in commercial loans and $5 million in consumer loans. Bracken joined the division in May 1989 as senior vice president. He had previously been a senior vice president at the Scarsdale National Bank and Trust Company. Bracken, his wife and daughter and son reside in North Salem, N.Y.

American Savings Bank is a New York state-chartered savings bank with executive and administrative offices in White Plains, N.Y.

#90116p7775 04/26/1990 ~PR Newswire

ARLINGTON, VA (APRIL 26) PR NEWSWIRE - USAir Group (NYSE: U) today reported a net loss of $38 million for the first quarter of 1990, which compares with net earnings of $16 million for the first quarter of 1989.

At the operating level, USAir Group had a loss of $160 million for the quarter, compared with operating income of $58 million for the same quarter of 1989.

First quarter 1990 revenues were $1.54 billion, up from $1.48 billion for the same period a year earlier. Loss per share for the first quarter of 1990 was $1.05 on 44.2 million shares, which compares with earnings per share of $0.35 on 43.9 million shares for the first quarter of 1989.

"Traffic levels through the first quarter were up 8.5 percent, slightly ahead of our projections," said USAir chairman and president Edwin I. Colodny. "We have also experienced a significant improvement in operating performance. On-time performance for March was over 79 percent our best record for this month. We also flew nearly 98 percent of our scheduled mileage.

Colodny also noted that several factors adversely affect comparisons between the first quarter of this year and last year. Among them are a strike against Eastern Airlines that began in early March of 1989, and the fact that the peak Easter travel holiday fell in March last year and in April this year.

Expenses for the first quarter of 1990 were inflated by a 24 percent increase in the price of fuel, Colodny added. In addition, they contain on-going merger-related costs such as wage and salary increases for many former Pacific Southwest Airlines and Piedmont Airlines employees who were brought into parity with USAir salary levels concurrent with the merger of Piedmont into USAir on Aug. 5, 1989.

USAir's airline operations showed a net loss of $67 million on operating revenues of $1.43 billion for the first quarter, compared with net income of $31 million on revenues of $1.39 billion for the same quarter a year earlier.

USAir's operating loss for the first quarter was $162 million, which compares with operating income of $55 million for the first quarter of 1989.

#90116p7777 04/26/1990 ~PR Newswire

NEW YORK (APRIL 26) PR NEWSWIRE - Ogden Corporation today reported income from operations of $24.7 million for the first quarter 1990, compared with $19.9 million for the same period of 1989, an increase of 24 percent. Both business segments, Operating Services and Waste-to- Energy Operations reported increased income from operations.

For the first quarter 1990 income before taxes and minority interest was $43.3 million, including a benefit from the sale by Ogden Projects of its stock in March 1990, compared with $23.2 million in 1989.

Net income increased to $28.0 million ($.66 per common share) from $16.5 million ($.39 per common share) despite increased taxes and minority interest.

The attached table sets forth revenues and income from operations by business segment, net income, primary and fully-diluted earnings per share for the first quarters of 1990 and 1989, which has been restated to reflect the operations of ERC International Inc. acquired on Jan. 19, 1990 in a transaction accounted for on a pooling-of-interests.

OGDEN CORPORATION
(In thousands except per share)

NEW YORK (APRIL 26) PR NEWSWIRE - The Shareholder Committee for Responsible Corporate Governance of Armstrong World Industries, Inc., today announced that after consulting with other shareholders it intends to cumulate votes to elect its nominees in the following order:

-- Michael C. Jensen
-- Richard E. Bennett
-- Greta E. Marshall
-- Frederick R. Warren-Boulton

The committee nominated these four to Armstrong's 13-member board.

Jensen is Edsel Bryant Ford Professor of Business Administration at Harvard Business School. Bennett is chairman of Scovill, Inc., an affiliate of members of the Committee.

Ms. Marshall is general partner of The Marshall Plan, an investment planning and management firm, and former investment manager for the California Public Employees' Retirement System. Warren-Boulton is a resident scholar at the American Enterprise Institute and former assistant attorney general for economic analysis.

Armstrong's annual meeting is scheduled to begin at 9 a.m., Monday, April 30, 1990.

#90116p7780 04/26/1990 ~PR Newswire

PARSIPPANY, NJ (APRIL 26) PR NEWSWIRE - Athlone Industries, Inc. (NYSE: ATH) today reported net sales of $68,951,000 and net earnings of $3,097,000 or $.50 per common share for the first quarter of 1990. Specialty steel shipments are trending up sharply in 1990 compared to the last half of 1989, however, the effect of some lower raw material costs and certain selling price increases have not yet been reflected in operating results.

For the first quarter of 1989, the company reported record net sales of $83,910,000 and net earnings of $6,908,000 or $1.21 per common share.

Commencing in June 1989 and through the first quarter of 1990, the company has retired $40 million of its 15-5/8 percent subordinated notes using internally generated funds. At present, approximately $35 million of these notes are outstanding. The company presently expects, subject to market conditions, to continue to retire these notes in 1990. The substantial interest savings will benefit future periods.

The regular quarterly dividend of $.25 per share will be payable on May 15 1990 to stockholders of record May 1, 1990.

JACKSONVILLE, FL (APRIL 26) PR NEWSWIRE - Winn-Dixie Stores, Inc. (NYSE: WIN) announced today that Vice Chairman, Robert D. Davis, will retire at the end of its current fiscal year in June.

Davis, 58, Winn-Dixie's chairman from 1983 to 1988, will remain on Winn-Dixie's Board. He said he was retiring to devote full time to Davis family business entities. Davis also serves as chairman of D.D.I., Inc., a family holding company.

"Winn-Dixie's current operating results demonstrate that management is executing a first-rate business plan whose performance targets are being met. In June I will complete 35 years' service. This change in my responsibilities will assure a continuation of the Davis family's strong backing of Winn-Dixie's management into the future," Davis said.

Davis family interests own, directly or indirectly, approximately 39 percent of Winn-Dixie's common stock.

Winn-Dixie is the Sunbelt's largest food retailer, operating l,223 stores in 13 states.

CINCINNATI (APRIL 26) PR NEWSWIRE - The Midland Company (AMEX: MLA) today reported net income for the first quarter ended March 31, 1990 of $810,000 $.25 per share, compared to $3,050,000, $.91 per share, in the first quarter of 1989. Revenues totaled $42,686,000 through the first three months of 1990 compared to $37,374,000 in 1989.

J.P. Hayden, Jr., Midland's chairman, stated, "The company's operating profit was adversely affected by heavier than normal weather related losses in Midland's insurance subsidiaries. These losses were caused primarily by severe weather in Alabama and Mississippi in February and March of this year. In contrast, during the first quarter of 1989, Midland's insurance division enjoyed one of its best quarters ever due to very mild weather.

"Midland's river transportation subsidiary experienced some difficulty with high water conditions in the first quarter of this year. Flooding along the Ohio and Mississippi rivers and their tributaries hampered the loading and unloading of barges due to flooding at these facilities along the river.

"On a more positive note, Midland's board of directors, at its March 1, 1990 board meeting, approved a 10.5 percent increase in its dividend to 42 cents per common share on an annualized basis."

Midland, which is headquartered in Cincinnati, is engaged in insurance and finance operations, the transportation of bulk commodities on the inland waterways, and the imprinted sportswear business.

#90116p7797 04/26/1990 ~PR Newswire

COLUMBIA, MD (APRIL 26) PR NEWSWIRE - The Ryland Group, Inc. (NYSE: RYL) today reported its 1990 first-quarter earnings.

Earnings from operations were $6.5 million, a 39 percent increase over 1989's first quarter. Primary earnings per share from operations for the first quarter were $.46 (fully diluted: $.42) compared to $.35 (fully diluted: $.35) in 1989 before the effect of an accounting principle change.

Consolidated revenue for the first quarter was $319 million, an 8 percent increase over the same period last year.

The consolidated net earnings for 1989's first quarter have been restated as a result of the adoption of Statement of Financial Accounting Standards (SFAS) 96, for accounting for income taxes, reported as a change in accounting principle. This restatement increased net earnings by $14 million for that period.

Ryland Building Company had a record first quarter, settling 1,999 homes during the first three months of 1990, which was a 12 percent increase over the same period last year. New orders for the period were 2,131 homes, and outstanding contracts were 3,258 homes at March 31, 1990, representing a 7 percent decrease in backlog dollar volume compared to March 31, 1989. The company's strongest results were attained in the Brock operations, which reported a 48 percent increase in homes settled over 1989's first quarter.

"While the growth in employment remains steady or is improving in a number of cities in the Midwest and Southwest, there are signs of problems in the mid-Atlantic and the southern California areas. However, the traffic through our model homes continues at levels equal to last year's, leading us to believe that a positive turn in interest rates could result in favorable sales," said Chairman and Chief Executive Officer C. E. Peck.

Ryland Mortgage Company and its financial services subsidiaries recorded pretax earnings of $1.9 million compared to $3.4 million in the first quarter of 1989.

Ryland Acceptance Corporation issued fewer bond series during the first quarter of 1990. However, significant additions were made to the bond administration portfolio of RMC Asset Management Company.

The Ryland Group, headquartered in Columbia, is one of the nation's largest homebuilders. Ryland has built more than 90,000 homes since it was founded in 1967.

BOSTON (APRIL 26) PR NEWSWIRE - Boston Edison Company (NYSE: BSE) today reported earnings (loss) per common share for the three and 12 months ended March 31, 1990 of 68 cents and (39 cents), respectively, compared to earnings per common share of 19 cents and $1.89 for the same periods last year. The results of operation for the three and 12 months ended March 31 1990 includes 41 cents per common share due to the cumulative effect of a change in accounting principle to begin recording unbilled revenues, effective Jan. 1, 1990. This accounting change provides a better matching of revenues and expenses by recording an estimate of customer usage which is unbilled at the end of each month. Results for the 12 months ended March 31, 1990, also included an after-tax charge of $106,280,000 relating to provisions for Pilgrim Nuclear Power Station litigation and rate proceedings recorded in the fourth quarter of 1989.

DALLAS (APRIL 26) PR NEWSWIRE - Sun Energy Partners, L.P. (NYSE: SLP), announced net income of $57 million, or $.15 per unit, for the quarter ended March 31, 1990. Excluding the effect of an accounting change, income increased 97 percent to $57 million in the first quarter of 1990 from $29 million in 1989. Revenues for the 1990 first quarter were $336 million compared to $303 million for the same period last year.

The first quarter of 1989 included a $199 million cumulative loss for a change in the method of accounting for the capitalization of interest costs. This resulted in a net loss of $170 million, or $.47 per unit.

The increase in income, before the cumulative effect of the accounting change for the first quarter of 1990, was primarily due to higher crude oil prices.

The Partnership also announced a cash distribution of $.41 per unit for the second quarter of 1990, to be paid on June 8, 1990 to unitholders of record on May 18, 1990.

Sun Energy Partners managing general partner is Oryx Energy Company.

#90116p7811 04/26/1990 ~PR Newswire

BOSTON (APRIL 26) PR NEWSWIRE - Uno Restaurant Corporation (AMEX: UNO) announced today that net income for its second quarter rose 19 percent to $776,000 compared to $650,000 for the comparable period in the prior year. At $13 million, revenues were 36 percent ahead of last year's second quarter, and earnings per share were 12 cents vs. 11 cents for the same quarter last year, allowing for a 9 percent increase in outstanding shares. For the first half of fiscal 1990, revenues were up 31 percent at $24.7 million, and net income increased by 26 percent to $1.6 million. Earnings per share were 25 cents compared to last year's 22 cents, after allowing for the increased number of shares outstanding.

In making the announcement, Aaron Spencer, chairman and chief executive officer, stated, "The second quarter absorbed substantial expenses in connection with our aggressive growth program and were, therefore, in line with expectations. As a result of this growth, the company anticipates record revenues and earnings during the second half of fiscal 1990, and is well positioned for excellent results continuing well into fiscal 1991. We are in the midst of an extremely aggressive expansion schedule that has resulted in 21 new restaurants opened in the last 12 months, with some 20-25 scheduled openings during the next 12 months. We anticipate five additional company openings during the second half of fiscal 1990, and up to nine openings in the first half of fiscal 1991."

Margins at comparable company stores are at record levels, however, as expected, pre-opening costs attributable to new restaurants bring overall margins down somewhat during the first year as pre-opening costs are amortized. In addition, new stores have been opening at record sales levels and, as a result, we expect further reductions in general and administrative expenses as a percent of sales.

During the second quarter, sales at company-owned units increased 3.5 percent over a year ago, primarily as a result of extremely strong sales in the New York and suburban markets more than offsetting modest softness in the Boston market. Notwithstanding, Boston market stores continue to register the highest volumes in the Uno system.

The company expects that its expansion plans for the remainder of fiscal 1990 and 1991 will be financed by internally generated funds, together with a $10 million private debt placement with Cigna, a major insurance company. These unsecured notes will mature in 1996 and carry a 10.22 percent fixed rate. The company anticipates closing this transaction during May.

Uno Restaurant Corporation operates and franchises a chain of casual dining, full-service restaurants under the name "Pizzeria Uno Restaurant & Bar." The restaurants feature gourmet, Chicago-style deep dish pizza and a variety of entrees, sandwiches, appetizers, salads, desserts and beverages. It currently owns and operates 27 Pizzeria Uno restaurants in Massachusetts, New York, New Jersey, Rhode Island, New Hampshire and Washington, D.C., and has 44 franchised restaurants in 15 states and Canada.

#90116p7815 04/26/1990 ~PR Newswire

HOUSTON (APRIL 26) PR NEWSWIRE - Enron Oil & Gas Company (NYSE: EOG) today reported net income of $11.2 million, or 15 cents per share, for the first quarter of 1990. The company reported a loss of $.7 million, or 1 cent per share, for the same period a year ago.

Comparable net revenues from operations were $96.3 million in the recent quarter compared to $74.6 million for the first quarter of 1989.

The 1990 results primarily reflect substantially increased wellhead natural gas sales and other natural gas marketing volumes, increased crude oil and condensate prices along with lower DD&A expenses and a lower effective federal income tax rate, according to Enron Oil & Gas Chairman and CEO Forrest E. Hoglund.

"Benefits resulting from those improvements were partially offset by lower average wellhead natural gas prices and an increase in exploration-related expenses," Hoglund said. "Our wellhead natural gas production volumes averaged 455 million cubic feet per day (MMcf/d) during the first quarter of 1990 compared to 337 MMcf/d during the same period a year ago." Hoglund also noted that wellhead natural gas sales were substantially higher in January and February but curtailed during March and early April reflecting both weaker demand and prices. Estimated deliverability currently exceeds 500 MMcf/d reflecting increased capability in each of the company's three core areas.

Crude oil and condensate prices during the first quarter of 1990 averaged $19.77/barrel compared to $15.44/barrel a year ago. Natural gas prices averaged $1.67/Mcf during the current period vs. $1.83/Mcf the prior-year quarter.

Enron Oil & Gas reported income before interest and taxes of $21.2 million for the first quarter of 1990 compared to $7.6 million for the first quarter of 1989. Net income benefited from a lower effective federal income tax rate reflecting the partial utilization of a net operating loss carryforward available to the company.

Discretionary cash flow increased to $61.8 million for the first quarter of 1990 compared to $35.5 million a year ago.

Enron Oil & Gas Company is one of the largest independent (non-integrated) oil and gas companies in the United States in terms of domestic proved reserves. The company's reserve base is 91 percent domestic and 91 percent natural gas.

#90116p7817 04/26/1990 ~PR Newswire

HOUSTON (APRIL 26) PR NEWSWIRE - For the second straight year, Seagull Energy Corporation (NYSE: SGO) today reported record first quarter results.

The company said earnings applicable to common stock for 1990's first quarter totaled $9.0 million, or $1.18 per share, on revenues of $63.0 million. Earnings applicable to common stock of $6.7 million, or 94 cents per share, on revenues of $61 million for the same quarter of 1989 had until now been the company's best ever for a single quarter.

Operating profit was also a company record for any quarter. It totaled $16.3 million for the 1990 period vs. $15.3 million for the same period of the prior year.

"Most of the 1990 improvement was registered in our exploration and production segment," pointed out Chairman Barry J. Galt. "Production of both natural gas and crude oil were at record levels for the company, due primarily to our purchase of the assets of Houston Oil Trust as of year-end 1989. Average prices were also higher than those of a year ago."

The company's record earnings were generated despite a slight decline in operating profit from its Alaska gas distribution division, Galt noted. The 1989 quarter's results were unusually strong due to severely cold weather, but this year's quarter was nearly as good ($9.9 million vs. $10.9 million in operating profit) and better than any other quarter since Seagull acquired the Alaska operations in 1985.

Unrelated to its income statement, Galt also reported that Seagull reduced its long-term debt some 31 percent during the quarter--from $113.8 million at the end of 1989 to $78.0 million as of March 31, 1990.

"Not only have we gotten the year off to a good start with record first quarter earnings, but our strong financial position gives us the ability to actively pursue a wide variety of energy investment opportunities," he added. "We will experience the usual fall-off in second and third quarter earnings because of the seasonal nature of heating requirements in Alaska, but the outlook for all of 1990 is very positive."

Houston-based Seagull is engaged in oil and gas exploration and production; the transportation, distribution and marketing of natural gas, liquids products and petrochemicals, and natural gas processing.

#90116p7818 04/26/1990 ~PR Newswire

NORCROSS, GA (APRIL 26) PR NEWSWIRE - SSI (NASDAQ: SSIAA) and NYNEX Information Solutions Group (NYSE: NYN) announced today that they have agreed in principle to the acquisition by NYNEX of SSI in a pooling transaction in which SSI shareholders will receive NYNEX common stock having a value of not less than $15 nor more than $16.20 for each share of common stock of SSI.

The agreement in principle is conditioned upon execution and approval by the respective boards of directors of NYNEX and SSI of a definitive agreement containing customary terms and conditions and approval of the transaction by the SSI shareholders.

Larry A. Dean, chairman and president of SSI is enthusiastic about the proposed acquisition. Dean will remain chief executive officer of SSI and will continue to be actively involved in the day-to-day operations of the company. Dean said: "A merger with NYNEX will offer significant benefits to the shareholders, customers and employees of SSI. Our shareholders will realize a value for their investment that has not been recognized by the current market."

Dean continued: "Since SSI will operate as a separate subsi$R1.7/8VLxour cu stomers will continue to receive the same excellent service and quality products that SSI's employees have always provided. I am very impressed with the tremendous commitment NYNEX has made to become the number one software provider to the banking industry, our principal marketplace. Also, NYNEX will provide us the resources necessary to further the growth and success of SSI."

The addition of SSI into NYNEX's Information Solutions Group (ISG) strengthens ISG's worldwide leadership position in software for the financial services market. SSI will report operationally to AGS Computers

a wholly owned subsidiary of ISG. Lawrence Schoenberg, chairman of AGS stated the acquisition is consistent with NYNEX's strategy to be a world class provider of software solutions for the banking industry.

Founded in 1971, SSI designs, markets and supports a line of financial application software for IBM and IBM-compatible computers.

The company has over 1,200 customers who use SSI's software for check processing, securityholder recordkeeping, electronic funds transfer, lease accounting, loan origination, safe box accounting, loan recovery, loan servicing and secondary marketing.

PHILADELPHIA (APRIL 26) PR NEWSWIRE - Sun Distributors L.P. (NYSE: SDP) had net income of $4.5 million for the first quarter of 1990, more than double the $2 million earned in the same quarter last year, it was announced today by Donald T. Marshall, chief executive officer of the diversified industrial distribution firm based here.

First quarter income per limited partnership unit was $.40 compared to $.18 in 1989.

Sales for the first quarter of 1990 were $146 million, up more than 9 percent from $134 million in 1989. Marshall noted, "Sun Distributors realized almost half of its sales growth this quarter from new acquisitions. Our ongoing acquisition program continued to help us during this period when many of our established markets showed little strength."

Sun Distributors continued its policy of monthly cash distributions to holders of limited partnership units with a total payment of $.275 per unit in the first quarter. In addition, a tax distribution of approximately $.297 per unit related to 1989 earnings was made in March.

Sun Distributors Class A limited partnership interests and Class B limited partnership interests, which previously traded as a unit, began trading separately on April 25, 1990. Holders of the combined units as of May 1, 1990, will receive an equal number of Class B depositary receipts, which will be mailed as soon as possible. NYSE symbols for the A and B interests after separation are SDP and SDP/B respectively.

NORCROSS, GA (APRIL 26) PR NEWSWIRE - SSI (NASDAQ: SSIAA) and NYNEX Information Solutions Group (NYSE: NYN) announced today that they have agreed in principle to the acquisition by NYNEX of SSI in a pooling transaction in which SSI shareholders will receive NYNEX common stock having a value of not less than $15 nor more than $16.20 for each share of common stock of SSI.

The agreement in principle is conditioned upon execution and approval by the respective boards of directors of NYNEX and SSI of a definitive agreement containing customary terms and conditions and approval of the transaction by the SSI shareholders.

Larry A. Dean, chairman and president of SSI is enthusiastic about the proposed acquisition. Dean will remain chief executive officer of SSI and will continue to be actively involved in the day-to-day operations of the company.

Dean said: "A merger with NYNEX will offer significant benefits to the shareholders, customers and employees of SSI. Our shareholders will realize a value for their investment that has not been recognized by the current market."

Dean continued: "Since SSI will operate as a separate subsidiary our customers will continue to receive the same excellent service and quality products that SSI's employees have always provided. I am very impressed with the tremendous commitment NYNEX has made to become the number one software provider to the banking industry, our principal marketplace. Also NYNEX will provide us the resources necessary to further the growth and success of SSI."

The addition of SSI into NYNEX's Information Solutions Group (ISG) strengthens ISG's worldwide leadership position in software for the financial services market. SSI will report operationally to AGS Computers, a wholly owned subsidiary of ISG. Lawrence Schoenberg, chairman of AGS stated the acquisition is consistent with NYNEX's strategy to be a world class provider of software solutions for the banking industry.

LAS VEGAS, NV (APRIL 26) PR NEWSWIRE -- Robyn Warsinske has been named to the newly created position of manager of investor relations of Nevada Power Company (NYSE: NVP). Her appointment was announced by Richard G. Hyte, vice president of finance and chief financial officer.

Hyte said creation of the post would increase company communications with the investment community and the country's financial markets. Hyte said Warsinske was chosen for the post because of her extensive experience in economics, financial analysis and financial planning.

Warsinske joined Nevada Power Company in 1986 as a senior financial analyst and was promoted to supervisor of financial planning in 1989.

Prior to joining Nevada Power, she was a senior analyst with Pacific Power and Light in Portland, Ore., and holds a degree in economics from Pacific Lutheran University.

#90116p7848 04/26/1990 ~PR Newswire

NEW YORK (APRIL 26) PR NEWSWIRE - In the first project of its kind, a U.S. development firm and its Soviet partner have announced plans to build a $130 million residential community in the suburbs of Moscow.

Senie Kerschner International Housing Limited (SKIHL), of Westport, Conn., and the Soviet farm collective Zavet Ilyicha announced today the signing of a joint venture agreement to build Rosinka, a new 528-unit residential community for international companies in the Soviet Union. The U.S. and Soviet partners will have equal shares of the venture.

Construction of Rosinka is expected to begin in late summer with the first homes ready for occupancy in June 1991. The project will be built in phases over a four-year period.

Over 100 of the rental units have already been reserved by companies based in countries including the United States, Finland, Japan, Holland, Sweden and the United Kingdom.

"Our market research shows that demand for executive housing outstrips available supply. As a result, foreign executives and their families frequently wait up to two years to find suitable living quarters in Moscow. Rosinka addresses this need and the international business response is very enthusiastic," said Alan Senie, president of SKIHL.

Located on 33 hectares (80 acres) of land overlooking a 15-hectare (35 acre) lake, Rosinka's three-story buildings will complement the rural landscape, bringing New England-style architecture to Moscow for the first time. Rosinka will offer four different apartment sizes ranging from 116 sq m (1248 sq ft) to 262 sq m (2712 sq ft) for a two- story townhouse. All units will be fully equipped with contemporary kitchens and baths. The village will have a range of amenities, including a supermarket, athletic facilities, daycare center, restaurant, dry cleaners, a transportation system, and a telecommunications center.

The apartments will be rented for six-year terms, with a limited number of 50-year leases also available. Eighty percent of the homes will be leased for roubles to Soviet citizens who are employed by foreign-based firms.

According to Viktor Malnev, chairman of the Zavet Ilyicha farm collective, Rosinka will generate considerable hard currency earnings for the farm collective. "We will use these resources to purchase equipment and technology to improve the output and quality of our production," Malnev

said.

In addition, the joint venture will help the farm complete a 24- hectare (60-acre) field of greenhouses which is already under construction. Since Zavet Ilyicha sends sixty percent of its produce to Moscow, these greenhouses will increase the city's vegetable supply over the winter months.

Finn-Stroi, a Finnish construction firm with over 17 years experience in the Soviet Union, will handle the construction of Rosinka.

According to Nolan K. Kerschner, president of The Kerschner Companies of Norwalk, Conn., and vice president of SKIHL: "We've been building homes in the Northeast United States for the past 40 years. The increased foreign business activity provides a way for us to become involved in housing in the Soviet Union. We hope eventually to be partners with Soviets on the expansion of their home building industry."

#90116p7850 04/26/1990 ~PR Newswire

MINNEAPOLIS (APRIL 26) PR NEWSWIRE - Diversified Energies, Inc. (NYSE: DEI), said today that for the first quarter ended March 31, 1990, it had net income of $18.6 million, or $1.16 per share, on revenues of $276.6 million.

That compares to net income of $39.9 million, or $2.50 per share, on revenues of $335.4 million for the same period last year. Net income for last year's first quarter reflects $17.8 million of after-tax income from the company's exploration and production unit that related to settlements of take-or-pay disputes, and an $800,000 reduction that stemmed from adopting the SFAS 96 method of accounting for income taxes. Exclusive of those non-recurring items, income for last year's period totaled $22.9 million, or $1.44 per share, on revenues of $307.6 million.

A company spokesperson said that when compared to the $22.9 million, the $4.3 million decline in net income for this year's first quarter was principally due to decreased volume of natural gas sold by the company's natural gas distribution unit -- due to weather that was 20 percent warmer then the normal weather of last year's first quarter -- and a reduced earnings contribution from its radio communications unit.

The radio communications unit had an operating loss of $600,000 for this year's first quarter compared to operating income of $2.5 million for the same period last year. Results reflect an 8 percent decline overall in

sales, a 16.5 percent increase in investment for engineering and product development, and reduced margins in response to increased price competition in the marketplace.

The company said that while reduced sales were disappointing, the unit ended the quarter with a 45 percent increase i orders on backlog -- $83 million on March 31, 1990, compared to $58 million at the same time last year. About $50 million of the backlog is scheduled for shipment this year.

Volumes of natural gas sold/delivered by the natural gas distribution unit totaled 57 billion cubic feet (Bcf), down 8.6 Bcf from the period last year. The unit had operating income of $35.7 million compared to operating income of $43 million for the period last year.

The company's exploration and production unit had operating income of $1.6 million for this year's first quarter compared to an operating loss -- exclusive of $27.8 million of pre-tax income from take-or-pay settlements -- of $1.7 million for the period last year. The improvement reflects reduced operating costs and improved subseas diving results.

LOS ANGELES (APRIL 26) PR NEWSWIRE - Lawrence Bernstein has been promoted to the position of senior vice president for finance for Orion Pictures Corp. (NYSE: OPC), it was announced today by Edwin L. Schwartz, senior vice president and chief financial officer of Orion Pictures Corp. Bernstein, who joined Orion in 1987, continues to serve as the company's chief accounting officer.

In making the announcement, Schwartz said, "Larry's promotion is a result of his expanded role within the Finance Department and in recognition of his increased responsibilities which include all aspects of accounting, tax, budgeting and financial forecasting, public reporting and financial controls for Orion as well as assisting in financing matters as required. In addition, vice presidents of departments responsible for the payments of participations and residuals, credit administration, international finance and television finance report directly to Larry." Bernstein is based at Orion Pictures Corp.'s Century City office.

Prior to joining Orion, Bernstein was a principal in the accounting firm of Arthur Young & Co., where he was assistant director of accounting for

their Los Angeles office and served various motion picture and other entertainment clients.

CHICAGO (APRIL 26) PR NEWSWIRE - UAL Corporation (NYSE: UAL) -- the holding company whose primary subsidiary is United Airlines -- today reported a first quarter loss of $36.4 million or $(1.68) per share of common stock, primarily as a result of a one-time, nonoperating charge against earnings of $77.5 million for the settlement of several lawsuits with respect to United's operation of its computer reservation system, dating back to the early 1980's. Without this charge, earnings would have been $10.2 million or $0.47 per share. These compare to net earnings for the first quarter 1989 of $65.4 million or $3.03 per share.

UAL Corporation Chairman, President and Chief Executive Officer Stephen M. Wolf said, "Although we achieved a slight profit for the quarter after excluding the one-time charge for settlement of lawsuits, we are nevertheless disappointed by these results. Expenses were up in most categories. The average price per gallon of fuel in the first quarter was 73.3 cents versus 60.7 cents last year, which alone contributed to a 23 percent, $71 million, increase in fuel expense."

Wolf continued, "While our domestic traffic was essentially unchanged from last year, United's growth in the Pacific has been dramatic. In the first quarter, United increased its Pacific traffic by 32 percent on capacity growth of just 24 percent."

UAL Corporation's first quarter operating revenues were $2.5 billion versus first quarter 1989 revenues of $2.3 billion. Revenue passenger miles were up 6.4 percent while yield (passenger revenue per mile flown) was up slightly to 12.79 cents. First quarter operating expenses were $2.6 billion versus first quarter 1989 expenses of $2.2 billion. A first quarter operating loss of $47.2 million compares to first quarter 1989 operating earnings of $142.7 million.

United flew 17.1 billion revenue passenger miles in first quarter 1990. Available seat miles were up 4.1 percent to 26.3 billion. Passenger load factor of 64.9 percent was up 1.4 points from 63.5 percent in 1989.

#90116p7855 04/26/1990 ~PR Newswire

MIAMI (APRIL 26) PR NEWSWIRE - Citizens Federal Bank, a Federal Savings Bank, and its parent company, Citizens Savings Financial Corporation (NASDAQ-NMS: CSFCB), have filed suit against the director of the Office of Thrift Supervision (OTS) and the Federal Deposit Insurance Corporation (FDIC) in the United States District Court for the District of Columbia.

Citizens is a financially strong, $4 billion, five-state federal savings bank with 92 banking offices in Florida, Illinois, Ohio, California and Virginia. (All further references to Citizens will encompass both Citizens Federal Bank and Citizens Savings Financial Corporation).

The federal suit seeks enforcement of the contractural obligations due Citizens under a 1988 contract between Citizens and the Federal Home Loan Bank Board (FHLBB) and the Federal Savings & Loan Insurance Corporation (FSLIC). The FDIC and OTS are successors to these government entities which were abolished by passage of the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) of 1989.

The major part of the action arises out of contractural promises made to Citizens by FSLIC and FHLBB for the purpose of inducing Citizens to acquire and operate American Savings Bank, a failing thrift institution in Illinois.

In its suit, Citizens claims that the defendants' contractural promises, which are binding on the United States Government, have been abrogated and repudiated as a result of FIRREA and certain regulations and decisions promulgated pursuant to FIRREA.

The savings bank sees a declaration that FIRREA and its implementing regulations effect a breach of defendants' contractural obligations to Citizens and, thereby, effect a taking of Citizens' property without just compensation and due process of law in violation of the Fifth Amendment. It also seeks an injunction prohibiting enforcement of those provisions of FIRREA that breach the contractural promises to Citizens.

This is believed to be the first case where a financially sound savings institution, which meets all of FIRREA's current capital requirements, has sued the government agencies to fulfill contractural obligations abrogated by FIRREA.

Citizens Savings Financial has been consistently profitable over the past eight years; earned a total of $40.9 million over the past four years; achieved record high net earnings of $13.9 million in 1989; and today announced that first quarter net earnings were up 16 percent over the same quarter last year.

Citizens meets all three of the current capital ratios with tangible of 2.2 percent vs. 1.5 percent required, core of 4.3 percent vs. 3 percent required, and risk-based of 14.2 percent vs. 6.4 percent required.

Earlier this month, Citizens was named the outstanding company of the year in Florida by the deans of the state's university business schools. The annual award, sponsored by The Miami Herald, is for "exceptional long-term profitability, growth and corporate citizenship."

In announcing the lawsuit, Charles B. Stuzin, chairman and president of Citizens, stated, "We believe that a legal contract signed by the government of the United States should be equally as binding as one signed by any of its citizens...and that it should be obeyed.

"We believe that the federal courts of this nation will determine that it is in the best interests of all Americans that their government abide by its contractural commitments. If so, they will decide in our favor in this case."

The transaction in question is the December, 1988, supervisory merger whereby Citizens acquired American Savings Bank, which operated 24 branches located throughout central and southern Illinois.

Citizens' bid had been determined to be the most attractive of all bids made for American. Also, it had been determined that FSLIC's financial assistance to Citizens would be less than the losses it would sustain upon a liquidation of American.

Among the financial assistance given to Citizens was a cash contribution. The FHLBB resolution regarding the acquisition stated that $86 million of that cash contribution would be credited to Citizens' regulatory capital account, and be amortized over 25 years. With the passage of FIRREA, all such regulatory agreements were voided.

Stuzin stated, "In a way this complicated case is very simple. They gave us a cash contribution to take over a failed institution, and told us that $86 million of that cash could be included in our regulatory capital. Now after Congress passed FIRREA, the government says that we can't count that money toward the financial strength of the bank. That's just not right.

"As a sound institution, we were asked by the government to acquire an extremely sick institution. In taking over American Savings, we estimate that we saved the government and taxpayers millions of dollars. Yet a year later, while we fulfilled all of our promises, the government breached its clear and unambiguous agreements. Except at a much higher cost to the taxpayers, how will the thrift crisis be solved if acquirors can't trust the word of their government?

"As an example, the OTS has twice objected to payment of quarterly dividends by the savings bank to the parent company. The objections were based upon the fact that even though Citizens meets all current capital requirements, we don't yet meet the fully phased-in core capital requirement that was mandated to be attained five years from now on Jan. 1 1995. While we fully anticipate meeting that requirement prior to the effective date, the action by OTS is a complete breach of our written agreements with them."

The lawsuit was filed by the firm of McGuire, Woods, Battle and Boothe of Washington, D.C. Lead attorney on the case is Charles J. Cooper.

Citizens is a $4 billion, five-state federal savings bank with 92 banking offices in five states. It operates as Citizens Federal Bank in its Florida, California and Virginia divisions; as Equitable Savings in its Ohio division; and as American Savings in its Illinois division.

The Florida offices are located from Spring Hill to Naples along the west coast, from Daytona Beach across the center of the state to Ocala, and down the lower east coast from Vero Beach to Miami.

The American Savings offices in Illinois are located in and around Springfield, Quincy, Champaign and Mt. Vernon in the central and southern portions of the state.

The Equitable Savings offices in Ohio are located in nine counties around the cities of Columbus, Mansfield, Canton and Dayton.

The California offices are in Santa Rosa and surrounding communities between San Francisco and Sacramento.

The Virginia offices are located in Richmond.

FAIRFAX, VA (APRIL 26) PR NEWSWIRE - Ogden Corporation (NYSE: OG) announced today that its Fairfax, Va.-based subsidiary, ERC Government Systems Co., Inc., has been awarded two contracts for its Applied Engineering Group, totaling over $9 million in value.

The contracts are for providing specialized engineering and other

professional services to the Navy and the Army.

The Applied Engineering Group was awarded a $7.7 million contract from the Naval Seas Systems Command to support its Waterfront Corrective Action Program (WCAP) by providing contractor engineering technical services to Navy Mobile Technical Units (MOTUs) in the Atlantic and Pacific regions. The services will include electromagnetic interference (EMI) surveys, problem identification, corrective action, and training of Navy personnel in shipboard EMI problem-solving. ERC will also provide logistics support management for the MOTUs, including the inventory management and control, receipt, shipping, and documentation of materials for fleet ships.

The group was also awarded a $1.5 million, 6-month contract extension to continue to operate and manage the Sharpe Army Depot Consolidation and Containerization Point (CCP) in Lathrop, Calif. ERC has provided all of the services and materials necessary for contractor operation of the CCP for over six years. The CCP is the Army's transshipment facility for all materials (less ammunition) being shipped to Army units located throughout the Pacific.

ERC Government Systems is a $90 million technology services firm that serves government and commercial clients in the defense and space technologies, software and systems engineering, and engineering and support services markets, worldwide.

DENVER (APRIL 26) PR NEWSWIRE - Apache Corp. (NYSE: APA) today announced the completion of its Sprowls No. 2-5 on the Taylor Ranch prospect in Oklahoma's Roger Mills County.

During final testing, the Anadarko basin well flowed 10.4 million cubic feet of gas per day from 127 feet of net pay in the Red Fork formation selectively perforated between 13,936 and 14,120 feet. The flow rate was gauged on a 13/64-inch choke with a flowing tubing pressure of 6,750 pounds per square inch. The well is scheduled to be connected today to a gathering system operated by Natural Gas Clearinghouse.

As an active and competitive operator in Oklahoma, Apache was able to increase its working interest in the well prior to drilling from 22 to 93 percent. The company holds a working interest of approximately 72 percent in a planned offset well, slated to be drilled during the second quarter.

Roger Mills County holds four of Apache's 16 largest fields, in which the

company owns interests in 114 wells that are currently producing, primarily from the Red Fork formation.

The Sprowls No. 2-5 was one of 33 producers drilled by Apache in the first quarter, during which the company participated in total of 46 wells. In Oklahoma alone during the first quarter, Apache drilled 22 wells, 17 of which were completed as productive.

Apache is an independent energy company engaged in exploration, development, production and marketing of natural gas and crude oil. The company's securities are traded on the New York and Midwest Stock Exchanges (symbol APA).

LOS ANGELES (APRIL 26) PR NEWSWIRE - Trust Company of the West (TCW) today announced the following management promotions: Judith E. Hirsch and Jun Hong have been named vice presidents; Adrienne Hubbs, George A. Leiva, Lisa L. Parisi, and Patricia Weeg have been promoted to assistant vice presidents.

Hirsch was promoted from assistant vice president to vice president of client relations. She joined TCW in 1983 and has held various positions in the client relations activities of the company. A native of Phoenix, Arizona, she attended the University of Arizona and held various advertising and marketing positions prior to joining the company.

Jun Hung, newly promoted to vice president of equities research, was previously assistant vice president. He is responsible for analyzing the media and capital goods industries. Hong joined TCW in 1987 as a

securities analyst. From 1984 to 1987, he was corporate banking officer for Bank of America in Los Angeles. He graduated from The Wharton School of Business in Pennsylvania with a master's degree in finance and a bachelor's degree in economics.

Hubbs was promoted to assistant vice president from senior securities analyst, and covers interest rate sensitive equities. She joined TCW in 1986 as a research assistant. Hubbs received her degree in international political economics and French from the University of California at Berkeley and her master's degree in international business and finance from Columbia University.

Leiva, who serves as a high yield and bankruptcy bond trader, was promoted to assistant vice president. He joined the company in 1982 as a bond trader and holds a bachelor's of science degree in economics from the University of Santa Clara.

Parisi, also a new assistant vice president, serves as a high yield bond analyst. She joined TCW in 1987 as a convertible bond analyst, having been a portfolio assistant with Lazard Freres Asset Management in New York. She received a bachelor's degree from Adelphi University in New York.

Patricia Weeg was also promoted to assistant vice president. She joined the company in 1986 as an equity trader, having been a senior trader at Wilshire Associates from 1982 to 1986. She previously worked as operations manager at Philips Appel & Walden in New Jersey.

Trust Co. of the West, headquartered in Los Angeles, is among the West's largest independent trust companies, with approximately $18 billion currently under management.

#90116p7875 04/26/1990 ~PR Newswire

NEW YORK (APRIL 26) PR NEWSWIRE - Sequa Corporation (NYSE: SQA.A, SQA.B) posted higher revenues and operating income for the first quarter of 1990, it was announced at the company's annual meeting today by Norman E. Alexander, chairman and chief executive officer.

For the three months ended March 31, 1990, Sequa's sales and revenues advanced to $534.3 million from $447.7 million, and operating income rose to $49.3 million from $46.6 million in the same period of 1989.

Net income from continuing operations amounted to $18.3 million or $1.78 per primary share in the first quarter of 1990 compared with $21.6 million

or $1.99 per primary share in the year-ago quarter. Included in the results for the first quarter of 1989 was a net portfolio gain of $2.8 million or 27 cents per primary share. Net income for the 1989 quarter was reduced to $20.4 million or $1.88 per primary share by the results of discontinued operations. For the 1990 quarter, discontinued operations had no effect on net income.

Commenting on Sequa's improved operating performance, Alexander noted that a number of the favorable trends developed in 1989 persisted in the first quarter, and that two unfavorable developments of the past year were reversed in the opening period of 1990. With respect to the latter, he cited the return to profitability of the Kollsman division and a turnaround in profits at the company's auxiliary printing equipment operation. In a further comment on Kollsman and other Sequa businesses serving defense markets, Alexander noted that, "These units are operating under altered circumstances and in a heightened competitive environment. At Kollsman, we are focusing our efforts on overseas defense markets and on building our domestic avionics and commercial manufacturing units. At ARC Propulsion, which has weathered the downturn in U.S. defense spending with considerably less effect, we are nonetheless developing offsets to the reduced defense market." One ARC opportunity referred to by Alexander was the establishment in late 1989 of a joint venture to develop an airbag system for the passenger side of automobiles. With the market for airbags just beginning to grow, Alexander described the venture as "an excellent opportunity for ARC -- and one we are pursuing vigorously."

In a discussion of Sequa's largest operating unit, Chromalloy Gas Turbine Corporation, Alexander noted that the expansion of the aircraft and jet engine markets currently under way benefits Gas Turbine in both the near-term, new build phase of the expansion and the longer-term repair cycle of the market. To support the sustained growth of the gas turbine unit, Alexander said that Sequa continues to reinvest in the operation, through both capital expenditures and acquisitions. The addition of businesses acquired in 1989 continued to temper Gas Turbine's profit growth during the first quarter of 1990.

#90116p7876 04/26/1990 ~PR Newswire

NEW YORK (APRIL 26) PR NEWSWIRE - Signing ceremonies were held today for a major new gas sales agreement between Esso Exploration and Production Khorat, Inc. (Esso Khorat) and the Petroleum Authority of Thailand (PTT) and for a Joint Operating Agreement between Esso Khorat and PTT Exploration and Production Company Ltd. (PTTEP). Under the terms of these agreements, Esso will develop and produce natural gas reserves in a 1,000 square mile contract area, some 300 miles northeast of Bangkok. These

agreements represent the first such accords between the Government of Thailand and a private energy development company to mutually develop the country's natural gas resources in the northeastern part of the country.

Esso began exploration activities in 1981 with the drilling of Nam Phong No. 1, which resulted in a gas discovery. An additional 11 wells have been drilled, establishing commercial quantities of gas.

Under the terms of the Gas Sales Agreement, initial deliveries of Nam Phong gas will be utilized to generate electricity at a new power plant currently being built in the vicinity by the Electricity Generating Authority of Thailand. Esso has already drilled sufficient wells to serve this facility, which is scheduled to commence operations later this year. Further development will provide for deliveries of up to 250 MCFD under this contract and for construction of a pipeline to carry gas to the Bangkok area.

The Joint Operating Agreement between Esso and PTTEP is in accordance with the terms of Esso's Concession, under which a 20 percent participating interest is offered to the Government in any block where a commercial discovery is made. The Government of Thailand has accepted this offer and designated PTTEP to carry out its activities. Today's agreement defines the detailed joint venture operating basis for the resulting 80 percent Esso, 20 percent PTTEP undertaking, with Esso as operator.

Esso Khorat Inc. is an affiliate of Exxon Company, International, a division of Exxon Corporation (NYSE: XON).

#90116p7879 04/26/1990 ~PR Newswire

VALLEY FORGE, PA (APRIL 26) PR NEWSWIRE - Alco Standard Corp. (NYSE: ASN) reported today that operating revenues for its second quarter totaled $1,156,677,000, up 11 percent from $1,042,373,000 in the second quarter of fiscal 1989.

Operating income increased sharply during the quarter to $58,819,000, a 27.8 percent increase over the $46,031,000 reported in the second quarter of 1989. Despite a sharp increase in the company's effective income tax rate, earnings per share for the quarter were $.69, a 3 percent increase over 1989.

For the six months ended March 31, 1990, operating revenues increased 8.5 percent from $2,026,166,000 to $2,198,651,000 and operating income was $105,016,000, up 24.1 percent from the $84,625,000 reported in the first half of fiscal 1989. Although taxes on income during the six months more

than doubled, earnings per share from continuing operations were $1.14, up 1.8 percent from the first half of 1989.

Alco Standard Corp., headquartered in Valley Forge, is a publicly held company specializing in high growth, service-intensive industries. For its fiscal year ended Sept. 30, 1989, revenues were $4.1 billion.

#90116p7886 04/26/1990 ~PR Newswire

LINCOLN, RI (APRIL 26) PR NEWSWIRE - A.T. Cross Company, manufacturer of fine writing instruments, announced that sales were $48.7 million in the first quarter ended March 31, 1990, a decrease of 8.2 percent from $53.1 million in the first quarter of 1989. Net earnings were $3.7 million, or 22 cents per share, compared to $6.0 million and 36 cents per share in the 1989 quarter, representing decreases of 39.2 percent and 38.9 percent respectively.

Sales of writing instruments were $42.0 million in the first quarter of 1990, an increase of 1.5 percent over 1989 first quarter sales, with strong foreign sales growth continuing. Domestic sales of writing instruments were approximately 9 percent below those of the first quarter of 1989. Sales of the leather and gift products segment were $6.8 million, a decrease of 42.1 percent from a year ago. Mark Cross retail store sales increased over a year ago, while sales of Manetti-Farrow declined significantly.

"These results are in line with our expectations as previously announced on April 19, 1990," Bradford R. Boss, chairman of the board said today. "The decreased sales and earnings were due to reduced domestic demand for writing instruments and lower order for leather goods from U.S. department stores. The results were adversely affected by the continuing sluggishness in consumer spending, compounded by severe financial stress among a number of retailing organizations which have been large Cross customers. On the positive side, our growth abroad remains strong, and sales of our Mark Cross retail stores are increasing as well.

"Historically, the first quarter of each year has been the smallest in terms of sales and earnings, with the fourth quarter normally amounting to a third or more of the total year. We still expect sales and earnings for the full year 1990 to be ahead of 1989."

#90116p7890 04/26/1990 ~PR Newswire

CHICAGO (APRIL 26) PR NEWSWIRE - Chicago-based Allied Products Corp. (NYSE: ADP) reported net income of $3,891,000 (61 cents per common share) for the first quarter ended March 31, 1990, compared with net income of $4,811,000 (80 cents per common share) in the first quarter of 1989.

Net sales for the first quarter of 1990 were $161,823,000 compared with $159,586,000 for the first quarter of 1989.

Commenting on those results, Richard A. Drexler, president and chief executive officer of Allied Products, stated:

"Our strong first-quarter performance in 1990 was due, in part, to the deferral of production and sales that normally would have occurred in the last quarter of 1989. The deferral of that activity was necessary as the company negotiated to restructure its bank debt. That restructuring was announced on Jan. 24, 1990, and it provided vital working capital financing during the first quarter, a critical season for production of agricultural equipment.

"Plans for the balance of the year call for continued cost reduction and curtailment in production of certain high-investment products in order to conserve working capital and comply with the terms of our credit agreements. In light of the financial constraints under which the company is operating, first-quarter sales and income are not indicative of results expected for 1990 as a whole."

Allied Products Corp. manufactures agricultural equipment, transportation and industrial products and chemical specialities.

ALLIED PRODUCTS CORP. AND CONSOLIDATED SUBSIDIARIES

#90116p7895 04/26/1990 ~PR Newswire

CHICAGO (APRIL 26) PR NEWSWIRE - R.R. Donnelley and Sons Company (NYSE: DNY), North America's largest printer, reported its first quarter net income increased 6.8 percent to $43.5 million or 56 cents per share. Sales for the first quarter were $724.6 million, an increase of 2.4 percent over the same period in 1989.

The company reported that the first quarter's sales were also affected by lower paper pricing and unfavorable exchange rate variations. First-quarter, 1989 results included the net sales of the company's Dunstable, U.K., operations and Metromail's proprietary coupon business, both since shut down.

Earnings from operations, pre-tax earnings and net income all grew at rates faster than sales, despite increases in start-up expenses, depreciation expense, and a higher effective tax rate. Improved productivity and cost control and lower interest expense contributed to these faster-growing earnings results.

First quarter, 1990 capital spending was $58.6 million. The company continued to project full-year capital spending at $250 million.

The Donnelley board of directors today declared a quarterly dividend of 24 cents per share, payable on June 1, 1990, to shareholders of record on May 11, 1990.

#90116p7896 04/26/1990 ~PR Newswire

ANN ARBOR, MI (APRIL 26) PR NEWSWIRE - J.P. Industries, Inc. (NYSE: JPI) today announced increased sales but lower earnings for the first quarter of 1990 compared to last year.

Sales for the quarter ended March 31, 1990, increased to $110.6 million, up from $108.4 million. Net income was $2.6 million for the first quarter of 1990, compared to $3.2 million in 1989. Primary earnings per share declined to 25 cents in 1990 from 30 cents reported in the first quarter of 1989.

Sales for the automotive aftermarket increased by 13 percent over the same period of last year. However, lower sales to new car and light truck original equipment manufacturers and to the railroad aftermarket partially offset this increase. This change in sales mix accounted for most of the decline in operating margins.

Interest expense for the first quarter of 1990 declined to $3.5 million from $4.7 million a year ago. This is the result of reducing debt by approximately $100 million during 1989 and the first quarter of 1990 through the divestiture of the plumbing products and builders' hardware operations.

"We believe our increase in sales demonstrates our ability to withstand the pressures of a changing marketplace," said Dr. John Psarouthakis, J.P. Industries' president, chairman and founder.

As previously announced, on March 30, 1990, T&N Automotive Components Inc. commenced a tender offer for all the outstanding shares of common stock of J.P. Industries for $17.30 per share in cash. The expiration date for the tender offer is midnight, Monday, May 14, 1990, unless extended.

J.P. Industries is a global manufacturer and marketer of engine and transmission components. Corporate headquarters are located at 325 E. Eisenhower Parkway, Ann Arbor 48108-3388.

ATLANTA (APRIL 26) PR NEWSWIRE - Ford Motor Co. is taking to the skies in announcing to Atlantans the introduction today of the all-new 1991 Ford Escort, a car in which Ford has invested $2 billion to design, engineer and bring it into production, said Joe King, Atlanta district manager of Ford Division.

This subcompact "Baby Taurus," competing against national and international competition, is the subject of announcements by two sky-writer planes flying above Atlanta's perimeter from 7 to 8 a.m., noon to 1 p.m. and from 4 to 6 p.m. during late rush hour traffic.

Also, Ford in Jackson, Mich., is "launching" the new escort with "blast-off smoke and astronauts" at NASA's Michigan Space Center. And in New Orleans, the first Escort sold today will arrive on the aircraft carrier Cabot, anchored in the Mississippi River.

The Escort goes on sale today at Ford dealerships around the country for a suggested retail price of $7,565. Ford projects sales of 500,000 of the new Escort and its sister car, the Mercury Tracer, next year.

#90116p7903 04/26/1990 ~PR Newswire

DALLAS (APRIL 26) PR NEWSWIRE - Southwest Airlines' (NYSE: LUV) net income for the first quarter ended March 31, 1990, was $5.1 million ($.18 per share) compared to the record $19.6 million ($.64 per share) earned in first quarter 1989. The decrease in earnings primarily resulted from increased fuel costs and a decrease in nonoperating gains of $7.2 million, before the effects of income taxes.

Revenues for the first quarter of 1990 increased 13.6 percent to $260.6 million compared to $229.4 million for first quarter 1989, commensurate with the 13.8 percent increase in available seat miles (ASMs). The increase in revenue was derived from a 5.1 percent increase in revenue passenger miles (RPMs) and an increase in passenger revenue yield per RPM of 8.1 percent due to first-quarter 1990 fuel surcharges and a higher percentage of higher yielding business class passengers in 1990. The load factor declined 4.9 points from 65.3 percent to 60.4 percent. With the exception of first quarter 1989, however, the first- quarter 1990 load factor was the best since 1981.

Operating expenses for first quarter 1990 increased 21.7 percent to $252.5 million or $.0655 per ASM, compared to $207.5 million or $.0613 per ASM for first quarter 1989. The 6.9 percent increase in operating expenses per ASM primarily resulted from a 25.4 percent increase in the average

fuel cost per gallon from $.5672 for first quarter 1989 to $.7110 for first quarter 1990.

Operating income for first quarter 1990 decreased to $8.1 million from the record 1989 first-quarter operating income of $21.9 million. Nonoperating pre-tax gains of $2.3 million were recognized in first quarter 1990 as compared to $9.5 million in 1989. The 1990 gains were primarily attributable to gains from the sale of certain financial assets. These nonoperating gains, net of income tax effects, increased earnings per share by $.05 in first quarter 1990 and $.20 in first quarter 1989.

During the first quarter, the company took delivery of two new Boeing 737-500 aircraft, the first in commercial service, increasing its fleet to 96. At March 31, 1990, the average age of the company's fleet was 5.9 years, which is the youngest average pure jet fleet age of any domestic carrier.

The company recently initiated service to Burbank, Calif., increasing to 30 the total number of cities served through the Southwest system via 32 airport locations.

MINNEAPOLIS (APRIL 26) PR NEWSWIRE - Jostens Inc. (NYSE: JOS) has scored back-to-back victories this year by winning the San Francisco 49ers Super Bowl ring account. Jostens made the 49ers' 1984 and 1988 Super Bowl rings and has been chosen to make gold and diamond rings commemorating the team's Super Bowl XXIV victory.

The rectangular crown of the ring will display four football-shaped marquis-cut diamonds, representing the 49ers' four Super Bowl victories. The main stones will set on a football-shaped white gold insert, surrounded by smaller diamonds of various point sizes.

The sides of the ring tell more of the 49ers success story. One side features four miniature Vince Lombardi trophies, a replica of the Golden Gate Bridge and the player's name. The words San Francisco appear just below the bridge, as well as the 49ers' season record of 17-2.

The other side of ring will display the Super Bowl XXIV logo, and the 49ers "Back to Back" slogan, representing the 49ers' 1988 and 1989 Super Bowl victories. Completing the side is the final score of the Super Bowl game, 55-10.

The rings will be manufactured at Jostens' Princeton, Ill., Recognition Division plant and will be presented to the team at a special ceremony in Hawaii in June.

#90116p7919 04/26/1990 ~PR Newswire

JACKSON, Miss. (APRIL 26) PR NEWSWIRE - First Mississippi Corporation (NYSE: FRM) today reported net earnings of $3.6 million or $.18 per share on sales of $350.9 million for the nine months ended March 31, 1990, versus earnings of $19.1 million or $.94 per share on sales of $296.5 million for the same period last year.

Net earnings for the third quarter were $1.3 million or $.07 per share versus earnings of $8.6 million or $.42 per share prior year.

The decrease in net earnings year to date was due to operating losses in fertilizer and minerals, higher interest expense and lower operating profits in chemicals and oil and gas.

In February, the company approved a spinoff to its stockholders of FirstMiss Gold Inc., its gold mining subsidiary. The spinoff is subject to a favorable ruling from the Internal Revenue Service on the tax-free nature of the distribution.

J. Kelley Williams, chairman of the board and chief executive officer of First Mississippi, said, "Despite start-up problems and lower gold prices, we are proceeding with the proposed distribution. We expect operations to improve and anticipate a favorable tax ruling this summer. If these materialize, probable timing for the distribution is this fall."

Results by Industry Segment: - Industrial chemicals pretax operating profits for the nine months were $21.2 million versus $25.8 million last year. Lower volume for aniline and intermediate chemicals and higher expenses related to acquisition and internal development more than offset an increase in specialty chemicals contribution.

- Fertilizer results for the nine months were a loss of $4.0 million versus pretax operating profits of $6.0 million in 1989. The decrease was due to lower ammonia and urea prices and the temporary shutdown of the AMPRO ammonia plant during the quarter ended Sept. 30.

- Coal pretax operating profits were $0.7 million for the nine months, up from $0.4 million last year. Oil and gas pretax operating profits for the nine months were $3.9 million versus $4.2 million last year.

- Minerals operating results were a loss of $0.2 million versus pretax operating profits of $3.9 million last year. The decrease was due primarily to continuing start-up expenses.

- Other - Technology and New Ventures had a pretax operating loss of $4.6 million, the same as last year.

Corporate expenses, interest expense, taxes and other income and expenses were $13.4 million versus $16.6 million last year. The decrease was due to lower income tax expense which more than offset higher interest expense.

Industrial ammonia and urea results, previously reported as part of the industrial chemicals segment, are now included in the fertilizer segment. Prior year comparative results have been adjusted to reflect this change by reclassifying sales and pretax operating profits.

First Mississippi Corp., headquartered in Jackson, is diversified resource company with primary interests in chemicals, fertilizers, oil and gas,

coal, gold and growing interests in technology-based ventures.

MIAMI (APRIL 26) PR NEWSWIRE - Eastern Airlines today named D. Roger Ferguson, a 20-year industry veteran, vice president-maintenance and engineering.

He had been serving as staff vice president-maintenance planning and engineering for the Miami-based airline when he joined in 1970.

Ferguson, 48, will be responsible for Eastern's 160-plane fleet and direct a staff of 4,200 engineers, mechanics and support personnel. He reports to Joseph B. Leonard, executive vice president and chief operating officer.

He has held several positions in the operations and marketing areas, including vice president of system development and director of marketing strategic programs.

He served in the U.S. Navy for seven years as an engineer and operations officer on nuclear submarines and also trained personnel to operate and maintain submarine reactor plants for the former Atomic Energy Commission.

A native of Syracuse, N.Y., he holds a B.A. degree from Harvard University

and an M.B.A. from the University of Chicago.

#90116p7929 04/26/1990 ~PR Newswire

OAKLAND, NJ (APRIL 26) PR NEWSWIRE - Russ Berrie and Company, Inc. (NYSE: RUS) today announced net sales for the three months ended March 31, 1990, totaled $59,367,000 compared to $66,535,000 in 1989. Net income was $3,158,000, or 21 cents per share, vs. a net loss of $2,181,000, or 14 cents per share, in 1989. Last year included a restructuring charge of $9.5 million before taxes ($6.2 million after taxes, or 41 cents per share.)

Russell Berrie, board chairman and chief executive officer, stated: "The first-quarter results, compared to a year ago, reflect a general softness in the retail market. However, the decrease in operating expenses anticipated when we took the restructuring charge, has in fact occurred and is in line with our expectations."

Russ Berrie and Company, Inc. designs and markets an extensive variety of everyday and seasonal impulse gifts to retail stores. Products include stuffed animals, ceramic mugs, porcelain gifts, picture frames, greeting cards, candles, figurines, keyrings, magnets, school and stationary merchandise, and collectible dolls. The company has a direct sales force of more than 750 men and women. Distribution centers throughout the United States, Canada and England provide strategically located regional facilities to serve customers.

#90116p7956 04/26/1990 ~PR Newswire

CHICAGO (APRIL 26) PR NEWSWIRE - USG Corp. (NYSE: USG) today reported first quarter 1990 operating profit of $59 million, compared to $64 million for the like period in 1989. This decrease was primarily the result of lower gypsum wallboard prices, which were 8 percent lower in 1990's first quarter than in last year's first quarter. However, 1990 results were favorably affected by a further reduction in selling and administrative expenses, which were down 4.8 percent versus the first quarter of 1989.

Operating profit is the most realistic basis for year-to-year financial performance comparisons since it excludes nonrecurring items such as a first quarter 1990 pre-tax gain of $34 million on the sale of USG's corporate headquarters building at 101 South Wacker Drive in Chicago. In the first quarter of 1989, a nonrecurring pre-tax gain of $16 million was recorded for the settlement of a lawsuit with one of the corporation's insurance carriers. These nonrecurring gains are reflected in net earnings which for the first quarter of 1990 were $8 million, or $0.14 per share,

while first quarter 1989 net earnings were $3 million, or $0.05 per share.

First quarter 1990 sales were $530 million compared to $538 million during the like period in 1989. This decline reflects the absence in 1990 of the construction metal business which was sold by USG in June 1989, as well as lower gypsum wallboard prices.

''During this sluggish period for the construction industry, USG has been successful in reducing overhead and attaining a high level of operating efficiency,'' said USG Chairman Robert J. Day. ''We are pleased that our restructuring and debt repayment continue on schedule, and we believe business opportunity should remain stable throughout 1990.

''Two USG subsidiaries performed particularly well in the first quarter of 1990,'' Day said. ''USG Interiors posted a 10 percent increase in sales and 25 percent increase in operating profit, largely due to improved sales of domestic ceiling products and greater international sales. Reduced overhead also contributed to the improved operating profit.

''Meanwhile,'' Day continued, ''Reduced overhead and a sharper marketing focus primarily were responsible for greater operating profit at our DAP subsidiary this quarter compared to the same period last year. USG is continuing its emphasis on productivity improvements and cost reductions '' Day said. ''While the economic environment for 1990 is expected to be similar to that of 1989, we do see selected opportunities for growth.''

USG is a Fortune 500 corporation with operating subsidiaries that are leading manufacturers and distributors of building materials such as gypsum wallboard and related products, home improvement products and ceiling, wall and floor systems.

#90116p7957 04/26/1990 ~PR Newswire

PITTSBURGH (APRIL 26) PR NEWSWIRE - Ford (NYSE: F) unveiled its new 1991 Escort here today in a news conference that included representatives from The Budd Co., the Pennsylvania manufacturer of one of the car's parts.

Featured at the unveiling was the Escort's new lift gate, which is manufactured by the Budd Co. in Philadelphia. The Budd lift gates that will be part of the 1991 Ford Escorts are among the first parts to be manufactured in Budd's new $20 million state-of-the-art Phoenix plant, located in Philadelphia, which just began producing parts earlier this year.

Budd's Project Phoenix is a 215,000-square-foot manufacturing and shipping facility where 120 Budd workers are currently employed. The Phoenix facility is currently manufacturing the lift gates for the new Ford Escorts and the new Ford Explorers. Seven other production lines are slated to start up in the next two years at Project Phoenix.

The Phoenix plant operates on a team concept, with each of the plant's technicians being trained in and performing several aspects of the operation, including manufacturing, assembling, material handling and shipping.

Leo Elwork has been with Budd for 25 years in the quality assurance department. Elwork randomly selects five lift gates during each shift to inspect all dimensional and surface aspects of the part, ensuring that each part manufactured by Budd meets all the established specs and standards set forth by Ford.

The Ford Motor Co. has invited various part manufacturers from different states to participate in the new Escort launch as the 1991 model is unveiled across the country this spring.

In business for the last 77 years, The Budd Co. is recognized as a leading supplier to the automotive industry. As a subsidiary of Thyssen AG, Budd is backed by the technical resources of an international partner in the automotive industry with expertise in materials, components and systems.

CONTACT: Paul O. Sichert Jr. of The Budd Co., 313-643-3500.

#90116p7962 04/26/1990 ~PR Newswire

ATLANTA (APRIL 26) PR NEWSWIRE - The Citizens and Southern Corp. (NYSE: CTZ) today reported first quarter net income of $41.6 million, compared to $57.8 million earned during the same period a year ago.

After deducting dividends on preferred stock, earnings per common share were $.64 for the first quarter, compared to $.90 a year ago.

Earnings for the first quarter reflect a $54.8 million provision for credit losses compared to $17.7 million in the same quarter of 1989. The higher provision increased the reserve for credit losses to $248.9 million or 1.59 percent of total loans.

"Real estate markets in the Southeast have softened since the first of the year," said Chairman and Chief Executive Officer Bennett A. Brown. "With a weakened economy and softer real estate markets, we believe this action was necessary and prudent. Our reserve ratio of 1.59 percent is one of the stronger ratios within our industry."

Brown emphasized that "fundamental earnings for the quarter were solid. We were able to maintain a stable net interest margin and continue to focus on controlling our level of expenses. The operating environment we see for the remainder of the year is one of slower loan growth and potential futher softness in real estate markets and the economy. This requires that we focus on expense management and strong noninterest income generation."

During the quarter, C&S began an internal review of its commercial real estate portfolio and representatives of the Office of the Comptroller of the Currency (OCC) began their specialized commercial real estate examination. Brown said, "the OCC examination was rigorous and thorough as was our review."

Both of these reviews were completed after quarter end and resulted in the reclassification of certain loans, some to nonperforming status, and the decision to add to the reserve.

For the quarter, nonperforming assets increased $88.6 million to $244.3 million, compared with $155.7 million at year end. Nonperforming assets included $194.6 million in nonperforming loans and $49.7 million in other real estate owned.

The ratio of nonperforming assets to total laons and other real estate was 1.55 percent for first quarter, compared with 1.02 percent at year-end, and continues to be better than industry averages.

Willard A. Alexander, chief credit officer, said that the increase in the level of nonperforming loans included $41.7 million in loans that are current as to principal and interest. Of the loans placed on nonperforming status, $52.3 million were in Georgia, $2.6 million were is South Carolina and $32 million were in Florida.

Charge-offs for the quarter were $22.1 million, or .58 percent of total average loans, compared with $31.9 million, or .84 percent at fourth quarter 1989 and $14.3 million, or 41 percent a year ago.

The provision for credit losses was $54.8 million, compared with $23.9 million for the fourth quarter 1989 and $17.7 million in the first quarter a year ago.

In reviewing current market conditions and after completion of the OCC real estate examination, management decided to increase the reserve for credit losses by $30 million to $248.9 million, or 1.59 percent of total loans, compared with $216.2 million or 1.42 percent at year end.

The coverage ratio, which measures the level of the reserve as a mutliple

of nonperforming loans, was 1.28X compared to 2.01X at year end.

For the first three months, return on assets was .73 percent and return on common shareholders' equity was 11.80 percent, compared with 1.11 percent and 18.28 percent, respectively, from a year ago.

Total average loans increased 8 percent to $14.6 billion from a year ago, reflecting a 13 percent increase in commercial loans, a 6 percent increase in consumer loans and a 5 percent increase in real estate loans. C&S announced in the summer of 1989 that it was significantly curtailing its lending activities in the area of commercial real estate due to the increased risk associated with this type of lending and some signs of weakening markets. The slower real estate growth for the first quarter reflects this change in emphasis.

Net core deposits increased 16 percent over a year ago to $14.8 billion. Total deposits were $17.6 billion, an increase of 10 percent from a year ago. Shareholders' equity was $1.4 billion, a 6 percent increase from first quarter 1989. For the first quarter, the ratios for Tier 1 and total capital, on a fully phased-in basis, were 5.82 percent and 9.69 percent. Regulatory minimums for these ratios are 4 percent and 8 percent respectively.

The net interest margin was 4.61 percent for the quarter, compared with 4.87 percent a year ago and 4.62 percent at year end.

Expense growth was held to 3 percent while noninterest income increased 10 percent from the same period a year ago. Contributing to the noninterest income growth were increases in factoring fees, service charges and trust income.

Also today, the C&S board of directors approved a dividend of $.35 per common share, payable on June 15 to shareholders of record on May 25.

C&S had $24.1 billion in assets at the end of the first quarter. It is a three-state bank holding company with 511 banking offices in Georgia, Florida and South Carolina.

On Sept. 26, 1989, it was announced that C&S and Sovran Financial Corp., a Norfolk, Va.-based bank holding company, would combine to form Avantor Financial Corp. The shareholders of both companies approved the transaction on Feb. 2. The transaction currently is being reviewed by the regulatory agencies.

Brown said: "The C&S/Sovran combination is the largest bank merger is U.S. history and bank regulators, as should be expected, are very carefully reviewing the pending applications. We have provided additional information requested by the regulatory agencies and responded to the

Community Reinvestment Act (CRA) issues raised by certain groups. We also recognize that the special real estate exams by the OCC of both C&S and Sovran are occurring in the midst of the process, and the applications are not likely to be acted upon until those are completed.

"In the meantime, we are continuing the planning process which is necessary to effectively combine two large institutions and achieve increased value."

#90116p7965 04/26/1990 ~PR Newswire

NEW YORK (APRIL 26) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) today reported its results for the three months ended March 31, 1990.

Net income for the first quarter of 1990 was $9,130,000, or 49 cents per share, compared with net income in the first quarter of 1989 of $12,902,000, or 72 cents per share.

Revenue for the first quarter of 1990 was $117,096,000, compared with $122,274,000 for the first quarter of 1989, a decline of 4 percent.

The principal reason for the decrease in first-quarter revenue was a decline in premiums from the corporation's life insurance company subsidiary. The decrease notwithstanding, that subsidiary continues to reap the benefits of having been reorganized in 1989. Revenue in that operation was down $4.9 million (accounting for virtually the entire decline in consolidated revenue), but operating expenses were also reduced and the life insurance company was profitable, showing an $800,000 increase in net income over the prior year level.

In the first quarter of 1990, the corporation completed mergers with Griffith/Sincock Insurance Brokers, Inc., a regional broker headquartered in Orange County, Calif., and with Management Science Associates, Inc., a human resources consulting operation in Independence, Mo. Financial results for the first quarter of 1989 have been restated to reflect these mergers as poolings of interests.

Corroon & Black Corporation, headquartered in New York City, is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has subsidiaries across the United States and affiliated offices throughout the world. The corporation was founded in 1905 in New York City.

#90116p7968 04/26/1990 ~PR Newswire

OSLO, NORWAY (APRIL 26) PR NEWSWIRE - Norsk Hydro a.s. (NYSE: NHY), Norway's largest industrial company reported a fall in operating income for the first quarter of 1990 to NOK 1,886 million ($288.64 million), compared with NOK 2,570 million ($381.63 million) for the first quarter of 1989, despite a 31 percent increase in oil and gas operating income.

The results for the first quarter of 1990 were adversely affected by the group's agriculture, light metals and petrochemicals divisions which suffered from lower prices than were experienced in the first quarter of 1989. Net income in the first quarter of 1990 was reduced to NOK 813 million ($124.42 million) compared to NOK 1,250 million ($185.62 million) in the first quarter of 1989. Earnings per share were also down at NOK 4.00 ($.61) compared to NOK 6.10 ($.91) for the same period in 1989.

The first quarter figures, however, represent an increase in net income of 39 percent over the fourth quarter of 1989. Oil and gas, light metals and petrochemicals all showed improved operating income compared to the fourth quarter of 1989. Earnings per share were also lower in the fourth quarter at NOK 2.8 ($.42).

Oil & Gas Operating income for the first quarter of 1990 increased by 31 percent to NOK 797 million ($121.97 million), compared to NOK 608 million ($90.29 million) for the first quarter of 1989, due to increased production and higher oil and gas prices. Production was increased from 1.8 million tons of oil equivalents in 1989 to 1.9 million in 1990, mainly from an increase in the Oseberg field. Production from the Frigg field is being scaled down and was therefore lower than in the first quarter of 1989. The Veselfrikk field started production in January 1990.

Oil's share of total oil and gas production during the first quarter of 1990 was 56 percent compared to 46 percent in the first quarter of 1989.

Agriculture Operating income for the first quarter of 1990 fell to NOK 407 million ($62.29 million) compared to NOK 634 million ($94.15 million) for the first quarter of 1989, although the 1989 figure included a contribution of NOK 88 million ($13.07 million) for Dyno Industrier A.S.

Although total sales of fertilizers were on the same level as last year, a decrease in demand in key European markets -- especially France -- and a fall in European prices were the main causes for the weaker 1990 result. Other activities, especially industrial gases, made progress.

#90116p7981 04/26/1990 ~PR Newswire

HOUSTON (APRIL 26) PR NEWSWIRE - Anadarko Petroleum Corp. (NYSE: APC) today announced first quarter 1990 earnings of $20.0 million (38 cents per share) on revenues of $104.1 million. In the 1989 first quarter, the company's net income was $26.1 million (50 cents per share) on revenues of $126.6 million. During that quarter, three special items (two lawsuit settlements and provisions for impairments of overseas and geothermal properties) increased revenues by $31.3 million, and net income by $11.3 million (22 cents per share). Stated without the effect of the special items, 1989 first quarter revenues would have been $95.3 million and net income would have been $14.8 million (28 cents per share). The effect of the special items is excluded from the price and volume information.

Excluding the effect of the special items, the company's improved financial results for the 1990 first quarter were due to higher crude oil prices and volumes, increased revenues from sales of natural gas liquids, higher U.S. gas prices and lower interest expense. First quarter 1990 gas production was 40.2 billion cubic feet (Bcf) or about 447 million cubic feet per day (MMcf/d) compared with gas production of 40.3 Bcf during the 1989 first quarter (448 MMcf/d). Spot gas sales were 28.6 Bcf in the

1990 first quarter (71 percent of total gas production) compared with 24.3 Bcf in the 1989 first quarter (60 percent of total gas production).

Average U.S. gas prices were $1.87 per thousand cubic feet (Mcf) during the 1990 first quarter, which is 3 percent higher than the $1.82 per Mcf during the 1989 first quarter. Spot gas prices averaged $1.88 per Mcf during the 1990 first quarter compared with $1.75 per Mcf in the 1989 first quarter.

Anadarko's crude oil and condensate sales were 1.1 million barrels in the 1990 first quarter, which is 6 percent above the 995,000 barrels in the 1989 first quarter. Average U.S. oil prices were $20.24 per barrel in the 1990 first quarter, which is 22 percent above the $16.56 per barrel average in the 1989 first quarter.

#90116p7984 04/26/1990 ~PR Newswire

FINDLAY, OH (APRIL 26) PR NEWSWIRE - OHM Corporation (NYSE: OHM), a leading environmental services firm, today announced substantially improved operating results for the quarter ended March 31, 1990. Net income for the quarter was $808,000 or $0.07 per share, a significant improvement over the net loss of ($1,645,000) or ($.013) per share for the comparable 1989 quarter.

Net revenues for the quarter increased 43 percent to $46,992,000, reflecting a broad based increase in demand for all of the company's services. The company attributed its improved operating performance primarily to increases in activity in all sectors of its remediation services business.

Net revenues from industrial clients, which accounted for 76 percent of total net revenues, increased 28 percent to $35,702,000 for the first quarter of 1990 as compared to the 1989 period. Additionally, first quarter net revenues from the company's EPA Emergency Response Cleanup Services contracts, increased 47 percent to $5,650,000, or 12 percent of total net revenues. Primarily as a result of significantly increased activity under the company's many state contracts, net revenues from other government contracts were $5,640,000 or 12 percent of total net revenues, more than four times greater than those for the 1989 period.

The company said that the increased business in its Remediation Services Group continued into the second quarter.

OHM, with 30 locations across the United States and in Canada, provides a full range of environmental assessment, analytical, data management,

design, engineering, remediation and waste treatment services to a broad base of industrial and government clients.

PALO ALTO, CA (APRIL 26) PR NEWSWIRE - Bio-Electro Systems Inc. (BES) today announced a net loss for the quarter ended March 31, 1990, of $3.1 million. The loss consists primarily of research and development expenses less interest income, incurred under development contracts with ALZA Corp. and Medtronic Inc., a Minnesota corporation with which BES and ALZA have entered into a collaborative arrangement whereby both ALZA's and Medtronic's electrotransport drug delivery activities are being managed by ALZA pursuant to agreements with BES. Revenue for the quarter consists of interest income of $.3 million.

BES is developing drug delivery systems utilizing bioerodible polymer and electrotransport drug delivery technologies, and intends to commercialize, most likely through licensing, pharmaceutical products based on these technologies.

DALLAS (APRIL 26) PR NEWSWIRE - Fina Oil and Chemical Company, the main operating subsidiary of American Petrofina, Incorporated (AMEX: API.A), today announced the participation of its subsidiary, American Petrofina

Pipe Line Company, in Oil Spill '90. This is the first oil spill exercise developed jointly by three levels of government and private industry in Texas and is designed to help the state prepare for a major oil spill.

The exercise, developed by 15 different entities working together, will allow those involved to test emergency management plans and resources as well as communication coordination policies and procedures that would be called into play in the event of a major oil or chemical spill into a waterway. The exercise took place April 25 in the Corpus Christi, Texas, area.

Ron W. Haddock, president and chief executive officer of American Petrofina, Incorporated, commented, "Fina's participation in the oil spill simulation exercise will give us an excellent opportunity to test the effectiveness of our emergency response plans and will provide a valuable real-time training exercise for our personnel."

"This is not a pass or fail situation," Haddock said. "The exercise is intended to evaluate emergency management plans and resources, determine what works and what doesn't, and give the various participants an opportunity to work together. This will allow all of us to be better prepared in the event of a real situation."

The Governor's Oil Spill Advisory Committee recommended in October 1989, the implementation of annual exercises to develop coordinated interactions among all the various entities in the responses to and recovery from oil spills.

The two-part scenario includes a simulated pipeline rupture in an urban area and simulated release of oil from a storage facility into the Corpus Christi Bay area. The exercise participants will deal with all kinds of related concerns from the containment of the oil to diverting land and water traffic. A tabletop exercise on April 26 will examine past-response issues such as environmental and economic impact and cleanup and disposal of oil.

Participating with Fina are the Division of Emergency Management, the General Land Office, Water Commission, Railroad Commission, Department of Parks and Wildlife, Department of Public Safety, Department of Highways and Public Transportation, Department of Health, U.S. Coast Guard, U.S. Environmental Protection Agency, San Patricio County and the cities of Corpus Christi, Aransas Pass and Port Aransas.

NAPERVILLE, IL (APRIL 26) PR NEWSWIRE - Nalco Chemical Co. (NYSE: NLC) reported today at its annual shareholders' meeting that both first quarter sales and earnings increased substantially.

Net earnings were up 18 percent, reaching $29.7 million, compared to $25.1 million for the same quarter last year. On a primary per share basis, earnings increased by 15 percent to 75 cents compared to 65 cents for the first quarter last year.

Fully diluted earnings for the quarter were 4 cents a share lower than primary earnings, but still 9 percent higher than for the first quarter 1989. These figures take into account the assumed conversion of convertible preferred stock issued to the Nalco Employee Stock Ownership Plan (ESOP).

First quarter sales were up 14 percent to $284.8 million from $249.5 million for the similar period last year. Sales increases were recorded by all five of Nalco's operating units.

The Water and Waste Treatment and Petroleum Chemicals Divisions, Absorbent Chemicals Group and Day-Glo Color Corp. recorded double-digit sales increases among U.S. operations. The Process Chemicals Division's sales improved by 7 percent. This was a good increase considering the softness in the steel and automotive industries, which are very important to this division.

The International Division reported a 21 percent sales gain and continues to grow faster than the company's U.S. operations. Overall, sales

improvements were turned in by 30 of the company's 37 operating units. Nalco's core water treatment businesses led the way with solid increases by the Basic Industry, Utility Chemicals and WATERGY Groups.

Nalco's Pulp and Paper and RPC Chemicals Groups also turned in significant sales gains. Outside the United States, notable sales improvements were reported by Nalco's larger companies in Italy, Austria, Germany, France, Brazil, Venezuela and Taiwan.

Commenting on operations, W. H. Clark, chief executive officer, said, "We produced excellent first quarter performance. Both sales and earnings increases exceeded our financial goals for the quarter. They give Nalco a running start for the year. Although we have seen some softening in the automotive and steel industries, the economic health of the other major industries we serve appears strong.

"As anticipated, demand for our chemicals and services was up in all segments of the petroleum industry. We see this as an area of continued growth. The strong performance of our Day-Glo subsidiary reflects the growing demand for their products and the added capacity of its new manufacturing plant in Twinsburg, Ohio.

"With our expansion into air pollution control programs through our newly formed Nalco Fuel Tech company plus the increasing interest in waste minimization and environmental management, we are very optimistic about achieving our 1990 sales and earnings goals. While it is true that our first quarter operating earnings were very strong, what is more important is that our long-term prospects for continued success are greatly improved.''

The board of directors declared a quarterly dividend of 37 cents a share, payable June 8, 1990, to shareholders of record May 18, 1990.

SEATTLE (APRIL 26) PR NEWSWIRE - Intercredit Corp., an Atlanta-based leasing company, has ordered seven 737-500s for its expanding fleet, Boeing Commercial Airplane Group confirmed today. The order is valued at about $200 million.

Last year, Intercredit placed its first orders for new aircraft, ordering four of the -500s in December.

"We believe the 737 family is ideally suited to match our client's needs," said Intercredit President and Chief Executive Officer Doug Matthews. "The combination of the plane's outstanding record of reliability and new improvements on these latest models make the 737 a logical choice for us." The 737-500s covered by today's announcement will be placed in operating leases upon delivery, Intercredit officials said.

The aircraft will be powered by CFM56-3 engines built by CFM International a consortium of General Electric and SNECMA of France.

Intercredit has been the operating lease company for more than 120 commercial aircraft transactions since its inception in the early '80s, the company said.

Today's announcement brings to 2,795 the number of 737s ordered since the plane's introduction in 1963. So far in 1990, Boeing Commercial Airplane Group has received orders for 113 aircraft valued at approximately $8.1 billion.

DAYTON, OH (APRIL 26) PR NEWSWIRE - The Mead Corporation's (NYSE: MEA) board of directors elected two new officers at the company's annual meeting, held here today. Russell E. Kross was named vice president, human and environmental protection, and Jeffrey L. Hayman was named corporate secretary.

Kross was formerly director of corporate human and environmental protection. He joined the company in 1968 as an environmental engineer for Mead's Chillicothe, Ohio, mill. In 1972 he was promoted to manager of environmental control at Chillicothe, and in 1973 was named manager of environmental control for the Mead Paper group.

Prior to joining Mead, Kross was assistant director of the Water Supply division for the Iowa State Department of Health. He graduated from the University of Iowa with a master's degree in environmental engineering (M.S.C.E.) and a bachelor's degree in civil engineering (B.S.C.E.).

Hayman, who was elected secretary of the corporation, joined Mead in 1988 as assistant general counsel and assistant secretary. Before joining Mead Hayman was in private practice with Simpson Thacher & Bartlett, a New York City law firm, where he specialized in securities and corporate law.

Hayman graduated from the Ohio State University with a bachelor's degree in social science in 1977. He received his J.D. degree with honors in law from Ohio State University College of Law in 1980. A member of the New York and Ohio bar associations, he is admitted to practice law in those states.

Mead is a leader in forest products, electronic publishing and color imaging, based in Dayton, Ohio.

HARTFORD, CT (APRIL 26) PR NEWSWIRE - The Dexter Corporation (NYSE: DEX) announced today the election of three new members to its board of directors; the re-election of two directors, and the retirement of four directors, at its annual meeting of shareholders.

The three new board members are: Bernard M. Fox, president and chief operating officer of Northeast Utilities; Robert M. Furek, president and chief executive officer of Heublein, Inc., and Max O. Weber, president and chief operating officer of Owens-Corning Fiberglas Corporation.
Re-elected were: K. Grahame Walker, president and chief executive officer of the Dexter Corporation, and George M. Whitesides, professor of chemistry at Harvard University.

Retiring from the Dexter board are four members: Walter J. Connolly Jr., retired chairman of the Bank of New England Corporation; Donald W. Davis, chairman of the executive committee, the Stanley Works; Donald Roon, president of the Roon Foundation, and Peter L. Scott, the retired chairman of Emhart Corporation.

The board also declared the quarterly dividend on Dexter common stock of 22 cents per share. The dividend is payable July 10, 1990, to shareholders of record at the close of business on June 15. It will be the 106th consecutive quarterly dividend paid on the common stock.

The Dexter Corporation is a Fortune 500 company producing specialty materials. Founded in 1767, Dexter is the oldest company listed on the New York Stock Exchange.

OLYMPIA, WA (APRIL 26) PR NEWSWIRE - AT&T will reduce rates for the majority of in-state long distance calls, effective June 11.

The company today filed new, lower prices with the Washington Utilities and Transportation Commission (WUTC). The new rates will reduce the cost of most daytime and evening calls by an average of more than 6 percent.

"These reductions make AT&T the least-costly major daytime competitor in our Washington markets," said Laddie Taylor, AT&T assistant vice president for government affairs. "These low rates are a signal that we'll compete hard to provide the best value."

The reduced prices pass along to consumers savings in connection charges AT&T pays to local telephone companies. The WUTC ordered cuts in those charges earlier this year.

In a separate pricing action, AT&T said it would simplify pricing for operator-handled calls. Operator handling charges for in-state calls will be raised to the same level as interstate operator charges. The company also introduced a 75-cent charge to be applied when the operator dials a call the caller is capable of dialing.

AT&T carries calls in Washington across the Cascades and to or from the Longview-Vancouver area.

#90116p8024 04/26/1990 ~PR Newswire

TOWSON, MD (APRIL 26) PR NEWSWIRE - The Black & Decker Corp. (NYSE: BDK) today announced that net earnings for the first quarter of 1990 were $10.0 million or 17 cents per share.

Operating income rose 148 percent for the period to $108.2 million, from $43.6 million last year.

Sales for the quarter were $1.0 billion, 76 percent higher than in the same three months of 1989.

The corporation had reported losses in the preceding three quarters related to its acquisition of Emhart Corporation in April 1989. Reflecting interest and other acquisition-related expenses, the corporation posted losses of 49 cents per share and 5 cents per share, respectively, for the three-month periods ended September 1989 and December 1989.

Commenting on the results, Nolan D. Archibald, chairman and chief executive officer, said, "Our higher operating income margin, despite a generally sluggish sales environment, attests to Black & Decker's market strength, which has been enhanced by the high-margin product lines acquired from Emhart.

"Reflecting generally healthy economic conditions on the continent, European sales were strong, despite a continuing weak retail environment in the United Kingdom. In the United States, price increases, manufacturing efficiencies, and effective expense and quality control in power tools and household products have helped produce higher operating margins. Locks and hardware, in particular, had an excellent quarter, led by double-digit sales and operating income improvement at Kwikset. Our commercial and industrial businesses performed generally as expected.

"Our plans for the year anticipated the likelihood of additional inventory adjustments by our customers and continued weakness at the retail level, and, as this begins to occur, we have adjusted production volume and reduced operating expenses appropriately.

"It is difficult, however, to predict the course of the hyper-inflationary environment in Brazil or the duration of a recent slowdown in the Australian retail market. We anticipate that these markets, as well as the United Kingdom, will pose a challenge for the remainder of the year."

During the quarter, the corporation sold the Bostik chemical adhesives, Arcotronics capacitors and footwear materials businesses, which it had

acquired from Emhart. "With the divestiture of these businesses," Nolan Archibald noted, "and the sale of Emhart's headquarters building for $17 million earlier this week, approximately $500 million in asset sale proceeds has been applied to reduce our acquisition debt, putting us ahead of our required principal repayment schedule.

"Nevertheless, increased borrowing costs in Brazil and the slower than expected pace of our asset sale program have resulted in higher interest expense in the first quarter than we had planned. We are continuing to pursue various options for the sale of Emhart's Information & Electronic Systems Sector and Dynapert, and have begun to test the market for the sale of three additional businesses. As we move into the balance of the year, we will be implementing additional strategies, including a receivables sale program and the restructuring of sterling-denominated debt, to lower our interest expense."

Black & Decker is the world's leading marketer and manufacturer of power tools and other quality products used in and around the home and for commercial applications.

See Notes to Consolidated Financial Statements

Notes to Consolidated Financial Statements: CHANGE IN FISCAL YEAR: The corporation changed its fiscal year from a fiscal year ended on the last Sunday in September to a fiscal year ended on Dec. 31. The change is effective for the 1990 fiscal year ending Dec. 31, 1990.

ACQUISITION OF EMHART: During 1989, the corporation acquired Emhart Corp. ("Emhart") as more fully explained in the Annual Report to Stockholders for the year ended Sept. 24, 1989. Since the acquisition took place in April 1989, the results for the three months ended March 26, 1989, do not include the results of Emhart.

In connection with the acquisition, the corporation intends to dispose of several Emhart businesses. Net income and allocated after- tax interest expense on such businesses has been excluded from consolidated results of operations for the three months ended April 1, 1990.

During the quarter, the corporation closed on three previously announced sales including the Bostik Chemical adhesives, Footwear materials, and Arcotronics businesses for approximately $500 million in the aggregate. The proceeds from these sales were used to reduce debt.

FOREIGN EXCHANGE: Foreign exchange losses in Brazil have been classified as adjustments to all statement of earnings lines to offset the effects of inflation and to more properly match costs and revenues for the period. Previously, these foreign exchange losses were classified as other expense. This change had no effect on Earnings Before Income Taxes or Net Earnings. Amounts related to foreign exchange in the corresponding

quarter of the prior year were immaterial and, therefore, not reclassified.

SALE OF STOCK: In March 1990, the corporation issued 2.6 million shares of its common stock to the Company Account in Emhart Corporation's 401(k) plan for $47 million in cash. This investment in Black & Decker stock gives effect to the original intent of the plan that the Company Account be invested primarily in employer stock to be used for matching contributions to its employees' savings plan.

LOS ANGELES (APRIL 26) PR NEWSWIRE - At the annual meeting of stockholders of CPC International Inc. (NYSE: CPC) held here, Chairman and Chief Executive Officer James R. Eiszner said that CPC's "geographic spread, leading market positions, excellent products, experienced management, and strong cash flow" position it for continued strong progress in 1990 and through the coming decade. CPC, a worldwide consumer foods company with 1989 sales of $5.1 billion, achieved an increase in earnings per share of 15 percent in 1989.

Stockholders Re-Elect Four Board Members to Three-Year Terms In business conducted at the meeting, four members of CPC's board of directors whose terms expired today were re-elected to serve three-year terms. They were: Theodore H. Black, chairman, president, and chief executive officer of Ingersoll-Rand Co.; Paul W. Joy, vice chairman of American Brass Co.; James W. McKee Jr., former chairman of CPC and chairman of the executive committee of the board; and Richard W. Siebrasse, vice chairman of CPC and president of the company's worldwide consumer foods business.

Jean M. Wilkowski, former U.S. ambassador and chairman, Volunteers in Technical Assistance, was not a candidate for re-election, pursuant to the

board's policy on tenure of directors. Also, it was announced that Ivan A. Burns, corporate executive vice president of CPC, plans to take early retirement and resign from the board on May 1.

In other business, a stockholder proposal concerning annual election of all directors was defeated, and stockholders ratified the appointment of KPMG Peat Marwick as independent auditors for 1990.

Acquisitions to Add $775 Million in 1990 CPC President Charles R. Shoemate Vice Chairman Richard W. Siebrasse, and Best Foods Division President Robert J. Gillespie also addressed the meeting, reviewing CPC's progress in 1989 and opportunities for further growth, particularly in Europe and the Unite States.

Shoemate said that while CPC's consumer foods business showed good growth in 1989, this was not yet indicative of the powerful drive the company expects from the consumer foods business through the 1990s, as new acquisitions begin to add sales and profits.

CPC acquired nine consumer foods businesses in 1989 and on April 2, 1990, completed the acquisition of three market-leading brands in the United Kingdom -- Ambrosia desserts; Bovril beef pastes, cubes, and granules; and Marmite yeast spread. Total sales for the three brands recently acquired are about $145 million. Altogether, CPC's 19 acquisitions since 1986 will add approximately $775 million in sales in 1990 and $850 million-$900 million in 1991, Shoemate said.

With sales in 1989 of $5.1 billion, CPC International ranks as one of the largest and most international food companies in the United States. CPC's worldwide consumer foods business accounts for approximately 80 percent of the company's total sales. Best known among its U.S. brands are: Hellmann's and Best Foods mayonnaise, Mazola corn oil and margarine Skippy peanut butter, Thomas' English muffins, Arnold breads, Mueller's pasta products, Karo and Golden Griddle syrups, and Knorr sauces, soups, and boullions. CPC is also one of the largest corn refiners, with operations in North America and Latin America. Worldwide, CPC International has 112 plants in 47 countries.

#90116p8033 04/26/1990 ~PR Newswire

BOSTON (APRIL 26) PR NEWSWIRE - Bank of Boston Corporation (NYSE: BKB) reported today net income of $44 million for the quarter ended March 31, 1990. Net income per common share was 56 cents on a primary basis and 55 cents fully diluted. These results compared with $89 million reported

for the same quarter a year earlier, or $1.23 and $1.17 per share, respectively.

During the quarter, the corporation recorded a $125 million provision for credit losses, an increase of $89 million over the $36 million in the prior year. Net income for the quarter also reflected higher noninterest income, including a pre-tax $33 million gain on the settlement of a portion of its pension obligations.

Consolidated net interest revenue, on a fully taxable equivalent basis, was $311 million for the first quarter of 1990, compared with $322 million for the same period in 1989. Interest margin was 3.71 percent for 1990 and 4.13 percent in 1989. The decline in margin primarily reflects a lower domestic margin as a result of a higher level of nonperforming assets, which reduced net interest revenue by an additional $23 million in the comparison, as well as a reduction in interest spreads associated with the positive steps taken late last year to improve liquidity. This was partially offset by higher international margins, principally in Latin America. Net interest revenue benefited from a higher level of domestic earning assets, compared with the same period last year. Interest margin increased 40 basis points over the fourth quarter of 1989, reflecting significantly higher margins in Latin America, which were partially offset by a lower domestic margin. Noninterest income

Noninterest income for the quarter was $212 million, compared with $161 million in the same period in the prior year. Noninterest income in 1990 included the $33 million gain from the settlement of a portion of the corporation's pension obligations and a $29 million increase from mezzanine and venture capital profits. These increases were partially offset by a decrease of $12 million in fee-based income, including a reduction of $5 million in credit card fees reflecting the sale of the business in the fourth quarter of 1989 and lower financial service fees in Latin America. Also in the comparison, trading profits and commissions were $11 million lower.

Bank of Boston Corporation, with assets of $37 billion at March 31, 1990, is a New England-based superregional bank holding company with both national and international operations. Its major banking subsidiaries are The First National Bank of Boston, with headquarters in Massachusetts; Casco Northern Bank, N.A., in Maine; Bank of Boston Connecticut; Rhode Island Hospital Trust National Bank; and Bank of Vermont. The corporation and its subsidiaries provide a broad range of financial services to individual, corporate, institutional and governmental customers as well as to other banks. The corporation's common and preferred stocks are listed on the New York and Boston exchanges.

#90116p8036 04/26/1990 ~PR Newswire

WILMINGTON, DE (APRIL 26) PR NEWSWIRE - The Columbia Gas System Inc. (NYSE: CG), today estimated earnings of $47.6 million, or $1.04 per share, for the fist quarter of 1990, a decline of 38 percent from the $76.7 million, or $1.69 per share, recorded in the first quarter of 1989.

Earnings are estimated because the first quarter has not been closed. Reporting to stockholders at the corporation's annual meeting, Columbia Executive Vice President and Chief Financial Officer Robert A. Oswald attributed the decline primarily to weather in Columbia's service area that was 15 percent warmer than last year and almost 25 percent warmer than normal. The temporary impacts of the transmission companies' 1989 customer settlement and higher costs for the distribution companies which have not as yet been reflected in rates also contributed to the earnings decline. Higher oil and gas prices improved earnings in Columbia's oil and gas segment.

Oswald added that Columbia's external financing plans now call for raising about $500 million of long-term capital, 30 percent of which has already been raised. The remainder, he said, will probably come from existing bank lines of credit or additional sales of debentures.

Columbia Chairman and Chief Executive Officer John H. Croom told stockholders that although "the first quarter's results have been disappointing due to the unprecedented warm weather, I am optimistic about the future for natural gas and for Columbia." The results, he said, have not "altered Columbia's commitment or ability to continue" with an aggressive long-term capital investment program.

Croom said the 1990 program is designed to enable Columbia to capitalize on an improved competitive posture after its transmission companies settled many major regulatory and legal challenges in 1989 and on the nation's growing concern for improving the environment.

DENVER (APRIL 26) PR NEWSWIRE - MinVen Gold Corp. (AMEX: MVG) today revealed positive results of recent drilling and studies of ore reserves at its Blackdome Mine near Clinton, B.C.

On March 29, 1990, six days after MinVen's decision to write-down the Blackdome mine, an ongoing exploration program showed strong assay results (typical of historical high-grade zones) in drill hole No. 730. The intercept averaged 51.3 ounces of gold per ton over a true width of 1.3 feet and represents an unexplored vein, No. 18, which is located 325 feet east of, and sub-parallel to, Blackdome's main ore-bearing vein structure.

As of April 24, exploration drilling results in 15 holes, including No. 730, suggest the presence of a high grade ore shoot. Drilling is continuing and although the limits of this discovery have not yet been defined, the drill-indicated reserves of this ore shoot are 29,000 tons, averaging 0.60 ounces of gold per ton. A drift currently being driven along the new No. 18 vein has returned assays averaging 0.99 ounces of gold per ton over an average true width of 5 feet and a length of 138 feet.

Anderson noted that to date, Blackdome's ore has been mined from 12 similar shoots averaging approximately 20,000 tons each, scattered along a steeply inclined structure for a distance of 1.5 miles,

A total of 309,103 tons of ore with an average grade of 0.66 ounces of gold per ton have been produced at Blackdome since operations began in 1986. At the start of production, proven and probable ore reserves were 131,515 tons average 0.61 ounces of gold per ton.

As a result of the significant decline in the grade of ore mined at Blackdome which began in December 1989, MinVen management elected on March 23, 1990, to take a pre-tax write-down of $17.4 million on the carrying value of the asset.

MinVen Gold is a publicly held, Denver-based mining company with interests in five operating mines in the U.S. and Canada. Its shares are traded on the American and Toronto stock exchanges under the symbol MVG.

IRVINE, CA (APRIL 26) PR NEWSWIRE - Fluor Daniel announced today that it has been awarded two contracts by Pillsbury Inc., a subsidiary of London-based Grand Metropolitan PLC. The value of the contracts was not disclosed.

Fluor Daniel's Industrial Sector will provide engineering, procurement and construction management services under an existing alliance agreement. The first contract is for expansion of the Wellston, Ohio, plant to include a new frozen distribution center, additional capacity to produce pizza, and new vegetable processing lines. The second contract is for renovation of a previously closed facility in Murfreesboro, Tenn. The reconditioned plant will produce dry grocery products.

Pillsbury is part of the food sector of Grand Metropolitan PLC, an international food, drinks and retailing company with annual sales exceeding $15 billion.

Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

SAN DIEGO, CA (APRIL 26) PR NEWSWIRE - Pacific Data Products Inc. of San Diego has announced that it will sell a private label version of Brightwork's PS-Print software, called "PacificPrint." The printer option software is for exclusive use with two of its most popular emulation

cartridges for HP LaserJet printers: "PacificPage," a PostScript language emulation cartridge, and "Plotter in a Cartridge," which provides fast HP-GL output on a laser printer.

When used together with "Plotter in a Cartridge" and "PacificPage," "PacificPrint" enables users to turn their networked laser printers into PostScript or HP-GL compatible printers, while continuing to use them in their native PCL mode.

"'PacificPrint' is an ideal solution for users who want to install 'PacificPage' or 'Plotter in a Cartridge' on their networked printers," stated Ken Glass, Brightwork Marketing director. "The number of networked printers will grow rapidly as we enter the 1990s."

"This customized version of Brightwork's PS-Print software is the perfect answer for many LAN users who wish to have the added functionality of 'PacificPage' and 'Plotter in a Cartridge' while not giving up their HP PCL printer," added Mick O'Rourke, Pacific Data's vice president of marketing.

In addition to providing a networking option for the two emulation cartridges, "PacificPrint" provides a complete printing system for networks. It lets any user print to any printer, attached to any PC, anywhere on the LAN. Each fileserver can have an unlimited number of print servers and any PC can host single or multiple printers in dedicated or non dedicated mode.

"PacificPrint" also simplifies printing operations. Familiar NetWare commands can be used or, with QueueIt!, users can hot-key a window to select a printer or to change the printer options directly from their application. Important jobs can be resequenced so that they print immediately, and users are immediately notified of print job completion, printer off-line conditions, and required form changes. "PacificPrint" requires only 11k and less than 1 percent of CPU power at the host PC.

"PacificPrint" will be available exclusively through Pacific Data's worldwide distribution channel, and will be compatible with "PacificPage" and "Plotter in a Cartridge" for the HP LaserJet Series II, IIP, IID, and III printers.

#90116p8056 04/26/1990 ~PR Newswire

MILWAUKEE (APRIL 26) PR NEWSWIRE - WICOR, Inc. (NYSE: WIC), the Milwaukee-based parent of Wisconsin Gas Company and Sta-Rite Industries, Inc., reported first-quarter earnings of $17.1 million, down from $22 million for the same period last year.

The financial results were announced by Stuart W. Tisdale, president and chief executive officer, at WICOR's annual meeting of shareholders today.

Earnings per share were $1.25, versus $1.64 in the first quarter of 1989. First-quarter operating revenues were $251.0 million, compared with $260.2 million in 1989.

Tisdale attributed the decline in earnings to exceptionally warm weather during the first quarter, which is traditionally a period of strong sales for Wisconsin Gas. Temperatures were 16-percent warmer than last year and the warmest recorded in the past 100 years.

Wisconsin Gas reported first-quarter earnings of $14.8 million on operating revenues of $179.3 million, compared with earnings of $19.7 million and operating revenues of $188.7 million for the period last year. Tisdale said the utility's continuing efforts to hold the line on expenses had kept its first-quarter costs below budget, but could not

offset the drop in gas sales.

Sta-Rite's key markets rebounded from slowdowns during the latter half of 1989, resulting in first-quarter operating revenues of $71.4 million. Operating revenues for the period last year were $71.2 million. Tisdale said earnings of $2.2 million, compared with $2.5 million in first quarter 1989, reflected a planned reduction in inventory levels. He noted that Sta-Rite's results were on budget for the quarter.

At the annual meeting, details of the 1989 performances of WICOR's two subsidiaries and the outlook for 1990 were discussed by Thomas F. Schrader president and chief executive officer of Wisconsin Gas Company, and Joseph P. Wenzler, president and chief executive officer of Sta-Rite Industries. In addition, shareholders voted to increase the number of shares authorized for issuance through the WICOR stock option plan from 500,000 to 1 million shares, and re-elected three incumbent members of the Board of Directors.

MORRISTOWN, NJ (APRIL 26) PR NEWSWIRE - AT&T Capital Corporation today filed a registration statement with the Securities and Exchange Commission (SEC) for the offering and sale of up to $2.1 billion of notes and warrants to purchase notes. The notes will be registered under the SEC's Rule 415 (commonly called a shelf registration) which allows AT&T Capital to offer to sell notes on a continuous or delayed basis.

AT&T Capital will use the proceeds from the sales primarily to finance installment sale, lease and other finance agreements with purchasers of AT&T and non-AT&T equipment, to purchase finance receivables from various AT&T affiliates, to fund equity investments, and to repay debt of AT&T Capital and its subsidiaries.

AT&T Capital was formed earlier this year in connection with the reorganization of AT&T Credit Corporation, now a subsidiary of AT&T Capital. The AT&T Capital family of companies also includes AT&T Commercial Finance Corporation, AT&T Capital Holdings division, Eaton Financial Corporation, and Encore International, Inc.

This notice does not constitute an offering to sell securities. Such an offering may be made only by means of a prospectus.

HOUSTON (APRIL 26) PR NEWSWIRE - Global Marine Inc. (NYSE: GLM) today reported a net loss of $11 million, or 11 cents per share, on revenues of $60 million for the first quarter, which ended March 31, 1990.

For the corresponding quarter in 1989, the company reported a net loss of $14 million, or 14 cents per share, on revenues of $42 million. The average utilization rate for Global Marine's offshore drilling rig fleet was 97 percent for the first quarter of 1990, compared to 69 percent for the first quarter of 1989 and 88 percent for the fourth quarter of 1989.

C. Russell Luigs, chairman, president and chief executive officer, commented, "We are encouraged by the gradual recovery in offshore drilling markets to date and its effect on our operational and financial performance. We remain cautiously optimistic that the recovery will continue."

Global Marine is a major international offshore drilling contractor with interests in oil and gas development and production.

#90116p8062 04/26/1990 ~PR Newswire
OIL CITY, PA (APRIL 26) PR NEWSWIRE - Quaker State Corporation (NYSE:KSF) reported increased sales and earnings for the first quarter of 1990, compared with the same period a year ago. Net income was $2,326,000 ($.09 per share) on sales and operating revenues of $208,950,000. This compares to net income of $580,000 ($.02 per share) and sales and operating revenues of $194,893,000 in the first quarter of 1989.

Quaker State's operating profit in the first quarter was $7,506,000, an increase of 28 percent over the operating profit of $5,884,000 reported by the company in the first quarter of 1989.

The profit gains were reported in the company's petroleum and coal segments. Petroleum operating profit rose to $3,803,000, up from $2,464,000 in the first quarter of 1989, which included a $2.2 million state tax refund. Operating profit of The Valley Camp Coal Company increased more than ten-fold, from $98,000 a year ago to $1,064,000 in the first quarter of 1990.

The improved earnings in the petroleum segment is attributed to the favorable impact of ongoing cost control efforts, strong results in the company's oil and gas production units, firmer pricing of motor oils, and

liquidation of low priced inventories which resulted in LIFO profit of approximately $875,000. However, profit was negatively impacted because operations at McKean Refinery were reduced in anticipation of its forthcoming sale.

Sales in the fast lube operations increased 16 percent to $22,173,000, but industry-wide price cutting continued to hold down profits, which grew 7 percent to $818,000 compared to $764,000 in the first quarter of 1989. During the quarter Quaker State Minit-Lube, Inc., added seven company operated units while McQuik's Oilube, Inc., gained one franchise outlet. At March 31, there were 379 Minit-Lube and 80 McQuik's service centers in operation.

The Valley Camp Coal Company reported significant profit gains, chiefly because of operating improvements at Helen Mining Co. in Pennsylvania.

Operating profit of the company's other businesses experienced modest declines, primarily because of the slowdown in new car sales. At Heritage Insurance Group, operating profit declined slightly, despite higher capital gains, to $1,662,000 from $1,828,000 last year, due primarily to higher policy acquisition costs and less favorable claims experience. At Truck-Lite Company, Inc., earnings declined from $1,440,000 in the first quarter of 1989 to $1,229,000 because of soft sales to new car manufacturers.

#90116p8077 04/26/1990 ~PR Newswire

LOS ANGELES (APRIL 26) PR NEWSWIRE - Unocal (NYSE: UCL) today announced an innovative series of programs designed to rid the air in the Los Angeles Basin of up to 23 million pounds of air pollution annually.

In one program, called SCRAP, Unocal will spend more than $5 million to eliminate -- by paying for and scrapping 7,000 older cars -- six million pounds of air pollution. A second program, called Smog-Fighter, which helps older cars run cleaner, could rid the basin of up to another 17 million pounds of air pollution each year.

"Unocal is initiating a series of pollution-control programs that strike at the heart of the air quality problem in the Los Angeles Basin," said Richard J. Stegemeier, Unocal chairman, president and chief executive officer. "We want to demonstrate ways of reducing smog that are efficient and cost-effective."

Termed SCRAP (South Coast Recycled Auto Program), Smog-Fighter and Protech Patrol, the three clean air programs target vehicle emissions, which cause at least 60 percent of the area's smog according to the California Air Resources Board. (Residential, commercial, industrial and manufacturing sources make up the remaining 40 percent.)

Under SCRAP, Unocal will pay $700 apiece for 7,000 pre-1971 vehicles registered in the Los Angeles Basin. These 7,000 vehicles each year emit approximately 6 million pounds of carbon monoxide, reactive organic gases and nitrogen oxides. (Pre-1971 vehicles pollute from 15 to 30 times more than 1990 models.) The initiative will cost Unocal more than $5 million.

The second initiative, Smog-Fighter, offers free Smog Checks and low-emission tune-ups to drivers of pre-1975 cars at participating Unocal

Protech stations in the greater Los Angeles area. The program will be offered to drivers in the "off" year of the biennial mandatory Smog Check operated by the state's Bureau of Automotive Repair. The free low-emission tune-up, with adjustment to timing, idle speed and air/fuel mixtures, will enable checked cars to run cleaner and get better gasoline mileage.

Protech Patrol, the program's third facet, will circulate specially equipped vehicles on the area's freeways to aid stranded motorists.

Unocal will gather pertinent emissions data from SCRAP and Smog-Fighter to share with the South Coast Air Quality Management District, the State Air Resources Board, university researchers, environmental groups and other interested organizations.

TROY, MI (APRIL 26) PR NEWSWIRE - Entertainment Publishing Corp. (AMEX: ENT), the leading publisher of discount coupon books, reported record revenues and earnings for the three- and nine-month periods ended March 31 1990.

Revenues for the three months ended March 31, 1990, were $26,835,000 compared with $22,997,000 for the same period last year, representing an increase of $3,838,000 or 16.7 percent. Net income increased to $4,840,000 ($.86 per share on 5,650,000 shares outstanding) compared to

$3,396,000 ($.64 per share on 5,340,000 shares outstanding) in the prior period.

For the nine months ended March 31, 1990, revenues increased 14.0 percent to $76,147,000 compared to $66,817,000 in the same period last year. Net income increased to $11,571,000 ($2.08 per share on 5,567,000 shares outstanding) compared to $7,263,000 ($1.42 per share on 5,106,000 shares outstanding) for the prior period. Reflected in the results for the nine months ended March 31, 1989, is an $835,000 ($.16 per share) after-tax charge to income for the cumulative effect of a change in accounting.

For the three and nine months ended March 31, 1990, operating income increased 32.9 percent and 40.5 percent, respectively.

Hughes L. Potiker, chairman and president of Entertainment Publishing Corp., indicated he was very pleased to report record revenues and earnings. "We are ahead of projections compiled at the time of the December 1988 recapitalization both for earnings and debt repayment and have positioned ourselves well for the future."

NEW YORK (APRIL 26) PR NEWSWIRE - The board of directors of Ametek Inc. (NYSE: AME) today elected Walter E. Blankley, 54, president and chief executive officer of the Fortune 500 manufacturer, according to Ametek's Chairman Dr. John H. Lux.

Blankley, formerly senior vice president, succeeds John P. Dandalides, 66, who retired after 35 years with Ametek, having served as president and chief operating officer since 1988. At the company's annual meeting on April 24, Blankley had been elected a member of Ametek's board of directors.

The company's directors also elected Roger K. Derr executive vice president and chief operating officer, and Chief Financial Officer Allan Kornfeld as executive vice president, according to Lux. Both Derr and Kornfeld had previously served as senior vice presidents of the company.

As president and chief executive officer of Ametek, Blankley will be responsible for the company's 30 manufacturing locations which are structured into three operating groups: Precision Instruments divisions including U.S. Gauge, one of the world's leading aircraft and automotive instrument manufacturers, and Ametek Aerospace Products -- formerly GE's aircraft instrument business, acquired by the company in 1989; the Electro-mechanical group headed by the Lamb Electric division, a major manufacturer of appliance and business machine motors worldwide; and Ametek's Industrial Materials group including Specialty Metal Products, a leading producer of high-purity metal powders, metal strip and composite materials.

Blankley joined Ametek in 1960 and in 1966 was appointed general manager of the company's Hunter Spring division. In 1970 he was named general manager of Ametek's multiplant Aluminum Extrusion division which, under his management, became the largest independent aluminum extruder on the West Coast. Blankley was elected a vice president of Ametek in 1971, group vice president in 1978, and has been senior vice president since 1982.

A native of Philadelphia, he was awarded in 1957 a bachelor of science degree in mechanical engineering by Princeton University where he played varsity basketball. Blankley and his wife, Rosemary, live in West Chester, Pa., a Philadelphia suburb. They have a son, Stephen, and a daughter, Laura.

Blankley will become the seventh president in Ametek's 60-year history. The Fortune 500 industrial manufacturer, with 6,000 employees worldwide, had 1989 sales of $587 million. Listed on the New York Stock Exchange

since 1930, Ametek has increased dividend payments to its stockholders for 40 consecutive years.

#90116p8090 04/26/1990 ~PR Newswire

WALTHAM, MA (APRIL 26) PR NEWSWIRE - Cabot Corporation (NYSE: CBT) today reported income applicable to primary common shares of $25.3 million ($1.03 per share) for its second quarter ended March 31, 1990, compared with $28.1 million ($1.05 per share) in the same quarter a year ago. Net sales and other operating revenues were $445.1 million vs. $540.9 million last year.

For the six months ended March 31, 1990, Cabot reported income applicable to primary common shares of $42.7 million ($1.74 per share), compared with $49.9 million ($1.86 per share) in the same period a year ago. Net sales were $851.7 million compared with $1,021.0 million last year.

Cabot Chairman Samuel W. Bodman said, "Our second quarter operating results reflect the progress we are making at Cabot. We fell just short of matching record earnings achieved in the same quarter a year ago, despite the unfavorable impact on our energy business of unusually warm weather during the quarter and the effects on our carbon black business of higher feedstock costs and weaker worldwide demand for rubber blacks."

Exclusive of a $10.2 million net gain associated with the company's energy restructuring, total operating profit for the second quarter advanced to $64.0 million from $61.9 million last year. The improvement in total operating profit was offset by increased provisions for contingencies and higher interest expense.

The decline in net sales reflects the divestiture in late 1989 of Cabot's West Texas gas pipeline and processing businesses.

Operating profit for Cabot's Energy Group advanced to $22.9 million from $21.9 million in the second quarter last year. Improved earnings in the company's liquified natural gas business essentially offset lower earnings from Cabot Oil & Gas Corporation as a result of lower produced volumes due principally to the warm winter weather.

Cabot Corporation is a Waltham, Mass. based Fortune 300 company with operations in specialty chemicals and materials and energy.

#90116p8097 04/26/1990 ~PR Newswire

OKLAHOMA CITY, (APRIL 26) PR NEWSWIRE - Kerr-McGee Corp. (NYSE: KMG) today reported first-quarter net income of $27.1 million, or 54 cents per common share. In the like 1989 quarter, income from continuing operations was $33.9 million, or 70 cents per common share. Including a gain of $30 million, or 62 cents per common share, realized from the completion of the sale of discontinued operations, the 1989 first-quarter net income was $63.9 million, or $1.32 cents per common share.

Comments on results First-quarter operating profit increased for all company operations except refining and marketing, compared with the 1989 first quarter, said Frank A. McPherson, chairman and chief executive officer. Exploration and production operating profit increased due to higher crude oil sales volumes and prices, partially offset by higher exploration expenses. The company's crude oil production increased 16 percent due to the start-up of new North Sea fields and the acquisition of Canadian properties. Average crude oil prices were up $2.87 per barrel for the quarter, compared with the 1989 first quarter.

Operating profit for coal was higher due to increased sales volumes and lower per-ton production costs. Results for chemical operations improved due largely to higher sales prices and volumes for titanium dioxide pigment. Contract drilling recorded an operating profit, compared with an operating loss in the 1989 first quarter, due to higher rig utilization and day rates.

A significant decrease in refining and marketing operating profit in the 1990 first quarter, compared with the 1989 period, was due to processing higher-priced crude oil while product prices were declining.

Oil and gas production, prices Kerr-McGee's production of crude oil averaged 50,600 barrels per day in the first quarter, an increase of 7,100 barrels per day. Crude oil prices for the first quarter averaged $19.02 per barrel, up l8 percent from the 1989 first quarter.

Average daily natural gas deliveries were 258 million cubic feet per day in both the 1990 and 1989 first quarters. The average natural gas sales price was $l.83 per thousand cubic feet, about the same as in the 1989 quarter.

Sales, cash flow, capital expenditures Sales were $812 million, up 13 percent from $717 million in the first quarter last year. Cash flow from operations totaled $116 million, compared with $124 million in the 1989 first quarter. Capital expenditures were $94 million, compared with $69

million in the like 1989 quarter.

BOISE, ID (APRIL 26) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) announced today that by an amendment filed with the Securities and Exchange Commission (SEC) on April 23, it increased its offering of Zero-Coupon Convertible Notes (also known as Liquid Yield Option(TM) Notes) (the "Notes") from $125 to $166 million net proceeds. The Notes are due in 2005 at a total redemption price of $500 million. Each Note has been priced at $343.61 and is redeemable when due at $1,000, which represents a yield to maturity of 7.25 percent per annum.

The Notes, non-callable for two years, are convertible into shares of the company's common stock at $55.02 per share.

Each Note, at the option of the holder, will be purchased by the company in 1995 at a purchase price calculated to yield a 7.25 percent return to the holder. The purchase price may be paid at that time, at the sole option of the company, in cash, shares of common stock or market rate subordinated notes due in 2005.

Morrison Knudsen Corp. is a diversified worldwide organization involved in a wide array of environmental services, industrial process, power, mining and rail systems operations. The company provides design, engineering, construction, program-management, procurement and construction-management services in the infrastructure industries.

LOS ANGELES (APRIL 26) PR NEWSWIRE - John C. Quinn, former editor of USA Today and a Gannett Co., Inc. (NYSE: GCI) news executive for 24 years, retired as a company officer and director, it was announced Thursday at the annual shareholders' meeting here.

Quinn normally would have retired Nov. 1, but Gannett Chairman, President and CEO John J. Curley said that Quinn is retiring a few months early to take advantage of summer weather in his native Rhode Island. Quinn plans to divide his time between Carolina, R.I., and Cocoa Beach, Fla.

As a result of Quinn's retirement, Peter S. Prichard, editor of USA Today, and senior vice president/news, becomes chief news executive of Gannett.

Quinn began his newspaper career 47 years ago as a copyboy at the Providence (R.I.) Journal-Bulletin, where he rose to day managing editor. He left the newspaper in 1966 to join Gannett.

He became chief news executive for the Gannett Rochester newspapers, and also served as the head of Gannett News Service, beginning in 1967. In 1980, Gannett News Service won the Pulitzer Prize Gold Medal for Public Service.

Quinn has been Gannett's chief news executive since 1971. He worked closely with retired Gannett Chairman Allen H. Neuharth to plan the launch of USA Today in September 1982. Quinn served as editor of USA Today from 1983 to 1988 when Prichard succeeded him.

Quinn was the National Press Foundation's editor of the year in 1986. He also served as president of the American Society of Newspaper Editors and the Associated Press Managing Editors, a rare distinction.

In other developments at Thursday's annual meeting, Gannett shareholders re-elected five members of the board of directors to terms expiring in 1993.

The five are: -- Cathleen P. Black, publisher of USA Today and executive vice president/marketing of Gannett;

-- Meredith A. Brokaw, a distinguished civic leader, chairman of the Coro Foundation and owner of Penny Whistle Toy Stores in New York City;

-- Peter B. Clark, former chairman, president and chief executive officer of The Evening News Association;

-- John J. Curley, chairman, president and chief executive officer of Gannett;

-- John J. Louis, Jr., former U.S. ambassador to the United Kingdom and the founder of Combined Communications Corp.

Earlier today, Gannett's directors declared a regular quarterly dividend of 30 cents per share of common stock, payable on July 2, 1990 to shareholders of record on June 8, 1990.

Gannett is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest information systems and a national group of commercial printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

GRAND RAPIDS, MI (APRIL 26) PR NEWSWIRE - Guardsman Products, Inc. (NYSE: GPI) announced today that it has entered into a letter of intent to purchase the Scrunge(R) line of abrasive cleaning sponge products from the Church & Dwight Co., Inc. of Princeton, N.J.

The product line offers three varieties of scratchless cleaning sponges for use with cookware, kitchen, and for general household purposes. The two-sided Scrunges have a scrubber side for removing heavier buildups of dirt and grime and a sponge side for wiping surfaces clean.

Scrunge sponges are currently distributed nationally through grocery channels.

Chuck Bennett, president and chief operating officer of Guardsman, stated that the Scrunge products will add substantially to the growing lines of Guardsman consumer products that are distributed to the food stores. Adding strong national brands, such as Scrunge, will also help expand the distribution of some of the company's regional products.

The purchase of the Scrunge product line continues the Guardsman commitment to grow its Consumer Products Group by acquisition and expansion of complementary products marketed nationally through

established distribution networks.

Guardsman Products, Inc. is a diversified producer of custom industrial coatings, consumer products and packaging services.

DALLAS (APRIL 26) PR NEWSWIRE - Stinu Corp. of America Inc., the manufacturer/retailer of UNITS interlock knit separates, and MIKI CORP. of Japan, have entered into a long-term agreement to expand UNITS' international presence with locations in Japan.

Milt Schulle, president of UNITS, signed an international franchise agreement on April 20, 1990, with MIKI CORP.'s executive vice president and director, Yoshihide Nishimoto.

MIKI CORP. is the largest retail specialty store concern in Japan with over 1,000 directly operated locations throughout Japan. The stores specialize in women's apparel, children's wear and jewelry with annual group sales in excess of $1.2 billion (U.S.).

"We have been interested in developing the right presence in Japan and the MIKI group understands their market better than anyone," said Schulle. "We have a product that fits the life of today's woman, whether she is in the United States or anywhere in the world, and MIKI CORP. obviously agrees with us."

In Japan, UNITS stores will operate under the name STINU UNITS with the flagship location expected to open this fall in a fashionable area of Tokyo. Plans for additional STINU UNITS locations call for 20 stores in four years and 100 locations in all.

"We are enthusiastic about our partnership with Stinu Corp. of America Inc., and look forward to developing STINU UNITS stores under this new concept. We believe our extensive retail management expertise of over 1,000 stores in Japan, and UNITS' diverse and dramatic presentations of interchangeable apparel, and innovative product development, will result in great success here in Japan," said Nishimoto.

BOSTON (APRIL 26) PR NEWSWIRE - The board of directors of Bank of Boston Corporation (NYSE: BKB) today declared quarterly dividends of 89 cents per share on the corporation's Series A preferred stock (BKB pfA); 86 cents per share on its Series B preferred stock (BKB pfB); and $1.58 per share on its Series C preferred stock (BKB pfC). The dividends on each of these three series of adjustable-rate, cumulative preferred stock are payable June 15, 1990, to stockholders of record on May 25, 1990.

For the period March 16, 1990, through June 15, 1990, the dividend rate is 7.05 percent for the Series A shares, 6.80 percent for the Series B shares and 6.25 percent for the Series C shares.

The corporation's three series of preferred stock were issued each in connection with the acquisition of bank holding companies in Maine (Series A), Connecticut (Series B) and Rhode Island (Series C).

The dividend rate on each of the three series is adjusted quarterly. The dividend rate on the Series A shares is 195 basis points below the highest of three Treasury benchmarks, with a minimum dividend rate of 6 percent and a maximum rate of 13 percent. The dividend rate on the Series B shares is 220 basis points below that Treasury benchmark, with a minimum rate of 6 percent and maximum rate of 13 percent. The dividend rate on the Series C shares is 275 basis points below the same benchmark, with a minimum rate of 5.50 percent and a maximum rate of 12.50 percent.

Bank of Boston Corporation is a New England-based superregional bank holding company with assets of $37 billion at March 31, 1990.

HOUSTON (APRIL 26) PR NEWSWIRE - American General Corp. (NYSE: AGC) today said that Institutional Shareholder Services Inc. (ISS) has recommended that institutional shareholders cast their votes at American General Corp.'s Wednesday, May 2, annual meeting against Torchmark Corp.'s (NYSE: TMK) five nominees to American General's board of directors and Torchmark's resolution aimed at the sale of American General.

The recommendations are contained in a 10-page proxy analysis report dated April 23 and being circulated to ISS's institutional investor clients this week. Torchmark late last month made, then withdrew, a proposal to acquire American General, with the payment to be cash for half of the shares and Torchmark stock for the rest. Torchmark is waging the proxy contest in connection with the American General annual meeting of shareholders, to be held in Houston.

Regarding the directors election, the ISS analysis notes that: "Torchmark has not suggested that American General is poorly run, or that it would make any significant changes if the merger were to be completed. Since Torchmark is not taking over the company, but investigating options through a proxy fight, a more immediate concern is corporate goverance; how do the companies treat their shareholders. In this battle, American General is superior.

"For us, corporate governance is the deciding factor," the ISS analysis continues. "Thus, in a proxy fight where the future of the company is at stake, we recommend a vote for incumbent managers."

The analysis notes that the Torchmark resolution calls on American General to retain an investment banking firm "...for the specific purpose of solicitating offers to acquire the company by sale or merger and to set up a committee of outside directors to consider and recommend to the full board of directors for approval the best available offer to acquire the company by sale or merger.... We are not comfortable with the assumption that the best course for American General at this juncture is selling it off."

American General is an insurance and financial services organization with assets of $32 billion and total equity of $4.4 billion. Headquartered in Houston, the company has subsidiaries that operate in 50 states and Canada.

#90116p8130 04/26/1990 ~PR Newswire

NEW YORK (APRIL 26) PR NEWSWIRE - Time Warner Inc. (NYSE: TWX) reported today that with the direct assistance of the U.S. trade representative, its Warner Bros. and DC Comics subsidiaries have reached an agreement in their actions charging unfair competition against South Korea-based Kukje Corp. The suit was based on Kukje's registration and unauthorized use of counterfeit versions of the Batman logo on sneakers produced in South Korea.

Warner Bros. Inc. is the producer and distributor of the popular "Batman" movie, scheduled to be released in South Korea in early summer 1990. DC Comics Inc. is the owner of the Batman copyrights and trademarks since the character's creation more than 50 years ago.

Under the settlement, Kukje has agreed not to copy Warner Bros. or DC Comics trademarks in the future and to pay 25 million won (approximately $35,000 U.S.) as compensation for losses suffered by the Time Warner subsidiaries. Time Warner plans to donate the money to Korean charities.

"We are very pleased that, thanks to the direct intervention of Ambassador Carla Hills, U.S. trade representative, we have been able to reach this important, precedent-setting settlement in our trademark dispute in South Korea," said Timothy A. Boggs, a Time Warner vice president.

"This settlement is a great stride forward in our worldwide battle to protect intellectual property rights," said Jon Lang, vice president of Warner Bros. Merchandising, the licensing agent for Batman and other Time Warner properties. "It is our expectation that companies and countries around the world will understand that we simply will not tolerate infringement of our trademarks and copyrights, which, after all, are our most valuable assets."

The settlement followed intensive unsuccessful efforts by the Time Warner subsidiaries to get Kukje to agree to stop using the Batman property in South Korea. Settlement discussions began in earnest after a March 1990 conversation between Mrs. Hills and South Korean Trade Minister Han.

#90116p8132 04/26/1990 ~PR Newswire

BALTIMORE (APRIL 26) PR NEWSWIRE - Crown Central Petroleum Corp. (AMEX: CNP.A) announced today at the Annual Meeting of Stockholders' that the company earned $1.1 million ($0.12 per share) in net income for the first quarter of 1990 on revenues of $458 million.

This compares to net income of $2.8 million ($0.22 per share) on revenues of $284 million in the first quarter of 1989, and to net income of $3.1 million ($0.32 per share) on revenues of $496 million in the fourth quarter of 1989. The results for the first quarter of 1989 included $3 million in pre-tax gain from sales associated with the company's withdrawal from exploration and production operations.

The substantial increase in revenues for the first quarter of 1990 and the fourth quarter of 1989 compared to the first quarter of 1989 reflects the acquisition of the La Gloria Oil and Gas Co. in October 1989. The decline in net income for the first quarter of 1990 compared to the fourth quarter of 1989 was the result of lower margins combined with lower sales volumes on all products, except jet fuel. The cost of crude processed increased approximately 12 percent this quarter while finished product prices rose only 6 percent.

Henry A. Rosenberg Jr., Crown's chairman of the board, said, "The severe weather conditions that existed early in the first quarter created a very volatile marketplace that reversed during the quarter. Margins which had

improved in January over the fourth quarter of 1989, deteriorated considerably in February and March."

Rosenberg said the precipitous drop in demand for home heating oil was a major factor in the lower wholesale sales from the company's East Coast terminals. The company did shift refinery distillate production to jet fuel to meet increased market demand at more favorable prices.

Rosenberg added that margins have improved in April as the market stabilized somewhat, and the company was optimistic about the outlook for the second quarter.

#90116p8134 04/26/1990 ~PR Newswire

PITTSBURGH (APRIL 26) PR NEWSWIRE - The Board of Directors of Allegheny International, Inc. (AI) (NYSE: AG) considered today Japonica Partners' recent offer to purchase for cash any and all of the following debentures of AI and Chemetron Corporation, AI's wholly-owned subsidiary (Chemetron):

Allegheny's 9 Percent Subordinated Sinking Fund Debentures due 1989, 10-3/4 Percent Subordinated Sinking Fund Debentures due 1999 and 10.4 Percent Subordinated Sinking Fund Debentures due 2002; and Chemetron's 9 Percent Sinking Fund Debentures due 1994.

AI indicated that in light of the fact that the Official Committee of Unsecured Creditors has stated that it believes the Japonica offer is in violation of Section 1125(e) of the Bankruptcy Code and that a recently filed motion by the trustee for the Allegheny debenture holders stated that questions could be raised under Section 1125 as well as other laws regarding the offer, AI is reviewing Japonica's offer from a legal standpoint and many alter its present position with regard to the offer depending upon the results of that review.

From a financial standpoint, and given the inherent uncertainties of the reorganization and the tender offer process (debenture holders should carefully review the tender offer materials and especially the conditions to the offer), the Board of Directors does not recommend that debenture holders accept or reject the Japonica offer and is remaining neutral and expressing no opinion. Just as voting on a reorganization plan is an individual matter, so is the decision whether to accept or reject Japonica's offer.

Above all, the board of directors (with two opposing) continue to believe that AI's Joint Stock Plan of Reorganization is the only viable plan and

is in the best interests of all creditors and shareholders of AI.

#90116p8137 04/26/1990 ~PR Newswire

HARTFORD, CT (APRIL 26) PR NEWSWIRE - Connecticut Natural Gas Corporation (NYSE: CTG) today reported consolidated net income for the first quarter ended March 31, 1990, of $9,593,000, up from the $8,090,000 earned during the same quarter of 1989.

The increased earnings were principally attributable to the new higher gas rates which became fully effective in October 1989 as a result of the rate decision rendered by the Connecticut Department of Public Utility Control (DPUC) and greater sales and profit margins on sales to interruptible customers, which offset reduced sales to CNG's firm customers, due to the warmer weather experienced in the first quarter of 1990.

Consolidated earnings per share based on 8,335,278 weighted average shares outstanding were $1.15, up compared to earnings per share of $1.04 earned during 1989 on 7,744,014 weighted average shares outstanding, which included the benefit of $.02 per share from earnings on discontinued operations. Consolidated revenues for the three months ended March 31, 1990, were $86,084,000 compared with $78,892,000 for 1989.

For the 12 months ended March 31, 1990, consolidated net income totaled $14,235,000 compared with net income of $9,929,000 reported for the 12 months ended last year.

Earnings from continuing operations increased primarily because of the new higher gas rates, as mentioned above, and greater sales and profit margins on sales to interruptible customers due to the warmer weather experienced over the year.

Increased sales and associated profits from the non-regulated district heating and cooling operations also contributed to the higher level of earnings.

Net income per common share from continuing operations amounted to $1.78 on 8,080,148 average shares outstanding, compared with $1.25 per common share earned in 1989 on 7,662,389 average common shares then outstanding.

Consolidated revenues for the 12 months ended March 31, 1990, were $224,039,000, compared with revenues of $195,002,000 reported for the comparable period a year ago.

Discontinued operations included in per share earnings for the 12 months ending March 31, 1990 were a $.03 loss versus income of $.03 per share in the prior year comparable period. After reflecting the effect of discontinued operations, consolidated earnings are $1.75 compared to the $1.28 in the prior 12 month period.

Victor Frauenhofer, president and chief executive officer, indicated that over 90 percent of consolidated net income for the current 12 month earnings period has been generated by the regulated natural gas distribution business of the company.

The 12 month gas earnings include the $.61 per share earned in December 1989, of which approximately $.28 of the December earnings were a result of the severe cold weather experienced in CNG's service area.

In January, after an in-depth review by company management, the CNG board of directors approved a plan to divest certain operations of the non-regulated businesses, including the propane distribution and equipment rental businesses, a small packaged cogeneration systems business, and various real property investments not currently utilized in its non-regulated operations.

The financial impact to net income from these businesses is identified by the caption "discontinued operations," and their discontinuance is not expected to adversely materially impact ongoing future financial results. The divestiture of these businesses is expected to be concluded in 1990 and result in a cash and earnings benefit to the company. The cash proceeds

are expected to be utilized to fund the ongoing construction and working capital requirements of the retained non-regulated district heating and cooling operations.

NORWALK, CT (APRIL 26) PR NEWSWIRE - Trans-Lux Corporation (AMEX: TLX)

today reported earnings of two cents per share for the first quarter ended March 31, 1990. The announcement was made by chairman Richard Brandt at the company's annual meeting here today.

Gross revenues of $4.3 million for the first quarter were flat compared to the previous year. Net income for the quarter was $23,000 (two cents per share) versus $80,000 (five cents per share) in 1989.

Brandt said, "First quarter results reflect softness in the brokerage display market and the continued decline of the teleprinter business, historically two of our major markets. Our backlog overall, however, continues to be strong, and we have several major display orders slated for delivery at later dates.

In other business at the meeting, Messrs. Edward H. Meyer and Howard S. Modlin were reelected as Class B directors and Robert Greenes was reelected as a common stock director, all, for three year terms. The stockholders also voted to recommend the retention of Deloitte & Touche as the company's independent auditors for 1990 and approved the proposal to amend the corporation's Certificate of Incorporation to reduce the corporation's authorized number of shares of common stock to 4,000,000 and Class B stock to 2,000,000.

The company's board of directors authorized payment of a regular quarterly cash dividend on July 10, 1990, to all stockholders of record as of the close of business on June 22, 1990. Holders of common stock will receive three cents per share and holders of Class B stock will receive 2.7 cents per share.

Trans-Lux Corporation, whose securities are traded under the symbol "TLX" on the American Stock Exchange has two operating divisions. The Communications Division designs, leases, sells and services large-scale LED information displays and credit terminals, facsimile equipment and teleprinters. The Entertainment Division operates a chain of theaters in the southwest and certain other theatrical properties.

PINEVILLE, LA (APRIL 26) PR NEWSWIRE - Central Louisiana Electric Company Inc. (NYSE: CNL) today reported operating results for the first quarter and 12 months ended March 31, 1990, Scott Brame, president and chief executive officer, announced.

For the quarter, operating revenues were $69,500,000 versus $68,478,000 recorded in the similar quarter of 1989, reflecting somewhat higher generating fuel costs. These costs have no effect on earnings since changes in generating fuel costs are recovered in revenues through a fuel adjustment clause. Net income after preferred dividends totaled $5,380,000 or 48 cents per share, compared with $6,395,000 or 57 cents per share reported in the first quarter of 1989. Lower earnings were primarily caused by a decrease in sales. Lower preferred dividend requirements were offset by increased interest charges.

Sales of 1,160 million kilowatt-hours during the first quarter of 1990 were 2.5 percent below 1989 first-quarter levels as milder temperatures recorded during the quarter resulted in lower electric sales. Sales to residential and commercial customers, which are most affected by the milder weather, were down 5.8 percent. Sales to industrial customers were about equal to first quarter 1989.

Central Louisiana Electric Company operates solely in Louisiana as an electric utility serving 199,000 customers in 34 of the state's parishes.

CHICAGO (APRIL 26) PR NEWSWIRE - Sara Lee Corporation (NYSE: SLE), today announced the election of a new director and promotion of two corporate officers.

Allen F. Jacobson, chairman and chief executive officer of 3M corporation, was elected to serve on the board of directors. Mark J. McCarville was elected to senior vice president-corporate development and David W. Bryan was elected to vice president-business planning.

Jacobson, 63, will serve as a member of the audit committee and the compensation and employee benefits committee. Sara Lee's board is now comprised of 18 directors. Jacobson joined 3M in 1947 and held numerous positions before being named president of U.S. operations in 1984. He assumed his current position in 1986 and has served on the company's board of directors since 1983.

Jacobson's other corporate directorships include Mobil Corporation, Northern States Power Company, U.S. West, Inc., Potlatch Corporation and Valmont Industries, Inc. Jacobson is a member of the Business-Higher Education Forum, the Business Council, the Business Roundtable and The Conference Board.

McCarville, 43, previously vice president-corporate development, is now responsible for acquisitions and divestments and for the development of the corporation's long range plan. He joined Sara Lee Corporation's treasury department in 1976. McCarville was elected treasurer in 1982 and became vice president and treasurer a year later.

Bryan, 44, was formerly president of the Fuller Brush Company. Prior to joining Fuller in 1987, Bryan was vice president-new ventures of the Sara

Lee direct marketing division.

Sara Lee Corporation, an international packaged food and consumer products company, markets a variety of brand name products including Hanes, L'eggs, Hillshire Farm, Jimmy Dean, Douwe Egberts, Kiwi, and, of course, Sara Lee.

DALLAS (APRIL 26) PR NEWSWIRE - Sterling Software Inc. (NYSE: SSW) said earnings per share from continuing operations before an extraordinary gain increased to 21 cents for the second quarter of fiscal 1990, up from 19 cents last year. Earnings per share from all operations amounted to 24 cents, before an extraordinary gain, reflecting a net earnout payment from the sale of a discontinued business. Revenue for the quarter ended March 31, 1990 rose to $47.8 million from $45.0 million a year ago.

Sterling said it also realized an after-tax extraordinary gain in the second quarter of approximately $567,000 as a result of buying back its eight percent convertible debentures at a discount, reducing the amount outstanding to approximately $60 million. Total earnings per share after extraordinary gains for the respective second quarters were therefore 29 cents in 1990 and 22 cents in 1989.

Cumulative results for the first half of fiscal 1990 were 38 cents per share from continuing operations, before the extraordinary gain, on revenue of $92.6 million, up from 32 cents and $85.7 million respectively in 1989.

During the second quarter Sterling's Federal Systems Group was selected for the award of a $200 million software support contract at the NASA/Ames Research Center. This contract effectively continues the software support services Sterling has been providing under earlier contracts with NASA/Ames for the past 20 years. Also during the quarter Sterling's Applications Software Group acquired Metro-Mark Systems, a major EDI software company operating in the United States and Canada. Metro-Mark was combined with Sterling's Ordernet Services Division, which is a leader in the rapidly expanding EDI business.

Sterling's Systems Software Group acquired Rogalandsdata, a Norwegian software development business specializing in systems software products for IBM mainframes. Rogalandsdata operations will be part of Sterling Software Scandinavia, a newly formed software development lab and marketing arm for Sterling products in the Nordic countries.

Sterling Software, headquartered in Dallas, specializes in systems and applications software products in the United States and internationally, and in professional services for the U.S. federal government.

#90116p8185 04/26/1990 ~PR Newswire

MONTVALE, NJ (APRIL 26) PR NEWSWIRE - The Great Atlantic & Pacific Tea Company, Inc. (NYSE: GAP) today verified an earlier preliminary release, by reporting final audited results for its 1989 fiscal year.

For the year ended Feb. 24, 1990, the company said net income rose 15.0 percent to $146,698,000 or $3.84 per share compared to $127,582,000 or $3.34 per share last year, while sales were $11,147,997,000 up 10.7 percent compared to $10,067,776,000 in fiscal 1988.

Fiscal 1989 earnings were affected by two new factors. For the first time a significant charge of 13 cents per share was incurred for using the LIFO method of inventory valuation for certain recently acquired companies. Without that charge, earnings would have been $3.97 vs. $3.37 in 1988. The second factor was the cost of carrying the company's 19.9 percent investment in Isosceles PLC, which reduced earnings by 8 cents for the year. Earnings, before the effect of these two factors, improved by 20 percent in 1989 vs. 1988.

In the 12-week fourth quarter ended Feb. 24, 1990, net income increased 12.8 percent to $34,509,000 or $.90 cents per share compared to $30,590,000 or $.80 cents per share in the same period last year. Sales for the quarter were $2,567,724,000 an increase of 5.5 percent compared to $2,433,417,000 during the same period a year ago.

James Wood, chairman, president and chief executive officer, said, "1989 was our eighth consecutive year of sales and earnings growth and capped a 10-year turnaround and renewal program, leaving A&P well- positioned for future progress in the nineties. In 1990, we will embark on the most extensive capital spending plan in the company's history, with $295 million budgeted for 43 new stores, 22 store enlargements, and over 140 remodeled stores," he said.

#90116p8186 04/26/1990 ~PR Newswire

HOUSTON (APRIL 26) PR NEWSWIRE - U.S. Home Corp. (NYSE: UH) today announced that for the quarter ended March 31, 1990, net income was $126,000 compared to net income of $421,000 in the first quarter of 1989. Total revenues for the quarter of $159.7 million included $152.9 million from housing operations and $6.8 million from financial services compared to total revenues of $162.9 million, which included $153.7 million from housing operations and $9.2 million from financial services in the 1989 first quarter.

Homes delivered during the first quarter were 1,233 plus 129 homes delivered by joint ventures, compared to 1,300 plus 23 homes delivered by joint ventures in the first quarter of 1989. New orders in the first quarter, including new orders by joint ventures, were 1,532, compared to 1,717 new orders last year.

The company's housing operations in the first quarter of 1990 were profitable despite an approximately $1 million write-off due to the liquidation and sale of all housing inventory in the recently closed markets of Atlanta and Charlotte. The sale of inventory expedited the company's exit from these two markets thereby reducing future carrying costs of such inventory units. This liquidation as well as reduced margins from the closing of units in the economically depressed real estate market in Arizona resulted in lower gross margins in the first quarter of 1990 compared to the first quarter of 1989. Selling, general and administrative expenses declined to 14 percent of sales, down from 15 percent of sales in the first quarter of 1989. Additionally, interest expense declined 39 percent to $2.2 million in the first quarter of 1990 from $3.6 million in 1989, resulting primarily from the company's program to reduce outstanding public debt.

Through April 15, 1990, an additional reduction in outstanding senior public debt in the principal amount of $17.7 million was achieved. Included in the $17.7 million was $6.2 million principal amount of the 11.25 percent Reset Notes due April 15, 2000, which were put to the company at par by noteholders under a special provision allowed under the indenture and $5.0 million principal amount of such notes purchased prior to and in anticipation of the redemption option period. With these redemptions and repurchases, the company has repurchased or retired $111.7 million principal amount of senior and subordinated long-term debt since Jan. 1, 1989, and substantially completed its public debt retirement program. There are no payments due on the company's housing public debt prior to 1994.

The company also announced the 16th annual renewal of its $161 million revolving credit agreement with a group of 17 commercial banks. The new credit agreement has a maturity date of June 28, 1991, and contains

convenants substantially similar to the prior agreement, although providing for increased prepayment provisions during its 15-month term.

#90116p8191 04/26/1990 ~PR Newswire

SPOKANE, WA (APRIL 26) PR NEWSWIRE - Pegasus Gold Inc. (AMEX, Toronto: PGU) today announced net income of $621,000 or 3 cents per share for the quarter ended March 31, 1990. Results for the same period a year earlier were $1,768,000 or 7 cents per share. Revenues for the first quarter of 1990 were $29.8 million compared to $30.4 million for the same period last year. Gold production for the first quarter was 56,100 with sales of 52,700, both records for the quarter, compared to 51,200 for the previous year.

The decrease in first quarter earnings from a year ago was due to several factors. The gold price realized in the first quarter was $414 compared to $416 during the same period in 1989. Higher exploration expenditures and lower interest income further reduced earnings by $1.4 million.

A record production performance at the Florida Canyon mine was complemented by strong performances at the other mine sites. The cash operating costs for the quarter were $234 per ounce, a reduction of $6 per ounce from a year ago. Commenting on the quarter's results, John Willson president and chief executive officer, said "We are very pleased by the first quarter results, particularly the lower production cost in what is normally our most difficult and highest cost quarter."

Pegasus Gold Inc. is a major North American gold producer that currently produces over 340,000 ounces of gold annually from six mines in the western United States. The company also produces significant quantities of silver, lead and zinc. Pegasus Gold common shares are traded on the American Stock Exchange and the Toronto Stock Exchange under the symbol PGU. Options on the company's common shares are traded on the Chicago Board Options Exchange and the Montreal Stock Exchange.

#90116p8195 04/26/1990 ~PR Newswire

DETROIT (APRIL 26) PR NEWSWIRE - U.S. automakers will assemble an estimated 138,619 cars this week, up 23 percent from last week's actual count of 112,431, Ward's said.

Average daily build this week is estimated at 27,723 compared to last week's daily rate of 28,107, which was spread over a four-day week due to an extended Easter weekend.

Car output for same-week 1989 was 162,922 units. Ward's reported that total estimated U.S. car output for calendar 1990 through the end of this week is 1,910,456 units, trailing year-ago's build of 2,541,940 by 24.8 percent.

General Motors Corp.'s car plants in Flint, Mich., and Janesville, Wis., scheduled weekend overtime this week. The Fairfax, Kan., plant is down this week due to a parts shortage. The Arlington, Texas, plant will close April 30 to retool for '91 Caprice output. The plant is scheduled to reopen in late June.

Ford Motor Co.'s Wixom, Mich., and Wayne, Mich., plants reported daily overtime this week. The Lorain, Ohio, Thunderbird/Cougar assembly will begin a one-week shutdown April 30 for inventory adjustment.

Chrysler's St. Louis car plant continues to operate at only one shift. Ward's said U.S. truck production will be an estimated 90,172 units compared to last week's count of 70,197. This compares with year-ago's count of 87,860.

U.S. truck production for calendar year 1990 through the end of this week is estimated at 1,236,369 vs. year-ago's 1,502,117, said Ward's. Ford's Twin Cities, Minn.; Louisville, Ky.; Lorain, Ohio; Kansas City, Mo.; and St. Louis plants slated daily overtime. The Louisville plant also has scheduled Saturday work.

Chrysler's Dodge City plant in Warren, Mich., continues to operate on two nine-hour daily shifts this week.

Of this week's estimated U.S. car output, GM accounts for 42.6 percent; Ford, 26.5 percent; Chrysler, 11.3 percent; Honda of America Mfg. Inc., 6.5 percent; Mazda Motor Mfg. (USA) Corp., 2.8 percent; Nissan of America Mfg. Corp., 1.1 percent; New United Motor Mfg. Inc., 3.6 percent; Toyota

Motor Mfg. USA Inc., 3.2 percent; Diamond-Star Motors Corp., 2.1 percent, and Subaru-Isuzu Automotive Inc., 0.3 percent.

#90116p8200 04/26/1990 ~PR Newswire

HOUSTON (APRIL 26) PR NEWSWIRE - Shareholders of Noble Drilling Corp. (NASDAQ: NDCO) met today in Houston and reelected three directors whose terms expired at the annual meeting. Directors that were reelected for three-year terms are Tommy Craighead, T.C. Craighead and Co., Ardmore, Okla.; Johnnie Hoffman, formerly vice president of Gulf Coast Marine Division for the company now retired, New Orleans; and John F. Snodgrass, president of The Samuel Roberts Noble Foundation, Ardmore, Okla.

James C. Day, president and chief executive officer, commented to shareholders that the outlook for 1990 is much more positive than in years past, "not because we see a raging oil market before us, but rather because there are many more encouraging signs pointing to a recovering market than we've seen in many years, such as increasingly strong energy demand in the world markets, a decline in domestic supplies, relatively stable oil prices and a renewed investment community interest in the oil sector."

Day told shareholders that two contracts for two year terms, employing a currently domestic-based shallow water jackup and posted barge, were signed on April 11. Both units are scheduled to begin work in Nigeria for Shell Petroleum Development Co. of Nigeria Ltd. during the fourth quarter. Day also discussed the previously announced letter of intent received by the company from Shell Nigeria for a third unit, a posted barge. This barge, a specialized high pressure drilling barge, is also scheduled to begin work in the fourth quarter.

Day also announced the reactivation of a 200-foot mat-support cantilevered jackup unit designated the "Duke Hinds." This rig was one of the units

acquired early in 1988 from General Electric Capital Corp. and had not worked since its acquisition. The rig was placed in service on April 4 in the Gulf of Mexico.

The company announced the redeployment of a domestic-based 3,000 h.p. land drilling unit to Venezuela under a bareboat charter arrangement. This unit is scheduled to begin operations in Venezuela during the third quarter.

Noble Drilling Corp. is a major drilling contractor providing offshore and onshore contract drilling services worldwide, with operations in the United States, Canada, the United Kingdom, East Africa, and the Far East. The company's common stock is traded on the NASDAQ/national market system under the symbol "NDCO."

DALLAS (APRIL 26) PR NEWSWIRE - E-Systems (NYSE: ESY) announced today that Charles "Chuck" R. Farmer Jr., senior vice president and Group Executive has notified the company of his intent to retire, effective June 8.

Farmer was named to his present position in September 1988. From 1983 to 1988 Farmer was vice president and general manager of the Garland Division where he served as vice president of electronic systems from 1975 to 1983. A Dallas native, he has been with E-Systems and its predecessor companies for 33 years.

"Mr. Farmer's many contributions to the successful growth of E-Systems have been outstanding, particularly in the field of electronic warfare,"

said E. Gene Keiffer, chairman and CEO of E-Systems.

Dr. Terry W. Heil, also a senior vice president and group executive, will become a senior vice president of the company upon Farmer's retirement. At that time all operating units of the company will report to Heil and Lowell Lawson, president and chief operating officer.

Dr. Heil joined E-Systems in 1988 after 22 years with the Singer Co. where he rose through a series of positions to become President of HRB-Singer in 1980, and executive vice president of the Singer Defense Electronics group in 1986. A Fairfield, Iowa, native, Heil earned a bachelor's degree in mathematics and physics at Parsons College in Iowa and received his master's and doctorate degrees in mathematics from the University of Arizona.

E-Systems is a major worldwide developer and producer of defense electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

#90116p8205 04/26/1990 ~PR Newswire

AGAWAM, MA (APRIL 26) PR NEWSWIRE - As Riverside Park begins it's 50th year of operation, false rumors still persist that New England's largest amusement park will soon be sold to a major corporation.

Edward J. Carroll, Jr., sole owner and general manager of Riverside Park and the Riverside Park Speedway responds "Riverside has not been sold. I don't know how the rumor got started, but it seems to surface in the Spring each year."

Perhaps it's because that in this age of multi-national corporations, a family-owned amusement business is such a rarity. "Since there are so few amusement parks owned by one person, folks are easily convinced that some giant corporation will swoop down and buy it. At a time when businesses couldn't attract and keep quality employees, Riverside turned that whole situation around and was fully staffed with bright and smiling faces. That change was so dramatic," Carroll adds, "that local folks thought there was a whole new management team here."

The Carroll family tradition that is Riverside Park began on May 31, 1940 when Ed's father Edward J. Carroll, Sr. first opened the gates of a refurbished amusement park to local fun-seekers. It quickly became New England's premier amusement attraction. After his father passed away in

1979, Edward J. Carroll Jr. found it natural to carry on the family tradition. "It's a good business," says Carroll. "It gets in your blood. I've never thought of doing anything else. Every day we deliver a little bit of magic to people, and you can't help but enjoy it."

Like any business, however, it is not without its headaches. "My dad used to say that if it was easy, anybody could do it. Running an amusement park with an annual attendance of close to one million guests is like managing a small city. Every day 600 people come to work to put on a show for thousands of guests each day. We have policemen, firemen, accountants first aid, media, computer operators, human resources, payroll, the list goes on and on." At peak season the park employs over 1,000 cast members a day. "The important thing is that the show goes on," Carroll states. "When John Q. Public walks into Riverside, he doesn't care who owns it. He just wants to have a good time."

DENVER (APRIL 26) PR NEWSWIRE - Scientific Software-Intercomp Inc. (SSI) (NASDAQ: SSFT) announced today that it has closed a $3 million financing with Halliburton Company (NYSE: HAL) and that it and Halliburton have signed an operating agreement enabling each to provide a more comprehensive service to its customers.

Dr. E.A. Breitenbach, chairman of SSI, explained that the agreement with Halliburton represents a major opportunity for the company. It will provide SSI with worldwide distribution channels through Halliburton for

both current and future SSI products, including SSI reservoir and pipeline simulators, and particularly the SSI workbench. The SSI Workbench is a family of computer software programs, which will be available this summer for use on desktop computers, that will make high technology available to a wide range of personnel at operating oil companies. SSI will also work with Halliburton on its development of its own workstation.

Halliburton purchased for $3 million SSI's five-year Zero Coupon Convertible Exchangeable Subordinated Debenture. At such time as SSI shareholders approve the authorization of preferred stock, the Debenture will be exchanged for 600,000 shares of preferred stock at $5 per share. The approval of the preferred stock will be on the agenda for SSI's shareholders' meeting this June. Both the Debenture and the preferred stock will be convertible into SSI common stock at the same $5 per share price. If the Debenture is not exchanged or converted, it matures in 1995 at which time $4,510,970 will be payable representing the purchase price of the Debenture and the accrual of 8.5 percent per annum interest thereon. Dr. Breitenbach explained that the proceeds of $3 million will be used by SSI for working capital and thereby will strengthen its balance sheet.

Halliburton is one of the world's largest diversified oil field services and engineering and construction companies with offices throughout the world and with revenues for 1989 in excess of $5.6 billion. For the past several years SSI has been working with the geophysical subsidiary of Halliburton on the development of reservoir monitoring technology.

SSI, for more than 20 years, has provided high technology software and consulting services to the oil and gas industry. The company has offices in Denver; Bakersfield, Calif.; Houston; Calgary; London and Cairo, Egypt.

DENVER (APRIL 26) PR NEWSWIRE - Scientific Software-Intercomp Inc. (SSI) (NASDAQ: SSFT) announced today that it has closed a $3 million financing with Halliburton Company (NYSE: HAL) and that it and Halliburton have signed an operating agreement enabling each to provide a more comprehensive service to its customers.

Dr. E.A. Breitenbach, chairman of SSI, explained that the agreement with Halliburton represents a major opportunity for the company. It will provide SSI with worldwide distribution channels through Halliburton for both current and future SSI products, including SSI reservoir and pipeline simulators, and particularly the SSI workbench. The SSI Workbench is a

family of computer software programs, which will be available this summer for use on desktop computers, that will make high technology available to a wide range of personnel at operating oil companies. SSI will also work with Halliburton on its development of its own workstation.

Halliburton purchased for $3 million SSI's five-year Zero Coupon Convertible Exchangeable Subordinated Debenture. At such time as SSI shareholders approve the authorization of preferred stock, the Debenture will be exchanged for 600,000 shares of preferred stock at $5 per share.

The approval of the preferred stock will be on the agenda for SSI's shareholders' meeting this June. Both the Debenture and the preferred stock will be convertible into SSI common stock at the same $5 per share price.

If the Debenture is not exchanged or converted, it matures in 1995 at which time $4,510,970 will be payable representing the purchase price of the Debenture and the accrual of 8.5 percent per annum interest thereon.

BETHEL, CT (APRIL 26) PR NEWSWIRE - David G. Bluestein has joined Duracell Holdings as vice president-strategy and development, a new position, effective April 30. Duracell Holdings manufactures and markets Duracell batteries.

Bluestein will report directly to C. Robert Kidder, president and CEO of Duracell, and will serve as a member of Duracell's operating committee.

Bluestein joins Duracell from his previous position as vice president and

general manager of Colgate-Palmolive's U.S. Body Care Division. Prior to that, he spent 12 years in marketing, sales and general management positions with Chesebrough Ponds, including experience as president and general manager of Spectrum Group, Inc.

As head of Duracell's strategy and development group, Bluestein will evaluate and develop "growth plus" options for the company, such as geographic expansion and new product initiatives.

"Under Dave's leadership, the strategy and development function will work with me and other members of management to formulate strategies which will enable us to achieve our common mission -- to be the leading consumer battery company in the world," said Kidder.

Bluestein, his wife Rokki and two sons live in Ridgefield, Conn.

CALGARY, ALBERTA (APRIL 26) PR NEWSWIRE - Gulf Canada Resources (AMEX, Montreal: GOU) Chairman and Chief Executive Officer S.K. (Keith) McWalter told shareholders attending the annual meeting today in Toronto that the company was at a turning point.

''In sharp comparison with the Eighties,'' which he described as one of the worst periods ever experienced by the Canadian petroleum industry, ''I believe the coming decade will be a rewarding time for shareholders,'' he said.

McWalter reminded shareholders that the company has developed an excellent international land position, is positioned for major oil and gas production from the Canadian frontiers, and following the merger with Home Oil, will have a much larger asset base in Western Canada, which will give the company improved earnings and cash flow.

The new company will rank third in oil production and fifth in gas production among all oil and gas companies in Canada. ''We now are truly poised to become the premier upstream oil and gas company in Canada,'' he concluded.

McWalter pointed out that although 1989 earnings remained low, he could report very positive developments. These included an increase in cash generation to $419 million, a 50 per cent balance sheet debt reduction, increased production, and replacement of production by maintaining proved reserves of both oil and natural gas.

The Gulf Chairman then reviewed recent operating accomplishments within the context of opportunities and positioning for domestic and international growth.

In Western Canada, McWalter reminded shareholders, Gulf has excellent opportunities to develop new gas reserves. ''In this past winter season,'' he said, ''we already have replaced reserves equivalent to one year of production, and we anticipate further reserve additions before year-end.''

He also cited recent exploration successes in Alberta's Sylvan Lake area as an example of Gulf's continuing interest in conventional oil development in the West.

In frontier activity, McWalter said the long-awaited start of construction at Hibernia is moving closer to reality, and in the North, Gulf is positioned for first development of either oil or gas from the Beaufort Sea/Mackenzie Delta region.

Gulf President C.E. (Chuck) Shultz, who replaces McWalter as Chief Executive Officer following the meeting, told shareholders that he had accepted the position with Gulf because he saw a well-managed company with an outstanding inventory of business opportunities.

CALGARY, ALBERTA (APRIL 26) PR NEWSWIRE - Acting to replace S.K. McWalter who retired today as chairman and chief executive officer of Gulf Canada Resources Limited (AMEX, Montreal: GOU), the board of directors designated Robert J. Butler as board chairman, and elevated president and chief operating officer C.E. (Chuck) Shultz to president and chief executive officer.

Butler, a director of Gulf Canada, is chairman of Urban Transportation Development Corporation Limited and a director of a number of other companies.

Shultz joined Gulf Canada as president and chief operating officer on Oct. 16, 1989, following 28 years with Tenneco Oil Company, Houston, where he had been senior vice-president responsible for international exploration and production plus company-wide products marketing and business development.

McWalter will continue as a member of the board, and Shultz will assume

the board position vacated by retired member John L. Stoik. Stoik, former president and chief executive officer, served on the Gulf board for the past 14 years.

#90116p8247 04/26/1990 ~PR Newswire

PEORIA, IL (APRIL 26) PR NEWSWIRE - RLI Corp. (NYSE: RLI) reported that its first quarter consolidated net income increased 170 percent to $3.1 million compared with $1.1 million for the same period in 1989. Earnings per share were up 184 percent to 54 cents from 19 cents in the first quarter 1989.

Total revenue for the first quarter 1990 declined 13 percent to $20.9 million, versus $24.2 million in the same period last year. However, gross premiums written increased to $37.7 million, compared with $30.4 million attained in 1989 as a result of increased production. Net written premiums also increased during 1990 to $17.3 million from $16.8 million.

"RLI continues to take advantage of quality protection offered in today's reinsurance market," said Gerald D. Stephens, president and chief executive officer.

"We have been able to obtain quality reinsurance at attractive rates despite continued softness in the insurance marketplace. Our underwriters have maintained a hard stance on risks chosen, and their selectivity is showing in our improved profitability. Annualized return on equity has improved from 7 percent recorded in the first quarter 1989 to 17 percent in the same period this year."

First quarter underwriting results improved significantly as the statutory combined loss and expense ratio for the specialty property/casualty segment dropped to 93.8 percent in the first quarter 1990 compared to 112.1 percent in 1989.

Continued underwriting selectivity contributed to the improvement in the loss component which declined to 46.5 percent in 1990 compared to 55.1 percent recorded in the same period in 1989.

The expense component also improved in the period to 47.3 percent from 57.0 percent in the prior year, reflecting the results of the company's more streamlined organization. "We are gratified to see the tangible results of the plans we put in place in 1989, particularly in the area of expense controls," Stephens said.

Net investment income before realized gains for the first quarter 1990 reached $2.4 million, a 4 percent increase over the $2.3 million attained last year.

In 1990 negligible realized gains were reported, while the first quarter 1989 included a loss of $208,000 (or $.02 after tax net earnings per share).

The company's balance sheet remains strong. Cash and invested assets fell $2.1 million since year end as the company repaid $2.7 million of outstanding debt, and shareholders' equity rose to $71. 4 million ($12.62/share) at the end of the first quarter from $70.3 million ($12.42/share) last year end.

Common stock outstanding at March 31, 1990, remained unchanged from year end 1989, at 5,658,974 shares. During 1989, the company purchased 321,321 shares of its stock from the market for $2.7 million or $8.38 per share. Since the inception of a stock repurchase program in 1987, the company has acquired an aggregate of 531,921 shares of its own stock for $4.7 million or an average price of $8.82 per share.

RLI Corp. underwrites selected property and casualty insurance products, and markets contact lens insurance, related products and practice automation systems to the ophthalmic industry.

RLI CORP.

First Quarter Ended March 31	1990	1989	Pct. Change
Gross revenue	$20,935,681	$24,194,460	(13)

NEW YORK (APRIL 26) PR NEWSWIRE - Directors of Sequa Corporation (NYSE: SQA), at a regular board meeting following the company's annual stockholder meeting, elected three operating managers to the position of corporate vice president. The three are: Antonio L. Savoca, president of Sequa's Atlantic Research propulsion and professional services unit; Daniel L. Marquitz, president of the Valley Line, a leading barge line, and John A. Cabrey, vice president of Sequa Chemicals, a producer of specialty chemicals for paper, textile and other markets.

In announcing the election of the three officers, Sequa's Chairman and CEO Norman E. Alexander echoed a statement made earlier to stockholders

attending the company's annual meeting. "Sequa Corporation is fortunate " said Alexander, "to have an extraordinary pool of talented, experienced and dedicated managers directing its diverse operations. Some are veterans of long-standing affiliation with the company; others are relatively new to our organization. But all have demonstrated the capability to get the job done right and the enthusiasm to reach for excellence in themselves and their operating teams."

Sequa Corporation is a diversified technology-based company with principal interests in aerospace, machinery and metal coatings, marine transportation, specialty chemicals and professional and technical services.

#90116p8253 04/26/1990 ~PR Newswire

RICHMOND, VA (APRIL 26) PR NEWSWIRE - Chesapeake Corporation (NYSE: CSK) held its 1990 annual stockholders meeting at the Virginia State Fairgrounds yesterday with approximately 1,200 stockholders attending the gathering.

In his remarks to stockholders, J. Carter Fox, president and chief executive officer, said that 1989 was the second best earnings year in the history of the company.

Operating earnings in 1989 were $117 million. Earnings per share were down eight percent from the 1988 record year. However, records were set in sales at $813 million, a 14 percent increase from 1988. Dividends declared were up 38 percent. Cash flow was at record levels and return on equity was a strong 17 percent, well above the company's target average for a business cycle of 15 percent.

According to Fox, the earnings shortfall in 1989 was largely associated with the non-cash charges and interest expense of the Wisconsin Tissue expansion and 1989 acquisitions. These expenses were anticipated and accepted as necessary consequences of making major investments for the future of Chesapeake.

Fox continued, "Most importantly, I am convinced that the investments we are making to expand and change your company will generate significant future increases in shareholder wealth.

"I am convinced that the current stock price for Chesapeake does not yet fully reflect the value that your management team has worked so diligently to build for you. We have modern, cost effective factories. Our products are targeted at profitable markets which, for the most part, are growing

faster than the economy in general. We have 375,000 acres of valuable land which we own for growing timber and development."

Since 1985 Chesapeake has changed its business by segmenting markets and creating niches where it could be a meaningful participant. Fox explained that in kraft products the business was changed to emphasize white top specialty products and products using recycled paper; in packaging, Chesapeake built a business in promotional point-of-sale displays and graphics packaging; in wood treating, a new business was started; and in tissue, a new business was acquired and expanded. Today Chesapeake is highly focused on these four core businesses.

Fox said, "Our commitment to our core businesses requires heavy capital expenditures in order to serve our customers and operate in a cost-effective manner."

"The money that we are spending for the future growth of the company adversely affects our earnings today and delays major increases in earnings until these projects are completed and are running at high levels ... I am convinced that we are doing the right things for the long term benefit of our business for our stockholders.

"While earnings are down for the first quarter of 1990, we expect improved earnings in the second half of 1990. Our five year plan shows 1990 to be the low point in earnings for this growth period. We are looking for dramatically higher cash flows and earnings as our major investments are completed," concluded Fox.

Chesapeake is an integrated paper and forest products company that produces and markets kraft, tissue, packaging and treated wood.

#90116p8256 04/26/1990 ~PR Newswire

LONG BEACH, CA (APRIL 26) PR NEWSWIRE - Poor financial performance and a review of cost projections have led to stringent cost-cutting steps at the Douglas Aircraft Company division of McDonnell Douglas (NYSE: MD). These cuts include a reduction in personnel.

Douglas has already made substantial reductions in a number of areas. Outlays for new business funds, as well as facilities and IRM (computer) capital have been sharply reduced since November. The company also has made extensive efforts to trim the kind of non-payroll expenses, such as utilities and operating supplies, that go into overhead costs. But those cuts have proved insufficient, leaving little choice in addressing the current imbalance between personnel directly engaged in design or

production and those in various general and administrative functions.

To meet the need for additional cost reductions, approximately 3,000 jobs will be eliminated. Those best qualified to perform the remaining work will be retained. Reductions are expected during the summer.

Douglas has experienced growth exceeding 20 percent per year in recent years -- from under 15,000 people in 1984 to approximately 50,000 today -- as demand for its MD-80 twin-jet airliners has surged. At the same time, development work on the new MD-11 long- range tri-jet and the C-17 transport for the U.S. Air Force is reaching its peak this year. The MD-11 is in flight test; the C-17 will fly in 1991.

The company's moves to control costs in all its transport programs are designed to ensure profitable production and to provide for long-term stable growth with introduction of new products.

Continued poor fiscal performance and an imbalance between personnel directly engaged in design or production and those in various general and administrative assignments are the principal reasons for the reduction in force. The situation developed as a result of the company's rapid overall growth and the mix of skills needed in development of the new aircraft programs.

With the MD-11 and C-17 now approaching the transition from development to production, a different mix of skills will be needed, with fewer general and administrative personnel at Douglas.

As the transition is made in months ahead, efforts will be made to transfer employees into production positions, but such moves will not be feasible in all cases. It is expected that a still-undetermined number of people will be unable or unwilling to accept transfers.

Therefore, because of these various reasons, a reduction in force will, unfortunately, be unavoidable.

CHICAGO (APRIL 26) PR NEWSWIRE - Telephone and Data Systems, Inc. (AMEX: TDS) announced today that it has approved an agreement to transfer certain interests in cellular Rural Service Areas (RSAs) to United States Cellular (AMEX: USM). Under the agreement, USM is to receive TDS's interests in 22 RSAs representing an aggregate of approximately 760,000 population equivalents. TDS is to receive approximately 100,000 shares of USM common stock and is to be reimbursed for advances to the partnerships.

The planned transfers may be subject to FCC and other approvals.

LeRoy T. Carlson Jr., TDS president, noted, "TDS retained the right to acquire RSA interests at the time USM became a public company in 1988, subject to the obligation to transfer certain of those interests to USM at TDS's cost of obtaining them. The planned transfer will discharge that obligation."

Separately, Carlson announced that TDS has initiated a study to determine whether to make a proposal to USM to transfer to USM the remainder of TDS's RSA interests, representing approximately 2,460,000 population equivalents in 29 RSAs. Carlson noted that TDS has the right to receive fair market value for those interest and that he anticipates that any proposal made by TDS to USM with respect to those interests would likely involve the issuance of additional USM equity to TDS.

TDS is a diversified Chicago-based communications service company with substantial local telephone operations and developing operation in cellular telephone and radio paging. TDS seeks to build value for its shareholders by providing excellent communications services in attractive, closely related segments of the telecommunications industry.

DALLAS (APRIL 26) PR NEWSWIRE - E-Systems (NYSE: ESY) announced today that Charles "Chuck" R. Farmer Jr., senior vice president and Group Executive has notified the company of his intent to retire, effective June 8.

Farmer was named to his present position in September 1988. From 1983 to 1988 Farmer was vice president and general manager of the Garland Division where he served as vice president of electronic systems from 1975 to 1983. A Dallas native, he has been with E-Systems and its predecessor companies for 33 years.

Dr. Terry W. Heil, also a senior vice president and group executive, will become a senior vice president of the company upon Farmer's retirement. At that time all operating units of the company will report to Heil and Lowell Lawson, president and chief operating officer.

Dr. Heil joined E-Systems in 1988 after 22 years with the Singer Co. where he rose through a series of positions to become President of HRB-Singer in 1980, and executive vice president of the Singer Defense Electronics group in 1986. A Fairfield, Iowa, native, Heil earned a bachelor's degree in

mathematics and physics at Parsons College in Iowa and received his master's and doctorate degrees in mathematics from the University of Arizona.

E-Systems is a major worldwide developer and producer of defense electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

#90116p8261 04/26/1990 ~PR Newswire

NILES, MI (APRIL 26) PR NEWSWIRE - National-Standard Company (NYSE: NSD) reported sales of $75.3 million and a net loss of $1.2 million or $.30 per share for the second quarter ended March 31, 1990, according to Michael B. Savitske, president and chief executive officer.

In the year earlier, second-quarter sales of $82.5 million and a net loss of $3.0 million or $.72 per share were reported.

For the first six months of the fiscal year, sales were $141.3 million with a net loss of $3.9 million or $.95 per share.

In the first half of the prior fiscal year, sales of $152.9 million and a net loss of $2.8 million or $.68 per share were reported. Prior-year six-month results also included $7.6 million of sales from business units closed or divested in 1989.

Depressed automotive industry sales continue to have an adverse effect on the majority of the company's product lines. Automotive sales are not expected to recover in the near future.

During the second quarter, the company announced its intent to divest its Medical Products Group located in Gainesville, Fla. The Medical Products Group manufactures specialized devices for use in radiology, cardiology, and urology markets. This action was taken as part of the company's strategy to concentrate its resources on core business.

While the company continues to be very optimistic on the future growth and profitability of the Medical Products Group, it does not presently have the financial and technical resources to support both the Medical Products Group and the rest of the organization.

NEW YORK (APRIL 26) PR NEWSWIRE - In response to press inquiries about Standard & Poor's announcement today, Citicorp (NYSE: CCI) said:

We are disappointed in S&P's action. We are confident that the strength of Citicorp's core businesses and well-positioned global franchises will continue to provide excellent returns and growth.

The company's consumer banking business recorded record results in the first quarter of this year. Strong performances are continuing in credit cards, branch systems, consumer businesses in Latin America and Asia, as well as private banking.

The local currency business in the developing economies is continuing to achieve high returns and good growth.

Although real estate is a cyclical business, Citicorp's real estate businesses have provided excellent returns over the years. Our continuing commitment to these businesses is well supported by strong credit practices and proven management.

In addition, Citicorp will continue to rebuild capital during 1990 from retained earnings, sales of non-strategic businesses and appreciated assets, and asset management.

SAN ANTONIO, TX (APRIL 26) PR NEWSWIRE - National Bancshares Corporation of Texas announced today that Team Bank, FAMCO, and the company have entered into a standstill agreement with regard to the previously announced litigation pertaining to the $4,950,000 indebtedness owed by the company to Team Bank. Under the terms of the standstill agreement, the company has agreed to dissolution of the temporary restraining order entered on Apr. 13, 1990, and Team Bank and FAMCO have agreed that for a period of approximately 60 days they will take no further action to collect the indebtedness owed by the company or any other action which would interfere with the company's pending recapitalization. The parties also agreed that they would negotiate in good faith towards resolution of the pending dispute during the 60-day standstill period.

National Bancshares Corporation of Texas is a $1.9 billion multi-bank holding company based in San Antonio, with member banks located in San Antonio, Houston, Corpus Christi, Austin, the Rio Grande Valley and several other communities in Central and South Texas.

TROY, MI (APRIL 26) PR NEWSWIRE - VOPLEX Corporation (AMEX: VOT), an automotive plastics manufacturer, announced that VOPLEX is conducting discussions with another company concerning VOPLEX entering into a joint venture which would combine the automotive plastics groups of the two companies. These two groups had combined sales of approximately $150 million during calendar year 1989.

Joseph W. Bauer, president and chief executive officer of VOPLEX, indicated that "the proposed joint venture would be another major milestone in our strategy to enhance our position as a tier one supplier for automotive plastics."

Since there is no binding agreement between the parties, discussions covering the proposed joint venture could terminate at any time.

NEW YORK (APRIL 26) PR NEWSWIRE - A. G. Edwards & Sons, Inc., as managing underwriter, has announced the initial public offering of 292,791 shares of Home Federal Savings Bank of Missouri common stock at $7.25 per share. The shares being offered constitute a portion of the 1,212,121 shares being issued by Home Federal Savings Bank of Missouri in connection with its conversion to a federally chartered stock savings bank from a federally chartered mutual savings and loan association.

The remaining 919,330 shares were subscribed for by Home Federal's employee stock ownership plan, certain depositors and borrowers and others in a subscription offering. Home Federal has granted the managing underwriter an option to purchase up to an additional 181,818 shares to cover over-allotments.

Home Federal expects to use the net proceeds from the sale of common stock in the conversion to increase substantially its regulatory capital, which will enable it to support future growth. The net proceeds will be added to the funds of the Home Federal to be used for general corporate purposes including the making of short-term or adjustable rate loans in the ordinary course of business.

Home Federal, headquartered in St. Louis, conducts its business through nine full service offices. At Sept. 30, 1989, Home Federal was the eighth largest thrift institution headquartered in Missouri, with total assets of $504 million, deposits of $475 million and retained earnings, all of which are tangible, of $15 million.

#90116p8306 04/26/1990 ~PR Newswire

PITTSBURGH (APRIL 26) PR NEWSWIRE - Allegheny International Inc. (AI)(NYSE: AG) today reported its results for the second quarter of the 1990 fiscal year which ended on April 1, 1990.

AI reported second quarter fiscal 1990 sales of $253.7 million and a net loss of $7.4 million, or a loss of $1.38 per common share. That compares to sales of $268.3 million and net loss of $4.6 million, equivalent to a loss per common share of $1.12, for the second quarter of fiscal 1989.

AI's consumer products companies reported an operating loss of $5.6

million in the fiscal 1990 second quarter, compared to operating earnings of $16.4 million in the fiscal 1989 second quarter.

Sales and operating earnings of most of AI's consumer products businesses were below the levels achieved in the second quarter of last year. Sales of small appliances and outdoor patio furniture experienced the greatest decline largely as a result of highly competitive market conditions and an unstable retail environment. These factors, together with increased receivable valuation allowances and plant rationalization charges, contributed significantly to the operating earnings decline.

AI reported earnings from discontinued operations of $13.2 million in the fiscal 1990 second quarter which reflect a gain on the sale of AI's interest in Titanium Metals Corp. of America and provisions for additional costs relating to companies sold in previous years.

For the first six months of fiscal 1990, AI reported sales of $467.5 million and a net loss of $10.5 million, compared to sales of $495.3 million and net loss of $2.8 million for the six-month period of fiscal 1989. AI lost $2.35 per common share in fiscal 1990's first six months, compared to a loss per share of $1.65 in the same six-month period of fiscal 1989.

Pittsburgh-based AI manufactures and markets consumer products that include small household appliances, electric blankets, outdoor furniture, and barbecue grills.

DETROIT (APRIL 26) PR NEWSWIRE - The Blue Cross and Blue Shield of Michigan (BCBSM) Board of Directors late today re-elected Donald M.D. Thurber as chairman for a third term.

Thurber, age 72, of Grosse Pointe was first elected chairman on June 16, 1988, as part of a reorganization of BCBSM leadership. A public member of the board of directors appointed by Governor James Blanchard, Thurber is a retired founder and owner of a Detroit public relations firm and a Harvard graduate.

The selection process began with Thurber and four other board members being selected vice chairpersons, each representing a segment of the board membership. The other vice chairpersons then selected Thurber to head the 35-member, policy-making body.

Thurber represents the four public members of the board appointed by the governor.

TORONTO (APRIL 26) PR NEWSWIRE - City Express announced today that it has entered into an agreement with Continental Airlines that will give travelers from Toronto Island and Ottawa International Airport much easier access to dozens of destinations in the U.S. and other countries.

Under the agreement, these City Express passengers will fly to Continental's major hub at Newark International Airport to make convenient connections to their flights. This new marketing agreement is a code-sharing relationship with Continental Airlines.

The new contract offers customers the benefits of Continental Airlines including, advance seat selection, one-stop passenger and baggage check-in OnePass mileage credit, inexpensive thru fares, and access to the many destinations Continental serves from Continental's largest hub located in Newark.

Officials from City Express said they intend to increase frequency as the market requires until there are hourly departures from both Newark and Downtown Toronto Airport.

The Continental/City Express agreement permits expansion of City Express U.S. connections to destinations such as, Dallas, Reno, Honolulu, Orlando, Miami, Los Angeles, Albuquerque and Washington D.C.

In addition, the Toronto and Ottawa customers will have access to a number of international points such as, London (Gatwick), Sydney, Tokyo, Mexico City, Santo Domingo, Montego Bay, Aruba, and Melbourne, Australia.

#90116p8325 04/26/1990 ~PR Newswire

SOUTH BEND, IN (APRIL 26) PR NEWSWIRE - Clark Equipment Co. (NYSE: CKL) today announced first quarter net income of $20 million, or $1.16 per share, an increase of 43 percent from the 1989 first quarter net income of $14.0 million, or 82 cents per share. Sales for the three months ended Mar. 31, 1990, were $385.8 million, compared with sales of $313.7 million in first quarter 1989. The announcement was made by Leo J. McKernan, chairman, president and chief executive officer.

First quarter 1990 net income benefited from a $4.3 million reduction in income tax expense due to the recognition of a portion of Clark's tax loss carryforward. Commenting on the use of tax loss carryforwards, McKernan said, ''Although accounting convention requires this benefit to be reported as an extraordinary item, these amounts should not be considered non-recurring. These credits will continue to reduce tax expense as long as Clark U.S. operations remain taxable and the loss carryforwards are available.'' At year-end 1989, pre-tax loss carryforwards of approximately $145 million were available to reduce future income tax expense for an extended number of years.

Clark's new orders for the first quarter 1990, exclusive of the unusual Brazilian situation, remained strong, totaling $280 million versus orders of $284 million in fourth quarter 1989 and $316 million in first quarter 1989. Order backlogs, again exclusive of Brazil, were reduced to $265 million at Mar. 31, 1990 from the $303 million at Dec. 31, 1989, reflecting an improvement in delivery lead times to customers. This reduction occurred in the off-highway components and U.S. forklift truck businesses, which experienced slightly slower order rates. Total company backlogs were $329 million at Mar. 31, 1990.

Clark Equipment Company's business is the design, manufacture and sale of forklift trucks, construction machinery, transmissions for on highway trucks, and axles and transmissions for off-highway equipment.

#90116u0186 04/26/1990 ~United Press International

TORONTO (APRIL 26) UPI - A power station explosion and fire knocked out electrical power to much of Toronto Wednesday night, leaving large portions of the city of 3 million people in darkness and the subways immobilized for nearly four hours.

Police said there was ''remarkably little looting,'' with most reports confined to downtown. Officials said there were no accidents and two of the firefighters called to the burning power station were hospitalized for minor smoke inhalation.

Subway service stopped citywide, but police said conductors managed to lead passengers to safety and no one was unaccounted for.

Power was restored just before midnight when workers re-routed power through a transformer in Scarborough, in the eastern part of the city.

Bus service was being provided for stranded subway riders, particularly for some of the more than 35,000 baseball fans who had watched the Toronto Blue Jays beat the Cleveland Indians at the Toronto SkyDome. The game was played under the lights, which were unaffected by the outage.

The explosion occurred shortly after 8 p.m. at a generating station in the Toronto suburb of East York, and flames burst from the damaged equipment. Spokesman Ross Fitchett of Toronto's hydroelectric utility said a

115,000-volt transformer was destroyed in the blast.

Toronto's international airport, located on the west side of the city, was unaffected by the outage.

Fitchett said the problem was an equipment failure, unrelated to the record warm weather.

Most of the downtown area was without power during the blackout. Traffic was snarled at intersections where signal lights stopped working, although some residents tried directing traffic before extra police were pressed into servic to man the intersections.

The subway closure also made taxis difficult to find.

''There's no cabs or nothing, they're all taken. It's really frustrating '' said Steve Mickoloff, 19.

''I don't know what I'm going to do,'' said Craig Stedman, 21, after checking the locked doors to the subway while trying to return to his suburban home. ''I may have to find someplace downtown to crash.''

The city's police headquarters was without power for nearly two hours, television reports said.

The blackout extended to the eastern suburbs of Oshawa and Ajax, officials said, and pockets of darkness were reported throughout the city.

Toronto's normally bright skyline of high-rise office buildings was dark except for a few buildings equipped with emergency generators.

Some radio stations went off the air briefly but soon restored their broadcasts with generator power. A generator at a satellite antenna failed briefly knocking out satellite distribution of Canadian television networks.

-30- 2949

#90116u0210 04/26/1990 ~United Press International

(APRIL 26) UPI - The Boston Bruins were looking for their first playoff sweep of the Montreal Canadiens since 1929 Wednesday night, but rookie Stephan Lebeau took on the hero's role in his first NHL playoff game, scoring third-period goals to break open a tie game and lift Montreal to a 4-1 victory.

The Canadiens averted their first playoff sweep overall since 1952, and will try to become only the third team in NHL history to win a best-of-seven series after being down three games to none when the Adams

Division final resumes with Game 5 Friday night in Boston.

''It looked like Montreal wanted this game more than we did,'' said Boston Coach Mike Milbury. ''If I had a chance to coach this game over we would do things differently. They outhit us and we didn't handle our power play very well. Give Montreal credit, they worked hard.''

Leabeau, in the lineup because leading scorer Stephane Richer was sidelined by injury, broke a 1-1 tie at 4:22 of the third period with a backhand shot on the stick side of Boston goaltender Andy Moog, who had given up a rebound after stopping Shayne Corson.

''Lebeau came to play,'' said Montreal Coach Pat Burns. ''You have to hand it to him. He hasn't dressed for the past several weeks, but he came up with a big game when we needed it.''

Lebeau scored again at 11:51 to make the score 3-1 when he came from behind the net with a wraparound shot to the short side.

''I had to prove something to myself,'' said Lebeau.

''I felt that during the pre-game warmup I was going to have a good game. As soon as the game started I felt confident. Since I haven't played for more than three weeks this is the biggest game of my career. I wanted the puck all night.''

Guy Carbonneau scored his second goal of the game into an empty net with 41 seconds to go.

The Bruins tied the score 1-1 at 18:23 of the second period on John Carter's fourth goal of the playoffs. Carter grabbed a rebound after Montreal goaltender Patrick Roy had stopped a backhand drive with his pad off the stick of Bobby Carpenter.

Carbonneau scored at 11:16 of the first period when he drove the puck through the legs of Moog after Brian Propp lost it along the boards.

In the other Wales Conference game, Rod Langway scored his first playoff goal since 1986 34 seconds into overtime and John Druce, the NHL's leading playoff goal-scorer, added two power play goals to lead the Washington Capitals to a 4-3 victory over the New York Rangers.

The victory gave Washington a commanding three games to one lead in the best-of-seven Patrick Division finals.

''Of all the great things Rod Langway has done for this franchise in the time he has been here, that goal certainly ranks up there with anything,'' said Washington Coach Terry Murray. ''It's a tremendous win for us, a very

emotional game. To come out a winner is a great feeling.''

Langway, a 12-year veteran defenseman, retrieved a rebound of his own shot skated through the right circle and scored over goaltender Mike Richter's left shoulder.

''I was very lucky,'' Langway said. ''I think if (the puck) got by me (on the rebound), then Mike Gartner has a breakaway and no one's back to stop him. As it turned out, it hit Mike's skate, went back to my stick and I walked in on goal.''

The Rangers rallied to score two goals in the final 4:03 of regulation to send the game into overtime.

John Ogrodnick scored on the power play from the slot off a pass from James Patrick at 15:57 of the third period to pull New York within 3-2. With New York pulling Richter for an extra attacker, Bernie Nicholls scored his seventh goal of the playoffs when, positioned at the left post, he took a centering pass from Kelly Kisio and scored between goalie Mike Liut's leg pads with 1:12 left to play in the third period.

The series resumes Friday with Game 5 in New York's Madison Square Garden.

In the Campbell Conference, play resumes Thursday with the St. Louis Blues at the Chicago Blackhawks in the Norris Division final. The best-of-seven series is tied at two games apiece.

The winner will face the Smythe Division champion Edmonton Oilers in the Conference finals beginning May 2 in Edmonton.

Rookie goaltender Ed Belfour, recalled from the Canadien national team, stopped 31 shots - 18 in a frenzied third period - to save a 3-2 victory for the Blackhawks Tuesday.

The Blues lost Brett Hull with 3:13 left in the second period. Hull, who had only two shots on goal, received a major penalty and game misconduct for high-sticking Jocelyn Lemieux. Hull's playoff scoring streak was stopped at eight games.

(APRIL 26) UPI - Utility officials in Toronto, Canada, hope to have electrical power restored by 3 a-m. An explosion and fire at a suburban power station Wednesday evening left large portions of the city and eastern suburbs in the dark. Subway service stopped citywide, but police say conductors managed to lead passengers to safety and NO one was injured.

Some damage but NO injuries are reported after tornadoes bounced through western Kansas late Wednesday afternoon and evening. Late afternoon thunderstorms spawned three twisters in north-central Texas, but NO one was injured. Police say two tornadoes hit Parker County... damaging several mobile homes and barns. A third twister touched down briefly in Collin County, north of the Dallas city limits, but caused NO damage.

The shuttle Discovery is orbiting the Earth about 45 miles away from the Hubble Space Telescope... which was deployed from the shuttle's cargo bay on Wednesday. The astronauts are standing by, in case ground controllers need help in activating the revolutionary observatory. Problems with one of the satellite's two European-built solar panels almost forced an emergency spacewalk.

House and Senate negotiators are working out the differences in their competing plans for oil-spill prevention and compensation. Congressional officials say the differences are slight and that a comprehensive oil-spill reform bill should soon be completed. The House has given in to the Senate's long-term position that strict state laws should override federal laws whenever they call for harsher penalties.

#90116u0294 04/26/1990 ~United Press International

WASHINGTON (APRIL 26) UPI - An increasing number of children, especially those who are poor and from single-parent households, are at risk of growing up illiterate and unhealthy, according to a report released Thursday.

''Poor children in America are in double jeopardy. They have the most health problems and the least access to care,'' said the interim report by the National Commission on Children.

The report said poor children are raised in families ''that experience the most stress, yet receive the least social support.'' Poor children also are ''at the highest risk of educational failure and often attend the worst schools.''

Cheri Hayes, executive director of the commission, said there are many children doing well in healthy and happy families.

''The other side of the coin, though, is that there's a dramatically increasing number of children seriously at risk,'' she said.

''The problem is, partly, (limited) economic resources that are available. But the other piece is making sure children receive care and attention and nurturing,'' Hayes said. ''The commission is concerned that parents and other caring adults are present in a child's life.''

The report, based on seven months of field study, recommended that the country do more to ensure children receive adequate parental, or other adult, attention.

''Parenting is an increasingly difficult job. As a society, America is not doing enough to recognize and encourage responsible parenting,'' the report said.

The commission's chairman, Sen. Jay Rockefeller, D-W.Va., said the report should be a warning to the nation.

''Too many of our children and adolescents are reaching adulthood unhealthy, illiterate, unemployable and lacking both moral direction and a

vision of a security future,'' Rockefeller said. ''This is a personal tragedy for the young people involved and a staggering loss for the nation as a whole.''

(APRIL 26) UPI - The lights are back on in Toronto, Canada. Electrical service was restored just before midnight when utility workers re-routed power through a transformer in the eastern part of the city. Large portions of the city and its eastern suburbs were left in the dark Wednesday evening by an explosion and fire at a generating station. A utility company spokesman says the incident was UNrelated to the record warm weather.

The State Department says NO big welcome is planned for freed hostage Robert Polhill upon his return to the United States Thursday. Following his arrival at Andrews Air Force Base outside Washington, D-C, Polhill will be taken to Walter Reed Hospital for further medical tests. The 55-year-old educator was freed Sunday in Damascus, Syria, following 39

months as a hostage of Moslem extremists in Lebanon. He has been undergoing medical observation since Monday in West Germany.

A bloody day in Colombia. A remote-control car bomb exploded Wednesday on a busy street in the cocaine cartel city of Medellin as a vehicle carrying an elite anti-drug force passed. One police officer and eight passersby were killed. In a second attack, police say eight men used automatic weapons to kill three men in a Medellin hair salon.

Engineers at the Goddard Space Flight Center in Greenbelt, Maryland, plan to spend Thursday checking out the systems of the Hubble Space Telescope... readying it for its 15-year quest to study the universe. Radio commands are scheduled to be beamed up to the robot telescope Friday to open a protective door, allowing light to fall into the instrument's 14-foot-wide tube for the first time. Until then, the shuttle Discovery... which deployed the telescope Wednesday... will stay within sight of it in case problems require an emergency spacewalk.

A federal court jury in Memphis reports it is ''hopelessly deadlocked'' in the fraud trial of Harold Ford, Tennessee's first black congressman. But the judge refused to declare a mistrial and ordered jurors to return Thursday for a third day of deliberations.

#90116u0426 04/26/1990 ~United Press International

SANTA MONICA, Calif. (APRIL 26) UPI - Elizabeth Taylor was in danger of dying of viral pneumonia last weekend and she is ''not out of the woods yet,'' but her doctors said her condition has improved.

''Her life was in jeopardy over the weekend, and for the time being, at least, I believe that has passed,'' pulmonary specialist Dr. Bernard Weintraub told a reporters Wednesday. ''She's seriously ill and she's still in the intensive care unit. She's not out of the woods yet, but she is improving.''

Taylor, 58, was taken off a ventilator Wednesday shortly before an update on her condition was provided by Weintraub and other doctors at St. John's Hospital and Health Center, where the actress has been hospitalized since April 16.

''She was smiling for the first time in a few days,'' infectious disease specialist Dr. Patricia Murray said. ''She told us she would come out and wave at you, but she wasn't in her balcony attire. That should give you some idea of her state of mind.''

Taylor is still receiving oxygen, but the ventilator tube that had been inserted in her throat was withdrawn, Weintraub said. She is also taking

antibiotics, but less than patients with similar cases of pneumonia usually do, Weintraub said.

The doctor said he did not know when Taylor, who nearly died of pnuemonia 30 years ago, would be moved out of the hospital's intensive care unit or when she would be sent home.

A biopsy performed Sunday revealed she is suffering from viral pneumonia, but the doctors said they do not know the exact type of virus that is causing it.

''In this type of pneumonia, it's very difficult to isolate a virus,'' said Murray.

Murray said she may learn more about Taylor's condition in a few days from a culture taken during the biopsy, but it is also possible that the exact cause of the pneumonia will never be known.

Doctors also said they found no link between Taylor's illness and large amounts of prescription drugs she had taken in the past.

''There is no evidence that any of her previous medication, whatever it was, has had any effect on her present illness,'' Murray said.

The Academy Award-winning actress's four children - Maria Burton-Carson, Liza Todd-Tivey and Christopher and Michael Wilding - have been with her through the week, and several friends visited her Wednesday.

Taylor was moved to the ICU Friday, three days after being transferred to St. John's from another hospital where she had checked in April 9 with what was described as a sinus condition and fever.

At the time she was transferred, Taylor issued a statement denying rumors that she was suffering from AIDS. The doctors said again Wednesday that she does not have AIDS.

''She did have an AIDS test, and it was negative,'' Murray said.

Taylor has been active in AIDS public education efforts and has raised millions of dollars for AIDS research.

The actress, who has admitted a long dependence on such drugs as Demerol and Valium, as well as alcohol, has experienced other serious health problems. She has suffered from back problems that began when she fell off a horse during filming of the 1945 film ''National Velvet,'' and nearly died of pneumonia while filming in London in the early 1960s.

She admitted herself into a drug rehabilitation program at the Betty Ford

Center near Palm Springs in 1983 and again in late 1988.

The District Attorney's Office recently said it would not file criminal charges against three doctors who treated Taylor several years ago, despite finding evidence that they had prescribed near-fatal doses of painkillers to the actress.

The findings were turned over to the State Medical Board for possible action against the physicians.

The violet-eyed actress, married seven times - twice to the late actor Richard Burton - won best actress Oscars for her performances in ''Butterfield 8'' and ''Who's Afraid of Virginia Woolf?''

#90116u0465 04/26/1990 ~United Press International

(APRIL 26) UPI - Bill Buckner circled the bases in Boston's Fenway Park in an all-out sprint. It looked more like the Marathon.

Buckner accounted for the Red Sox' only run Wednesday night in Boston's 3-1 loss to the California Angels when he hit an inside-the-park home run.

That's right. An inside-the-park home run.

With two outs in the fourth inning, Buckner lined a 1-1 pitch down the right-field line. California right fielder Claudell Washington raced for the ball and reached it as he crashed into the 3-foot-high right-field wall. Washington somersaulted into the front row of seats and the ball fell back into fair territory.

''I hit my head on a chair or somebody's leg. I was dazed and saw stars for a minute,'' Washington said. ''Some guy offered me a hot dog, but I didnt take it. It didn't have any mustard on it.''

While Washington remained in the stands pondering a snack, Buckner was chewing up the basepaths to record his first home run in Fenway Park since Sept. 7, 1986.

''Twenty-one years and 10,000 at bats later, that's the first one,'' Buckner said. ''I looked at the third base coach and kept going. I run until they tell me to stop.''

Washington left the game in the fifth inning with a minor contusion in his left knee.

The Red Sox collected 13 hits off Angel pitching but stranded 14 base runners.

''Wasted opportunities. That's it. Frustrating isn't it?'' lamented Red Sox Manager Joe Morgan. ''We didn't hit for beans when we needed to.''

Jack Howell had a hand in every Angels run, driving in one and scoring twice as California won for only the second time in their last seven games.

Kirk McCaskill, 2-0, allowed nine hits and walked two in his five innings, but only gave up one run before Mike Witt came on and pitched into the eighth. Mark Eichhorn got the last four outs, three on strikeouts, for his fourth save.

McCaskill, who threw 84 pitches in five innings, has a 1.06 ERA despite giving up 16 hits and walking 12 in 17 innings.

''Basically, I was just lucky. It wasn't really my pitching that got me out of it. It was their misfortune. I think I was extremely lucky,'' McCaskill said.

Elsewhere in the American League: Toronto dumped Cleveland 5-3, Milwaukee edged Kansas City 1-0, Detroit topped Minnesota 6-4, Seattle downed New York 5-2, Oakland nipped Baltimore 4-3 in 12 innings and the Chicago White Sox got by Cleveland 5-3.

In the National League it was: New York 8, Atlanta 5; Cincinnati 12, Philadelphia 7; Montreal 1, Houston 0; San Diego 3, Chicago 0; Pittsburgh 7, San Francisco 4, 12 innings and St. Louis 5, Los Angeles 1.

-- AROUND THE AL --

Blue Jays 5, Royals 3

At Toronto, Kelly Gruber continued his torrid hitting, going 4-for-5 and belting his major league-leading seventh homer for the Blue Jays. Gruber's homer was his fourth in three nights. He leads the AL in RBI, total bases and hits. Todd Stottlemyre, 2-2, earned the victory. Rod Nichols, 0-1, was the loser.

Brewers 1, Royals 0

At Milwaukee, Tom Filer, Chuck Crim and Dan Plesac combined on a five-hitter and Greg Brock drove in the game's only run with a sacrifice fly. Milwaukee, which had eight shutouts all last year, recorded their fifth this season. Filer, 2-1, allowed three hits over six innings. Plesac got out of a bases-loaded jam in the eighth for his first save. Bret Saberhagen, 1-2, was the loser.

Tigers 6, Twins 4

At Minneapolis, Lloyd Moseby paced a 12-hit attack with a triple and double and Dan Petry and Mike Henneman held off a late Minnesota rally to lift the Tigers. Cecil Fielder had three RBI and Larry Sheets two for Detroit. Jeff Robinson, 1-1, got the win, Petry relieved to get the final out of the seventh and Henneman handcuffed the Twins the rest of the way to pick up his fifth save. Kevin Tapani, 2-2, took the loss.

Mariners 5, Yankees 2

Edgar Martinez had four hits, including a two-run homer for Seattle. Martinez singled and scored in the third inning, singled in the fifth, homered in the seventh and singled in the ninth. Holman, near-perfect in his previous start, walked the first batter he faced but went six innings to raise his record to 3-1. Mike Schooler earned his third save. Pascual Perez, who left the game in the fourth with muscle spasms, fell to 1-2.

Athletics 4, Orioles 3, 12 innings

At Baltimore, Jose Canseco singled home Carney Lansford from second base with two outs in the 12th inning and four Oakland pitchers combined on a three-hitter to raise the A's road record to 7-0. Lansford scored when Canseco delivered his fourth hit of the game against Kevin Hickey, 0-1. Gene Nelson, 1-0, earned the victory in relief, combining with Bob Welch, Rick Honeycutt, and Dennis Eckersley to stifle the Orioles.

White Sox 5, Rangers 4

At Arlington, Tex., Reliever Bobby Thigpen retired Pete Icaviglia on a critical double play in the eighth inning to preserve the White Sox win. Thigpen pitched two innings and struck out the side in the ninth to earn his fourth save and help the White Sox break a four-game losing skid. Jack McDowell, 1-1 got the win. Bobby Witt lost his third game in as many starts.

#90116u0579 04/26/1990 ~United Press International

WASHINGTON (APRIL 26) UPI - Rep. Newt Gingrich, R-Ga., and several groups announced Thursday they would host a national teleconference next month designed to encourage what they called ''common sense'' solutions to troublesome issues.

Funded by GOPAC - a national Republican-oriented political organization - the May 19 teleconference is to originate in Atlanta and allow participants in four other cities to talk with each other about solving problems Gingrich has argued are caused by ''the bureaucratic welfare state.''

In addition, people at another 500 workshop sites will be able to view the 60-minute conference either through direct satellite feeds or on cable or other television stations, a Gingrich aide said.

President Bush, Vice President Dan Quayle and Housing and Urban Development Secretary Jack Kemp are to deliver taped messages to the conference, while Gingrich, Rep. Fred Grandy, R-Iowa, and others are scheduled to participate live.

''We will be sharing ... successful local solutions to some of the problems our nation is facing,'' Gingrich said in a letter announcing the conference. ''I believe there is a wealth of common sense ideas and success stories in America's heartland.''

A description of the conference cited as examples of problems a ''public housing bureaucracy that prosecutes a tenant for defacing property when the tenant paints over Nazi graffiti in the elevator'' and ''bureaucrats who sue a welfare recipient who saves $3,000 ... because welfare recipients aren't allowed to save.''

As ''common sense'' solutions, it cited a ''mayor who pulls his city out of bankruptcy by privatizing everything but the police force'' and ''the local sheriff who builds twice as many prison beds at half the cost estimated by the bureaucrats.''

The Gingrich aide said the conference was expected to cost about $250,000.

Participants will be able to ask questions from sites in San Diego, Detroit, Portland, Maine, and Orange City, Iowa.

The groups involved in the conference include the U.S. Chamber of Commerce the National Vietnam Veterans Coalition and Citizens against Government Waste.

BEIJING (APRIL 26) UPI - The chairman of Mongolia's Parliament will make an official visit to China starting next week, the first high-level visit to Beijing since a wave of democratic reforms in the neighboring country, the Chinese Foreign Ministry announced Thursday.

Foreign Ministry spokeswoman Li Jinhua said Punsalmaagiin Ochirbat, chairman of the presidium of the Great People's Hural, the Mongolian Parliament, will make a six-day trip to China, from May 4-9, for an ''official goodwill visit.''

It will be the first high-level Mongolian visit to China since the leadership of the ruling Mongolian People's Revolutionary Party, the communists, reformed in a series of moves this year.

Ochirbat last week met in Ulan Bator, the Mongolian capital, with Chinese Ambassador to Mongolia Zhang Delin to discuss the reforms in the country. He also assured Zhang the Ulan Bator government planned continued friendly relations with Beijing.

The reforms were prompted by several months of pro-democracy protests that are believed to have concerned leaders in China, after their crackdown last June on the Chinese democracy movement.

There are more than twice as many ethnic Mongolians in China, about 5 million, as in Mongolia itself, a nation of about 2 million. Most of the Chinese Mongolians are in the Inner Mongolia region, which borders Mongolia to the north.

The Mongolian Communist Party has given up its seven-decade-long constitutional monopoly on power and promised Mongolia's first multi-party elections for July.

(APRIL 26) UPI - A threat of fresh tornadoes hung over the southern Plains states early Thursday as severe thunderstorms battered the region, while gentler rains fell over the mid-Atlantic region and high winds tapered off in the Northwest.

Parts of north Texas, blasted by at least seven tornadoes Wednesday, were flooding Thursday after getting 6 to 10 inches of rain, the National Weather Service reported.

Twenty residents of DeLeon, Texas, 70 miles southwest of Fort Worth, were evacuated from low-lying areas of the town inundated by more than 8 inches of rain, said Comanche County Emergency coordinator Clyde Brinson.

The DeLeon hospital emergency room was flooded, but workers were busy set up another as volunteers sandbagged the perimeter of the institution and removed water from some parts of the 40-bed facility.

Evacuations were reported in other areas of north Texas as well.

Monte Nivens of the fire department in Alvord, Tex., north of Forth Worth, said three or four tornadoes blew through the town, knocking over trees, overturning storage sheds and damaging rooftops.

Two funnel clouds that hit Parker County west of Fort Worth uprooted trees downed power lines, destroyed a few homes and damaged many more, but apparently none of the Texas twisters injured humans.

Heavy storms also battered parts of Oklahoma and Arkansas early Thursday, authorities said.

Water up to 6 feet deep flowed over highways in Springer and Ardmore, Okla., where several bridges had washed out, and Cottonwood Creek had risen to 3 feet above a highway bridge in Lone Grove.

Aa tornado skipped across five central Kansas counties, damaging an irrigation system and several buildings. No injuries were reported, authorities said. The twister struck first in Gray County, then churned its way through Hodgeman, Ness, Trego and Ellis counties.

Another tornado damaged at least two homes in Rooks County, the county sheriff's office reported.

A few farms were hit in Ellis County, Kan., and power lines were down, forcing a brief closing of U.S. 40, according to a spokesman at the Law Enforcement Center in Hays.

In the West, high winds were dying down in eastern Washington after racing at 58 mph. Snow fell in the Cascades, and rain dampened much of Washington state and Oregon's West Coast during the night. California skies were clear.

Much of the Midwest started Thursday in the upper 60s, following the hottest day of the year so far. Chicago reached a record-high 87 degrees Wednesday and pushed water consumption one-third higher than normal.

Between 1 p.m. and 2 p.m. Wednesday, the Chicago Water Department reported pumping out more than 1.2 billion gallons of water. The rate is usually around 800 milion gallons on a warm summer day.

The air might have been warm but the water in Lake Michigan was icy cold. The Chicago Park District issued a warning that swimming in the lake was dangerous with water temperatures at 41 degrees.

''Someone can have a mild heart attack swimming,'' said department spokesman Joseph Tacoraro. ''Parents whose kids are on vacation should tell them the water is too cold and they should not swim in it.''

Rain and fog covered much of New England, where a string of three near-perfect days came to an end. Clouds and a few sprinkles stretched from Connecticut to Maine. Humidity was increasing and temperatures remained warm, with early morning readings of 47 in Boston and 41 in

Bangor, Maine.

Western Pennsylania skies cleared after midnight following hours of thunderstorms and gusty winds. It was mostly clear in eastern Pennsylvania southern New Jersey and Delaware.

West Virginia and Maryland saw mostly clear skies with the lows in the 50s except in northern regions, where it was in the 40s.

The South was largely clear and warm. But parts of Mississippi and Alabama were rainy and foggy.

BANGKOK, THAILAND (APRIL 26) UPI - Troops in Laos killed 35 pro-democracy demonstrators in four Laotian provinces last month, a Thai military spokesman said Thursday.

Laotian government troops crushed the pro-democracy demonstators in the provinces of Xieng Khong, Sayboury, Champasak and Borikhan from March 11 to March 13, said Lt. Gen. Naruedon Dejpradiyuth, spokesman for Thailand's Supreme Command.

Naruedon said 35 people were reported dead in the crackdown in Xieng Khong.

He said a visitor who came back from Laos told him that the demonstrators were demanding democracy and urging the government to improve its economic recession.

The spokesman denied Laos's allegation that Thailand was behind in the incident, saying, ''We have no policy to intervene in internal affairs in neighboring countries.''

(APRIL 26) UPI - Around the world... around the clock... the latest news from U-P-I.

Astronauts aboard the Discovery are standing by today in case they need to do anything else to help ground control activate the Hubble Space Telescope. Discovery is following the Hubble just in case the crew's help is needed. The telescope was launched yesterday, one orbit late because of problems with a solar panel.

The State Department says ex-hostage Robert Polhill will return to the United States today. Polhill will go to the Walter Reed Hospital near

Washington for further medical tests. The professor looked thin and tired yesterday when he appeared on the balcony of a U-S military hospital in West Germany.
